DATA I/O ANNOUNCES THIRD QUARTER 2004 FINANCIAL RESULTS

Redmond, WA. (Oct. 22, 2004) - Data I/O Corporation (NASDAQ: DAIO), the leading provider of manual and automated device programming systems, today announced financial results for the third quarter ended Sept. 30, 2004.

Revenues were \$7.8 million, up 12.6 percent from the \$6.9 million reported in the second quarter of 2004. Third quarter gross margins increased to 54.5 percent, up from the 50.9 percent reported in the prior quarter. The higher gross margins were primarily a result of increased direct sales in Europe and Asia, a more favorable product mix and material cost savings.

In accordance with U.S. generally accepted accounting principles (GAAP), net income for the third quarter of 2004 was \$93,000 or \$0.01 per share, compared with net income of \$104,000 or \$0.01 per share in the second quarter of 2004. The company took a restructuring charge of \$432,000 or \$0.05 per share during the third quarter, related to a reduction in the work force announced Aug. 2, 2004. Excluding the restructuring charge, the company's operating income was 7.3% of sales, in line with the company's expectations.

Total cash and short-term investments were \$6.2 million at Sept. 30, 2004. The company remains debt-free.

"We are pleased with our continued growth and the fact that we achieved our highest quarterly revenues since the fourth quarter of 2000 while recording our eighth consecutive quarter of profitability," said Fred Hume, president and CEO. "We saw stronger customer activity from Asia, which remained our largest overall revenue contributor. We believe this growth continues to validate our investment in that region, which is the fastest growing manufacturing center in the world.

"We began revenue shipments of our new in-systems programming (ISP) product solution to a major industrial controls manufacturer in the U.S. Initially, our ISP solution will focus on applications and devices that use access methods to the devices that are not currently supported by JTAG tools vendors. The new product satisfies an unmet need for an ISP solution that can be easily integrated with other test products in a manufacturing environment," Hume said.

Guidance for the Fourth Quarter

Data I/O currently expects that financial results for the fourth quarter will generally be in line with operating results for the third quarter.

Conference Call Information

A conference call discussing the third quarter of 2004 financial results will follow this release today at 8:00 a.m. Pacific time/11:00 a.m. Eastern time.
