

ARCHER DANIELS MIDLAND CO
Form 10-K
August 27, 2007

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D. C. 20549
FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended June 30, 2007
OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-44
ARCHER-DANIELS-MIDLAND COMPANY
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

41-0129150
(I. R. S. Employer
Identification No.)

**4666 Faries Parkway Box 1470 Decatur,
Illinois**
(Address of principal executive offices)

62525
(Zip Code)

217-424-5200
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock, no par value	New York Stock Exchange Chicago Stock Exchange Swiss Stock Exchange Frankfurt Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act.
Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer" and "large accelerated filer" in Rule 12B-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer Non-accelerated Filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

State the aggregate market value of the voting stock held by non-affiliates of the registrant.

Common Stock, no par value--\$20.3 billion
(Based on the closing sale price of Common Stock as reported on the New York Stock Exchange
as of December 31, 2006)

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

Common Stock, no par value—643,585,128 shares
(July 31, 2007)

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the proxy statement for the annual meeting of stockholders to be held November 8, 2007, are incorporated by reference into Part III.

SAFE HARBOR STATEMENT

This Form 10-K contains forward-looking information that is subject to certain risks and uncertainties that could cause actual results to differ materially from those projected, expressed, or implied by such forward-looking information. In some cases, you can identify forward-looking statements by our use of words such as "may, will, should, anticipates, believes, expects, plans, future, intends, could, estimate, predict, potential or contingent," the negative of these terms or other similar expressions. The Company's actual results could differ materially from those discussed or implied herein. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in this Form 10-K for the fiscal year ended June 30, 2007. Among these risks are legislative acts; changes in the prices of food, feed, and other commodities, including gasoline; and macroeconomic conditions in various parts of the world. To the extent permitted under applicable law, the Company assumes no obligation to update any forward-looking statements as a result of new information or future events.

PART I

Item 1. BUSINESS

Company Overview

Archer Daniels Midland Company (the Company) was incorporated in Delaware in 1923, successor to the Daniels Linseed Co. founded in 1902. The Company is a world leader in BioEnergy and has a premier position in the agricultural processing value chain. The Company is one of the world's largest processors of oilseeds, corn, wheat, and cocoa and is a leading manufacturer of biodiesel, ethanol, soybean oil and meal, corn sweeteners, flour, and other value-added food and feed ingredients. The Company also has an extensive grain elevator and transportation network to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, and barley.

During the last five years, the Company has experienced significant growth, spending approximately \$4.8 billion for construction of new plants, expansions of existing plants, and the acquisitions of plants and transportation equipment. The Company is constructing two dry corn milling plants which will increase the Company's annual ethanol production capacity by 550 million gallons to 1.7 billion gallons. In addition, the Company has recently completed construction of, or is currently constructing, a polyhydroxy alkanoate (PHA) natural plastics production facility, a propylene/ethylene glycol production facility, United States and foreign cocoa processing facilities, and United States and foreign biodiesel production facilities. Construction of these plants is expected to be completed during the next two fiscal years. The Company expects to spend approximately \$3.0 billion to construct these facilities and other approved capital projects over the next four years. There have been no significant dispositions during the last five years.

Segment Descriptions

The Company's operations are classified into three reportable business segments: Oilseeds Processing, Corn Processing, and Agricultural Services. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are aggregated and classified as Other. Financial information with respect to the Company's reportable business segments is set forth in "Note 14 of Notes to Consolidated Financial Statements" included in Item 8 herein, "Financial Statements and Supplementary Data."

Oilseeds Processing

The Company is engaged in processing oilseeds such as soybeans, cottonseed, sunflower seeds, canola, peanuts, and flaxseed into vegetable oils and meals principally for the food and feed industries. Crude vegetable oil is sold "as is" or is further processed by refining, bleaching, and deodorizing into salad oils. Salad oils can be further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oil is sold for use in chemicals, paints and other industrial products. Refined oil can be further processed for use in the production of biodiesel. Oilseed meals are primary ingredients used in the manufacture of commercial livestock and poultry feeds. Cottonseed flour is produced and sold primarily to the pharmaceutical industry. Cotton cellulose pulp is manufactured and sold to the chemical, paper, and filter markets.

Golden Peanut Company LLC, a joint venture between the Company and Alimenta (U.S.A.), Inc., is a major supplier of peanuts to both the domestic and export markets. The Company has a 50% ownership interest in this joint venture.

The Company has an ownership interest in Wilmar International Limited, a Singapore publicly listed company. Wilmar International Limited is the largest agricultural processing business in Asia and operates palm plantations; soybean, rapeseed, cottonseed, sunflower seed, peanut, palm kernel, and sesame seed crushing facilities and related vegetable oil refineries and packaging facilities; an oleochemical plant that produces fatty acids, glycerin, and soap noodles; a soy protein plant; wheat flour mills; rice mills; feed mills; fertilizer operations; and related silos

and storage facilities.

Item 1. BUSINESS (Continued)

Corn Processing

The Company is engaged in wet milling and dry milling corn operations. Products produced for use in the food and beverage industry include syrup, starch, glucose, dextrose, and sweeteners. Dextrose is also produced for use by the Company as a feedstock for its bioproducts operations. Corn gluten feed and meal as well as distillers grains are produced for use as feed ingredients. Corn germ, a by-product of the wet milling process, is further processed as an oilseed into vegetable oil and meal.

By fermentation of dextrose, the Company produces alcohol, amino acids, and other specialty food and feed ingredients. Ethyl alcohol is produced to beverage grade or for industrial use as ethanol. In gasoline, ethanol increases octane and is used as an extender and oxygenate. Amino acids, such as lysine and threonine, are vital compounds used in swine feeds to produce leaner animals and in poultry feeds to enhance the speed and efficiency of poultry production. The Company also produces, by fermentation, astaxanthin, a product used in aquaculture to enhance flesh coloration. The Company produces citric and lactic acids, lactates, sorbitol and xanthan gum which are used in various food and industrial products.

Almidones Mexicanos S.A., of which the Company has a 50% interest, operates a wet corn milling plant in Mexico.

Eaststarch C.V. (Netherlands), of which the Company has a 50% interest, owns interests in companies that operate wet corn milling plants in Bulgaria, Hungary, Romania, Slovakia, and Turkey.

Agricultural Services

The Agricultural Services segment utilizes the Company's extensive grain elevator and transportation network to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, and barley, and resells these commodities primarily as feed ingredients and as raw materials for the agricultural processing industry. Agricultural Services' grain sourcing and transportation network provides reliable and efficient services to the Company's agricultural processing operations.

A.C. Toepfer International (Toepfer), in which the Company has an 80% interest, is a global merchandiser of agricultural commodities and processed products. Toepfer has 38 sales offices worldwide and operates export, river, and country elevators in Argentina, Romania, and the Ukraine.

The Company has a 45% interest in Kalama Export Company, a grain export elevator in Washington.

Other

The Company is engaged in milling wheat, corn, and milo into flour. Wheat flour is sold primarily to commercial bakeries, food companies, food service companies, and retailers. Bulgur, a gelatinized wheat food, is sold to both the export and the domestic food markets. Corn meal and flour is sold primarily to the cereal, snack, and bakery mix markets. The Company produces bakery products and mixes which are sold to the baking industry. The Company also mills milo to produce industrial flour used in the manufacturing of wallboard for the building industry.

The Company processes cocoa beans and produces cocoa liquor, cocoa butter, cocoa powder, chocolate, and various compounds for the food processing industry.

The Company produces wheat starch and gluten for the baking industry. Lecithin, an emulsifier produced in the vegetable oil refining process, is marketed as a food and feed ingredient.

Item 1. BUSINESS (Continued)

The Company produces a wide range of edible soy protein products including soy flour, soy grits, soy protein concentrates and soy isolates that are used in processed meats, baked foods, nutritional products, snacks, and dairy and meat analogs. The Company further processes these ingredients into dry and frozen meat analogs that it markets to foodservice operators, retail and private label brand marketers, and direct-to-retail stores.

The Company produces natural source vitamin E, tocopherol antioxidants and phytosterols from co-products of oilseeds which are marketed to the dietary supplement and food industry. The Company produces soy isoflavones, a dietary supplement, from a co-product of edible soy processing. The Company processes and distributes edible beans for use as a food ingredient. The Company produces and distributes formula feeds and animal health and nutrition products to the livestock, dairy, poultry, and pet food industries.

Gruma S.A. de C.V. and affiliates (Gruma), of which the Company has a 27% interest, is the world's largest producer and marketer of corn flour and tortillas with operations in the United States, Mexico, Central America, South America, and Europe. Additionally, the Company has a 20% interest in a joint venture which consists of the combined United States corn flour operations of the Company and Gruma. The Company also has a 40% share, through a joint venture with Gruma, in nine Mexican-based wheat flour mills.

International Malting Company, a wholly owned subsidiary of the Company, operates malting barley plants in the United States, Australia, New Zealand, and Canada.

Hickory Point Bank and Trust Company, fsb, a wholly owned subsidiary of the Company, furnishes public banking and trust services, as well as cash management, transfer agency, and securities safekeeping services, for the Company.

ADM Investor Services, Inc., a wholly owned subsidiary of the Company, is a registered futures commission merchant and a clearing member of all principal commodities exchanges. ADM Investor Services International, Ltd. specializes in futures, options and foreign exchange in the European marketplace. ADM Derivatives, Inc. offers foreign exchange services to institutional and retail clients.

Agrinational Insurance Company, a wholly owned subsidiary of the Company, provides insurance coverage for certain property, casualty, marine, and other miscellaneous risks of the Company and participates in certain third-party reinsurance arrangements.

The Company has a 50% interest in Telles, LLC (Telles), a joint venture formed between the Company and Metabolix to market and sell PHA produced in a facility being constructed by the Company which is expected to be completed during fiscal 2009. This facility will produce PHA to be sold to Telles for marketing, sale, and distribution to the end consumer.

The Company is a limited partner in various private equity funds which invest primarily in emerging markets.

Methods of Distribution

Since the Company's customers are principally other manufacturers and processors, the Company's products are distributed mainly in bulk from processing plants or storage facilities directly to the customers' facilities. The Company has developed a comprehensive transportation system utilizing trucks, railcars, river barges, and ocean-going vessels to efficiently move both commodities and processed products virtually anywhere in the world. The Company owns or leases large numbers of the trucks, trailers, railroad tank and hopper cars, river barges, and towboats used in this transportation system.

Item 1. BUSINESS (Continued)

Status of New Products

The Company continues to expand its business in line with the Company's strategy to be a world leader in BioEnergy whilst maintaining its premier position in the agricultural processing value chain through the development of new products.

The Company's researchers have developed a number of custom low trans fats and oils for bakery and quick-service restaurants that utilize the Company's Novalipid portfolio of low trans fats and oils. These products meet the growing needs of food service customers driven by legislated municipal bans on the use of fats and oils that contain trans fats.

Our Aspire business model continues to be developed to leverage the Company's finished food product development capabilities. Under this program, ADM works with customers to supply finished food products such as nutrition bars, beverages and other items in a final packaged form ready for retail distribution. The development of the prototypes is done by research and development staff and the manufacturing is accomplished through a network of co-manufacturers. This program helps customers introduce more new trait-enhanced products more quickly than they would otherwise be able to accomplish.

The Company's cooked, dried edible bean products are finding a number of new applications due to the increased interest among our customers in improving nutrition, especially in the area of foods targeted for children. These edible bean powders are being used in a wide range of convenient foods.

The Company's alliance with Metabolix is proceeding on schedule. Semi-works production of PHA, a biodegradable plastic, is underway for market development, and construction of the Company's 50,000 ton per year commercial manufacturing facility is on schedule for startup in December 2008.

The Company is proceeding with construction of a commercial propylene glycol (PG) facility in Decatur, Illinois. Value-added derivatives of PG are being pursued by research and development staff.

Source and Availability of Raw Materials

Substantially all of the Company's raw materials are agricultural commodities. In any single year, the availability and price of these commodities are subject to unpredictable factors such as weather, plantings, government (domestic and foreign) farm programs and policies, changes in global demand created by population growth and changes in standards of living, and global production of similar and competitive crops. The substantial majority of the Company's raw materials are procured from thousands of grain elevators and wholesale merchants, principally in North America, South America, and Europe, pursuant to short-term agreements (less than one year) or on a spot basis. The Company does not grow crops and a relatively small proportion of the Company's raw materials are purchased directly from growers. The Company is not dependent upon any particular grower, elevator, or merchant or group of growers, elevators, or merchants as a source for its raw materials.

Patents, Trademarks, and Licenses

The Company owns several valuable patents, trademarks, and licenses but does not consider any segment of its business dependent upon any single or group of patents, trademarks or licenses.

Item 1. BUSINESS (Continued)

Seasonality, Working Capital Needs, and Significant Customers

Since the Company is so widely diversified in global agribusiness markets, there are no material seasonal fluctuations in the manufacture, sale, and distribution of its products and services. There is a degree of seasonality in the growing season and procurement of the Company's principal raw materials: oilseeds, corn, wheat, cocoa beans, and other grains. However, the actual physical movement of the millions of bushels of these crops through the Company's storage and processing facilities is reasonably constant throughout the year.

Price variations and availability of raw agricultural commodities may cause fluctuations in the Company's receivables, inventories, and short-term borrowings. No material part of the Company's business in any segment is dependent upon a single customer or very few customers.

Competition

The Company has significant competition in the markets in which it operates based principally on price, quality, products and alternative products, some of which are made from different raw materials than those utilized by the Company. Given the commodity-based nature of many of its businesses, the Company, on an ongoing basis, focuses on managing unit costs and improving efficiency through technology improvements, productivity enhancements, and regular evaluation of the Company's asset portfolio.

Research and Development Expenditures

The Company's research and development expenditures are focused on developing BioEnergy, food, feed, and industrial products from renewable, agricultural crops. The Company uses technical services representatives to interact with customers to understand the customers' product needs. These technical service representatives then interact with researchers who are familiar with the Company's wide range of food, feed, fuel, and industrial products as well as applications technology. These individuals form quick-acting teams to develop solutions to customer needs.

The Company is completing the two projects currently funded by the United States Department of Energy. The projects studied ways of converting corn fiber into either biofuels or animal feed. The results are being used to evaluate the commercial feasibility.

The Company was recently awarded additional funding from the Department of Energy to develop yeasts capable of fermenting 5-carbon sugars, which is a key technology for producing ethanol from lignocellulosic biomass. The Company is partnered with Purdue University on this project.

The Company's biodiesel research is focused on cost, product quality, and alternate feed stocks. Several new technologies have been developed to minimize the chemical input costs for biodiesel production while simultaneously reducing waste streams and improving yield.

A joint research project with Argonne National Laboratory is focused on the development of a separative bioreactor which utilizes the principles of electrodeionization. The new approach allows the production of chemicals from biomass feedstocks without the usual production of salt byproducts. This technology is being tested at pilot scale to quantify cost and performance.

The Company has also acquired a semi-works/toll-processing facility in Decatur, Illinois to be able to produce small scale commercial quantities of new bio-based industrial chemicals.

Item 1. BUSINESS (Continued)

The Company maintains a research laboratory in Decatur, Illinois, where product and process development activities are conducted. To develop new bioproducts and to improve existing bioproducts, new cultures are developed using classical mutation and genetic engineering. Protein and vegetable oil research is conducted at facilities in Decatur where bakery, meat and dairy pilot plants support application research. Vegetable oil research is also conducted in Hamburg, Germany; Erith, UK; and Arras, France. Research to support sales and development for bakery products is done at a laboratory in Olathe, Kansas. Research to support sales and development for cocoa and chocolate products is done in Milwaukee, Wisconsin, and the Netherlands. Research and technical support for industrial and food wheat starch applications is conducted in a Montreal, Canada research center. The Company conducts research for corn starches in paper and textile industries as well as fuel ethanol research in Clinton, Iowa. The Company maintains research centers in Quincy, Illinois, and Decatur, Indiana, that conduct swine and cattle feeding trials to test new formula feed products and to develop improved feeding efficiencies.

The amounts spent during the three years ended June 30, 2007, 2006 and 2005 for such technical efforts were approximately \$45 million, \$45 million, and \$40 million, respectively.

Environmental Compliance

During the year ended June 30, 2007, \$106 million was spent for equipment, facilities, and programs for pollution control and compliance with the requirements of various environmental agencies.

There have been no material effects upon the earnings and competitive position of the Company resulting from compliance with federal, state, and local laws or regulations enacted or adopted relating to the protection of the environment.

Number of Employees

The number of persons employed by the Company was approximately 27,300 at June 30, 2007.

Financial Information About Foreign and Domestic Operations

Item 1A, "Risk Factors," and Item 2, "Properties," includes information relating to the Company's foreign operations. Geographic financial information is set forth in "Note 14 of Notes to Consolidated Financial Statements" included in Item 8 herein, "Financial Statements and Supplementary Data".

Available Information

The Company's Internet address is <http://www.admworld.com>. The Company makes available, free of charge, through its Internet site, the Company's annual reports on Form 10-K; quarterly reports on Form 10-Q; current reports on Form 8-K; Directors and Officers Forms 3, 4, and 5; and amendments to those reports, as soon as reasonably practicable after electronically filing such materials with, or furnishing them to, the Securities and Exchange Commission (SEC).

In addition, the Company makes available, through its Internet site, the Company's Business Code of Conduct and Ethics, Corporate Governance Guidelines, and the written charters of the Audit, Compensation/Succession, Nominating/Corporate Governance, and Executive Committees.

Item 1. BUSINESS (Continued)

The public may read and copy any materials filed by the Company with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site which contains reports, proxy and information statements, and other information regarding issuers that file information electronically with the SEC. The SEC's Internet address is <http://www.sec.gov>.

Item 1A. RISK FACTORS

The availability and price of the agricultural commodities and agricultural commodity products the Company produces and merchandises can be affected by weather, disease, government programs, and various other factors beyond the Company's control and could adversely affect the Company's operating results.

The availability and price of agricultural commodities are subject to wide fluctuations due to unpredictable factors such as weather, plantings, government (domestic and foreign) farm programs and policies, changes in global demand resulting from population growth and changes in standards of living, and global production of similar and competitive crops. These factors have historically caused volatility in the agricultural commodities industry and, consequently, in the Company's operating results. Reduced supply of agricultural commodities due to weather-related factors or other reasons could adversely affect the Company's profitability by increasing the cost of raw materials used in the Company's agricultural processing operations. Reduced supplies of agricultural commodities could also limit the Company's ability to procure, transport, store, process, and merchandise agricultural commodities in an efficient manner which could adversely affect the Company's profitability. In addition, the availability and price of agricultural commodities can be affected by other factors, such as plant disease, which can result in crop failures and reduced harvests.

Also, with respect to prices, to the extent production capacity is added within the agricultural processing industry, the disruption to the balance of supply and demand may result in downward pressure on the relevant product prices, thereby adversely affecting revenues and operating results.

Fluctuations in energy prices could adversely affect the Company's operating results.

The Company's operating costs and selling prices of certain finished products are sensitive to changes in energy prices. The Company's processing plants are powered principally by electricity, natural gas, and coal. The Company's transportation operations are dependent upon diesel fuel and other petroleum products. Significant increases in the cost of these items could adversely affect the Company's production costs and operating results.

The Company has certain finished products, such as ethanol and biodiesel, which are closely related to, or may be substituted for, petroleum products. Therefore, the selling prices of ethanol and biodiesel relate to the selling prices of unleaded gasoline and diesel fuel. A significant decrease in the price of unleaded gasoline or diesel fuel could result in a significant decrease in the selling price of the Company's ethanol and biodiesel and could adversely affect the Company's revenues and operating results.

The Company is subject to economic downturns, political instability and other risks of doing business globally which could adversely affect the Company's operating results.

The Company conducts its business and has substantial assets located in many countries and geographic areas. The Company's operations are principally in developed countries in the United States, Europe, and South America but the

Company also operates in, or plans to expand or develop its business in, emerging market areas such as Asia. Both developed and emerging market areas are subject to economic downturns and emerging market areas could be subject to more volatile economic, political and market conditions. Such economic downturns and volatile conditions may have a negative impact on the Company's ability to execute its business strategies and on its operating results.

Item 1A. RISK FACTORS (Continued)

The Company's operating results could be affected by changes in trade, monetary and fiscal policies, laws and regulations, and other activities of United States and foreign, agencies, and similar organizations. These conditions include but are not limited to changes in a country's or region's economic or political conditions, trade regulations affecting production, pricing and marketing of products, local labor conditions and regulations, reduced protection of intellectual property rights, changes in the regulatory or legal environment, restrictions on currency exchange activities, currency exchange fluctuations, burdensome taxes and tariffs, and other trade barriers. International risks and uncertainties, including changing social and economic conditions as well as terrorism, political hostilities, and war, could limit the Company's ability to transact business in these markets and could adversely affect the Company's revenues and operating results.

Government policies and regulations, in general, and specifically affecting the agricultural sector and related industries, could adversely affect the Company's operating results.

Agricultural production and trade flows are subject to government policies and regulations. Governmental policies affecting the agricultural industry, such as taxes, tariffs, duties, subsidies, and import and export restrictions on agricultural commodities and commodity products, can influence the planting of certain crops, the location and size of crop production, whether unprocessed or processed commodity products are traded, the volume and types of imports and exports, the availability and competitiveness of feedstocks as raw materials, and industry profitability. In addition, international trade disputes can adversely affect agricultural commodity trade flows by limiting or disrupting trade between countries or regions. Future government policies may adversely affect the supply of, demand for, and prices of the Company's products, restrict the Company's ability to do business in its existing and target markets, and could negatively impact revenues and operating results.

The Company is subject to food and feed industry risks which could adversely affect the Company's operating results.

The Company is subject to food industry risks which include, but are not limited to, food spoilage or food contamination, shifting consumer preferences, federal, state, and local food processing regulations, and customer product liability claims. The liability which could result from these risks may not always be covered or could exceed liability insurance related to product liability and food safety matters maintained by the Company. The occurrence of any of the matters described above could adversely affect the Company's revenues and operating results.

Certain of the Company's merchandised commodities and finished products are used as ingredients in livestock and poultry feed. The Company is subject to risks associated with the outbreak of disease in livestock and poultry, including, but not limited to, mad-cow disease and avian influenza. The outbreak of disease could adversely affect demand for the Company's products used as ingredients in livestock and poultry feed. A decrease in demand for these products could adversely affect the Company's revenues and operating results.

Item 1A. RISK FACTORS (Continued)

The Company is subject to numerous laws and regulations globally which could adversely affect the Company's operating results.

The Company is required to comply with the numerous and broad reaching laws and regulations administered by United States federal, state, local, and foreign governmental agencies relating to, but not limited to, the sourcing, transporting, storing, and processing of agricultural raw materials as well as the transporting, storing and distributing of related agricultural products including commercial activities conducted by Company employees and third parties globally. Any failure to comply with applicable laws and regulations could subject the Company to administrative penalties and injunctive relief, civil remedies, including fines, injunctions, and recalls of its products.

The production of the Company's products requires the use of materials which can create emissions of certain regulated substances. Although the Company has programs in place throughout the organization globally to guard against non-compliance, failure to comply with these regulations can have serious consequences, including civil and administrative penalties as well as a negative impact on the Company's reputation.

In addition, changes to regulations may require the Company to modify existing processing facilities and/or processes which could significantly increase operating costs and negatively impact operating results.

The Company is exposed to potential business disruption, including but not limited to transportation services, and other serious adverse impacts resulting from acts of terrorism or war, natural disasters and severe weather conditions, and accidents which could adversely affect the Company's operating results.

The assets and operations of the Company are subject to damage and disruption from various events which include, but are not limited to, acts of terrorism or war, natural disasters and severe weather conditions, accidents, explosions, and fires.

The potential effects of the conditions cited above include, but are not limited to, extensive property damage, extended business interruption, personal injuries, and damage to the environment. The Company's operations also rely on dependable and efficient transportation services. A disruption in transportation services could result in supply problems at the Company's processing plants and impair the Company's ability to deliver processed products to its customers in a timely manner.

Item 1B. UNRESOLVED STAFF COMMENTS

The Company has no unresolved staff comments.

Item 2. PROPERTIES

The Company owns or leases the following processing plants and procurement facilities:

	Processing Plants			Procurement Facilities		
	United States	Foreign	Total	United States	Foreign	Total
Owned	137	98	235	173	104	277
Leased	4	1	5	9	30	39
	141	99	240	182	134	316

The Company's operations are such that most products are efficiently processed near the source of raw materials. Consequently, the Company has many plants strategically located in grain producing areas. The annual volume of commodities processed will vary depending upon availability of raw materials and demand for finished products.

Oilseeds Processing

	Processing Plants			Procurement Facilities		
	United States	Foreign	Total	United States	Foreign	Total
Owned	44	48	92	15	79	94
Leased	—	—	—	—	20	20
	44	48	92	15	99	114

The Company operates twenty-one domestic and seventeen foreign oilseed crushing plants with a daily processing capacity of approximately 91,000 metric tons (3.3 million bushels). The domestic plants are located in Georgia, Illinois, Indiana, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Carolina, Tennessee, and Texas. The foreign plants are located in Bolivia, Brazil, Canada, England, Germany, India, Mexico, the Netherlands, Poland, and the Ukraine.

The Company operates thirteen domestic oilseed refineries in Georgia, Illinois, Indiana, Iowa, Minnesota, Missouri, Nebraska, North Dakota, and Tennessee, as well as sixteen foreign refineries in Bolivia, Brazil, Canada, England, France, Germany, India, the Netherlands, and Poland. The Company packages oils at seven domestic plants located in California, Florida, Georgia, and Illinois, as well as at six foreign plants located in Bolivia, Brazil, England, and Germany. The Company operates one domestic and six foreign biodiesel plants located in North Dakota, Brazil, Germany, and India. In addition, the Company operates two fertilizer blending plants in Brazil.

The Oilseeds Processing segment operates fifteen domestic country grain elevators as adjuncts to its processing plants. These elevators, with an aggregate storage capacity of 8 million bushels, are located in Illinois, Missouri, North Carolina, and Ohio.

This segment also operates ninety-eight foreign elevators, including port facilities, in Bolivia, Brazil, Canada, Germany, Mexico, the Netherlands, Paraguay, and Poland as adjuncts to its processing plants. These facilities have a storage capacity of 125 million bushels.

Item 2. PROPERTIES (Continued)*Corn Processing*

	Processing Plants			Procurement Facilities		
	United States	Foreign	Total	United States	Foreign	Total
Owned	13	–	13	5	–	5

The Company operates five wet corn milling and two dry corn milling plants with a daily grind capacity of approximately 50,000 metric tons (2.0 million bushels). The Company also operates corn germ extraction plants, sweeteners and starches production facilities, and bioproducts production facilities in Illinois, Iowa, Minnesota, Nebraska, North Carolina, and North Dakota. The Corn Processing segment also operates five domestic grain terminal elevators as adjuncts to its processing plants. These elevators, with an aggregate storage capacity of 12 million bushels, are located in Minnesota.

Agricultural Services

	Processing Plants			Procurement Facilities		
	United States	Foreign	Total	United States	Foreign	Total
Owned	1	–	1	130	18	148
Leased	1	–	1	8	6	14
	2	–	2	138	24	162

The Company operates a rice mill located in California and an animal feed facility in Illinois. The Agricultural Services segment operates one hundred thirty-eight domestic terminal, sub-terminal, country, and river elevators covering the major grain producing states, including fifty-one country elevators, seventy-nine sub-terminal, terminal and river loading facilities, and eight grain export elevators in Florida, Louisiana, Ohio, and Texas. Elevators are located in Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, Oklahoma, Tennessee, and Texas. These elevators have an aggregate storage capacity of approximately 342 million bushels. The Company has five grain export elevators in Argentina, Mexico, and the Ukraine that have an aggregate storage capacity of approximately 29 million bushels. The Company has thirteen country elevators located in the Ukraine, Romania, and the Dominican Republic. In addition, the Company has six river elevators located in Romania and the Ukraine.

Item 2. PROPERTIES (Continued)

The Company operates twenty-three domestic wheat flour mills, a domestic bulgur plant, two domestic corn flour mills, two domestic milo mills, and twenty foreign flour mills with a total daily milling capacity of approximately 26,700 metric tons (1.0 million bushels). The Company also operates six bakery mix plants. These plants and related properties are located in California, Illinois, Indiana, Kansas, Minnesota, Missouri, Nebraska, New York, North Carolina, Oklahoma, Pennsylvania, Tennessee, Texas, Washington, Barbados, Belize, Canada, England, Grenada, and Jamaica. The Company operates two foreign formula feed plants as adjuncts to the wheat flour mills in Belize and Grenada. The Company operates a rice milling plant in Jamaica.

The Company operates three domestic and nine foreign chocolate and cocoa bean processing plants with a total daily grind capacity of approximately 1,800 metric tons. The domestic plants are located in Massachusetts, New Jersey, and Wisconsin, and the foreign plants are located in Brazil, Canada, England, Ivory Coast, the Netherlands, and Singapore. The Company operates ten cocoa bean procurement and handling facilities/port sites in the Ivory Coast, Indonesia, Malaysia, and Brazil.

The Company operates two domestic soy protein specialty plants in Illinois and one foreign plant in the Netherlands. Lecithin products are produced at six domestic and four foreign plants in Illinois, Iowa, Nebraska, Canada, Germany, and the Netherlands. The Company also operates a starch and gluten plant in Iowa and one in Canada. The Company produces soy-based foods at plants in Illinois and North Dakota. The Company produces vitamin E, sterols, and isoflavones at plants in Illinois. The Company also operates a honey drying operation in Wisconsin.

The Company operates twenty-three domestic edible bean procurement facilities with an aggregate storage capacity of approximately 12 million bushels, located in Colorado, Idaho, Michigan, Minnesota, North Dakota, and Wyoming.

The Company also operates thirty domestic and six foreign formula feed and animal health and nutrition plants. The domestic plants are located in Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, Ohio, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin. The foreign plants are located in Canada, China, Puerto Rico, and Trinidad.

Item 3. LEGAL PROCEEDINGS

Environmental Matters

The Company is involved in approximately twenty administrative and judicial proceedings in which it has been identified as a potentially responsible party (PRP) under the federal Superfund law and its state analogs for the study and cleanup of sites contaminated by material discharged into the environment. In all of these matters there are numerous PRPs. Due to various factors, such as the required level of remediation and participation in the cleanup effort by others, the Company's future cleanup costs at these sites cannot be reasonably estimated. In management's opinion, these proceedings will not, either individually or in the aggregate, have a material adverse affect on the Company's financial condition or results of operations.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

PART II**Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES***Common Stock Market Prices and Dividends*

The Company's common stock is listed and traded on the New York Stock Exchange, Chicago Stock Exchange, Frankfurt Stock Exchange, and Swiss Stock Exchange. The following table sets forth, for the periods indicated, the high and low market prices of the common stock as reported on the New York Stock Exchange and common stock cash dividends declared per share.

	Market Price		Cash
	High	Low	Dividends Per Share
Fiscal 2007-Quarter Ended			
June 30	\$ 39.65	\$ 32.05	\$ 0.115
March 31	37.84	30.20	0.115
December 31	40.00	31.20	0.100
September 30	45.05	36.44	0.100
Fiscal 2006-Quarter Ended			
June 30	\$ 46.71	\$ 34.60	\$ 0.100
March 31	35.50	24.05	0.100
December 31	25.55	23.00	0.085
September 30	24.75	19.75	0.085

The number of registered shareholders of the Company's common stock at June 30, 2007, was 18,252. The Company expects to continue its policy of paying regular cash dividends, although there is no assurance as to future dividends because they are dependent on future earnings, capital requirements, and financial condition.

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES (Continued)

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program (2)	Number of Shares Remaining to be Purchased Under the Program (2)
April 1, 2007 to April 30, 2007	4	\$ 37.25	4	77,502,074
May 1, 2007 to May 31, 2007	33,372	36.47	235	77,501,839
June 1, 2007 to June 30, 2007	9,260	34.47	184	77,501,655
Total	42,636	\$ 36.04	423	77,501,655

(1) Total shares purchased represents those shares purchased as part of the Company's publicly announced share repurchase program described below and shares received as payment of the exercise price for stock option exercises. During the three-month period ended June 30, 2007, the Company received 42,213 shares as payment of the exercise price for stock option exercises.

(2) On November 4, 2004, the Company's Board of Directors approved a stock repurchase program authorizing the Company to repurchase up to 100,000,000 shares of the Company's common stock during the period commencing January 1, 2005 and ending December 31, 2009.

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES (Continued)

Performance Graph

The graph below compares five-year returns of the Company's common stock with those of the S&P 500 Index and the S&P Packaged Foods and Meats Index. The graph assumes all dividends have been reinvested and assumes an initial investment of \$100 on June 30, 2002. Information in the graph is presented on a June 30 fiscal year basis.

Graph produced by Research Data Group, Inc.

Shareholders' equity	11,253	9,807	8,435	7,698	7,069
Per common share	17.50	14.95	12.96	11.83	10.96
Weighted average shares outstanding-basic	651	654	654	648	646
Weighted average shares outstanding-diluted	656	656	656	650	647

Significant items affecting the comparability of the financial data shown above are as follows.

- Net earnings for 2007 include a gain of \$440 million (\$286 million after tax, equal to \$0.44 per share) related to the exchange of the Company's interests in certain Asian joint ventures for shares of Wilmar International Limited, realized securities gains of \$357 million (\$225 million after tax, equal to \$0.34 per share) related to the Company's sale of equity securities of Tyson Foods Inc. and Overseas Shipholding Group Inc. and a \$209 million gain (\$132 million after tax, equal to \$0.20 per share) related to the sale of businesses.
- Net earnings for 2005 include a gain of \$159 million (\$119 million after tax, equal to \$0.18 per share) related to sales of the Company's interest in Tate & Lyle PLC.
- Net earnings for 2004 include a \$400 million charge (\$252 million after tax, equal to \$0.39 per share) related to the settlement of fructose litigation and a \$51 million charge (\$32 million after tax, equal to \$0.05 per share) related to the abandonment and write-down of long-lived assets.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Company Overview

The Company is principally engaged in procuring, transporting, storing, processing, and merchandising agricultural commodities and products. The Company's operations are classified into three reportable business segments: Oilseeds Processing, Corn Processing, and Agricultural Services. Each of these segments is organized based upon the nature of products and services offered. The Company's remaining operations are aggregated and classified as Other.

The Oilseeds Processing segment includes activities related to processing oilseeds such as soybeans, cottonseed, sunflower seeds, canola, peanuts, and flaxseed into vegetable oils and meals principally for the food and feed industries. In addition, oilseeds may be resold into the marketplace as a raw material for other processors. Crude vegetable oil is sold "as is" or is further processed by refining, bleaching, and deodorizing into salad oils. Salad oils can be further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oil is sold for use in chemicals, paints, and other industrial products. Refined oil can be further processed for use in the production of biodiesel. Oilseed meals are primary ingredients used in the manufacture of commercial livestock and poultry feeds. Oilseeds Processing also includes activities related to the Company's interest in Wilmar International Limited, the largest agricultural processing business in Asia.

The Corn Processing segment includes activities related to the production of sweeteners, starches, dextrose, and syrups for the food and beverage industry as well as activities related to the production, by fermentation, of bioproducts such as alcohol, amino acids, and other specialty food and feed ingredients.

The Agricultural Services segment utilizes the Company's extensive grain elevator and transportation network to buy, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, and barley, and resells these commodities primarily as feed ingredients and as raw materials for the agricultural processing industry. Agricultural Services' grain sourcing and transportation network provides reliable and efficient services to the Company's agricultural processing operations. Also included in Agricultural Services are the activities of A.C. Toepfer International, a global merchandiser of agricultural commodities and processed products.

Other includes the Company's remaining operations, consisting principally of food, feed, and industrial businesses and financial activities. Food, feed, and industrial includes: Wheat Processing, with activities related to the production of wheat flour; Cocoa Processing, with activities related to the production of chocolate and cocoa products; the production of natural health and nutrition products; and the production of other food, feed, and industrial products. Financial activities include banking, captive insurance, private equity fund investments, and futures commission merchant activities.

Operating Performance Indicators

The Company's Oilseeds Processing, Agricultural Services, and Wheat Processing operations are principally agricultural commodity-based businesses where changes in segment selling prices move in relationship to changes in prices of the commodity-based agricultural raw materials. Therefore, changes in agricultural commodity prices have relatively equal impacts on both net sales and cost of products sold and minimal impact on the gross profit of underlying transactions. As a result, changes in net sales amounts of these business segments do not necessarily correspond to the changes in gross profit realized by these businesses.

The Company's Corn Processing operations and certain other food and feed processing operations also utilize agricultural commodities (or products derived from agricultural commodities) as raw materials. In these operations, agricultural commodity price changes can result in significant fluctuations in cost of products sold, and such price changes cannot necessarily be passed directly through to the selling price of the finished products. For products such

as ethanol, selling prices bear no direct relationship to the raw material cost of the agricultural commodity from which it is produced.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

The Company conducts its business in many countries. For the majority of the Company's subsidiaries located outside the United States, the local currency is the functional currency. Revenues and expenses denominated in foreign currencies are translated into U.S. dollars at the weighted average exchange rates for the applicable periods. Fluctuations in the exchange rates of foreign currencies, primarily the Euro and British pound, as compared to the U.S. dollar will result in corresponding fluctuations in the relative U.S. dollar value of the Company's revenues and expenses. The impact of these currency exchange rate changes, where significant, is discussed below.

The Company measures the performance of its business segments using key operating statistics such as segment operating profit and return on fixed capital investment, and return on net assets. The Company's operating results can vary significantly due to changes in unpredictable factors such as fluctuations in energy prices, weather conditions, crop plantings, global government farm programs and policies, changes in global demand resulting from population growth and changes in standards of living, and global production of similar and competitive crops. Due to these unpredictable factors, the Company does not provide forward-looking information in "Management's Discussion and Analysis of Financial Condition and Results of Operations."

2007 Compared to 2006

As an agricultural-based commodity business, the Company is subject to a variety of market factors which affect the Company's operating results. Strong biodiesel demand in Europe continued to create increased vegetable oil demand and positively impacted rapeseed crushing margins in Europe. Abundant oilseed supplies, improved vegetable oil values, and strong protein meal demand have positively impacted oilseed crushing margins in North America. Increased ethanol contracted selling prices, continuing strong ethanol demand, and solid demand for sweetener and starch products improved corn processing results. These increases in corn processing results were partially offset by higher net corn costs. Global grain merchandising opportunities resulting from regional production imbalances also improved operating results. North American river transportation operations were favorably impacted by strong demand for river transportation services which increased barge freight rates. Increasing commodity price levels negatively affected LIFO inventory valuations partially offsetting the improvements in operating results.

Net earnings increased principally due to improved operating results in all of the Company's operating segments. Earnings before income taxes for 2007 include a gain of \$440 million related to the exchange of the Company's interests in certain Asian joint ventures for shares of Wilmar International Limited (the Wilmar Gain), a \$357 million realized securities gain from sales of the Company's equity securities of Tyson Foods, Inc. and Overseas Shipholding Group, Inc., a gain of \$153 million from the sale of the Company's interest in Agricore United and a \$53 million gain from the sale of the Company's Arkady food ingredient business. Earnings before income taxes for 2007 also include charges of \$206 million from the effect of changing commodity prices on LIFO inventory valuations, \$46 million related to the repurchase of \$400 million of the Company's outstanding debentures, and \$21 million related to abandonment and write-down of long-lived assets. Net earnings for 2006 include a \$36 million reduction in income tax expense related to the recognition of federal and state income tax credits and adjustments resulting from the reconciliation of filed tax returns to the previously estimated tax provision. Earnings before income taxes for 2006 include charges of \$15 million resulting from the Company's adoption of Financial Accounting Standards Board Interpretation Number 47, *Accounting for Conditional Asset Retirement Obligations, an interpretation of FASB Statement No. 143 (FIN 47)*, \$71 million related to abandonment and write-down of long-lived assets, \$9 million representing the Company's share of a charge for abandonment and write-down of long-lived assets reported by an unconsolidated affiliate of the Company, and \$22 million associated with the closure of a citric acid plant and exiting the European animal feed business. Earnings before income taxes for 2006 also include credits of \$12 million from the effect of changing commodity prices on LIFO inventory valuations, \$17 million from the sale of long-lived assets, \$46 million related to Brazilian transactional tax credits, and \$40 million related to realized securities gains.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Analysis of Statements of Earnings

Net sales and other operating income increased 20% to \$44.0 billion due primarily to increased selling prices of agricultural commodities, oilseed and corn processing products and, to a lesser extent, increased sales volumes of agricultural commodities and oilseed processing products. In addition, net sales and other operating income increased \$916 million, or 3%, due to currency exchange rate fluctuations.

Net sales and other operating income by segment are as follows:

	2007	2006	Change
	(In millions)		
Oilseeds Processing	\$ 13,937	\$ 11,867	\$ 2,070
Corn Processing			
Sweeteners and Starches	2,378	2,133	245
Bioproducts	3,064	2,727	337
Total Corn Processing	5,442	4,860	582
Agricultural Services	19,706	15,440	4,266
Other			
Food, Feed, and Industrial	4,840	4,354	486
Financial	93	75	18
Total Other	4,933	4,429	504
Total	\$ 44,018	\$ 36,596	\$ 7,422

Oilseeds Processing sales increased 17% to \$13.9 billion due principally to increased average selling prices of vegetable oil and increased sales volumes of vegetable oil and biodiesel. Vegetable oil selling prices and volumes improved as the markets anticipate new demand from the developing United States biodiesel industry. Biodiesel sales volumes increased due to additional production capacity. Corn Processing sales increased 12% to \$5.4 billion principally due to increased sales of Bioproducts and, to a lesser extent, increased sales of Sweeteners and Starches. Bioproducts sales increased primarily due to higher average selling prices of ethanol, partially offset by lower sales volumes. Ethanol average selling prices increased principally due to higher gasoline prices. Ethanol sales volumes decreased as 2006 sales volumes exceeded production due to the release of inventories built up in anticipation of refiners replacing MTBE with ethanol. Sweeteners and Starches sales increased primarily due to higher average selling prices resulting from good demand for sweetener and starch products. Agricultural Services sales increased 28% to \$19.7 billion principally due to increased agricultural commodity prices and increased sales volumes. The increase in commodity prices is primarily due to higher average market prices of corn in North America which have increased 60% from the prior year. Increased sales volumes of global grain merchandising activities also contributed to the increase in Agricultural Services sales. Other sales increased 11% to \$4.9 billion primarily due to higher average selling prices of wheat flour products and, to a lesser extent, increased sales volumes and higher average selling prices of cocoa products.

Cost of products sold increased 21% to \$40.8 billion primarily due to higher average prices of agricultural commodities and increased sales volumes. Manufacturing costs for 2007 and 2006 include a \$21 million and \$62 million charge, respectively, for abandonment and write-down of long-lived assets. In addition, cost of products sold increased \$874 million, or 3%, due to currency exchange rate fluctuations.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Selling, general, and administrative expenses of \$1.2 billion were comparable to 2006 and include \$25 million of currency exchange rate increases. Excluding the impact of currency exchange rate increases, selling, general and administrative expenses decreased \$23 million principally due to 2006 selling, general and administrative expenses including \$20 million of severance costs associated with the closure of a citric acid plant. During 2007 and 2006, the Company issued option grants and restricted stock awards to officers and key employees pursuant to the Company's Long-term Management Incentive Program. Certain officers and key employees of the Company receiving option grants and restricted stock awards are eligible for retirement. Compensation expense related to option grants and restricted stock awards issued to these retirement-eligible employees is recognized in earnings on the date of grant. Selling, general, and administrative expense for 2007 and 2006 includes compensation expense related to option grants and restricted stock awards granted to retirement-eligible employees of \$30 million and \$31 million, respectively.

Other income increased \$1.0 billion primarily due to the \$440 million Wilmar Gain, a \$357 million gain on the sale of the Company's equity securities of Tyson Foods, Inc. and Overseas Shipholding Group, Inc., a \$153 million gain on the sale of the Company's interest in Agricore United, and a \$53 million gain on the sale of the Company's Arkady food ingredient business. Other income also includes a \$46 million charge related to the repurchase of \$400 million of the Company's outstanding debentures. Excluding these items, other income increased \$73 million primarily due to a \$120 million increase in equity in earnings of unconsolidated affiliates, and a \$53 million increase in investment income, partially offset by a \$69 million increase in interest expense and a \$27 million reduction in gains on sales of long-lived assets. The increase in equity in earnings of unconsolidated affiliates is primarily due to higher valuations of the Company's private equity fund investments and improved operating results of the Company's Asian oilseed crushing ventures. Interest expense and investment income increased primarily due to increased average borrowing and investment levels.

Operating profit by segment is as follows:

	2007	2006	Change
	(In millions)		
Oilseeds Processing	\$ 1,117	\$ 599	\$ 518
Corn Processing			
Sweeteners and Starches	485	432	53
Bioproducts	634	445	189
Total Corn Processing	1,119	877	242
Agricultural Services	516	275	241
Other			
Food, Feed, and Industrial	214	159	55
Financial	195	151	44
Total Other	409	310	99
Total Segment Operating Profit	3,161	2,061	1,100
Corporate	(7)	(206)	199
Earnings Before Income Taxes	\$ 3,154	\$ 1,855	\$ 1,299

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Oilseeds Processing operating profits increased \$518 million to \$1.1 billion due to the \$440 million Wilmar Gain and improved market conditions in all geographic regions. North American processing results improved principally due to abundant oilseed supplies in the United States and good demand for vegetable oil and soybean meal. Vegetable oil values improved as the markets anticipate new demand from the developing United States biodiesel industry. North American processing results were also favorably impacted by lower plant operating costs resulting from improved capacity utilization. Asian joint venture results improved due to improved palm processing operating results partially offset by decreased soy crushing operating results. European processing results improved principally due to abundant oilseed supplies in Europe and strong demand for vegetable oil. The strong demand for vegetable oil is the result of strong biodiesel demand. These increases were partially offset by decreased biodiesel operating profits resulting from higher vegetable oil prices, increased market production capacity, and lower diesel fuel prices. South American processing results declined principally due to last year's \$27 million credit for Brazilian transactional taxes. Excluding the impact of last year's credit for Brazilian transactional taxes, South American processing results improved principally due to increased fertilizer margins. The improvement in fertilizer margins was primarily due to higher average sales prices due to improved fertilizer demand combined with stable raw material costs. Operating profits for 2007 include a \$5 million charge for abandonment and write-down of long-lived assets. Operating profits for 2006 include a \$14 million charge for abandonment and write-down of long-lived assets and a \$6 million charge related to the adoption of FIN 47.

Corn Processing operating profits increased \$242 million to \$1.1 billion principally due to higher average selling prices and lower energy costs, partially offset by lower ethanol sales volumes and higher net corn costs. Net corn costs have increased approximately 60% during 2007 due to significant demand increases for corn resulting primarily from the increase in corn-derived ethanol industry capacity. Agricultural commodity market concerns regarding the expected decline in the ending 2006 corn crop carryover has also contributed to the increase in corn costs. Sweeteners and Starches operating profits increased \$53 million due primarily to higher average sales prices and lower energy costs. Sales prices have increased principally due to good demand for sweetener and starch products. These increases were partially offset by increased net corn costs. Sweeteners and Starches operating profits for 2006 include a \$5 million charge related to the adoption of FIN 47. Bioproducts operating profits increased \$189 million primarily due to higher ethanol average selling prices and lower energy costs, partially offset by increased net corn costs and lower ethanol sales volumes. Ethanol average sales prices increased principally due to strong demand from gasoline refiners and higher gasoline prices. Ethanol sales volumes decreased as 2006 sales volumes exceeded production due to the release of inventories built up in anticipation of refiners replacing MTBE with ethanol. Bioproducts operating results for 2007 include a \$1 million charge for abandonment and write-down of long-lived assets. Bioproducts operating results for 2006 include a \$6 million charge for abandonment and write-down of long-lived assets, a \$2 million charge related to the adoption of FIN 47, and \$6 million of costs related to the closure of a citric acid plant.

Agricultural Services operating profits increased \$241 million to \$516 million principally due to a \$153 million gain from the sale of the Company's interest in Agricore United, a Canadian business which specialized in crop input, crop protection services, and grain marketing and merchandising. Excluding the Agricore United gain, Agricultural Services operating profits increased \$88 million to \$363 million principally due to improved global grain merchandising operating results and, to a lesser extent, improved transportation and North American origination operating results. Global grain merchandising results improved as regional production imbalances allowed the Company to capitalize on merchandising opportunities. North American river transportation operating results increased primarily due to increased barge freight rates created by strong demand for barge capacity. North American origination operating results improved due to good export demand for agricultural commodities and higher ocean freight rates. Agricultural Services operating profits for 2007 include a \$12 million trade disruption insurance recovery related to Hurricane Katrina.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Other operating profits increased \$99 million to \$409 million. Other – Food, Feed, and Industrial operating profits increased \$55 million and include a \$53 million gain on the sale of the Company's Arkady food ingredient business and a \$15 million charge for abandonment and write-down of long-lived assets. Other – Food, Feed, and Industrial operating results for 2006 include a \$51 million charge for abandonment and write-down of long-lived assets, a \$2 million charge related to the adoption of FIN 47, a \$9 million charge representing the Company's share of a charge for abandonment and write-down of long-lived assets reported by an unconsolidated affiliate of the Company, a \$17 million gain from the sale of long-lived assets, and a \$16 million charge related to exiting the European animal feed business. Excluding the effect of these 2007 and 2006 items, Other – Food, Feed, and Industrial operating profits declined \$44 million due primarily to cocoa processing operating results declining from prior year levels and costs related to the start-up of the Company's natural plastics production operations. Cocoa processing operating results declined primarily due to increased industry production capacity which caused downward pressure on cocoa processing margins. These increases were partially offset by improved operating results of the Company's wheat flour processing and protein specialty operations. Other – Financial operating profits increased \$44 million principally due to increased valuations of the Company's private equity fund investments and higher operating results of the Company's futures commission merchant business, partially offset by lower operating results of the Company's captive insurance operations. The results of the Company's captive insurance operations for 2007 include a \$12 million charge related to a Hurricane Katrina trade disruption insurance settlement.

Corporate expense decreased \$199 million to \$7 million principally due to a \$345 million increase in realized securities gains principally resulting from sales of the Company's equity securities of Tyson Foods, Inc. and Overseas Shipholding Group, Inc. and a \$103 million reduction in unallocated interest expense due principally to higher levels of invested funds and higher interest rates. These decreases were partially offset by a \$206 million charge, compared to a \$12 million credit in the prior year, related to the effect of changing commodity prices on LIFO inventory valuations and a \$46 million charge related to the repurchase of \$400 million of the Company's outstanding debentures.

Income taxes increased due principally to higher pretax earnings and the absence of last year's \$36 million income tax credit related to the recognition of federal and state income tax credits and adjustments resulting from the reconciliation of filed tax returns to the previously estimated tax provision. The Company's effective tax rate during 2007 was 31.5% and, after excluding the effect of last year's \$36 million tax credit, was 31.2% for the prior year. The increase in the Company's effective tax rate is primarily due to changes in the geographic mix of pretax earnings.

2006 Compared to 2005

As an agricultural-based commodity business, the Company is subject to a variety of market factors which affect the Company's operating results. Strong biodiesel demand in Europe continued to create increased vegetable oil demand and has positively impacted rapeseed crushing margins in Europe. Abundant oilseed supplies and strong protein meal demand have positively impacted oilseed crushing margins in North America. A good corn supply resulting in lower price levels for corn favorably impacted corn processing operations, while ethanol experienced good demand due to gasoline refiners replacing MTBE with ethanol. Solid demand for sweetener and starch products has also improved corn processing results. During the first half of 2006, hurricanes in the gulf coast region of the United States disrupted North American grain origination and agricultural commodity export operations, negatively impacting export sales volumes. The gulf coast hurricanes also disrupted river transportation, resulting in increased barge demand and barge freight rates.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Net earnings increased principally due to improved operating results of Oilseeds Processing and Corn Processing. In addition, net earnings also increased due to a \$36 million reduction in income tax expense related to the recognition of federal and state income tax credits and adjustments resulting from the reconciliation of filed tax returns to the previously estimated tax provision. Earnings before income taxes for 2006 include charges of \$31 million resulting from the Company's adoption of Statement of Financial Accounting Standards (SFAS) Number 123(R), *Share Based Payment*, \$15 million resulting from the Company's adoption of FIN 47, \$71 million related to abandonment and write-down of long-lived assets, \$9 million representing the Company's share of a charge for abandonment and write-down of long-lived assets reported by an unconsolidated affiliate of the Company, and \$22 million associated with the closure of a citric acid plant and exiting the European animal feed business. Earnings before income taxes for 2006 also include credits of \$12 million from the effect of changing commodity prices on LIFO inventory valuations, \$17 million from the sale of long-lived assets, \$46 million related to Brazilian transactional tax credits, and \$40 million related to realized securities gains. Earnings before income taxes for 2005 included credits of \$114 million from the effect of changing commodity prices on LIFO inventory valuations, \$114 million of realized securities gain from the sale of Tate & Lyle PLC shares, and \$45 million representing the Company's equity share of the gain reported by the Company's unconsolidated affiliate, Compagnie Industrielle et Financiere des Produits Amylaces SA (CIP), upon the sale of its interest in Tate & Lyle PLC (the CIP Gain). Earnings before income taxes for 2005 also include a \$42 million charge for abandonment and write-down of long-lived assets.

Analysis of Statements of Earnings

Net sales and other operating income increased 2% to \$36.6 billion due primarily to higher average selling prices of agricultural commodities and increased sales volumes and selling prices of corn processing products, partially offset by decreased average selling prices of cocoa products and currency exchange rate decreases of \$415 million.

Net sales and other operating income by segment are as follows:

	2006	2005	Change
	(In millions)		
Oilseeds Processing	\$ 11,867	\$ 11,803	\$ 64
Corn Processing			
Sweeteners and Starches	2,133	1,905	228
Bioproducts	2,727	2,459	268
Total Corn Processing	4,860	4,364	496
Agricultural Services	15,440	15,198	242
Other			
Food, Feed, and Industrial	4,354	4,506	(152)
Financial	75	72	3
Total Other	4,429	4,578	(149)
Total	\$ 36,596	\$ 35,943	653

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Oilseeds Processing sales increased \$64 million to \$11.9 billion principally due to higher average selling prices of South American oilseed exports and of vegetable oil. These increases were partially offset by lower average selling prices of protein meal. Corn Processing sales increased 11% to \$4.9 billion due to sales increases in both Sweeteners and Starches and Bioproducts. Sweeteners and Starches sales increased due to higher average selling prices and sales volumes. Sales volumes and prices have increased primarily due to solid demand for sweetener and starch products. Bioproducts sales increased primarily due to increased sales volumes and average selling prices of ethanol, partially offset by lower average selling prices of lysine. The increases in ethanol sales volumes and sales prices were principally due to increased demand from gasoline refiners as refiners used ethanol to replace MTBE as a gasoline additive and to increased gasoline prices. Agricultural Services sales increased 2% to \$15.4 billion primarily due to increased commodity prices in North America and, to a lesser extent, increased barge freight rates as the gulf coast hurricanes reduced barge capacities and created strong demand for North American river transportation. These increases were partially offset by decreased commodity sales volumes in North America. The decreased sales volumes were primarily due to disruptions in North American grain origination and export activities caused by the hurricanes in the gulf coast region. Other sales decreased 3% to \$4.4 billion primarily due to decreased average selling prices of cocoa products and lower sales volumes of formula feed products. These decreases were partially offset by increased average selling prices of wheat flour products due to higher commodity prices.

Cost of products sold increased \$118 million to \$33.6 billion due primarily to higher average prices of agricultural commodities and increased manufacturing costs, partially offset by currency exchange rate decreases of \$389 million. Manufacturing costs increased \$399 million primarily due to increased energy costs, an \$86 million charge for abandonment and write-down of long-lived assets, and increased employee-related costs.

Selling, general, and administrative expenses increased \$112 million to \$1.2 billion principally due to increased employee-related costs, including a \$31 million charge related to the adoption of SFAS 123(R), \$20 million of severance costs associated with the closure of a citric acid plant, and increased provisions for doubtful accounts.

Other income decreased \$84 million due primarily to a \$73 million decrease in realized securities gains, a \$55 million decrease in equity in earnings of affiliates, and a \$39 million increase in interest expense, partially offset by a \$69 million increase in investment income. The decrease in realized securities gains is primarily due to the \$114 million realized securities gain in 2005 from the sale of Tate & Lyle PLC shares, partially offset by \$40 million of realized securities gains during 2006. The decrease in equity in earnings of affiliates is primarily due to the CIP Gain in 2005 and lower valuations of the Company's private equity fund investments in 2006, partially offset by improved earnings of the Company's Asian oilseed crushing ventures. Interest expense increased primarily due to higher average borrowing levels and interest rates. Investment income increased primarily due to the reversal of \$19 million of Brazilian transactional taxes previously assessed on investment income upon positive resolution in the Brazilian Supreme Court, higher levels of invested funds, and higher interest rates.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Operating profit by segment is as follows:

	2006	2005	Change
	(In millions)		
Oilseeds Processing	\$ 599	\$ 345	\$ 254
Corn Processing			
Sweeteners and Starches	431	271	160
Bioproducts	446	259	187
Total Corn Processing	877	530	347
Agricultural Services	275	262	13
Other			
Food, Feed, and Industrial	159	263	(104)
Financial	151	151	-
Total Other	310	414	(104)
Total Segment Operating Profit	2,061	1,551	510
Corporate	(206)	(35)	(171)
Earnings Before Income Taxes	\$ 1,855	\$ 1,516	\$ 339

Oilseeds Processing operating profits increased \$254 million to \$599 million primarily due to improved market conditions in all geographic regions. European processing results improved principally due to strong demand for biodiesel and abundant rapeseed supplies in Europe. This strong demand for biodiesel in Europe increased European vegetable oil demand and resulted in improved oilseeds processing results. Abundant rapeseed supplies in Europe resulted in lower rapeseed price levels. North American processing results improved principally due to abundant oilseed supplies in the United States and good demand for soybean meal. Vegetable oil values were solid as the markets anticipate new demand from the developing United States biodiesel industry. South American operating results increased primarily due to improved origination activities and a \$27 million credit for Brazilian transactional taxes. Operating results in Asia increased due to improved soy crushing margins and improved palm operations. Operating profits include a \$14 million charge for abandonment and write-down of long-lived assets and a \$6 million charge related to the adoption of FIN 47. Operating profits for 2005 include a charge of \$13 million for abandonment and write-down of long-lived assets.

Corn Processing operating profits increased \$347 million to \$877 million primarily due to higher average selling prices, increased sales volumes, and lower net corn costs, partially offset by increased energy costs. Sweeteners and Starches operating profits increased \$160 million due primarily to decreased net corn costs and higher average sales prices and sales volumes. Sales volumes and prices have increased primarily due to good demand for sweetener and starch products. These increases were partially offset by increased energy costs. Sweeteners and Starches operating profits include a \$5 million charge related to the adoption of FIN 47. Bioproducts operating profits increased \$187 million primarily due to higher ethanol sales volumes and average selling prices and decreased net corn costs, partially offset by increased energy costs and lower lysine average selling prices. The increases in ethanol sales volumes and average sales prices were principally due to increased demand from gasoline refiners as refiners used ethanol to replace MTBE as a gasoline additive and from increased gasoline prices. Bioproducts operating profits include a \$6 million charge for abandonment and write-down of long-lived assets, a \$2 million charge related to the adoption of FIN 47, and \$6 million of costs related to the closure of a citric acid plant. Bioproducts operating profits for 2005 include a \$16 million charge for abandonment and write-down of long-lived assets.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Agricultural Services operating profits increased \$13 million to \$275 million as improved results from transportation operations were partially offset by a decline in global grain merchandising and North American origination operating results. North American river transportation operating results increased primarily due to increased barge freight rates created by strong demand for barge capacity. This increase was partially offset by increased fuel costs. The gulf coast hurricanes negatively impacted North American origination and export activities during the first half of 2006.

Other operating profits decreased \$104 million to \$310 million. Other – Food, Feed, and Industrial operating results decreased \$104 million due primarily to a \$51 million charge for abandonment and write-down of long-lived assets, a \$2 million charge related to the adoption of FIN 47, and a \$9 million charge representing the Company's share of a charge for abandonment and write-down of long-lived assets reported by an unconsolidated affiliate of the Company. In addition, cocoa processing, natural health and nutrition, and formula feed operating results declined from prior year levels. Cocoa processing operating results declined primarily due to increased industry capacity which caused downward pressure on cocoa finished product prices. Formula feed operating results declined due to costs associated with exiting the European animal feed business. Other – Food, Feed, and Industrial operating profits include a \$17 million gain from the sale of long-lived assets. Other – Food, Feed, and Industrial operating results for 2005 include a \$13 million charge for abandonment and write-down of long-lived assets. Other – Financial operating profits are comparable to prior year levels as improvements in the Company's captive insurance operations and futures commission merchant business offset lower valuations of the Company's private equity fund investments.

Corporate decreased \$171 million due primarily to a \$102 million decrease in income from the effect of changing commodity prices on LIFO inventory valuations, the \$114 million realized securities gain in 2005 from the sale of Tate & Lyle PLC shares, the CIP Gain in 2005, and a \$22 million charge in 2006 upon the adoption of SFAS 123(R), partially offset by the aforementioned \$19 million reversal of Brazilian transactional taxes and a \$97 million reduction in unallocated interest expense. The reduction in unallocated interest expense is due principally to higher levels of invested funds and higher interest rates.

Income taxes increased due principally to higher pretax earnings. This increase was partially offset by a \$36 million reduction in income tax expense related to the recognition of federal and state income tax credits and adjustments resulting from the reconciliation of filed tax returns to the previously estimated tax provision. The Company's effective tax rate for 2006 was 29.3% as compared to 31.1% for 2005. Excluding the effect of the \$36 million tax credit, the Company's effective tax rate was 31.2% for 2006 and, after excluding the effect of the CIP Gain, was 32.1% for 2005. No tax was provided on the CIP Gain in 2005, as CIP is a corporate joint venture of the Company and the proceeds from the sale are permanently reinvested. Excluding the effect of the \$36 million tax credit in 2006 and the CIP Gain in 2005, the decrease in the Company's effective tax rate is primarily due to changes in the geographic mix of pretax earnings.

Liquidity and Capital Resources

The Company's objective is to have sufficient liquidity, balance sheet strength, and financial flexibility to fund the operating and capital requirements of a capital intensive agricultural-based commodity business.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

At June 30, 2007, the Company continued to show substantial liquidity with working capital of \$7.3 billion and a current ratio, defined as current assets divided by current liabilities, of 1.9 to 1. Included in working capital is \$875 million of cash, cash equivalents, and short-term marketable securities as well as \$4.4 billion of readily marketable commodity inventories. Cash generated from operating activities totaled \$303 million for the year compared to \$1.4 billion last year. This decrease was primarily due to an increase in working capital requirements principally related to increased prices and quantities of agricultural commodity inventories and increased receivables, partially offset by increased cash earnings. Despite increased investment in property, plant, and equipment, cash used in investing activities decreased \$714 million for the year to \$355 million due primarily to increased sales of marketable securities and proceeds from sales of businesses including the sale of the Company's equity interests in Tyson Foods, Inc., Overseas Shipholding Group, Inc. and Agricore United. Cash used in financing activities was \$398 million compared to cash generated by financing activities of \$284 million last year. Net long-term borrowings increased primarily as a result of the issuance of \$1.2 billion of convertible senior notes in February 2007 (described in detail below), compared to \$600 million of 30-year debentures issued in September 2005. This increase was partially offset by \$283 million of increased payments on long-term debt principally related to the Company retiring \$400 million of debentures in 2007.

Capital resources were strengthened as shown by the increase in the Company's net worth from \$9.8 billion to \$11.3 billion. The Company's ratio of long-term debt to total capital (the sum of the Company's long-term debt and shareholders' equity) was 30% at June 30, 2007, and 29% at June 30, 2006. This ratio is a measure of the Company's long-term liquidity and is an indicator of financial flexibility. The Company currently has \$3.9 billion of commercial paper and commercial bank lines available to meet seasonal cash requirements of which \$2.6 billion are committed and \$1.3 billion are uncommitted. At June 30, 2007, the Company had \$468 million of short-term debt outstanding. Standard & Poor's, Moody's, and Fitch rate the Company's commercial paper as A-1, P-1, and F1, respectively, and rate the Company's long-term debt as A, A2, and A+, respectively. In addition to the cash flow generated from operations, the Company has access to equity and debt capital through numerous alternatives from public and private sources in domestic and international markets.

In February 2007, the Company issued \$1.2 billion principal amount of convertible senior notes due in 2014 (the Notes) in a private placement. The Notes were issued at par and bear interest at a rate of 0.875% per year, payable semiannually. The Notes are convertible based on an initial conversion rate of 22.8343 shares per \$1,000 principal amount of Notes (which is equal to an initial conversion price of approximately \$43.79 per share). The Notes may be converted, subject to adjustment, only under the following circumstances: 1) during any calendar quarter beginning after March 31, 2007, if the closing price of the Company's common stock for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the immediately preceding quarter is more than 140% of the applicable conversion price per share, which is \$1,000 divided by the then applicable conversion rate, 2) during the five consecutive business day period immediately after any five consecutive trading day period (the note measurement period) in which the average of the trading price per \$1,000 principal amount of Notes was equal to or less than 98% of the average of the product of the closing price of the Company's common stock and the conversion rate at each date during the note measurement period, 3) if the Company makes specified distributions to its common stockholders or specified corporate transactions occur, or 4) at any time on or after January 15, 2014, through the business day preceding the maturity date. Upon conversion, a holder would receive an amount in cash equal to the lesser of 1) \$1,000 and 2) the conversion value, as defined. If the conversion value exceeds \$1,000, the Company will deliver, at the Company's election, cash or common stock or a combination of cash and common stock for the conversion value in excess of \$1,000. If the Notes are converted in connection with a change in control, as defined, the Company may be required to provide a make-whole premium in the form of an increase in the conversion rate, subject to a stated maximum amount. In addition, in the event of a change in control, the holders may require the Company to purchase all or a portion of their Notes at a purchase price equal to 100% of the principal amount of the Notes, plus accrued and

unpaid interest, if any.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Concurrent with the issuance of the Notes, the Company purchased call options in private transactions at a cost of \$299 million. The purchased call options allow the Company to receive shares of its common stock and/or cash from the counterparties equal to the amounts of common stock and/or cash related to the excess of the current market price of the Company's common stock over the exercise price of the purchased call options. In addition, the Company sold warrants in private transactions to acquire, subject to customary anti-dilution adjustments, 26.3 million shares of its common stock at an exercise price of \$62.56 per share and received proceeds of \$170 million. If the average price of the Company's common stock during a defined period ending on or about the respective settlement dates exceeds the exercise price of the warrants, the warrants will be settled, at the Company's option, in cash or shares of common stock. The purchased call options and warrants are intended to reduce the potential dilution upon future conversions of the Notes by effectively increasing the initial conversion price to \$62.56 per share.

Upon closing of the sale of the Notes, \$370 million of the net proceeds from the Note issuance and the proceeds from the warrant transactions were used to repurchase 10.3 million shares of the Company's common stock under the Company's stock repurchase program.

As of June 30, 2007, none of the conditions permitting conversion of the Notes had been satisfied. In addition, as of June 30, 2007, the market price of the Company's common stock was not greater than the exercise price of the purchased call options or warrants.

Contractual Obligations and Off-Balance Sheet Arrangements

In the normal course of business, the Company enters into contracts and commitments which obligate the Company to make payments in the future. The following table sets forth the Company's significant future obligations by time period. Purchases include commodity-based contracts entered into in the normal course of business, which are further described in Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," energy-related purchase contracts entered into in the normal course of business, and other purchase obligations related to the Company's normal business activities. Where applicable, information included in the Company's consolidated financial statements and notes is cross-referenced in this table.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Contractual Obligations	Note Reference	Total	Payments Due by Period			
			Less than 1 Year	2 – 3 Years	4 – 5 Years	Over 5 Years
(In millions)						
Purchases						
Inventories		\$ 11,113	\$ 10,312	\$ 535	\$ 159	\$ 107
Energy		429	269	152	7	1
Other		217	67	94	43	13
Total purchases		11,759	10,648	781	209	121
Short-term debt	Note 7	468	468	-	-	-
Long-term debt	Note 7	4,897	65	92	425	4,315
Estimated interest payments		5,752	290	509	474	4,479
Operating leases	Note 12	900	318	241	132	209
Estimated pension and other postretirement plan contributions	Note 13	1,045	79	173	195	598
Total		\$ 24,821	\$ 11,868	\$ 1,796	\$ 1,435	\$ 9,722

At June 30, 2007, the Company estimates it will spend approximately \$3.0 billion over the next four years to complete approved capital projects and acquisitions. The Company is a limited partner in various private equity funds which invest primarily in emerging markets. At June 30, 2007, the Company's carrying value of these limited partnership investments was \$165 million. The Company has future capital commitments related to these partnerships of \$138 million and expects the majority of these additional capital commitments, if called for, to be funded by cash flows generated by the partnerships. The Company also has outstanding letters of credit and surety bonds of \$339 million at June 30, 2007.

In addition, the Company has entered into agreements, primarily debt guarantee agreements related to equity-method investees, which could obligate the Company to make future payments. The Company's liability under these agreements arises only if the primary entity fails to perform its contractual obligation. The Company has collateral for a portion of these contingent obligations. At June 30, 2007, these contingent obligations totaled approximately \$98 million. Amounts outstanding for the primary entity under these contingent obligations were \$51 million at June 30, 2007.

Critical Accounting Policies

The process of preparing financial statements requires management to make estimates and judgments that affect the carrying values of the Company's assets and liabilities as well as the recognition of revenues and expenses. These estimates and judgments are based on the Company's historical experience and management's knowledge and understanding of current facts and circumstances. Certain of the Company's accounting policies are considered critical, as these policies are important to the depiction of the Company's financial statements and require significant or complex judgment by management. Management has discussed with the Company's Audit Committee the development, selection, disclosure, and application of these critical accounting policies. Following are the accounting

policies management considers critical to the Company's financial statements.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Inventories and Derivatives

Certain of the Company's merchandisable agricultural commodity inventories, forward fixed-price purchase and sale contracts, and exchange-traded futures and options contracts are valued at estimated market values. These merchandisable agricultural commodities are freely traded, have quoted market prices, and may be sold without significant additional processing. Management estimates market value based on exchange-quoted prices, adjusted for differences in local markets. Changes in the market values of these inventories and contracts are recognized in the statement of earnings as a component of cost of products sold. If management used different methods or factors to estimate market value, amounts reported as inventories and cost of products sold could differ. Additionally, if market conditions change subsequent to year-end, amounts reported in future periods as inventories and cost of products sold could differ.

The Company, from time to time, uses derivative contracts to fix the purchase price of anticipated volumes of commodities to be purchased and processed in a future month, to fix the purchase price of the Company's anticipated natural gas requirements for certain production facilities, and to fix the sales price of anticipated volumes of ethanol. These derivative contracts are designated as cash flow hedges. The change in the market value of such derivative contracts has historically been, and is expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Gains and losses arising from open and closed hedging transactions are deferred in other comprehensive income, net of applicable income taxes, and recognized as a component of cost of products sold in the statement of earnings when the hedged item is recognized. If it is determined that the derivative instruments used are no longer effective at offsetting changes in the price of the hedged item, then the changes in the market value of these exchange-traded futures contracts would be recorded in the statement of earnings as a component of cost of products sold.

Employee Benefit Plans

The Company provides substantially all domestic employees and employees at certain international subsidiaries with pension benefits. The Company also provides substantially all domestic salaried employees with postretirement health care and life insurance benefits. In order to measure the expense and funded status of these employee benefit plans, management makes several estimates and assumptions, including interest rates used to discount certain liabilities, rates of return on assets set aside to fund these plans, rates of compensation increases, employee turnover rates, anticipated mortality rates, and anticipated future health care costs. These estimates and assumptions are based on the Company's historical experience combined with management's knowledge and understanding of current facts and circumstances. Management also uses third-party specialists to assist in measuring the expense and funded status of these employee benefit plans. If management used different estimates and assumptions regarding these plans, the funded status of the plans could vary significantly, and the Company could recognize different amounts of expense over future periods.

Income Taxes

The Company frequently faces challenges from domestic and foreign tax authorities regarding the amount of taxes due. These challenges include questions regarding the timing and amount of deductions and the allocation of income among various tax jurisdictions. In evaluating the exposure associated with various tax filing positions, the Company records reserves for probable exposures. Deferred tax assets represent items to be used as tax deductions or credits in future tax returns, and the related tax benefit has already been recognized in the Company's income statement. Realization of certain deferred tax assets reflects the Company's tax planning strategies. Valuation allowances related to these deferred tax assets have been established to the extent the realization of the tax benefit is

not probable. Based on management's evaluation of the Company's tax position, it is believed the amounts related to these tax exposures are appropriately accrued. To the extent the Company were to favorably resolve matters for which accruals have been established or be required to pay amounts in excess of the aforementioned reserves, the Company's effective tax rate in a given financial statement period may be impacted.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Undistributed earnings of the Company's foreign subsidiaries and affiliated corporate joint ventures accounted for on the equity method are considered to be permanently reinvested, and accordingly, no provision for U.S. income taxes has been provided thereon. If the Company were to receive distributions from any of these foreign subsidiaries or affiliates or determine the undistributed earnings of these foreign subsidiaries or affiliates to not be permanently reinvested, the Company could be subject to U.S. tax liabilities which have not been provided for in the consolidated financial statements.

Asset Abandonments and Write-Downs

The Company is principally engaged in the business of procuring, transporting, storing, processing, and merchandising agricultural commodities and products. This business is global in nature and is highly capital-intensive. Both the availability of the Company's raw materials and the demand for the Company's finished products are driven by unpredictable factors such as weather, plantings, government (domestic and foreign) farm programs and policies, changes in population growth, changes in standards of living, and production of similar and competitive crops. These aforementioned unpredictable factors, therefore, may cause a shift in the supply/demand dynamics for the Company's raw materials and finished products. Any such shift will cause management to evaluate the efficiency and profitability of the Company's fixed asset base in terms of geographic location, size, and age of its factories. The Company, from time to time, will also invest in equipment and technology related to new, value-added products produced from agricultural commodities and products. These new products are not always successful from either a commercial production or marketing perspective. Management evaluates the Company's property, plant, and equipment for impairment whenever indicators of impairment exist. Assets are abandoned after consideration of the ability to utilize the assets for their intended purpose or to employ the assets in alternative uses or sell the assets to recover the carrying value. If management used different estimates and assumptions in its evaluation of this fixed asset base, then the Company could recognize different amounts of expense over future periods.

Valuation of Marketable Securities and Investments in Affiliates

The Company classifies the majority of its marketable securities as available-for-sale and carries these securities at fair value. Investments in affiliates are carried at cost plus equity in undistributed earnings. For publicly traded securities, the fair value of the Company's investments is readily available based on quoted market prices. For non-publicly traded securities, management's assessment of fair value is based on valuation methodologies including discounted cash flows and estimates of sales proceeds. In the event of a decline in fair value of an investment below carrying value, management may be required to determine if the decline in fair value is other than temporary. In evaluating the nature of a decline in the fair value of an investment, management considers the market conditions, trends of earnings, discounted cash flows, trading volumes, and other key measures of the investment as well as the Company's ability and intent to hold the investment. When such a decline in value is deemed to be other than temporary, an impairment loss is recognized in the current period operating results to the extent of the decline. See Notes 3 and 5 to the Company's consolidated financial statements for information regarding the Company's marketable securities and investments in affiliates. If management used different estimates and assumptions in its evaluation of these marketable securities, then the Company could recognize different amounts of expense over future periods.

**Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS (Continued)**

The Company is a limited partner in various private equity funds which invest primarily in emerging markets. The Company accounts for these limited partnerships using the equity method of accounting. Therefore, the Company is recording in the consolidated statement of earnings its proportional share of the limited partnerships' net income or loss. The limited partnerships value their investments at fair value. Thus, unrealized gains and losses related to the change in fair value of these investments are recorded in the limited partnerships' statements of earnings. The valuation of these investments, as determined by the general partner, can be subjective, and the values may vary significantly. Some of the factors causing the subjectivity and volatility of these valuations include the illiquidity and minority positions of these investments, currency exchange rate fluctuations, less-regulated securities exchanges, and the inherent business risks and limitations present in the emerging market countries. The Company records the results of these limited partnerships based on the information provided to the Company by the general partner. Due to the subjectivity and volatility in valuing these investments, the fair value of these investments, and thus the Company's results, could vary significantly over future periods.

**Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT
MARKET RISK**

The market risk inherent in the Company's market risk sensitive instruments and positions is the potential loss arising from adverse changes in commodities futures prices, marketable equity security prices, market prices of limited partnerships' investments, foreign currency exchange rates, and interest rates as described below.

Commodities

The availability and price of agricultural commodities are subject to wide fluctuations due to unpredictable factors such as weather, plantings, government (domestic and foreign) farm programs and policies, changes in global demand resulting from population growth and changes in standards of living, and global production of similar and competitive crops. To reduce price risk caused by market fluctuations, the Company generally follows a policy of using exchange-traded futures and options contracts to minimize its net position of merchandisable agricultural commodity inventories and forward cash purchase and sales contracts. The Company will also use exchange-traded futures and options contracts as components of merchandising strategies designed to enhance margins. The results of these strategies can be significantly impacted by factors such as the volatility of the relationship between the value of exchange-traded commodities futures contracts and the cash prices of the underlying commodities, counterparty contracts defaults, and volatility of freight markets. In addition, the Company from time-to-time enters into derivative contracts which are designated as hedges of specific volumes of commodities that will be purchased and processed, or sold, in a future month. The changes in the market value of such futures contracts have historically been, and are expected to continue to be, highly effective at offsetting changes in price movements of the hedged item. Gains and losses arising from open and closed hedging transactions are deferred in other comprehensive income, net of applicable taxes, and recognized as a component of cost of products sold in the statement of earnings when the hedged item is recognized.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (Continued)

A sensitivity analysis has been prepared to estimate the Company's exposure to market risk of its daily net commodity position. The Company's daily net commodity position consists of inventories, related purchase and sale contracts, and exchange-traded futures contracts, including those contracts used to hedge portions of production requirements. The fair value of such daily net commodity position is a summation of the fair values calculated for each commodity by valuing each net position at quoted futures prices. Market risk is estimated as the potential loss in fair value resulting from a hypothetical 10% adverse change in such prices. Actual results may differ.

	2007		2006	
	Fair Value	Market Risk	Fair Value	Market Risk
	(In millions)			
Highest long position	\$ 703	\$ 70	\$ 510	\$ 51
Highest short position	565	57	574	57
Average position long (short)	180	18	(203)	(20)

The change in fair value of the average position for 2007 compared to 2006 was principally a result of changes in the daily net commodity position and commodity prices.

Marketable Equity Securities

Marketable equity securities, which are recorded at fair value, have exposure to price risk. The fair value of marketable equity securities is based on quoted market prices. Risk is estimated as the potential loss in fair value resulting from a hypothetical 10% adverse change in quoted market prices. Actual results may differ.

	2007	2006
	(In millions)	
Fair value	\$ 227	\$ 640
Market risk	23	64

The decrease in fair value for 2007 compared to 2006 resulted primarily from disposals of securities partially offset by increases in fair market value of certain securities.

Limited Partnerships

The Company is a limited partner in various private equity funds which invest primarily in emerging markets. The Company accounts for these limited partnerships using the equity method of accounting. Therefore, the Company is recording in the consolidated statement of earnings its proportional share of the limited partnerships' net income or loss. The limited partnerships value their investments at fair value. Risk is estimated as the potential loss in fair value resulting from a hypothetical 10% adverse change in market prices of the limited partnerships' investments. Actual results may differ.

	2007	2006
	(In millions)	
Fair value of partnerships' investments	\$ 188	\$ 210
Market risk	19	21

The decrease in fair value for 2007 compared to 2006 resulted primarily from returns of capital.

**Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT
MARKET RISK (Continued)**

Currencies

In order to reduce the risk of foreign currency exchange rate fluctuations, except for amounts permanently invested as described below, the Company follows a policy of entering into currency exchange forward contracts to mitigate its foreign currency risk related to transactions denominated in a currency other than the functional currencies applicable to each of its various entities. The instruments used are readily marketable exchange-traded futures contracts and forward contracts with banks. The changes in market value of such contracts have a high correlation to the price changes in the currency of the related transactions. The potential loss in fair value for such net currency position resulting from a hypothetical 10% adverse change in foreign currency exchange rates is not material.

The amount the Company considers permanently invested in foreign subsidiaries and affiliates and translated into dollars using the year-end exchange rates is \$5.4 billion at June 30, 2007, and \$4.5 billion at June 30, 2006. This increase is due to an increase in retained earnings of the foreign subsidiaries and affiliates and appreciation of foreign currency exchange rates. The potential loss in fair value resulting from a hypothetical 10% adverse change in quoted foreign currency exchange rates is \$543 million and \$454 million for 2007 and 2006, respectively. Actual results may differ.

Interest

The fair value of the Company's long-term debt is estimated using quoted market prices, where available, and discounted future cash flows based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. Such fair value exceeded the long-term debt carrying value. Market risk is estimated as the potential increase in fair value resulting from a hypothetical .5 % decrease in interest rates. Actual results may differ.

	2007	2006
	(In millions)	
Fair value of long-term debt	\$ 4,927	\$ 4,387
Excess of fair value over carrying value	110	257
Market risk	204	218

The increase in fair value of long-term debt in 2007 resulted principally from the Company's issuance of \$1.2 billion convertible senior notes partially offset by repayment of \$400 million of debentures and other principal payments of long-term debt.
