Forward-Looking Information

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for forward-looking statements made by or on behalf of Photronics, Inc. (the "Company"). These statements are based on management's beliefs, as well as assumptions made by and information currently available to management. Forward-looking statements may be identified by words like "expect", "anticipate", "believe", "plan", "projects", and similar expressions. All forward-looking statements involve risks and uncertainties that are difficult to predict. In particular, any statement contained in this quarterly report on Form 10-Q, in press releases, written statements or other documents filed with the Securities and Exchange Commission, or in the Company's communications and discussions with investors and analysts in the normal course of business through meetings, phone calls and conference calls, regarding the consummation and benefits of future acquisitions, expectations with respect to future sales, financial performance, operating efficiencies and product expansion, are subject to known and unknown risks, uncertainties and contingencies, many of which are beyond the control of the Company. These factors may cause actual results, performance or achievements to differ materially from anticipated results, performances or achievements. Factors that might affect such forward-looking statements include, but are not limited to, overall economic and business conditions; the demand and receipt of orders for the Company's products; competitive factors in the industries and geographic markets in which the Company competes; changes in federal, state and international tax requirements (including tax rate changes, new tax laws and revised tax law interpretations); the Company's ability to place new equipment in service on a timely basis; interest rate fluctuations and other capital market conditions, including foreign currency rate fluctuations; economic and political conditions in international markets; the ability to obtain additional financings; the ability to achieve anticipated synergies and other cost savings in connection with acquisitions and productivity programs; delays in the ramp up of production of the state-of-the-art nanofab facility ("U.S. Nanofab"); the timing, impact and other uncertainties of future acquisitions; the seasonal and cyclical nature of the semiconductor and flat panel display industries; the availability of capital; management changes; damage or destruction to the Company's facilities by natural disasters, labor strikes, political unrest or terrorist activity; the ability to fully utilize its tools; the ability of the Company to receive desired yields, pricing, product mix, and market acceptance of its products; changes in technology; and the ability of the Company to obtain necessary export licenses. Any forward-looking statements should be considered in light of these factors. Accordingly, there is no assurance that the Company's expectations will be realized. The Company does not assume responsibility for the accuracy and

completeness of the forward-looking statements and does not assume an obligation to provide revisions to any forward-looking statements.

PHOTRONICS, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements
Three and Six Months Ended April 27, 2008 and April 29, 2007
(unaudited)
(in thousands, except share amounts)

NOTE 1 - BASIS OF FINANCIAL STATEMENT PRESENTATION

Photronics, Inc. and its subsidiaries (the "Company" or "Photronics") is one of the world's leading manufacturers of photomasks, which are high precision photographic quartz plates containing microscopic images of electronic circuits. Photomasks are a key element in the manufacture of semiconductors and flat panel displays ("FPDs"), and are used as masters to transfer circuit patterns onto semiconductor wafers and flat panel substrates during the fabrication of integrated circuits ("IC") and a variety of FPDs and, to a lesser extent, other types of electrical and optical components. The Company currently operates principally from eleven manufacturing facilities; three of which are located in Europe, two in Taiwan, one each in Korea, Singapore, and China; and three in the United States, including a state-of-the-art nanofab facility ("U.S. Nanofab") in Boise, Idaho, which commenced production during the three months ended April 27, 2008.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for annual financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the interim period are not necessarily indicative of the results that may be expected for the fiscal year ending November 2, 2008. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended October 28, 2007.

NOTE 2 - COMPREHENSIVE INCOME (LOSS)

The following table summarizes comprehensive income (loss) for the three and six months ended April 27, 2008 and April 29, 2007:

	Three Months Ended		Six Months Ended	
	April 27, 2008	April 29, 2007	April 27, 2008	April 29, 2007
Net income (loss)	\$(2,069)	\$14,066	\$ (5,409)	\$21,923

Other comprehensive income:				
Change in unrealized net gains on investments, net of tax	(43)	(133)	(92)	(120)
Change in fair value of cash flow hedges	44	110	72	(1,373)
Foreign currency translation adjustments	(58)	467	(7,440)	6,558
	<u>(57)</u>	<u>444</u>	<u>(7,460)</u>	<u>5,065</u>
Total comprehensive income (loss)	<u><u>\$(2,126)</u></u>	<u><u>\$14,510</u></u>	<u><u>\$(12,869)</u></u>	<u><u>\$26,988</u></u>

-7-

NOTE 3 - EARNINGS (LOSS) PER SHARE

The calculation of basic and diluted earnings (loss) per share is presented below:

	Three Months Ended		Six Months Ended	
	April 27, 2008	April 29, 2007	April 27, 2008	April 29, 2007
Net income (loss)	\$(2,069)	\$14,066	\$(5,409)	\$21,923
Effect of dilutive securities:				
Interest expense on convertible notes, net of related tax effect	-	1,100	-	2,201
Earnings for diluted earnings (loss) per share	<u><u>\$(2,069)</u></u>	<u><u>\$15,166</u></u>	<u><u>\$(5,409)</u></u>	<u><u>\$24,124</u></u>
Weighted average common shares computations:				
Weighted average common shares used for basic earnings (loss) per share	41,638	41,513	41,632	41,494
Effect of dilutive securities:				
Convertible notes	-	9,441	-	9,441
Employee stock options	-	445	-	445
Dilutive potential common shares	<u><u>-</u></u>	<u><u>9,886</u></u>	<u><u>-</u></u>	<u><u>9,886</u></u>

Weighted average common shares used for diluted earnings per share	41,638	51,399	41,632	51,380
Earnings (loss) per share:				
Basic	\$(0.05)	\$0.34	\$(0.13)	\$0.53
Diluted	\$(0.05)	\$0.30	\$(0.13)	\$0.47

The potential effect of the conversion of the Company's convertible subordinated notes and the exercise of some of its employee stock options would be antidilutive. The following table shows the amount of incremental shares outstanding that would have been added if the assumed conversion of convertible subordinated notes and stock options had been dilutive.

	Three Months Ended		Six Months Ended	
	April 27, 2008	April 29, 2007	April 27, 2008	April 29, 2007
Convertible notes	8,196	-	8,818	608
Employee stock options	2,502	1,770	2,389	1,789
Total potentially dilutive shares excluded	10,698	1,770	11,207	2,397

NOTE 4 - INVESTMENTS

Short-term investments at April 27, 2008 consist of foreign bond fund securities and, at October 28, 2007 included term deposits. Long-term investments of \$0.1 million at April 27, 2008 and October 28, 2007 included in "Other Assets" primarily consist of available-for-sale equity securities. Fair values of the Company's investments were determined based upon quoted market prices and cash values.

-8-

Investments at April 27, 2008 were as follows:

	Cost Basis	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Short-term investments:				
Foreign bond funds	\$2,450	\$ 44	\$ -	\$2,494
Long-term equity investments	30	94	-	124
	\$2,480	\$138	\$ -	\$2,618

Investments at October 28, 2007 were as follows:

	<u>Cost Basis</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Estimated Fair Value</u>
Short-term investments:				
Term deposit	\$3,260	\$ -	\$ -	\$3,260
Foreign bond funds	2,289	108	-	2,397
Total short-term investments	5,549	108	-	5,657
Long-term equity investments	29	109	-	138
	<u>\$5,578</u>	<u>\$217</u>	<u>\$ -</u>	<u>\$5,795</u>

In determining whether investment holdings are other than temporarily impaired, the Company considers the nature, cause, severity and duration of the impairment. The Company and its investment advisors used analyst reports, credit ratings or other items as part of its review. No investments were impaired as of April 27, 2008.

The maturities of short-term investments at April 27, 2008 were as follows:

	<u>Cost Basis</u>	<u>Estimated Fair Value</u>
Due in one year or less	\$2,450	\$2,494

During the six months ended April 27, 2008 the Company's term deposits matured. The Company sold \$47.4 million of short-term investments during the six months ended April 29, 2007 in connection with the Company's repayment of its 4.75% convertible subordinated notes in December 2006.

-9-

Gross realized gains and losses related to the Company's investments were as follows:

<u>Three Months Ended</u>		<u>Six Months Ended</u>	
April 27, 2008	April 29, 2007	April 27, 2008	April 29, 2007

Gross realized gains	\$ -	\$391	\$ -	\$435
Gross realized losses	-	(56)	-	(87)
Net realized gains	\$ -	\$335	\$ -	\$348

NOTE 5 - STOCK-BASED COMPENSATION PLANS

In March 2007, shareholders approved a new stock-based compensation plan ("Plan"), under which options, restricted stock, restricted stock units, stock appreciation rights, performance stock, performance units, and other awards based on, or related to shares of the Company's common stock may be granted from shares authorized but unissued, shares previously issued and reacquired by the Company or both. A maximum of three million shares of common stock may be issued under the Plan. Awards may be granted to Company officers, employees and directors, non-employee directors, consultants, advisors and independent contractors of the Company or a subsidiary of the Company. The Plan prohibits further awards from being issued under prior plans. The plans are more fully described below. The Company incurred compensation cost under the plans for the three and six months ended April 27, 2008 of \$0.7 million and \$1.2 million, respectively, as compared to \$0.7 million and \$1.5 million, respectively, for the comparable prior year periods. No compensation cost was capitalized as part of inventory, and no income tax benefit was recorded in those periods. No equity awards were settled in cash during the periods presented.

Stock Options

Option awards generally vest in one to four years, and have a ten-year contractual term. All incentive and non-qualified stock option grants must have an exercise price equal to the market value of the underlying common stock on the date of grant. The option and share awards provide for accelerated vesting if there is a change in control as defined in the Plan.

The fair value of option grants is determined with the closing price on the day of grant using the Black-Scholes option pricing model. Expected volatility is based on the historical volatility of the Company's stock. The Company uses historical option exercise behavior and employee termination data to estimate option life, which represents the period of time that the options granted are expected to remain outstanding. The risk-free rate of return for the estimated life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. The weighted average assumptions used for the six months ended April 27, 2008 and April 29, 2007 are noted in the following table.

	Six Months Ended	
	April 27, 2008	April 29, 2007
Volatility	43.1%	52.8%
Risk free rate of return	2.5% - 2.6%	4.5%
Dividend yield	0.0%	0.0%
Expected term	4.7 years	4.6 years

-10-

A summary of option awards under the plan as of April 27, 2008 is presented below:

Options	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding at April 27, 2008	2,184,815	\$18.68	5.9 years	\$ -
Exercisable at April 27, 2008	1,673,945	\$19.32	5.3 years	\$ -

There were 18,500 share options granted with a weighted average grant date fair value of \$4.15 during the six months ended April 27, 2008. For the comparable period last year 50,750 share options were granted with a weighted average grant date fair value of \$7.31 per share. As of April 27, 2008 the total compensation cost related to non-vested option awards not yet recognized was approximately \$3.0 million. That cost is expected to be recognized over a weighted average amortization period of 2.3 years.

Restricted Stock

The Company also grants restricted stock awards periodically. The restrictions on these awards lapse over a service period that has ranged from less than one to eight years. During the six months ended April 27, 2008, 149,300 shares were granted with a weighted average grant date fair value of \$11.79 per share. For the comparable period last year 36,500 shares were granted with a weighted average grant date fair value of \$14.11 per share. As of April 27, 2008, the total compensation cost related to non-vested restricted stock awards not yet recognized was approximately \$4.5 million, which is expected to be recognized over a weighted average amortization period of 4.7 years. A summary of the status of the Company's nonvested restricted shares as of April 27, 2008 is presented below.

Restricted Stock	Shares	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding at April 27, 2008	344,928	4.7 years	\$3,711

-11-

NOTE 6 - GEOGRAPHIC INFORMATION

Edgar Filing: PHOTRONICS INC - Form 10-Q

The Company operates in a single operating segment as a manufacturer of photomasks, which are high precision quartz plates containing microscopic images of electronic circuits for use in the fabrication of semiconductors. Geographic net sales are based primarily on where the Company's facility is located. The Company's net sales and operating income (loss) for the three and six months ended April 27, 2008 and April 29, 2007, and long-lived assets by geographic area as of April 27, 2008 and October 28, 2007, were as follows:

	Three Months Ended		Six Months Ended	
	April 27, 2008	April 29, 2007	April 27, 2008	April 29, 2007
Net sales

North America	201,029	134,875		
	<u>\$590,953</u>	<u>\$531,578</u>		

The Company is typically impacted during its first fiscal quarter by the North America and European holiday periods as some customers reduce their effective workdays and orders during this period.

NOTE 7 - INCOME TAXES

The effective tax rate in Q2-08 differs from the amount computed by applying the U.S. statutory rate of 35% to the income before taxes primarily because income tax provisions in jurisdictions where the Company generated income

were, due to valuation allowances, not significantly offset by income tax benefits in jurisdictions where the Company incurred losses. The effective tax rate in Q2-07 differs from the amount computed by applying the U.S. statutory rate of 35% to income before taxes primarily due to the benefit recorded for the resolution and settlement of U.S. and foreign tax matters that were associated with uncertain tax positions in prior years.

The Company's operations have followed the migration of semiconductor industry fabrication to Asia, where the Company operates in countries where it is accorded favorable tax treatment. PKLT, the Company's FPD manufacturing facility in Taiwan, is accorded a tax holiday, which is expected to expire in 2012. In addition, the Company has been

-12-

accorded a tax holiday in China which is expected to expire in 2011. These tax holidays had no dollar or per share effect in the three and six months ended April 27, 2008 and April 29, 2007. In Korea and Taiwan, various investment tax credits have been utilized to reduce the Company's effective income tax rate.

In June 2006, the FASB issued FASB Interpretation Number 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109." The interpretation contains a two step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS No. 109. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. The Company adopted FIN 48 as of the beginning of its 2008 fiscal year. Prior to adoption, the Company's pre-existing policy was to establish reserves, including interest and penalties, for uncertain tax positions that reflected the probable outcome of known tax contingencies. As of the date of adoption of FIN 48, the Company has elected to recognize interest, and penalties if applicable, related to uncertain tax positions in the income tax provision in its condensed consolidated statements of operations. As compared to the Company's historical approach, the application of FIN 48 resulted in a net increase to accrued income taxes payable of approximately \$1.0 million (including interest and penalties of approximately \$0.2 million), and a decrease to retained earnings of the same amount. There were no significant changes to the liability for uncertain tax positions (or accrued interest and penalties) during the six months ended April 27, 2008.

As of the date of adoption of FIN 48 the gross unrecognized tax benefits for income taxes associated with uncertain tax positions totaled approximately \$3.5 million. If recognized, the benefits would favorably affect the Company's effective rate in future periods.

It is possible that material changes to the gross unrecognized tax benefits may be required during fiscal year 2008. These changes relate to possible settlements in the U.K. and Germany during fiscal year 2008. Though the Company expects these items may result in a net reduction of its unrecognized tax benefits, an estimate of the expected reduction and related income tax benefit cannot be made at this time.

Currently, the statutes of limitations remain open subsequent to and including 2003 in the U.S. and Korea, 2002 in the U.K., and 2001 in Germany.

NOTE 8 - LONG -TERM BORROWINGS

Long-term borrowings consist of the following:

	April 27, 2008	October 28, 2007
	<u> </u>	<u> </u>
Borrowings under revolving credit facility, which bears interest at a variable rate, as defined (4.2% at April 27, 2008)	\$115,000	
2.25% convertible subordinated notes redeemed on April 15, 2008	-	\$150,000
8.0% capital lease obligation payable through January 2013	59,124	-
5.6% capital lease obligation payable through October 2012	18,459	19,912
Foreign notes payable	29,878	25,823
	<u>222,461</u>	<u>195,735</u>
Less current portion	17,523	4,482
	<u>\$204,938</u>	<u>\$191,253</u>

-13-

On April 15, 2008, the Company redeemed its \$150.0 million 2.25% convertible subordinated notes. In connection with this redemption, the Company had net borrowings of \$115.0 million under its revolving credit facility ("credit facility") at April 27, 2008. The Company entered into the credit facility agreement on June 6, 2007 with a group of financial institutions. The credit facility provides for an aggregate commitment of \$155.0 million over a 5-year term, and allows for borrowings in various currencies. The applicable interest rate spread and facility fee vary based upon the Company's senior leverage ratio. Under the terms of the credit facility, the Company is subject to compliance with certain financial and other covenants, as defined, including, but not limited to: Senior Leverage Ratio, Total Leverage Ratio, and Minimum Unrestricted Cash Balances. The credit facility also limits the amounts of both secured and unsecured debt. The credit facility is secured by a pledge of the Company's stock in certain of its subsidiaries. Borrowings under the credit facility bear interest at certain benchmarked interest rates, as defined, plus a spread based on the Company's senior leverage ratio. On April 25, 2008, the credit facility was amended, primarily amending the Applicable Rate chart and the Maximum Senior Leverage Ratio terms, and providing that the Company enter into an agreement evidencing permanent long-term capital of at least \$75.0 million by November 2, 2008. As of April 27, 2008, \$115.0 million was borrowed under the credit facility and \$3.6 million was utilized for a standby letter of credit, and the remaining balance of \$36.4 million was available to the Company.

During the three months ended January 27, 2008, a capital lease agreement commenced and was also modified as discussed below for the U.S. Nanofab. Quarterly lease payments, which bear interest at 8%, are \$3.8 million for the period April 2008 through January 2013. As of April 27, 2008 total capital lease amounts payable were \$71.6 million of which \$59.1 million represents principal and \$12.5 million represents interest. At the end of the 5-year lease term, ownership of the property transfers to the Company. The modification during the three months ended January 27, 2008 changed the initial lease payment from January 1, 2008 to April 1, 2008, the final lease payment from October 1, 2012 to January 1, 2013, and increased the total payments under the lease from \$73.9 million to \$75.4 million.

In October 2007, the Company entered into a capital lease agreement in the amount of \$19.9 million associated with certain equipment. Under the capital lease agreement, the Company is required to maintain the equipment in good working condition, and is required to comply with certain non-financial covenants. Payments under the lease are \$0.4 million per month over a 5-year term at a 5.6% interest rate.

Foreign notes payable, as of April 27, 2008, consist of a China term and revolving debt credit facility and a short-term credit line facility, both of which are fully outstanding, and amount to RMB 186 million (\$26.7 million) and RMB 22.5 million (\$3.2 million). As of April 27, 2008, the term loan interest rate was 7.65%, the revolver was 7.42%, and the short-term credit line was 5.87%. Rates are subject to change based on the People's Bank of China base rate, as defined. The term and revolving debt credit facility is due in October, 2010, and the short-term credit line is due in March, 2009. The Company is subject to certain financial and other covenants similar to those of its credit facility described above.

NOTE 9 - COMMITMENTS AND CONTINGENCIES

As of April 27, 2008, the Company had commitments outstanding for capital expenditures of approximately \$22 million.

The Company is subject to various claims that arise in the ordinary course of business. The Company believes such claims, individually or in the aggregate, will not have a material adverse effect on the business of the Company.

NOTE 10 - RECENT ACCOUNTING PRONOUNCEMENTS

In May 2008, The Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 162, "The Hierarchy of Generally Accepted Accounting Principles." SFAS No. 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles. SFAS No. 162 will be effective 60 days following the Security and Exchange Commission's approval of the Public Company Accounting Oversight Board's amendments to AU Section 411, "The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles." The Company is evaluating the impact, if any, SFAS No. 162 will have on its consolidated financial statements.

-14-

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities - an amendment of FASB Statement No. 133." SFAS No. 161 changes the disclosure requirements for derivative instruments and hedging activities by requiring entities to provide enhanced disclosures about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. The Company is evaluating the impact, if any, SFAS No. 161 will have on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements - an amendment of Accounting Research Bulletin No. 51." SFAS No. 160 establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS No. 160 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim statements within those fiscal years. The Company is currently evaluating the impact SFAS No. 160 will have on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141R, "Business Combinations." SFAS No. 141R establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. The statement also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statement to evaluate the nature and financial effects of the business combination. SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, and, therefore will not impact the Company's consolidated financial statements upon adoption.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115." SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value, and is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company is currently evaluating the impact that the adoption of SFAS No. 159 will have on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements," which provides a consistent definition of fair value which focuses on exit price and prioritizes, within a measurement of fair value, the use of market-based inputs over entity-specific inputs. SFAS No. 157 requires expanded disclosures about fair value measurements and establishes a three-level hierarchy for fair value measurements based on the transparency of inputs to the valuation of an asset or liability as of the measurement date. The standard also requires that a company use its own nonperformance risk when measuring liabilities carried at fair value, including derivatives. In February 2008, the FASB approved a FASB Staff Position ("FSP") that permits companies to partially defer the effective date of SFAS No. 157 for one year for nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. The FSP did not permit companies to defer recognition and disclosure requirements for financial assets and financial liabilities or for nonfinancial assets and nonfinancial liabilities that are remeasured at least annually. SFAS No. 157 is effective for financial assets and financial liabilities and for nonfinancial assets and nonfinancial liabilities that are remeasured at least annually for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The provisions of SFAS No. 157 will be applied prospectively. The Company intends to defer adoption of SFAS No. 157 for one year for nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. The Company is currently evaluating the effects, if any, that SFAS No. 157 may have on its financial condition and results of operations.

-15-

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Overview

Management's discussion and analysis of the Company's financial condition, business results and outlook should be read in conjunction with its condensed consolidated financial statements and related notes. Various segments of this MD&A do contain forward-looking statements, all of which are presented based on current expectations and may be adversely affected by uncertainties and risk factors presented throughout this filing and the Company's Annual Report on Form 10-K for the fiscal 2007 year, leading actual results to materially differ from these expectations.

The Company sells substantially all of its photomasks to semiconductor designers and manufacturers, and manufacturers of flat panel displays (FPDs). Photomask technology is also being applied to the fabrication of other higher performance electronic products such as photonics, micro-electronic mechanical systems and certain

nanotechnology applications. The Company's selling cycle is tightly interwoven with the development and release of new semiconductor designs and flat panel applications, particularly as it relates to the semiconductor industry's migration to more advanced design methodologies and fabrication processes. The Company believes that the demand for photomasks primarily depends on design activity rather than sales volumes from products produced using photomask technologies. Consequently, an increase in semiconductor or FPD sales does not necessarily result in a corresponding increase in photomask sales. In addition, the reduced use of customized integrated circuits (ICs), reductions in design complexity or other changes in the technology or methods of manufacturing semiconductors or a slowdown in the introduction of new semiconductor or FPD designs could reduce demand for photomasks even if demand for semiconductors and FPDs increases. Advances in semiconductor and photomask design and semiconductor production methods could reduce the demand for photomasks. Historically, the semiconductor industry has been volatile with sharp periodic downturns and slowdowns. These downturns have been characterized by, among other things, diminished product demand, excess production capacity, and accelerated erosion of selling prices.

Material Changes in Results of Operations
Three and Six Months ended April 27, 2008 and April 29, 2007

The following table represents selected operating information expressed as a percentage of net sales:

	Three Months		Six Months Ended	
	Ended			
	April 27,	April 29,	April 27,	April 29,
	2008	2007	2008	2007
Net sales	100.0%	100.0%	100.0%	100.0%
Cost of sales	(81.6)	(76.1)	(80.9)	(74.1)
Gross margin	18.4	23.9	19.1	25.9
Selling, general and administrative expenses	(12.3)	(13.2)	(14.0)	(14.3)
Research and development expenses	(4.2)	(3.9)	(4.1)	(4.2)
Gain on sale of facility	-	-	-	1.0
Operating income	1.9	6.8	1.0	8.4
Other income (expense), net	(2.9)	0.4	(1.8)	0.1
Income before income taxes and minority interest	(1.0)	7.2	(0.8)	8.5
Income tax benefit (provision)	(0.9)	5.8	(1.3)	2.4
Minority interest	-	(0.2)	(0.4)	(0.7)
Net income (loss)	(1.9)%	12.8%	(2.5)%	10.2%

Edgar Filing: PHOTRONICS INC - Form 10-Q

All of the following tabular comparisons, unless otherwise indicated, are for the three months ended April 27, 2008 (Q2-08) and April 29, 2007 (Q2-07) and for the six months ended April 27, 2008 (YTD-08) and April 29, 2007 (YTD-07) in millions of dollars:

Net Sales

	Three Months Ended			Six Months Ended		
	Q2-08	Q2-07	Percent Change	YTD-08	YTD-07	Percent Change
IC	\$ 80.0	\$ 88.3	(9.4)%	\$160.4	\$173.9	(7.7)%
FPD	30.3	21.3	42.1%	53.1	41.7	27.3%
Total net sales	\$110.3	\$109.6	0.6%	\$213.5	\$215.6	(1.0)%

Net sales for Q2-08 increased to \$110.3 million as compared to \$109.6 million for Q2-07. The increase is related to increased sales of FPD photomasks of \$9.0 million, primarily associated with increased unit sales of high-end FPD photomasks. Sales of IC photomasks declined approximately \$8.3 million as a result of a decline in average selling prices ("ASPs"), principally from mainstream products. High-end photomask applications, which typically have higher ASPs, include mask sets for FPD products using G6 and above technologies and IC products using 90 nanometer and below technologies. By geographic area, net sales in Q2-08 as compared to Q2-07 increased by \$2.2 million or 3.5% in Asia, decreased by \$0.6 million or 2.2% in North America, and decreased by \$0.9 million or 4.9% in Europe. As a percent of total sales in Q2-08, net sales were 60% in Asia, 24% in North America, and 16% in Europe; and net sales in Q2-07 in Asia were 58%, North America 24%, and Europe 18%.

For YTD-08, net sales decreased 1.0% or \$2.1 million, primarily related to reduced sales of IC photomasks of approximately \$13.5 million as a result of decreased ASPs, principally from mainstream products. The decrease was mitigated, to some extent, by an increase of \$11.4 million in net sales of FPD photomasks, principally high-end. The Company's quarterly revenues can be affected by the seasonal purchasing of its customers.

Gross Margin

	Three Months Ended			Six Months Ended		
	Q2-08	Q2-07	Percent Change	YTD-08	YTD-07	Percent Change
Gross margin	\$20.3	\$26.2	(22.5)%	\$40.9	\$55.9	(26.8)%
Percentage of net sales	18.4%	23.9%		19.1%	25.9%	

Gross margin decreased to 18.4% in Q2-08 from 23.9% in Q2-07 primarily due to decreased IC ASPs and as a result of the Company's expanded manufacturing base, including manufacturing costs associated with the U.S. NanoFab, which commenced operations during Q2-08. Gross margin decreased to 19.1% in YTD-08 from 25.9% in YTD-07 primarily due to decreased IC ASPs and the Company's aforementioned increased manufacturing base. The

Company operates in a high fixed cost environment and to the extent that the Company's revenues and utilization increase or decrease, gross margin will generally be positively or negatively impacted. Additionally, the gross margin percentage throughout the remainder of fiscal 2008 could be negatively impacted by increased depreciation expense and other costs associated with the Company's increased fixed cost manufacturing base, primarily at the U.S. NanoFab.

-17-

Selling, General and Administrative Expenses

	Three Months Ended			Six Months Ended		
	Q2-08	Q2-07	Percent Change	YTD-08	YTD-07	Percent Change
Selling, general and administrative expenses	\$13.6	\$14.4	(6.0)%	\$29.9	\$30.9	(3.3)%
Percentage of net sales	12.3%	13.2%		14.0%	14.3%	

Selling, general and administrative expenses decreased \$0.8 million to \$13.6 million in Q2-08, compared with \$14.4 million in Q2-07. Selling, general, and administrative expenses were \$29.9 million and \$30.9 million in YTD-08 and YTD-07, respectively. These decreases were primarily a result of reduced salaries and related benefits as a result of cost reduction programs.

Research and Development

	Three Months Ended			Six Months Ended		
	Q2-08	Q2-07	Percent Change	YTD-08	YTD-07	Percent Change
Research and development	\$4.6	\$4.3	6.7%	\$8.9	\$9.0	(2.1)%
Percentage of net sales	4.2%	3.9%		4.1%	4.2%	

Research and development expenses consist primarily of global development efforts relating to high-end process technologies for advanced sub-wavelength reticle solutions for IC and FPD technologies. Research and development expenses increased by \$0.3 million to \$4.6 million in Q2-08, as compared to \$4.3 million in Q2-07. On a YTD basis, research and development expenses decreased \$0.1 million to \$8.9 million in YTD-08, as compared to \$9.0 million in YTD-07.

Gain on Sale of Facility

In January 2007, the Company sold its Austin, Texas, manufacturing and research and development facility for proceeds of \$5.0 million and realized a gain of \$2.3 million, which was recorded in operating income in Q1-07.

Other Income (expense), net

	Three Months Ended		Six Months Ended	
	Q2-08	Q2-07	YTD-08	YTD-07
Interest expense	\$(2.8)	\$(0.9)	\$(5.0)	\$(3.0)
Investment and other income (expense), net	(0.4)	1.3	1.2	3.1
Other income (expense), net	\$(3.2)	\$ 0.4	\$(3.8)	\$ 0.1

Interest expense in Q2-08 and YTD-08 increased as compared to the same periods in the prior year, primarily as a result of the Company's increased debt levels year-over-year. Investment and other income (expense), net, for Q2-08 decreased as compared to Q2-07 mainly due to higher foreign currency exchange losses. Investment and other income (expense), net, for YTD-08 decreased as compared to YTD-07 as a result of decreased investment income associated with reduced cash and short-term investment balances.

-18-

Provision for Income Taxes

	Three Months Ended		Six Months Ended	
	Q2-08	Q2-07	YTD-08	YTD-07
Income tax benefit (provision)	\$(0.9)	\$6.4	\$(2.8)	\$5.1

The effective tax rates in Q2-08 and YTD-08 differ from the amounts computed by applying the U.S. statutory rate of 35% to the income before taxes primarily because income tax provisions in jurisdictions where the Company generated income were, due to valuation allowances, not significantly offset by income tax benefits in jurisdictions where the Company incurred losses. The effective tax rates in Q2-07 and YTD-07 differ from the amounts computed by applying the U.S. statutory rate of 35% to income before taxes primarily due to the benefit recorded for the resolution and settlement of U.S. and foreign tax matters that were associated with uncertain tax positions in prior years.

The Company's operations have followed the migration of semiconductor industry fabrication to Asia, where the Company operates in countries where it is accorded favorable tax treatment. PKLT, the Company's FPD manufacturing facility in Taiwan, is accorded a tax holiday, which is expected to expire in 2012. In addition, the

Company has been accorded a tax holiday in China which is expected to expire in 2011. These tax holidays had no dollar or per share effect in the three and six months ended April 27, 2008 and April 29, 2007. In Korea and Taiwan, various investment tax credits have been utilized to reduce the Company's effective income tax rate.

In June 2006, the FASB issued FASB Interpretation Number 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109." The interpretation contains a two step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS No. 109. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. The Company adopted FIN 48 as of the beginning of its 2008 fiscal year. Prior to adoption, the Company's pre-existing policy was to establish reserves, including interest and penalties, for uncertain tax positions that reflected the probable outcome of known tax contingencies. As of the date of adoption of FIN 48, the Company has elected to recognize interest, and penalties if applicable, related to uncertain tax positions in the income tax provision in its condensed consolidated statements of operations. As compared to the Company's historical approach, the application of FIN 48 resulted in a net increase to accrued income taxes payable of approximately \$1.0 million (including interest and penalties of approximately \$0.2 million), and a decrease to retained earnings of the same amount. There were no significant changes to the liability for uncertain tax positions (or accrued interest and penalties) during the six months ended April 27, 2008.

As of the date of adoption of FIN 48 the gross unrecognized tax benefits for income taxes associated with uncertain tax positions totaled approximately \$3.5 million. If recognized, the benefits would favorably affect the Company's effective rate in future periods.

It is possible that material changes to the gross unrecognized tax benefits may be required during fiscal year 2008. These changes relate to possible settlements in the U.K. and Germany during fiscal year 2008. Though the Company expects these items may result in a net reduction of its unrecognized tax benefits, an estimate of the expected reduction and related income tax benefit cannot be made at this time.

Currently, the statutes of limitations remain open subsequent to and including 2003 in the U.S. and Korea, 2002 in the U.K., and 2001 in Germany.

Minority Interest in Consolidated Subsidiaries

Minority interest decreased \$0.2 million to \$0.0 million in Q2-08 as compared to Q2-07 due to decreased net income at the Company's non-wholly owned subsidiary in Taiwan. The Company's ownership in its subsidiary in Taiwan was approximately 58% at April 27, 2008 and October 28, 2007, and its ownership in its subsidiary in Korea was approximately 99.7% at April 27, 2008 and October 28, 2007.

-19-

Liquidity and Capital Resources

The Company's working capital decreased \$54.3 million to \$42.3 million at April 27, 2008, as compared to \$96.6 million at October 28, 2007, primarily related to payments for capital expenditures, and an increase in the current portion of long-term borrowings related to the U.S. Nanofab capital lease agreement which commenced during Q1-08. Cash, cash equivalents, and short-term investments decreased to \$69.6 million at April 27, 2008 as compared to \$151.7 million at October 28, 2007, primarily due to payments for capital expenditures and convertible subordinated notes. Accounts receivable increased from \$68.3 million at October 28, 2007 to \$79.0 million at April 27, 2008,

primarily due to increased net sales in Q2-08 as compared to Q4-07. Cash provided by operating activities was \$35.1 million for the six months ended April 27, 2008, as compared to \$71.5 for the same period last year, primarily due to the Company incurring a net loss of \$5.4 million for the six months ended April 27, 2008, as compared to net income of \$21.9 million in the same prior year period. Cash used in investing activities for the six months ended April 27, 2008 was \$77.4 million, which was comprised primarily of capital expenditure payments of \$78.1 million. Cash used in financing activities of \$37.3 million for the six months ended April 27, 2008 was primarily comprised of \$169.0 million repayments of long-term borrowings (primarily relating to the Company's redemption of its \$150.0 million convertible subordinated notes) offset by \$132.1 million in proceeds from long-term borrowings, primarily related to the Company's revolving credit facility.

At April 27, 2008, the Company had capital commitments outstanding of approximately \$22 million. Photronics believes that its currently available resources, together with its capacity for growth, and its access to other debt and equity financing sources, will be sufficient to satisfy its currently planned capital expenditures, as well as its anticipated working capital requirements for the remainder of its 2008 fiscal year. However, the Company cannot assure that additional sources of financing would be available to the Company on commercially favorable terms should the Company's capital requirements exceed cash available from operations, existing cash, and short-term investments.

Cash Requirements

The Company's cash requirements for the balance of fiscal 2008 will be primarily to fund operations, including spending on capital expenditures and capital lease obligations, as well as any cash acquisitions that it may undertake. On April 25, 2008, the Company's credit facility was amended, including a provision that the Company enter into an agreement evidencing permanent long-term capital of at least \$75.0 million by November 2, 2008. The Company expects that cash, cash equivalents, short-term investments, cash generated from operations, along with access to other debt and equity financing sources, should be sufficient to meet its cash requirements for the next 12 months. The Company regularly reviews the availability and terms on which it might issue additional equity or debt securities in the public or private markets. However, the Company cannot assure that additional sources of financing would be available to the Company on commercially favorable terms should the Company's capital requirements exceed cash available from operations, cash available under its credit facility, existing cash, and short-term investments.

Stock-Based Compensation

Total stock-based compensation expense for the three and six months ended April 27, 2008 was \$0.7 million and \$1.2 million, respectively, as compared to \$0.7 million and \$1.5 million, respectively, for the comparable prior year periods, substantially all of which is in selling, general and administrative expenses. No compensation cost was capitalized as part of inventory, and no income tax benefit has been recorded. As of April 27, 2008 total unrecognized compensation cost of \$7.5 million is expected to be recognized over a weighted average amortization period of 3.8 years.

Business Outlook

A majority of the Company's revenue growth has come from, and is expected to continue to come from, the Asian region, as customers increase their use of manufacturing foundries located outside of North America and Europe. Additional revenue growth is also anticipated from North America and Europe as a result of utilizing technology licensed under the Company's technology license with Micron Technology, Inc. The Company's Korean and Taiwanese operations are non-wholly owned subsidiaries. Therefore, a portion of earnings generated at each of these locations is allocated to the minority shareholders.

The Company continues to assess its global manufacturing strategy and monitor its market capitalization, sales volume and related cash flows from operations. This ongoing assessment could result in future facilities closures,

asset

-20-

redeployments, impairments of goodwill and other intangible and long-lived assets, workforce reductions, asset impairments or the addition of increased manufacturing facilities, all of which would be based on market conditions and customer requirements.

The Company's future results of operations and the other forward-looking statements contained in this filing involve a number of risks and uncertainties. Various factors that have been discussed and a number of other factors could cause actual results to differ materially from the Company's expectations.

Application of Critical Accounting Policies

The Company's condensed consolidated financial statements are based on the selection and application of significant accounting policies, which require management to make significant estimates and assumptions. The Company believes that the following are some of the more critical judgment areas in the application of the Company's accounting policies that affect its financial condition and results of operations.

Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect amounts reported in them. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Significant accounting estimates include management's review of long-lived assets and goodwill for potential impairment, income tax provision, allowance for uncollectible accounts receivable, inventory valuation allowances and restructuring reserves. The Company's estimates are based on the facts and circumstances available at the time; different reasonable estimates could have been used in the current period, and changes in the accounting estimates used are likely to occur from period to period, which may have a material impact on the presentation of the Company's financial condition and results of operations. Actual results reported by the Company may differ from such estimates. The Company reviews these estimates periodically and reflects the effect of revisions in the period that they are determined.

Derivative Instruments and Hedging Activities

The Company records derivatives in the condensed consolidated balance sheet as assets or liabilities, measured at fair value. Gains or losses resulting from changes in the values of those derivatives are reported in the condensed consolidated statements of income or as accumulated other comprehensive income, a separate component of shareholders' equity, depending on the use of the derivatives and whether they qualify for hedge accounting. Among other criteria, in order to qualify for hedge accounting, the derivative must be a hedge for an interest rate, price, foreign currency exchange rate, or credit risk; expected to be highly effective at the inception of the hedge and be highly effective in achieving offsetting changes in the fair value or cash flows of the hedged items during the term of the hedge, and formally documented at the inception of the hedge. The Company uses judgment in assessing the fair value of derivatives and related financial instruments, including assumptions utilized in derivative fair value models in areas such as projected interest rates and changes in the Company's stock price during the contract term. The Company manages a portion of its foreign currency exchange and interest rate risks through these derivative instruments.

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation and amortization. Repairs and maintenance, as well as renewals and replacements of a routine nature are charged to operations as incurred, while those which improve or extend the lives of existing assets are capitalized. Upon sale or other disposition, the cost of the asset and accumulated depreciation are removed from the accounts, and any resulting gain or loss is reflected in operations.

Depreciation and amortization are computed on the straight line method over the estimated useful lives of the related assets. Buildings and improvements are depreciated over 15 to 40 years, machinery and equipment over 3 to 10 years and furniture, fixtures and office equipment over 3 to 5 years. Leasehold improvements are amortized over the life of the lease or the estimated useful life of the improvement, whichever is less. Judgment and assumptions are used in establishing estimated useful lives and depreciation periods. The Company also uses judgment and assumptions as it periodically reviews property, plant and equipment for any potential impairment in carrying values whenever events such as a significant industry downturn, plant closure, technological obsolescence, or other change in circumstances indicate that their carrying amount may not be recoverable. Actual fair values may differ from estimated fair values.

-21-

Goodwill and Other Intangible Assets

Intangible assets consist primarily of goodwill and other acquisition-related intangibles, and a technology license agreement and a supply agreement. These assets are stated at fair value as of the date acquired less accumulated amortization. Amortization is calculated on a straight-line basis or another method that more fairly represents the utilization of the assets. The future economic benefit of the carrying value of intangible assets is reviewed annually and the Company uses judgment whenever events or changes in circumstances indicate the carrying value of an intangible asset may not be recoverable based on discounted cash flows or market factors and an impairment loss would be recorded in the period so determined.

Impairment of Long-Lived Assets

Long-lived assets and certain identifiable assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Determination of recoverability is based on the Company's judgment and estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of an impairment loss for long-lived assets and certain identifiable intangible assets that management expects to hold and use is based on the fair value of the asset. Long-lived assets and certain identifiable intangible assets to be disposed of are reported at the lower of carrying amount or fair value less costs of disposition.

Investment in Joint Venture

Investments in joint ventures over which the Company has the ability to exercise significant influence and that, in general, are at least 20 percent owned are stated at cost plus equity in undistributed net income (loss) of the joint venture. These investments are evaluated for impairment in accordance with the requirements of Accounting Principles Board Opinion No. 18, "The Equity Method of Accounting for Investments in Common Stock." An impairment loss would be recorded whenever a decline in the value of an equity investment below its carrying amount is determined to be other than temporary. In judging "other than temporary," the Company would consider the length of time and extent to which the fair value of the investment has been less than the carrying amount of the investment, the near-term and longer-term operating and financial prospects of the investee, and its longer-term intent of retaining the investment in the investee.

Income Taxes

The income tax provision (benefit) is computed on the basis of the various tax jurisdictions' financial statements income or loss before income taxes. Deferred income taxes reflect the tax effects of differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company uses judgment and assumptions to determine if valuation allowances for deferred income tax assets are required if realization is not likely by considering future market growth, forecasted operations, future taxable income, and the mix of earnings in the tax jurisdictions in which it operates.

The Company considers income taxes in each of the tax jurisdictions in which it operates in order to determine its effective income tax rate. Current income tax exposure is identified and temporary differences resulting from differing treatments of items for tax and financial reporting purposes are assessed. These differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets. Additionally, the Company evaluates the recoverability of deferred income tax assets from future taxable income and establishes valuation allowances if recovery is deemed not likely. Accordingly, the income tax provision in the consolidated statements of operations is impacted by changes in the valuation allowance. Significant management estimates and judgment are required in determining any valuation allowance recorded against net deferred tax assets.

-22-

Revenue Recognition

The Company recognizes revenue when both title and risk of loss transfer to the customer. The Company makes estimates and assumptions and uses judgment relating to discounts and estimates for product returns and warranties which are accrued and recognized at the time of sale.

Discounts - Sales discounts are negotiated with customers prior to billing and at the time of billing, sales invoices are prepared net of negotiated sales discounts.

Product Returns - Customer returns have historically been insignificant. However, the Company does record a liability for the insignificant amount of estimated sales returns based upon historical experience.

Warranties and Other Post Shipment Obligations - For a 30-day period, the Company warrants that items sold will conform to customer specification. However, the Company's liability is limited to repair or replacement of the photomasks at its sole option. The Company inspects photomasks for conformity to customer specifications prior to shipment. Accordingly, customer returns of items under warranty have historically been insignificant. However, the Company records a liability for the insignificant amount of estimated warranty returns based on historical experience.

Sales Taxes - The Company presents its revenues in the consolidated statements of operations net of sales taxes, if any (excluded from revenues).

Effect of New Accounting Standards

In May 2008, The Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 162, "The Hierarchy of Generally Accepted Accounting Principles." SFAS No. 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles. SFAS No. 162 will be effective 60 days following the Security and Exchange Commission's approval of the Public Company Accounting Oversight Board's amendments to AU Section 411, "The Meaning of Present Fairly

in Conformity With Generally Accepted Accounting Principles." The Company is evaluating the impact, if any, SFAS No. 162 will have on its consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities - an amendment of FASB No. 133." SFAS No. 161 changes the disclosure requirements for derivative instruments and hedging activities by requiring entities to provide enhanced disclosures about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS No. 133 and its related interpretations, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. The Company is evaluating the impact, if any, SFAS No. 161 will have on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements - an amendment of Accounting Research Bulletin No. 51." SFAS No. 160 establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS No. 160 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim statements within those fiscal years. The Company is currently evaluating the impact SFAS No. 160 will have on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141R, "Business Combinations." SFAS No. 141R establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. The statement also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statement to evaluate the nature and financial effects of the business combination. SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, and, therefore will not impact the Company's consolidated financial statements upon adoption.

-23-

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities-Including an Amendment of FASB Statement No. 115." SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value, and is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company is currently evaluating the impact that the adoption of SFAS No. 159 will have on its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" which provides a consistent definition of fair value which focuses on exit price and prioritizes, within a measurement of fair value, the use of market-based inputs over entity-specific inputs. SFAS No. 157 requires expanded disclosures about fair value measurements and establishes a three-level hierarchy for fair value measurements based on the transparency of inputs to the valuation of an asset or liability as of the measurement date. The standard also requires that a company use its own nonperformance risk when measuring liabilities carried at fair value, including derivatives. In February 2008, the FASB approved a FASB Staff Position ("FSP") that permits companies to partially defer the effective date of SFAS No. 157 for one year for nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. The FSP did not permit companies to defer recognition and disclosure requirements for financial assets and financial liabilities or for nonfinancial assets and nonfinancial liabilities that are remeasured at least annually. SFAS No. 157 is effective for financial assets and financial liabilities and for nonfinancial assets and nonfinancial liabilities that are remeasured at least annually for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The

provisions of SFAS No. 157 will be applied prospectively. The Company intends to defer adoption of SFAS No. 157 for one year for nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. The Company is currently evaluating the effects, if any, that SFAS No. 157 may have on its financial condition and results of operations.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company records derivatives on the balance sheet as assets or liabilities, measured at fair value. The Company does not engage in derivative instruments for speculative purposes. Gains or losses resulting from changes in the values of those derivatives are reported in the condensed consolidated statement of income, or as accumulated other comprehensive income, a separate component of shareholders' equity, depending on the use of the derivatives and whether they qualify for hedge accounting. In order to qualify for hedge accounting, among other criteria, the derivative must be a hedge for an interest rate, price, foreign currency exchange rate, or credit risk, expected to be highly effective at the inception of the hedge and be highly effective in achieving offsetting changes in the fair value or cash flows of the hedged item during the term of the hedge, and formally documented at the inception of the hedge. In general, the types of risks hedged are those relating to the variability of future cash flows caused by movements in foreign currency exchange and interest rates. The Company documents its risk management strategy and hedge effectiveness at the inception of, and during the term of each hedge.

Foreign Currency Exchange Rate Risk

The Company conducts business in several major international currencies through its worldwide operations and is subject to changes in foreign exchange rates of such currencies. Changes in exchange rates can positively or negatively affect the Company's sales, operating margins and retained earnings. The functional currencies of the Company's Asian subsidiaries are the Korean won, New Taiwan dollar, Chinese renminbi and Singapore dollar. The functional currencies of the Company's European subsidiaries are the British pound and the euro.

The Company attempts to minimize its risk to foreign currency transaction losses by producing its products in the same country in which the products are sold and thereby generating revenues and incurring expenses in the same currency and by managing its working capital. In some instances, the Company may sell or purchase products in a currency other than the functional currency of the country where it was produced. To date, the Company has not experienced a significant foreign exchange loss on these transactions. However, there can be no assurance that this approach will be successful, especially in the event of a significant adverse movement in the value of any foreign currencies against the U.S. dollar. The Company does not engage in purchasing forward exchange contracts for speculative purposes.

-24-

The Company's primary net foreign currency exposures as of April 27, 2008 included the Korean won, the Singapore dollar, the New Taiwan dollar, the Chinese renminbi, the British pound and the euro. As of April 27, 2008, a 10% adverse movement in the value of these currencies against the U.S. dollar would have resulted in a net unrealized pre-tax loss of \$4.5 million. The Company does not believe that a 10% change in the exchange rates of other non-U.S. dollar currencies would have a material effect on its consolidated financial position, results of operations, or cash flows.

In April, 2006, the Company's Korean subsidiary entered into a foreign currency rate swap contract which, under the terms of the contract, effectively converted a \$50 million interest bearing intercompany loan denominated in U.S. dollars to Korean won. During the three and six month periods ended April 27, 2008, \$25.0 million and \$45.0 million, respectively, of the intercompany loans were repaid, which reduced the intercompany loan and related swap balance to

\$5.0 million at April 27, 2008. This contract expires in November 2008, the due date of the intercompany loan.

In accordance with SFAS No. 133, "Accounting for Derivatives and Hedging Activities," hedges related to anticipated transactions are designated and documented at their inception as cash flow hedges and are evaluated for effectiveness. In September, 2006, the Company entered into forward contracts to convert the fixed yen purchase price of certain equipment into fixed U.S. dollar amounts, which were designated as cash flow hedges. The Company records these derivative instruments in either current assets, noncurrent assets, or accrued liabilities, depending on their net position, at fair value regardless of the purpose or intent for holding the instrument. Changes in the fair value of derivative financial instruments are recognized in earnings for the ineffective portion of hedges or in shareholders equity as a component of accumulated other comprehensive income or loss for the effective portion. As of April 27, 2008, all of the Company's forward contracts were settled.

Interest Rate Risk

The majority of the Company's borrowings at April 27, 2008 were in the form of its variable rate revolving credit facility and its capital lease obligation for the U.S. Nanofab, which bears interest at a fixed rate of 8%. At April 27, 2008, the Company had approximately \$80 million in net variable rate financial instrument liabilities which were sensitive to interest rate risk. A 10% change in interest rates would not have a material effect on the Company's consolidated financial position, results of operations, or cash flows.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation was carried out under the supervision and with the participation of the Company's management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Act of 1934) as of April 27, 2008, the end of the period covered by this report. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of April 27, 2008, the end of the period covered by this report, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

Changes in Internal Control over Financial Reporting

There was no change in the Company's internal control over financial reporting during the Company's second quarter of fiscal 2008 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

-25-

PART II. OTHER INFORMATION

Item 1A. RISKS RELATING TO THE COMPANY'S BUSINESS

There have been no material changes to risks relating to the Company's business as disclosed in Part 1, Item 1A of the Company's Form 10-K for the year ended October 28, 2007.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

- (a) The matters set forth in this Item 4 were submitted to a vote of security holders of the Company at an Annual Meeting of Shareholders held on April 1, 2008.
- (b) The following directors, constituting the entire Board of Directors, were elected at the Annual Meeting of Shareholders held on April 1, 2008. Also indicated are the affirmative and authority withheld votes for each director.

	<u>For</u>	<u>Authority Withheld</u>
Walter M. Fiederowicz	38,204,132	978,000
Joseph A. Fiorita, Jr.	37,657,715	1,524,417
Michael J. Luttati	37,686,365	1,495,767
Constantine S. Macricostas	37,137,276	2,044,856
George C. Macricostas	36,628,922	2,553,910
Willem D. Maris	38,137,638	1,044,494
Mitchell G. Tyson	37,451,903	1,730,229

- (c) Ratification of the selection of Deloitte & Touche LLP as registered independent public accounting firm for the fiscal year ending November 2, 2008.
