Washington, D.C. 20549

FORM 6-K

REPORT OF FOREIGN ISSUER

PURSUANT TO RULE 13a-16 OR 15d-16 OF

THE SECURITIES EXCHANGE ACT OF 1934

For the Date of 23 April 2003

BHP Billiton Limited

ABN 49 004 028 077

600 Bourke Street

Melbourne Victoria 3000

Australia

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F	<input checked="" type="checkbox"/>		Form 40-F	<input type="checkbox"/>
-----------	-------------------------------------	--	-----------	--------------------------

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934

Yes	<input type="checkbox"/>		No	<input checked="" type="checkbox"/>
-----	--------------------------	--	----	-------------------------------------

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b):

23 April 2003
Number: 13/03

BHP BILLITON PRODUCTION REPORT FOR THE QUARTER ENDED 31 MARCH 2003

BHP Billiton today released its production report for the quarter ended 31 March 2003.

- **Oil and Condensate**

production for the quarter of 15.3 million barrels was 22 per cent lower than the March 2002 quarter. The decrease was mainly due to natural field decline in Bass Strait (Australia), Laminaria (Australia) and Griffin (Australia), and higher downtime and natural field decline at Liverpool Bay (UK) and Typhoon (US). This was partly offset by the commencement of production from Boris (US). Production was 7 per cent lower than the December 2002 quarter. The decrease reflected natural field decline in Bass Strait, Laminaria, and Griffin, and maintenance downtime and natural field decline at Liverpool Bay. This was partially offset by the commencement of production from Boris and infill drilling in Bolivia.

- **Natural Gas**

production for the quarter of 66.99 billion cubic feet was in line with the March 2002 quarter, reflecting increased production from Bruce (UK) following removal of contract restrictions and increased demand at Bass Strait. This was partly offset by natural field decline in West Cameron (US) and lower demand from Brazil reducing production from Bolivia. Natural gas production was 3 per cent lower than the December 2002 quarter mainly due to seasonal conditions reducing demand from Bass Strait.

- **Alumina**

production for the quarter of 1.0 million tonnes was in line with the March 2002 and December 2002 quarters. Higher year on year production mainly reflects a return to full production at Alumar (Brazil) following government enforced power rationing.

- **Aluminium**

production for the quarter of 267,000 tonnes was 7 per cent higher than the March 2002 quarter, mainly due to a return to full production at Alumar and Valesul (Brazil) following government enforced power restrictions and increased pot amperage at Hillside (South Africa) in March 2003. Aluminium production was in line with the December 2002 quarter.

- **Copper**

production for the quarter of 231,300 tonnes was 23 per cent higher than the March 2002 quarter due to the ramp up of the Escondida (Chile) Phase IV expansion. This scheduled increase was realised despite the ongoing capacity reductions at the Escondida and Tintaya (Peru) operations that were originally announced in November 2001, and more recently extended in December 2002. Production for the quarter was 3 per cent higher than the December 2002 quarter mainly due to the successful ramp up of the Escondida Phase IV expansion.

- **Iron Ore**

production for the quarter of 17.2 million tonnes (BHP Billiton share) was 5 per cent higher than the March 2002 quarter and 7 per cent lower than the December 2002 quarter. Western Australian iron ore production of 17.7 million tonnes (100 per cent terms) was 7 per cent lower than the December 2002 quarter and 3 per cent higher than the March 2002 quarter. Lower production compared to the December quarter was largely due to the impact of cyclonic weather conditions during January 2003. Shipments of Western Australian iron ore during the quarter continued to reflect strong demand for all products in Asian markets. Samarco (Brazil) production for the March 2003 quarter of 2.0 million tonnes was in line with the December 2002 quarter and 19 per cent higher than the March 2002 quarter, reflecting strong customer demand for pellets during the year.

- **Metallurgical Coal**

production for the quarter of 8.6 million tonnes was in line with the December 2002 quarter and 5 per cent lower than the March 2002 quarter. Queensland (Australia) production of 7.0 million tonnes was 8 per cent higher than the December 2002 quarter and 9 per cent lower than the March 2002 quarter, matching customer demand for the period.

- **Ekati™ Diamond**

(Canada) production for the quarter of 1.02 million carats was 9 per cent higher than the March 2002 quarter mainly due to continued benefits of a processing plant de-bottlenecking program and mining of higher ore grades.

• **Energy Coal**

production for the quarter of 19.7 million tonnes was in line with the March 2002 quarter. Production at Mount Arthur North (Australia) commenced in January 2003 in accordance with customer contractual arrangements and higher production at Cerrejon Coal (Colombia) reflects increased ownership interest purchased in February 2002. These factors were partly offset by lower South African production reflecting the closure of Rietspruit in May 2002 and closure of the Petangis (Indonesia) mine in October 2002.

• **Nickel**

production for the quarter of 18,600 tonnes was 4 per cent higher than the March 2002 quarter, reflecting ramp-up of production at Cerro Matoso Line 2 (Colombia), benefits from ongoing improvement programs at Cerro Matoso and improved efficiencies at Yabulu (Australia). Production was 4 per cent lower than the December 2002 quarter because of scheduled maintenance shutdowns at Cerro Matoso.

• **Ferrochrome**

production for the quarter of 263,000 tonnes was 31 per cent higher than the March 2002 quarter and 14 per cent higher than the December 2002 quarter. The increase is driven by restart of idle furnaces in response to increased market demand, and commissioning of the pelletising plant at Tubatse (South Africa).

	Refer footnotes on page 5.								
(a) Metal production is reported on the basis of payable metal.									
(b) Sulphide production at Escondida and Tintaya was temporarily reduced in November 2001 and January 2002 respectively due to									
weak market conditions. Commercial production of copper cathode commenced at Tintaya in June 2002.									
The Escondida Phase IV expansion was commissioned in October 2002.									
(c) Antamina commenced commercial production in October 2001.									
(d) Production ceased, ahead of mine closure, in February 2003.									
(e) Coal production is reported on the basis of saleable product. Production figures include some thermal coal.									
(f) BHP Billiton acquired its share of South Blackwater in July 2001. South Blackwater is equally owned by BHP Billiton and									

Mitsubishi Development Pty Ltd. Effective January 2002, South Blackwater production is reported in BMA.										
(g) Shown on 100% basis before 20% outside equity interest.										
(h) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.										
(i) Boodarie Iron recommenced production in July 2002 following the suspension of operations due to a tube failure in a gas re-heating furnace.										
(j) Production shown on 86.5% basis after allowing for Indonesian state owned corporation's 13.5% share of production.										
BHP Billiton sold its interest in the Senakin and Satui mines effective 30 November 2001. Production ceased at Petangis in October 2002.										
(k) BHP Billiton increased its interest in Cerrejon Zona Norte to 33.3% from 16.7% effective February 2002.
