PICO HOLDINGS, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of PICO Holdings, Inc. and Subsidiaries (the "Company" or "PICO") have been prepared in accordance with the interim reporting requirements of Form 10-Q, pursuant to the rules and regulations of the United States Securities and Exchange Commission (the "SEC"). Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States of America ("US GAAP") for complete consolidated financial statements.

In the opinion of management, all adjustments and reclassifications considered necessary for a fair and comparable presentation of the financial statements presented have been included and are of a normal recurring nature. Operating results presented are not necessarily indicative of the results that may be expected for the year ending December 31, 2006.

These condensed consolidated financial statements should be read in conjunction with the Company's audited financial statements and notes thereto, contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2005 filed with the SEC.

The preparation of condensed consolidated financial statements in accordance with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses for each reporting period. The significant estimates made in the preparation of the Company's condensed consolidated financial statements relate to the assessment of the carrying value of real estate and water assets, investments, unpaid losses and loss adjustment expenses, deferred income taxes, accounts and loans receivable, and contingent liabilities. While management believes that the carrying values of such assets and liabilities are appropriate as of June 30, 2006 and December 31, 2005, it is reasonably possible that actual results could differ from the estimates upon which the carrying values were based.

Stock-Based Compensation:

On January 1, 2006, PICO adopted Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payment" (FAS 123(R)), that addresses the accounting for share-based payment transactions in which an enterprise receives employee services in exchange for either equity instruments of the enterprise or liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments. The statement eliminates the ability to account for share-based compensation transactions, as PICO formerly did, using the intrinsic value method as prescribed by Accounting Principles Board, or APB, Opinion No. 25, "Accounting for Stock Issued to Employees," and generally requires that such transactions be accounted for using a fair-value-based method and recognized as expenses in the consolidated statement of income.

PICO adopted FAS 123(R) using the modified prospective method which requires the application of the accounting standard as of January 1, 2006. In accordance with the modified prospective method, the consolidated financial statements for prior periods have not been restated to reflect, and do not include, the impact of FAS 123(R). However, as PICO had no unvested stock options outstanding, the adoption of SFAS 123R had no impact on the accompanying condensed consolidated financial statements.

Similarly, because PICO had no stock options outstanding during the three and six months ended June 30, 2005, there was no difference between reported net loss and pro forma net loss (as required to be disclosed under SFAS No. 123)

for that period. However, the Company's subsidiary, HyperFeed Technologies, Inc. has stock options outstanding and recorded stock-based compensation expense of \$77,000 and \$153,000 for the three and six months ended June 30, 2006. HyperFeed's pro forma stock-based compensation expense for the three and six months ended June 30, 2005 was \$47,000 and \$100,000, respectively.

Stock-Based Plans Outstanding:

PICO Holdings, Inc. 2005 Long Term Incentive Plan (the "2005 Plan"). The 2005 Plan provides for the grant or award of various equity incentives to PICO employees, non-employee directors and consultants. A total of 2,654,000 shares of common stock are issuable under the 2005 Plan and it provides for the issuance of incentive stock options, non-statutory stock options, free-standing stock-settled stock appreciation rights, restricted stock awards, performance shares, performance units, restricted stock units, deferred compensation awards and other stock-based awards.

As of June 30, 2006 2,185,965 stock-settled SARs were outstanding with a strike price of \$33.76. The awards are fully vested and exercisable at anytime.

In the three and six months ended June 30, 2005 there is compensation expense recorded for the cash settled SARs issued from the 2003 cash-settled SAR Plan. Compensation cost was measured as the amount by which the quoted market price of PICO stock exceeded the exercise price at the end of the period. Changes in the quoted market price were reflected as an adjustment to the accrued compensation obligation and compensation expense in the Company's consolidated financial statements. The Company recorded compensation expense of \$7.4 million and \$17.3 million for the three and six months ended June 30, 2005 respectively, representing the difference between the exercise price of the vested SARs and the market value of PICO stock at the end of each period. The cash liability for the accrued benefit was transferred to Rabbi Trust accounts in September 2005 leaving no accrued stock appreciation rights payable and increasing deferred compensation in the accompanying consolidated balance sheets.

The Company applies the provisions of Emerging Issues Task Force No. 97-14, *Accounting for Deferred Compensation Arrangements Where Amounts Earned Are Held in a Rabbi Trust and Invested*. In summary, investment returns generated are reported within the Company's financial statements (with a corresponding increase in the trust assets) and an expense is recorded within the caption, "Operating and other costs" for increases in the market value of the assets held with a corresponding increase in the deferred compensation liability (except in the case of PICO stock, which is reported as Treasury Stock, at cost). In the event the trust assets decline in value, the Company will recover previously expensed compensation.

During the three months ended June 30, 2006, the Company distributed treasury stock with a value of \$306,000 that was held in trust accounts for certain Directors of the Company in satisfaction of deferred compensation obligations.

Employee Compensation and Bonus Plans:

In the three months ended June 30, 2006, the Company accrued \$2.1 million in estimated incentive award payable to certain members of management in accordance with the provisions of the Company's bonus plan. The accrual will change based on fluctuation in book value per share of the Company for the remainder of 2006.

For the three and six months ended June 30, 2005, the Company accrued \$2.6 million in estimated incentive award payable in accordance with the provisions of the Company's bonus plan. In addition, \$2.2 million in incentive award was recorded for certain members of Vidler Water Company's ("Vidler") management based on the combined net income of Vidler and Nevada Land and Resource Company ("NLRC") in accordance with the related bonus plan.

Notes and other receivables:

Notes and other receivables primarily consist of installment notes from the sale of real estate. These notes generally have terms ranging from three to ten years, with interest rates of 7% to 10%. The Company records a provision for doubtful accounts to allow for any specific accounts which may be unrecoverable and is based upon an analysis of the Company's prior collection experience, customer creditworthiness, and current economic trends. For the three and six months ended June 30, 2006 and 2005, no significant provision had been recorded.

Reclassifications

Stock appreciation rights expense of \$7.4 million and \$17.3 million in the three and six months ended June 30, 2005, respectively, has been reclassified to operating and other costs in the accompanying condensed consolidated statements of operations.

Recently Issued Accounting Pronouncements

SFAS 153 - In December 2004, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 153, "Exchanges of Nonmonetary Assets - An amendment of APB 29, Accounting for Nonmonetary Transactions" (SFAS 153). This statement amends APB No. 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. This statement was effective beginning in the first quarter of 2006. The adoption of SFAS 153 did not have a material impact on PICO's financial statements.

SFAS 154 - In June 2005, the FASB issued Statement of Financial Accounting Standards No. 154 (SFAS 154), "Accounting Changes and Error Corrections." SFAS 154 changes the requirements for the accounting for and reporting of a change in accounting principle. This Statement requires retrospective application to prior periods' financial statements of a voluntary change in accounting principle unless it is impracticable. In addition, this Statement requires that a change in depreciation, amortization or depletion for long-lived, non-financial assets be accounted for as a change in accounting estimate effected by a change in accounting principle. This new accounting standard was effective January 1, 2006. The adoption of SFAS 154 had no impact on PICO's financial statements.

SFAS 155 - In February 2006, the FASB issued Statement of Financial Accounting Standards No. 155 (SFAS 155), "Accounting for Certain Hybrid Financial Instruments - an amendment of FASB Statements No. 133 and 140." SFAS 155 allows financial instruments that have embedded derivatives to be accounted for as a whole, eliminating the need to separate the derivative from its host, if the holder elects to account for the whole instrument on a fair value basis. This new accounting standard is effective January 1, 2007. The adoption of SFAS 155 is not expected to have an impact on PICO's financial statements.

FIN 48 - In July 2006, the FASB issued FASB Interpretation 48, "Accounting for Income Tax Uncertainties" ("FIN 48"). FIN 48 defines the threshold for recognizing the benefits of tax return positions in the financial statements as "more-likely-than-not" to be sustained by the taxing authority. The recently issued literature also provides guidance on the de-recognition, measurement and classification of income tax uncertainties, along with any related interest and penalties. FIN 48 also includes guidance concerning accounting for income tax uncertainties in interim periods and increases the level of disclosures associated with any recorded income tax uncertainties.

FIN 48 is effective for fiscal years beginning after December 15, 2006. The differences between the amounts recognized in the statements of financial position prior to the adoption of FIN 48 and the amounts reported after adoption will be accounted for as a cumulative-effect adjustment recorded to the beginning balance of retained earnings. PICO has not yet determined the impact, if any, of adopting the provisions of FIN 48 on its financial statements.

2. Net Income Per Share

Basic earnings per share is computed by dividing net earnings by the weighted average shares outstanding during the period. Diluted earnings per share is computed similarly to basic earnings per share except the weighted average shares outstanding are increased to include additional shares from the assumed exercise of any common stock equivalents - PICO's stock-settled stock appreciation rights (SARs) are common stock equivalents for this purpose - using the treasury method, if dilutive. The number of additional shares is calculated by assuming that the SARs were exercised, and that the proceeds were used to acquire shares of common stock at the average market price during the period.

For the three and six months ended June 30, 2006 the Company's stock-settled SARs are not included in the diluted per share calculation because they were out-of-the-money and consequently, their effect on earnings per share is anti-dilutive. In May 2006, the Company issued 2,600,000 shares of common stock in a stock offering.

During the three and six months ended June 30, 2005, the Company had cash-settled stock appreciation rights outstanding. The rights were not considered common stock equivalents for purposes of earnings per share because they were not convertible into common shares of the Company when exercised; the benefit was payable in cash. Consequently, diluted earnings per share was identical to that of the basic earnings per share. In May 2005, the Company issued 905,000 shares of common stock in a stock offering.

3. Comprehensive Income

The Company applies the provisions of SFAS No. 130, "Reporting Comprehensive Income." Comprehensive income for the Company includes foreign currency translation and unrealized holding gains and losses on available for sale securities.

The components of comprehensive income are as follows:

	Three Months Ended June 30, 2006	Three Months Ended June 30, 2005	Six Months Ended June 30, 2006	Six Months Ended June 30, 2005
Net income	\$ 382,183	\$ 23,592,499	\$ 7,600,384	\$ 16,629,151
Net change in unrealized appreciation (depreciation) on available for sale investments	(1,139,841)	10,904,723	(6,747,101)	18,568,665
Net change in foreign currency translation	243,164	(282,438)	(38,314)	(466,396)
Total comprehensive income (loss)	\$ (514,494)	\$ 34,214,784	\$ 814,969	\$ 34,731,420

Total comprehensive income (loss) for the three months ended June 30, 2006 is net of deferred income tax benefit of \$19,000 and the six months ended June 30, 2006 is net of deferred income tax benefit of \$5 million. Total comprehensive income for the three and six months ended June 30, 2005 is net of deferred income tax charges of \$2.3 million and \$4.2 million, respectively.

The components of accumulated other comprehensive income:

	June 30, 2006	December 31, 2005
Unrealized appreciation on available for sale investments	\$ 59,377,311	\$ 66,124,412
Foreign currency translation	(6,070,264)	(6,031,950)
Accumulated other comprehensive income	\$ 53,307,047	\$ 60,092,462

Accumulated other comprehensive income is net of deferred income tax liabilities of \$27.4 million and \$32.7 million at June 30, 2006 and December 31, 2005, respectively.

At June 30, 2006, the Company had \$1.7 million of gross unrealized losses.

Marketable equity securities: The Company's \$188.4 million investments in marketable equity securities consist primarily of investments in common stock of other publicly traded companies. The gross unrealized loss on equity securities was \$532,000 at June 30, 2006 and the majority of such investments were continuously below cost for less than 12 months.

Corporate Bonds and US Treasury Obligations: At June 30, 2006, the bond portfolio consists of \$82.9 million of publicly traded corporate bonds and \$10.5 million US Treasury obligations. The total bond portfolio had gross unrealized losses of \$1.7 million, \$528,000 of which was in a continuous loss position for greater than 12 months. We do not consider these investments to be other than temporarily impaired because we have the intent and ability to hold these bonds until recovery of fair value, which may be maturity. The impairment is mostly due to interest rate fluctuations rather than deterioration of the underlying issuer of the particular bonds.

4. Commitments and Contingencies

During the first quarter of 2006, the Company entered into a Secured Convertible Promissory Note Agreement ("Note") with its 80%-owned consolidated subsidiary, HyperFeed Technologies, Inc. ("HyperFeed"). The maximum borrowing under the note is \$10 million and interest accrues at prime plus 2.75%. The exercise price of the conversion right is the lesser of \$1.05 or 80% of the 5 day average at the exercise date. The Company can elect to convert all or any part of the principal and interest outstanding into common stock of HyperFeed at any time. At June 30, 2006 HyperFeed had borrowed \$6.7 million. The intercompany note and related interest have been eliminated in consolidation.

On June 19, 2006, HyperFeed announced a merger agreement with Exegy, Inc. Under the terms of the merger agreement the security holders of HyperFeed will own 50% of the merged company on a fully-diluted basis, and the security holders of Exegy will own 50% of the merged company on a fully-diluted basis. Prior to the merger, PICO will convert the principal outstanding on the Note into HyperFeed common stock under the terms of the Note. At the time of the merger PICO will also contribute cash to HyperFeed and the holders of Exegy will contribute cash to Exegy, so that HyperFeed and Exegy will each have cash and cash equivalents of at least \$5 million at the time of the merger. If for any reason the proposed merger does not close, PICO has no commitment to HyperFeed for any further funding beyond the \$10 million Note. At the date of filing, HyperFeed has drawn \$7.6 million under the Note. There are no assurances, absent the proposed merger, that additional funding, from any source, will be available to HyperFeed after the full utilization of PICO's Note. HyperFeed believes that without additional funding beyond the Note from PICO or other sources, there may be insufficient capital resources for HyperFeed to fund its operations beyond December 31, 2006.

Construction of the pipeline project to convey water from the Fish Springs Ranch to a storage tank near Reno, Nevada has begun. The total cost of the pipeline project is estimated to be between \$78 million to \$83 million, which will be incurred over the next 12 to 18 months. As of June 30, 2006, approximately \$7.7 million of costs related to the design and construction of the Fish Springs Ranch pipeline project had been capitalized. Vidler has remaining commitments at June 30, 2006 for future capital expenditure of approximately \$10.1 million, and is in the process of obtaining additional bids for the remaining construction. The final regulatory approval required for the pipeline project is a Record of Decision (“ROD”) for a right of way, which was granted on May 31, 2006. Subsequently there have been two protests against the ROD being granted, and the matter is on appeal to the Interior Board of Land Appeals (“IBLA”). The decision of the IBLA is expected during the third quarter of 2006, at which time Vidler expects the ROD to be final.

The Company is subject to various litigation that arises in the ordinary course of its business. Based upon information presently available, management is of the opinion that such litigation will not have a material adverse effect on the consolidated financial position, results of operations or cash flows of the Company.

5. Segment Reporting

PICO Holdings, Inc. is a diversified holding company engaged in five major operating segments: Water Resource and Water Storage Operations, Real Estate Operations in Nevada, Business Acquisitions and Financing, Insurance Operations in Run Off, and HyperFeed Technologies, Inc.

The accounting policies of the reportable segments are the same as those described in the Company's 2005 Annual Report on Form 10-K. Management analyzes segments using the following information:

Segment assets:

	At June 30, 2006	At December 31, 2005
Total Assets:		
Water Resource and Water Storage Operations	\$141,786,145	\$86,353,051
Real Estate Operations in Nevada	67,737,948	66,513,641
Business Acquisitions and Financing	141,636,695	127,980,663
Insurance Operations in Run Off	150,672,697	156,366,749
HyperFeed Technologies, Inc.	4,995,445	4,615,518
	\$506,828,930	\$441,829,622

Segment revenues and income (loss) before taxes and minority interest for the second quarter and first half of 2006 and 2005 were:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
Revenues:				
Water Resource and Water Storage Operations	\$ 673,988	\$94,592,339	\$ 982,284	\$ 94,999,526
Real Estate Operations in Nevada	4,626,254	2,150,567	6,391,587	4,517,959
Business Acquisitions and Financing	3,188,181	2,021,945	12,160,869	3,883,479
Insurance Operations in Run Off	1,059,598	3,401,330	8,259,920	5,992,297
HyperFeed Technologies	883,385	1,044,573	1,882,019	1,933,665
Total Revenues	\$10,431,406	\$103,210,754	\$29,676,679	\$111,326,926
Income (Loss) Before Taxes and Minority Interest:				
Water Resource and Water Storage Operations	\$ (782,481)	\$ 51,832,868	\$(1,961,377)	\$ 50,314,427
Real Estate Operations in Nevada	2,723,539	1,177,510	3,650,393	2,416,112
Business Acquisitions and Financing	879,334	(11,557,502)	7,627,147	(22,604,667)

Insurance Operations in Run Off	748,396	3,154,340	7,549,002	5,407,457
HyperFeed Technologies	(2,446,254)	(1,568,768)	(5,018,587)	(3,268,469)
Income Before Taxes and Minority Interest	\$ 1,122,534	43,038,448	\$11,846,578	\$ 32,264,860

6. Private Placement of Common Stock

On May 4, 2006, the Company completed a sale of 2.6 million shares of newly-issued common stock to institutional investors at a price of \$30 per share. After placement costs, the net proceeds to the Company were \$73.9 million. The Company filed a registration statement on Form S-3 to register the shares under the Securities Act, which became effective in June 2006.

7. Subsequent Events

In July 2006, Nevada Land and Resource Company and Vidler Water Company entered into an agreement with Southern Nevada Water Authority to sell Spring Valley Ranch and related water assets for \$22 million. Closing of the sale is expected to occur on August 21, 2006. It is anticipated that if the sale closes, the net gain before tax will be approximately \$17 million in the quarter ended September 30, 2006.

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of financial condition and results of operations should be read in conjunction with the Unaudited Condensed Consolidated Financial Statements and Notes thereto included elsewhere in this report and the Consolidated Financial Statements and Notes thereto included in our annual report on Form 10-K.

This Form 10-Q (including the "Management's Discussion and Analysis of Financial Condition and Results of Operations" section) contains "forward-looking statements" regarding our business, financial condition, results of operations, and prospects, including, without limitation, statements about our expectations, beliefs, intentions, anticipated developments, and other information concerning future matters. Words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates," and similar expressions or variations of such words are intended to identify forward-looking statements, but are not the exclusive means of identifying forward-looking statements in this Form 10-Q.

Although forward-looking statements in the Form 10-Q represent the good faith judgment of our management, such statements can only be based on facts and factors currently known by us. Consequently, forward-looking statements are inherently subject to risks and uncertainties, and the actual results and outcomes could differ from those discussed in or anticipated by the forward-looking statements. Factors that could cause or contribute to such differences in results and outcomes include, without limitation, those discussed under the heading "Risk Factors" and elsewhere in our 2005 Annual Report on Form 10-K. Readers are urged not to place undue reliance on these forward-looking statements, which speak only as of the date of this Form 10-Q. We undertake no obligation to revise or update any forward-looking statement in order to reflect any event or circumstance which may arise after the date of this Form 10-Q. Readers are urged to carefully review and consider the various disclosures made in this Form 10-Q and our 2005 Annual Report on Form 10-K, which attempt to advise interested parties of the risks and factors which may affect our business, financial condition, results of operations, and prospects.

INTRODUCTION

PICO Holdings, Inc. (PICO and its subsidiaries are referred to as "PICO" and "the Company," and by words such as "we" and "our") is a diversified holding company. PICO seeks to acquire businesses and interests in businesses which we identify as undervalued based on fundamental analysis--that is, our assessment of what the business is worth, based on the private market value of its assets, earnings, and cash flow. Typically, the businesses will be generating free cash flow and have a low level of debt, or, alternatively, strong interest coverage ratios or the ability to realize surplus assets. As well as being undervalued, the business must have special qualities such as unique assets, a potential catalyst for change, or be in an industry with attractive economics. We are also interested in acquiring businesses and interests in businesses where there is significant unrecognized value in land and other tangible assets.

We have acquired businesses and interests in businesses by the acquisition of private companies, and the purchase of shares in public companies, both directly through participation in financing transactions and through open market purchases. When acquisitions become core operations, we become actively involved in the management and strategic direction of the business.

Our objective is to generate superior long-term growth in shareholders' equity, as measured by book value per share. We anticipate that PICO's earnings will fluctuate, and that the results for any one quarter or year are not necessarily indicative of our future performance.

Our business is separated into five major operating segments:

- Water Resource and Water Storage Operations;
- Real Estate Operations in Nevada;

- Business Acquisitions and Financing (contains businesses, interests in businesses, and other parent company assets);
 - Insurance Operations in “Run Off”; and
 - HyperFeed Technologies, Inc. (“HyperFeed”).

Currently our major consolidated subsidiaries are:

- Vidler Water Company, Inc. (“Vidler”), which develops and owns water resources and water storage operations in the southwestern United States, primarily in Nevada and Arizona;
- Nevada Land & Resource Company, LLC (“Nevada Land”), which owns approximately 700,000 acres of land in Nevada, and the mineral rights and water rights related to the land owned;
- Physicians Insurance Company of Ohio (“Physicians”), which is running off its medical professional liability insurance loss reserves;
- Citation Insurance Company (“Citation”), which is running off its historic property & casualty insurance and workers’ compensation loss reserves;
 - Global Equity AG, which holds our interest in Jungfraubahn Holding AG; and
- HyperFeed, which is a leading developer of ticker plant technologies, data distribution, smart order routing, and managed data services to the financial community.

RESULTS OF OPERATIONS--THREE AND SIX MONTHS ENDED JUNE 30, 2006 AND 2005

Shareholders’ Equity

At June 30, 2006, PICO had shareholders’ equity of \$375.9 million (\$23.67 per share), compared to \$302.2 million (\$22.77 per share) at March 31, 2006, and \$300.9 million (\$22.67 per share) at December 31, 2005. Book value per share increased by \$1.00, or 4.4%, during the first half of 2006, and by \$0.90, or 4%, during the second quarter of 2006.

During the second quarter of 2006, shareholders’ equity increased by \$73.7 million, primarily due to the issuance of 2.6 million new shares for net proceeds of \$73.9 million.

The \$75 million increase in shareholders’ equity during the first half of 2006 also resulted primarily from the issuance of 2.6 million new shares for net proceeds of \$73.9 million. Although PICO reported \$7.6 million in net income for the six months, this only had a minor effect on shareholders’ equity, as most of net income came from realized gains, which were largely included in shareholders’ equity in prior periods as unrealized gains.

Comprehensive Income

In accordance with Statement of Financial Accounting Standards No. 130, “Reporting Comprehensive Income,” PICO reports comprehensive income as well as net income from the Condensed Consolidated Statement of Operations. Comprehensive income measures changes in shareholders’ equity, and includes unrealized items which are not recorded in the Consolidated Statement of Operations, for example, foreign currency translation and the change in investment gains and losses on available-for-sale securities.

For the second quarter of 2006, PICO recorded a comprehensive loss of \$514,000, principally due to a \$1.1 million net decrease in unrealized appreciation in investments. The reduction in unrealized appreciation in investments during the second quarter primarily resulted from a decrease in the market value of listed stocks, which our management believes reflects typical fluctuation in the stock market.

For the first half of 2006, PICO recorded comprehensive income of \$815,000, principally represented by the first half’s \$7.6 million in net income, which was largely offset by a \$6.7 million net reduction in unrealized appreciation in investments. The reduction in unrealized appreciation in investments during the first half of 2006 primarily resulted from a decrease in unrealized appreciation in listed stocks, due to the sale of our holdings in Anderson-Tully Company (“Anderson-Tully”) during the first quarter of 2006. At December 31, 2005, shareholders’ equity included an

unrealized gain, net of deferred taxes, on Anderson-Tully, which was realized during the first quarter of 2006.

Net Income

Segment revenues and income (loss) before taxes and minority interest for the second quarter and first half of 2006 and 2005 were:

	Three Months Ended		Six Months Ended June	
	June 30,		30,	
	2006	2005	2006	2005
Revenues:				
Water Resource and Water Storage Operations	\$ 674,000	\$ 94,592,000	\$ 982,000	\$ 95,000,000
Real Estate Operations in Nevada	4,626,000	2,151,000	6,392,000	4,518,000
Business Acquisitions and Financing	3,188,000	2,022,000	12,161,000	3,883,000
Insurance Operations in Run Off	1,060,000	3,401,000	8,260,000	5,992,000
HyperFeed Technologies	883,000	1,045,000	1,882,000	1,934,000
Total Revenues	\$10,431,000	\$103,211,000	\$29,677,000	\$111,327,000
Income (Loss) Before Taxes and Minority Interest:				
Water Resource and Water Storage Operations	\$(782,000)	\$ 51,833,000	\$(1,961,000)	\$ 50,314,000
Real Estate Operations in Nevada	2,724,000	1,178,000	3,650,000	2,416,000
Business Acquisitions and Financing	879,000	(11,558,000)	7,627,000	(22,604,000)
Insurance Operations in Run Off	748,000	3,154,000	7,549,000	5,407,000
HyperFeed Technologies	(2,446,000)	(1,569,000)	(5,018,000)	(3,268,000)
Income Before Taxes and Minority Interest	\$ 1,123,000	\$ 43,038,000	\$11,847,000	\$ 32,265,000

Second quarter revenues decreased \$92.8 million and first-half revenues decreased \$81.7 million year over year. This was primarily due to Vidler's sale of real estate and water assets in the Harquahala Valley Irrigation District of Arizona for \$94.4 million, which was included in revenues in the second quarter and first half of 2005.

Second quarter costs and expenses decreased \$50.9 million and first-half costs and expenses decreased \$62.2 million year over year. In the second quarter and first half of 2005, costs and expenses included \$38.9 million for the cost of the real estate and water assets sold in the Harquahala Valley. In 2005, costs and expenses also included Stock Appreciation Rights ("SAR") expense of \$7.4 million in the second quarter and \$17.3 million in the first half, compared to zero in 2006.

PICO recorded income before taxes and minority interest of \$1.1 million in the second quarter of 2006, compared to income of \$43 million in the second quarter of 2005. The \$41.9 million year over year decrease in second quarter income before taxes and minority interest primarily resulted from a \$52.6 million decrease in Water segment income due to the \$55.5 million contribution to income from the sale of real estate and water assets in the Harquahala Valley Irrigation District in 2005. In addition, the Insurance Operations in Run Off segment income decreased by \$2.4 million, primarily due to a \$2.6 million decrease in realized gains year over year. The Business Acquisitions & Finance segment result improved by \$12.4 million year over year. This was primarily due a \$7.4 million expense related to SAR in the second quarter of 2005 which did not recur in 2006 and to a \$3.9 million change year over year in an expense related to foreign currency. In addition, Real Estate Operations in Nevada segment income increased by \$1.5 million year over year, primarily due to a \$1.2 million increase in gross margin from land sales.

After a provision for taxes of \$753,000, PICO reported net income of \$382,000 (\$0.03 per share) for the second quarter of 2006, all from continuing operations.

For the second quarter of 2005, after a \$19.6 million provision for taxes, PICO generated net income of \$23.6 million (\$1.83 per share), consisting of income of \$23.6 million (\$1.83 per share) from continuing operations and a loss from discontinued operations of \$17,000 after-tax (\$0.00 per share).

PICO recorded income before taxes and minority interest of \$11.8 million in the second quarter of 2006, compared to income of \$32.3 million in the second quarter of 2005. The \$20.4 million year over year decrease in first half income before taxes and minority interest primarily resulted from a \$52.2 million decrease in Water segment income due to the \$55.5 million contribution to income from the sale of real estate and water assets in the Harquahala Valley Irrigation District in 2005, which did not recur in 2006. The Business Acquisitions & Finance segment result improved by \$30.2 million year over year. This was primarily due to a \$17.3 million expense related to SAR in the first half of 2005, which did not recur in 2006, as well as a \$6.8 million year over year increase in realized gains, and a \$5.3 million change year over year in the foreign currency expense.

After a provision for taxes of \$4.4 million, in the first half of 2006, PICO reported net income of \$7.6 million (\$0.54 per share), consisting of income of \$7.4 million (\$0.53 per share) from continuing operations, and a gain from discontinued operations of \$165,000 after-tax (\$0.01 per share).

For the first half of 2005, after a \$16.6 million provision for taxes, PICO reported net income of \$16.6 million (\$1.32 per share), consisting of \$16.7 million (\$1.32 per share) in income from continuing operations, partially offset by income from discontinued operations of \$40,000 after-tax (\$0.00 per share).

WATER RESOURCE AND WATER STORAGE OPERATIONS

	Three Months Ended June 30, 2006		Six Months Ended June 30, 2005	
Revenues:				
Sale of Real Estate and Water Assets	\$ 7,000	\$94,395,000	\$ 35,000	\$94,547,000
Lease of Water	21,000	21,000	43,000	41,000
Lease of Agricultural Land	20,000	129,000	40,000	258,000
Interest	577,000	41,000	883,000	94,000
Other	49,000	6,000	(19,000)	60,000
Segment Total Revenues	\$674,000	\$94,592,000	\$982,000	\$95,000,000
Expenses:

Overhead Expenses	(563,000)	(2,555,000)	(1,051,000)	(3,020,000)
Project Expenses	(567,000)	(861,000)	(1,291,000)	(1,804,000)
Segment Total Expenses	\$(1,456,000)	\$(42,759,000)	\$(2,943,000)	\$(44,686,000)
Income (Loss) Before Tax	\$(782,000)	\$51,833,000	\$(1,961,000)	\$50,314,000

Water Resource and Water Storage Operations are primarily conducted through Vidler Water Company.

Over the past 5 years, several large sales of real estate and water assets have generated the bulk of Vidler's revenues. Since the date of closing determines the accounting period in which the sales revenues and gross margin are recorded, Vidler's reported revenues and income fluctuate from quarter to quarter depending on the dates when specific transactions close. Consequently, sales of real estate and water assets for any individual quarter are not indicative of likely revenues for future quarters or the full financial year.

Sale of Harquahala Valley Irrigation District Real Estate and Water Assets

In June 2005, Vidler closed on the sale of real estate and water assets in the Harquahala Valley Irrigation District of Arizona to a real estate developer. The sale of the Harquahala Valley Irrigation District real estate and water assets added \$94.4 million to revenues and approximately \$55.5 million to income. After the repayment of borrowings collateralized by the properties, the exercise of options to acquire certain farms that we sold in the transaction, and closing and other costs, Vidler received net cash proceeds of \$83.4 million.

Segment Results

In the second quarter of 2006, Vidler generated \$674,000 in revenues. The largest revenue item was \$577,000 of interest earned from the temporary investment of funds in money market funds and corporate bonds maturing in 2006 and 2007. After operating expenses of \$1.5 million, Vidler generated a loss before taxes of \$782,000 for the second quarter of 2006.

In the second quarter of 2005, Vidler generated \$94.6 million in revenues. The sale of the Harquahala Valley Irrigation District real estate and water assets added \$94.4 million to revenues and approximately \$55.5 million to income.

Project Expenses consist of costs related to the development of existing water resources, such as maintenance and professional fees. Project expenses are recorded as expenses as incurred, and could fluctuate from period to period depending on activity regarding Vidler's various water resource projects. Costs related to the development of water resources which meet the criteria to be recorded as assets in our financial statements are capitalized to the cost of the asset, and amortized against matching revenues once revenues are generated.

Project Expenses were \$567,000 in the second quarter of 2006, compared to \$861,000 in the second quarter of 2005. The \$294,000 year over year decrease was principally due to a reduction in legal, engineering, and consulting expenses, which were higher in 2005 due to the preparation of an Environmental Impact Study related to Fish Springs Ranch.

Overhead Expenses consist of costs which are not related to the development of specific water resources, such as salaries and benefits, rent, and audit fees. Overhead Expenses were \$563,000 in the second quarter of 2006, compared to \$2.6 million in the second quarter of 2005. In the second quarter of 2005, Overhead Expenses included the accrual of \$2.2 million in incentive compensation for Vidler management, compared to \$30,000 in the second quarter of 2006.

In the first half of 2006, Vidler generated \$982,000 in revenues. The largest revenue item was \$883,000 of interest earned from the temporary investment of funds in money market funds and corporate bonds maturing in 2006 and 2007. After operating expenses of \$2.9 million, Vidler generated a loss before taxes of \$2 million for the first half of 2006.

In the first half of 2005, Vidler generated \$95 million in revenues. The sale of the Harquahala Valley Irrigation District real estate and water assets added \$94.4 million to revenues and approximately \$55.5 million to income.

Project Expenses were \$1.8 million in the first half of 2006, compared to \$1.3 million in the first half of 2005. The \$513,000 year over year decrease was principally due to a reduction in legal, engineering, and consulting expenses, which were higher in 2005 due to the preparation of an Environmental Impact Study related to Fish Springs Ranch.

Overhead Expenses were \$3 million in the first half of 2006, compared to \$1.1 million in the second quarter of 2005. In the first half of 2005, Overhead Expenses included the accrual of \$2.2 million in incentive compensation for Vidler management, compared to \$30,000 in the first half of 2006.

Fish Springs Ranch

During the second quarter of 2006, we sold 2.6 million shares of newly-issued PICO common stock in a private placement for net proceeds of \$73.9 million.

Vidler has a 51% membership interest in Fish Springs Ranch LLC, and is the managing partner. The funds raised in the stock offering have largely been contributed to Vidler, and the primary use will be to design and construct a pipeline to convey 8,000 acre-feet of water annually from Fish Springs Ranch to a central storage tank in northern Reno, Nevada, which could supply water to the new projects of several developers. The total cost of the pipeline project is estimated at \$78 million to \$83 million, over the next 12 to 18 months. Design of the pipeline project is nearly complete. As of June 30, 2006, Vidler has outlaid approximately \$7.7 million for the pipeline project, which has been capitalized (i.e., recorded as an asset on our balance sheet).

The final regulatory approval required for the pipeline project is a Record of Decision ("ROD") for a right of way, which was granted on May 31, 2006. Subsequently there have been two protests against the ROD being granted, and the matter is on appeal to the Interior Board of Land Appeals ("IBLA"). The decision of the IBLA is expected during the third quarter of 2006, at which time Vidler expects the ROD to be final.

REAL ESTATE OPERATIONS IN NEVADA

	Three Months Ended		Six Months Ended June	
	June 30,		30,	
	2006	2005	2006	2005
Revenues:				
Sale of Land	\$3,826,000	\$1,775,000	\$5,054,000	\$3,778,000
Lease and Royalty	407,000	141,000	552,000	286,000
Interest and Other	393,000	235,000	786,000	454,000
Segment Total Revenues	\$4,626,000	\$2,151,000	\$6,392,000	\$4,518,000

Segment Total Expenses	\$(1,902,000)	\$(973,000)	\$(2,742,000)	\$(2,102,000)
Income Before Tax	\$2,724,000	\$1,178,000	\$3,650,000	\$2,416,000

Real Estate Operations in Nevada are primarily conducted through Nevada Land & Resource Company, LLC.

Nevada Land recognizes revenue from land sales, and the resulting gross profit or loss, when the sales transactions close. On closing, the entire sales price is recorded as revenue, and a gross margin is recognized depending on the cost basis attributed to the land. Since the date of closing determines the accounting period in which the sales revenue and gross margin are recorded, Nevada Land's reported revenues and income fluctuate from quarter to quarter depending on the dates when specific transactions close. Consequently, land sales revenues for any individual quarter are not indicative of likely revenues for future quarters or the full financial year.

In the second quarter of 2006, segment total revenues were \$4.6 million. Nevada Land sold approximately 51,539 acres of land for \$3.8 million. The average sales price was \$74 per acre, and our average basis in the land sold was \$25 per acre. The gross margin on land sales was \$2.5 million, which represents a gross margin percentage of 66%.

In the second quarter of 2005, segment total revenues were \$2.2 million. Nevada Land sold approximately 17,091 acres of land for \$1.8 million. The average sales price was \$104 per acre, and our average basis in the land sold was \$27 per acre. The gross margin on land sales was \$1.3 million, which represents a gross margin percentage of 73.7%.

The second quarter segment result improved by \$1.5 million year over year, principally due to a \$1.2 million higher gross margin from land sales year over year.

For the first half of 2006, segment total revenues were \$6.4 million. Nevada Land sold approximately 65,902 acres of land for \$5.1 million. The average sales price was \$77 per acre, and our average basis in the land sold was \$25 per acre. The gross margin on land sales was \$3.4 million, which represents a gross margin percentage of 66.9%.

For the first half of 2005, segment total revenues were \$4.5 million. Nevada Land sold approximately 38,917 acres of land for \$3.8 million. The average sales price was \$97 per acre, and our average basis in the land sold was \$29 per acre. The gross margin on land sales was \$2.6 million, which represents a gross margin percentage of 69.9%.

The first half segment result improved by \$1.2 million year over year, principally due to a \$741,000 higher gross margin from land sales year over year. The remainder of the improvement in the first half segment result was due to a \$598,000 increase in other revenues year over year, which exceeded a \$105,000 increase in other operating expenses year over year. The increase in other revenues resulted from increases of \$266,000 in lease and royalty revenues, and \$158,000 in interest and other revenues.

Demand continues to be strong for our real estate holdings. We currently have approximately 58,000 acres of land in escrow for \$5.9 million that we expect to close by the end of 2006.

BUSINESS ACQUISITIONS AND FINANCING

	Three Months Ended		Six Months Ended June	
	June 30, 2006	2005	30, 2006	2005
Revenues:				
Realized Gains On Sale of Holdings	\$ 541,000	\$ 333,000	\$8,698,000	\$1,887,000
Investment Income	2,551,000	1,646,000	3,266,000	1,906,000
Other	96,000	43,000	197,000	90,000
Segment Total Revenues	\$3,188,000	\$2,022,000	\$12,161,000	\$3,883,000
Segment Total Expenses	\$(2,309,000)	\$(13,580,000)	\$(4,534,000)	\$(26,487,000)
Income (Loss) Before Tax	\$879,000	\$(11,558,000)	\$7,627,000	\$(22,604,000)

This segment contains businesses, interests in businesses, and other parent company assets. Revenues and results in this segment vary considerably from period to period, primarily due to fluctuations in net realized gains or losses on the sale of holdings, and are not necessarily comparable from year to year.

The largest holding in this segment is Jungfraubahn Holding AG, which has a market value and carrying value of \$44.2 million (before taxes) at June 30, 2006.

For the second quarter of 2006, Business Acquisitions and Financing segment revenues were \$3.2 million. Investment income was \$2.6 million, including \$1.2 million from Jungfraubahn Holding AG's annual dividend payment for 2005 which was declared in April 2006 and paid in May 2006. Net gains of \$541,000 were realized gains on the sale of various securities. After expenses of \$2.3 million, the segment generated income before taxes of \$879,000 for the second quarter of 2006.

In the second quarter of 2005, Business Acquisitions and Financing segment revenues were \$2 million. Investment income was \$1.6 million, including \$1.1 million from Jungfraubahn Holding AG's annual dividend payment. Net gains of \$333,000 were realized gains on the sale of various securities. After total expenses of \$13.6 million, the segment incurred a loss before taxes of \$11.6 million for the second quarter of 2005.

Second quarter segment revenues increased by \$1.2 million year over year, principally due to \$1 million higher investment income. The increase in investment income was primarily due to higher interest income as a result of larger sums invested and rising interest rates.

Second quarter segment expenses decreased by \$11.3 million year over year. The expenses recorded in this segment primarily consist of holding company costs which are not allocated to our other segments, for example, rent for our head office.

Our interests in Swiss public companies are held directly and indirectly by Global Equity AG, a wholly owned subsidiary which is incorporated in Switzerland. Part of Global Equity AG's funding comes from a loan from PICO, which is denominated in Swiss Francs. Under GAAP, we are required to record a benefit (expense) through the statement of operations to reflect fluctuation in the exchange rate between the Swiss Franc and the U.S. dollar, although there was no net impact on shareholders' equity before related tax effects. A exchange rate benefit of \$2.1 million, which reduced segment expenses, was recorded in PICO's statement of operations in the second quarter of 2006, compared to a \$1.7 million exchange rate expense in the second quarter of 2005.

In the second quarter of 2005, segment expenses also included a \$7.4 million expense related to the PICO Holdings, Inc. Stock Appreciation Rights ("SAR") Program, which was still in effect during the first half of 2005. Under the SAR

program, the change in the “in the money” amount (i.e., the difference between the market value of PICO stock and the exercise price of the SAR) of SAR outstanding during each quarter was recorded through the consolidated statement of operations. An increase in the “in the money” amount of SAR (i.e., if the price of PICO stock rose during the quarter) was recorded as an expense. Substantially all of the second quarter 2005 \$7.4 million SAR expense resulted from the \$3.85 per share increase in the PICO stock price during the second quarter of 2005. The SAR Program was amended in the third quarter of 2005, and the spread value of the SAR outstanding was monetized based on the last sale price of PICO stock on September 21, 2005.

During the fourth quarter of 2005, the Company’s shareholders approved the PICO Holdings, Inc. 2005 Long-Term Incentive Plan (“2005 Plan”), and 2,185,965 stock-based SAR, with an exercise price of \$33.76, were issued to various of the Company’s officers, employees, and non-employee Directors. When stock-based SAR are exercised, new shares of stock will be issued to the participant to satisfy the spread value of the SAR being exercised. No expense was recorded in the second quarter and first half of 2006 related to the 2005 Plan, as all of the stock-based SAR that have been granted are fully vested.

In the first half of 2006, Business Acquisitions and Financing segment revenues were \$12.2 million. Net realized gains were \$8.7 million, primarily represented by gains of \$6.8 million on the sale of our holding in Anderson-Tully Company, and \$1 million on the sale of part of our holding in Raetia Energie AG. Investment income was \$3.3 million. After total expenses of \$4.5 million, the segment generated income before taxes of \$7.6 million for the first half of 2006. Segment expenses were reduced by a \$2.4 million exchange rate benefit, as discussed above.

Anderson-Tully was a timber Real Estate Investment Trust (“REIT”), which owned approximately 325,000 acres of high-quality timberlands in the southeastern United States. During 2003 and 2004, we accumulated almost 10% of Anderson-Tully at an average cost of approximately \$242,000 per share. During the first quarter of 2006, Anderson-Tully was acquired by a timberlands investment management organization, for approximately \$446,000 per share.

In the first half of 2005, Business Acquisitions and Financing segment revenues were \$3.9 million, principally consisting of \$1.9 million in net realized gains, and investment income of \$1.9 million. After total expenses of \$26.5 million, the segment incurred a loss before taxes of \$22.6 million for the first half of 2005.

First half segment revenues increased by \$8.3 million year over year, principally due to \$6.8 million higher realized gains and \$1.4 million higher investment income, as discussed above.

First half segment expenses decreased by \$22 million year over year. In 2005, segment expenses included SAR expense of \$17.3 million compared to zero in 2006. The remainder of the reduction in expenses is due to a \$5 million year over year change in the exchange rate expense (benefit), from a \$2.6 million expense in the first half of 2005 to a \$2.4 million benefit, which reduced other expenses, in 2006.

During the first quarter of 2006, PICO entered into a second convertible promissory note agreement with our subsidiary, HyperFeed Technologies, Inc. The maximum amount that can be borrowed under the note is \$10 million. The principal outstanding on the note was \$6.7 million at June 30, 2006. Interest is payable on the outstanding balance at the prime rate plus 2.75%, and PICO has the right to convert all or part of the amount due into HyperFeed common stock. The conversion price is the lower of either \$1.05, or 80% of the 5-day moving average price of HyperFeed common stock on the conversion date. In the accompanying consolidated financial statements, the principal and interest owing from HyperFeed to PICO are eliminated on consolidation.

On June 19, 2006, HyperFeed announced a merger agreement with Exegy, Inc. The security holders of HyperFeed will own 50% of the merged company on a fully-diluted basis, and the security holders of Exegy will own 50% of the merged company on a fully-diluted basis. Prior to the merger, we will convert the principal outstanding on the convertible promissory note into HyperFeed common stock under the terms of the note. At the time of the merger,

PICO will contribute cash to HyperFeed and the holders of Exegy will contribute cash to Exegy, so that HyperFeed and Exegy will each have cash and cash equivalents of at least \$5 million at the time of the merger.

On June 26, 2006, HyperFeed filed a Schedule 14C Information Statement with the SEC, regarding a proposed 1 for 1,000 reverse stock split, which would result in HyperFeed ceasing to file periodic reports with the SEC, and becoming a private company. HyperFeed is responding to SEC staff comments on the Schedule 14C.

INSURANCE OPERATIONS IN RUN OFF

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2006	2005	2006	2005
Revenues:				
Investment Income	\$ 913,000	\$ 700,000	\$1,584,000	\$1,365,000
Realized Investment Gains	147,000	2,701,000	6,676,000	4,627,000
Segment Total Revenues	\$1,059,000	\$3,401,000	\$8,260,000	\$5,992,000
Expenses:				
Operating and Underwriting Expenses	\$(311,000)	\$(247,000)	\$(711,000)	\$(585,000)
Segment Total Expenses	\$(311,000)	\$(247,000)	\$(711,000)	\$(585,000)
Income Before Taxes:				
Physicians Insurance Company of Ohio	\$656,000	\$2,160,000	\$5,945,000	\$4,326,000
Citation Insurance Company	96,000	994,000	1,604,000	1,081,000
Segment Income Before Tax	\$748,000	\$3,154,000	\$7,549,000	\$5,407,000

This segment consists of Physicians Insurance Company of Ohio and Citation Insurance Company. Both Physicians and Citation are in “run off.” This means that the companies are handling and resolving claims on expired policies, but not writing new business.

Revenues and results in this segment vary considerably from period to period, primarily due to fluctuations in net realized gains or losses on the sale of holdings, and are not necessarily comparable from year to year. Typically, most of the revenues of a “run off” insurance company come from investment income, which is expected to decline over time as fixed-income securities mature or are sold to provide the funds to pay claims and expenses.

The Insurance Operations in Run Off segment generated total revenues of \$1.1 million in the second quarter of 2006, compared to \$3.4 million in the second quarter of 2005. Investment income was \$913,000 in the second quarter of 2006, compared to \$700,000 in the second quarter of 2005. Realized investment gains were \$147,000 in the second quarter of 2006, compared to \$2.7 million in the second quarter of 2005.

Operating and underwriting expenses were \$311,000 in the second quarter of 2006, compared to \$247,000 in the second quarter of 2005. Consequently, segment income decreased from \$3.2 million in the second quarter of 2005 to \$748,000 in the second quarter of 2006, primarily due to a \$2.6 million reduction in realized gains.

The Insurance Operations in Run Off segment generated total revenues of \$8.3 million in the first half of 2006, compared to \$6 million in the first half of 2005. Investment income was \$1.6 million in both the first half of 2006, compared to \$1.4 million in the first half of 2005. Realized investment gains were \$6.7 million in the first half of 2006, compared to \$4.6 million in the first half of 2005.

Operating and underwriting expenses were \$711,000 in the first half of 2006, compared to \$585,000 in the first half of 2005. Consequently, primarily as a result of the \$2.1 million year over year increase in realized gains, segment income increased from \$5.4 million in the first half of 2005 to \$7.5 million in the first half of 2006.

On February 7, 2005, we reported on Schedule 13G that Physicians and Citation own a total of 310,000 common shares of Consolidated-Tomoka Land Co. (Amex: CTO), representing approximately 5.5% of CTO. Consolidated-Tomoka owns approximately 12,000 acres of land in and around Daytona Beach, Florida, and a portfolio of income properties in the southeastern United States. The investment was purchased between September

2002 and February 2004 at a cash cost of \$6.5 million, or approximately \$20.90 per CTO share. At June 30, 2006, the market value and carrying value of the investment was \$16.9 million (before taxes).

No other investments of the insurance companies have reached a threshold requiring public disclosure under the securities laws of the countries where the investments are held.

Physicians Insurance Company of Ohio

During the second quarter of 2006, Physicians generated total revenues of \$811,000, including realized gains of \$146,000. Operating and underwriting expenses were \$158,000, resulting in income before taxes of \$653,000.

During the first half of 2006, Physicians generated total revenues of \$6.3 million, including realized gains of \$5.2 million. Operating and underwriting expenses were \$363,000, resulting in income before taxes of \$5.9 million.

PHYSICIANS INSURANCE COMPANY OF OHIO -- LOSS AND LOSS ADJUSTMENT EXPENSE RESERVES (In Millions)

	June 30, 2006	March 31, 2006	December 31, 2005
Direct Reserves	\$12.6	\$12.7	\$12.9
Ceded Reserves	(1.0)	(1.0)	(1.0)
Net Medical Professional Liability Insurance Reserves	\$11.6	\$11.7	\$11.9

At June 30, 2006, Physicians' loss and loss adjustment reserves were \$11.6 million, net of reinsurance, compared to \$11.7 million at March 31, 2006, and \$11.9 million at December 31, 2005. Reserves decreased by \$150,000 during the second quarter and \$263,000 during the first half, due to the payment of losses and loss adjustment expenses. Recoveries from reinsurance companies were immaterial in both periods. No unusual trends in claims were noted.

Citation Insurance Company

During the second quarter of 2006, Citation generated total revenues of \$249,000. Operating and underwriting expenses were \$153,000, resulting in income before taxes of \$96,000.

During the first half of 2006, Citation generated total revenues of \$2 million, including realized gains of \$1.5 million. Operating and underwriting expenses were \$348,000, resulting in income before taxes of \$1.6 million.

CITATION INSURANCE COMPANY -- LOSS AND LOSS ADJUSTMENT EXPENSE RESERVES (In Millions)

	June 30, 2006	March 31, 2006	December 31, 2005
Property & Casualty Insurance			
Direct Reserves	\$7.6	\$7.9	\$8.2
Ceded Reserves	(1.8)	(1.7)	(1.8)
Net Property & Casualty Insurance Reserves	\$5.8	\$6.2	\$6.4
Workers' Compensation Insurance			
Direct Reserves	\$24.4	\$24.9	\$25.6
Ceded Reserves	(12.4)	(12.8)	(13.1)
	\$12	\$12.1	\$12.5

Net Workers' Compensation Insurance
Reserves

Total Reserves	\$17.8	\$18.3	\$18.9
-----------------------	--------	--------	--------

At June 30, 2006, Citation's claims reserves were \$17.8 million, net of reinsurance, consisting of \$5.8 million in net property and casualty insurance reserves and \$12 million in net workers' compensation reserves. At March 31, 2006, Citation's claims reserves were \$18.3 million, net of reinsurance, consisting of \$6.2 million in net property and casualty insurance reserves and \$12.1 million in net workers' compensation reserves. At December 31, 2005, Citation's claims reserves were \$18.9 million, net of reinsurance, consisting of \$6.4 million in net property and casualty insurance reserves and \$12.5 million in net workers' compensation reserves. There were no unusual trends in claims during the first half of 2006.

During the first half of 2006, Citation's net property and casualty insurance reserves declined by \$619,000 due to the payment of \$638,000 in direct losses and loss adjustment expenses, partially offset by the recovery of approximately \$19,000 from reinsurance companies. During the second quarter of 2006, Citation's net property and casualty insurance reserves declined by \$307,000.

During the first half of 2006, Citation's net workers' compensation reserves declined by \$469,000 due to the payment of \$1.2 million in direct losses and loss adjustment expenses, partially offset by the recovery of approximately \$733,000 from reinsurance companies. During the second quarter of 2006, Citation's net workers' compensation reserves decreased \$120,000.

12

HYPERFEED TECHNOLOGIES

	Three months ended		Six months ended June	
	June 30,		30,	
	2006	2005	2006	2005
Revenues:				
Service	\$882,000	\$1,045,000	\$1,880,000	\$1,934,000
Investment Income	1,000		2,000	
Segment Total Revenues	\$883,000	\$1,045,000	\$1,882,000	\$1,934,000
Expenses:				
Cost of service	\$(441,000)	\$(279,000)	\$(887,000)	\$(562,000)
Depreciation and amortization	(130,000)	(196,000)	(292,000)	(409,000)
Other	(2,758,000)	(2,139,000)	(5,721,000)	(4,231,000)
Segment Total Expenses	\$(3,329,000)	\$(2,614,000)	\$(6,900,000)	\$(5,202,000)
Segment Loss Before Taxes and	\$(2,446,000)	\$(1,569,000)	\$(5,018,000)	\$(3,268,000)
Minority Interest				

During the second quarter of 2006, HyperFeed generated \$883,000 in revenues. Service revenues were \$882,000 and the costs of service were \$441,000, resulting in gross margin of \$441,000. After the deduction of \$2.9 million in other operating expenses, HyperFeed generated a segment loss before taxes and minority interest of \$2.4 million.

During the second quarter of 2005, HyperFeed generated \$1 million in revenues. Service revenues were \$1 million and the costs of service were \$279,000, resulting in gross margin of \$766,000. After the deduction of \$2.3 million in other operating expenses, HyperFeed generated a segment loss before taxes and minority interest of \$1.6 million.

Year over year, the second quarter segment loss increased by \$877,000. Other operating expenses increased by \$553,000, primarily due to increases in the cost of labor, communications, and data. In addition, revenues decreased \$162,000, primarily due to the inclusion of two one-time fee contracts in 2005, which did not recur in 2006.

During the first half of 2006, HyperFeed generated \$1.9 million in revenues. Service revenues were \$1.9 million and the costs of service were \$887,000, resulting in gross margin of \$993,000. After the deduction of \$6.9 million in other operating expenses, HyperFeed generated a segment loss before taxes and minority interest of \$5 million.

During the first half of 2005, HyperFeed generated \$1.9 million in revenues. Service revenues were \$1.9 million and the costs of service were \$562,000, resulting in gross margin of \$1.4 million. After the deduction of \$5.2 million in other operating expenses, HyperFeed generated a segment loss before taxes and minority interest of \$3.3 million.

Year over year, the first half segment loss increased by \$1.7 million. Although service revenues were little changed year over year, higher cost of service (primarily data license fees) reduced gross margin by \$325,000. In addition, other operating expenses increased by \$1.4 million year over year, primarily due to increases in the cost of labor, communications, and data.

DISCONTINUED OPERATIONS

During 2003, HyperFeed sold two businesses, which are now recorded as discontinued operations: its retail trading business and its consolidated market data feed customers. The discontinued operations of HyperFeed broke even after-tax in the second quarter of 2006, compared to a \$17,000 after-tax loss in the second quarter of 2005. In the first half of 2006, the discontinued operations of HyperFeed generated an after-tax gain of \$165,000, compared to an after-tax loss of \$40,000 in the first half of 2005.

LIQUIDITY AND CAPITAL RESOURCES--SIX MONTHS ENDED JUNE 30, 2006 AND 2005

PICO's assets primarily consist of our operating subsidiaries, holdings in other public companies, marketable securities, and cash and cash equivalents. On a consolidated basis, the Company had \$97.1 million in cash and equivalents at June 30, 2006, compared to \$53.7 million at March 31, 2006 and \$37.8 million at December 31, 2005. The increase in cash and cash equivalents was primarily due to the May 2006 sale of 2.6 million shares of the Company's common stock for net proceeds of \$73.9 million.

Our cash flow position fluctuates depending on the requirements of our operating subsidiaries for capital, and activity in our insurance company investment portfolios. Our primary sources of funds include cash balances, cash flow from operations, the sale of holdings, and--potentially--the proceeds of borrowings or offerings of equity and debt. Currently, management believes that cash balances and cash flows are adequate to service existing debt and fund operations for the next twelve months.

In broad terms, the cash flow profile of our principal operating subsidiaries is:

- As Vidler's water assets are monetized, Vidler is generating free cash flow as receipts from the sale of real estate and water assets have overtaken maintenance capital expenditure, financing costs, and operating expenses;
- Nevada Land is actively selling land which has reached its highest and best use. Nevada Land's principal sources of cash flow are the proceeds of cash sales and collections of principal and interest on sales contracts where Nevada Land has provided vendor financing. These receipts and other revenues exceed Nevada Land's operating costs, so Nevada Land is generating strong cash flow;
- Investment income more than covers the operating expenses of the "run off" insurance companies, Physicians and Citation. The funds to pay claims come from the maturity of fixed-income securities, the realization of fixed-income investments and stocks held in their investment portfolios, and recoveries from reinsurance companies; and
- HyperFeed maintains its own cash and cash equivalents balances, and borrowings. At June 30, 2006, HyperFeed held approximately \$173,000 in cash and cash equivalents, and no external borrowings. PICO has extended a \$10 million secured convertible promissory to HyperFeed, on which \$6.7 million was drawn at June 30, 2006. Subsequent to June 30, 2006 HyperFeed had drawn another \$950,000. PICO anticipates HyperFeed drawing the balance of the note over the next several months. In addition, if the proposed merger with Exegy, Inc. closes, PICO will invest another \$5 million into HyperFeed on or around the close of the merger. See "*Business Acquisitions and Financing*" segment in Item 2, "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" above.

The Departments of Insurance in Ohio and California prescribe minimum levels of capital and surplus for insurance companies, set guidelines for insurance company investments, and restrict the amount of profits which can be distributed as dividends. Typically, our insurance subsidiaries structure the maturity of fixed-income securities to match the projected pattern of claims payments. When interest rates are at very low levels, to insulate the capital value of the bond portfolios against a decline in value which would be brought on by a future increase in interest rates, the bond portfolios may have a shorter duration than the projected pattern of claims payments.

As shown in the Condensed Consolidated Statements of Cash Flow, cash and cash equivalents increased by \$59.3 million in the first half of 2006, compared to a \$94.5 million net increase in the first half of 2005.

During the first half of 2006, Operating Activities used cash of \$12.4 million. The principal components of 2006 operating cash flows include the payment of claims by Citation and Physicians and the cost of drilling wells in several locations by Vidler.

During the first half of 2005, Operating Activities generated cash of \$82.3 million. Vidler's sale of real estate and water assets in the Harquahala Valley Irrigation District generated an operating cash inflow of approximately \$87.4 million. All other operating activities resulted in a net cash outflow of \$4.1 million.

Investing Activities provided \$587,000 of cash in the first half of 2006, compared to \$8.2 million of cash used in the first half of 2005. The sale and maturity of investments exceeded purchases, providing \$11.1 million in cash. The principal use of investing cash was \$9 million in outlays for property and equipment, primarily related to the Fish Springs pipeline project. The use of \$9.2 million of cash in Investing Activities in 2005 primarily consisted of the purchase of \$13.3 million of fixed-income securities, partially offset by \$5.2 million cash provided by the sale or maturity of fixed-income securities.

Financing Activities provided \$73.4 million of cash in the first half of 2006. This primarily represented the sale of 2.6 million newly-issued shares of PICO common stock for net proceeds of \$73.9 million. In the first half of 2005, Financing Activities provided \$17.5 million of cash. This primarily represented the sale of 905,000 newly-issued shares of PICO common stock for net proceeds of \$21.4 million, partially offset by the repayment of \$3.9 million in principal on notes collateralized by certain farm properties which Vidler sold in the Harquahala Valley Irrigation District.

During the first half of 2006, we continued to design a pipeline to convey water from the Fish Springs Ranch to a storage tank near Reno, Nevada, and began construction of a plant to generate the electricity which will be required to pump the water. The total cost of the pipeline project is estimated to be in the \$78 million to \$83 million range, which will be outlaid over the next 12 to 18 months. As of June 30, 2006, approximately \$7.7 million of costs related to the design and construction of the Fish Springs Ranch pipeline project has been capitalized. Vidler has commitments for future capital expenditure amounting to approximately \$10.1 million, and is in the process of obtaining additional bids for the remaining construction.

Share Repurchase Program

In October 2002, PICO's Board of Directors authorized the repurchase of up to \$10 million of PICO common stock. The stock purchases may be made from time to time at prevailing prices through open market or negotiated transactions, depending on market conditions, and will be funded from available cash.

As of June 30, 2006, no stock had been repurchased under this authorization.

Risk Factors

The following information sets forth factors that could cause our actual results to differ materially from those contained in forward-looking statements we have made in this quarterly report and those we may make from time to time. You should carefully consider the following risks, together with other matters described in this Form 10-Q or incorporated herein by reference in evaluating our business and prospects. If any of the following risks occurs, our business, financial condition or operating results could be harmed. In such case, the trading price of our securities could decline, in some cases significantly. The risks described below are not the only ones we face. Additional risks not presently known to us, or that we currently deem immaterial, may also impair our business operations. For a more detailed discussion of the factors that could cause actual results to differ, see the Risk Factors section in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 10, 2006.

Variances in physical availability of water, along with environmental and legal restrictions and legal impediments, could impact profitability from our water rights.

The water rights held by us and the transferability of these rights to other uses and places of use are governed by the laws concerning water rights in the states of Arizona, Colorado and Nevada. The volumes of water actually derived from the water rights applications or permitted rights may vary considerably based upon physical availability and may be further limited by applicable legal restrictions. As a result, the amounts of acre-feet anticipated from the water rights applications or permitted rights do not in every case represent a reliable, firm annual yield of water, but in some cases describe the face amount of the water right claims or management's best estimate of such entitlement. Legal impediments may exist to the sale or transfer of some of these water rights, which in turn may affect their commercial value. If we were unable to transfer or sell our water rights, we may lose some or all of our value in our water rights acquisitions.

Water we lease or sell may be subject to regulation as to quality by the United States Environmental Protection Agency acting pursuant to the federal Safe Drinking Water Act. While environmental regulations do not directly affect us, the regulations regarding the quality of water distributed affects our intended customers and may, therefore, depending on the quality of our water, impact the price and terms upon which we may in the future sell our water rights.

Our future water revenues are uncertain and depend on a number of factors, which may make our revenue streams and profitability volatile.

We engage in various water resource acquisitions, management, development, and sale and lease activities. Accordingly, our long-term future profitability will primarily be dependent on our ability to develop and sell or lease water and water rights, and will be affected by various factors, including timing of acquisitions, transportation arrangements, and changing technology. To the extent we possess junior or conditional water rights, such rights may be subordinated to superior water right holders in periods of low flow or drought.

In addition to the risk of delays associated with receiving all necessary regulatory approvals and permits, we may also encounter unforeseen technical difficulties which could result in construction delays and cost increases with respect to our water resource and water storage development projects.

Our profitability is significantly affected by changes in the market price of water. In the future, water prices may fluctuate widely as demand is affected by climatic, demographic and technological factors.

Our water activities may become concentrated in a limited number of assets, making our growth and profitability vulnerable to fluctuations in local economies and governmental regulations.

In the future, we anticipate that a significant amount of Vidler's revenues and asset value will come from a limited number of assets, including our water resources in Nevada and Arizona and the Vidler Arizona Recharge Facility. Although we continue to acquire and develop additional water assets, in the foreseeable future we anticipate that our revenues will still be derived from a limited number of assets, primarily located in Arizona and Nevada.

Our water sales may meet with political opposition in certain locations, thereby limiting our growth in these areas.

The transfer of water rights from one use to another may affect the economic base of a community and will, in some instances, be met with local opposition. Moreover, certain of the end users of our water rights, namely municipalities, regulate the use of water in order to manage growth. If we are unable to effectively transfer water rights, our liquidity will suffer and our revenues would decline.

The fair values of our real estate and water assets are linked to external growth factors.

The real estate and water assets we hold have fair values that are significantly affected by the growth in population and the general state of the local economies where our real estate and water assets are located, primarily in the states of Arizona and Nevada.

In certain circumstances, we finance sales of real estate and water assets, and we secure such financing through deeds of trust on the property, which are only released once the financing has been fully paid off.

Purchasers of our real estate and water assets may default on their financing obligations and the fair value of the secured property may be affected by the factors noted above. Accordingly, such defaults and declines in market values may have an adverse effect on our business, financial condition, and the results of operations and cash flows.

If we do not successfully locate, select and manage acquisitions and investments, or if our acquisitions or investments otherwise fail or decline in value, our financial condition could suffer.

We invest in businesses that we believe are undervalued or that will benefit from additional capital, restructuring of operations or improved competitiveness through operational efficiencies. If a business in which we invest fails or its fair value declines, we could experience a material adverse effect on our business, financial condition, the results of operations and cash flows. Additionally, our failure to successfully locate, select and manage acquisition and investment opportunities could have a material adverse effect on our business, financial condition, the results of operations and cash flows. Such business failures, declines in fair values, and/or failure to successfully locate, select and manage acquisitions or investments could result in an inferior return on shareholders' equity. We could also lose part or all of our capital in these businesses and experience reductions in our net income, cash flows, assets and shareholders' equity.

Failure to successfully manage newly acquired companies could adversely affect our business.

Our management of the operations of acquired businesses requires significant efforts, including the coordination of information technologies, research and development, sales and marketing, operations, and finance. These efforts result in additional expenses and involve significant amounts of management's time. To successfully manage newly acquired companies, we must, among other things, continue to attract and retain key management and other personnel. The diversion of the attention of management from the day-to-day operations, or difficulties encountered in the integration process, could have a material adverse effect on our business, financial condition, and the results of operations and cash flows. If we fail to integrate acquired businesses into our operations successfully, we may be unable to achieve

our strategic goals and the value of your investment could suffer.

Our acquisitions may not achieve expected rates of return, and we may not realize the value of the funds we invest.

We will continue to make selective acquisitions, and endeavor to enhance and realize additional value to these acquired companies through our influence and control. You will be relying on the experience and judgment of management to locate, select and develop new acquisition and investment opportunities. Any acquisition could result in the use of a significant portion of our available cash, significant dilution to you, and significant acquisition-related charges. Acquisitions may also result in the assumption of liabilities, including liabilities that are unknown or not fully known at the time of the acquisition, which could have a material adverse effect on us.

We do not know of any reliable statistical data that would enable us to predict the probability of success or failure of our acquisitions and investments, or to predict the availability of suitable investments at the time we have available cash. We may not be able to find sufficient opportunities to make this business strategy successful. Additionally, when any of our acquisitions do not achieve acceptable rates of return or we do not realize the value of the funds invested, we may write-down the value of such acquisitions or sell the acquired businesses at a loss. We have made a number of acquisitions in the past that have been highly successful, and we have also made acquisitions that have lost either part or all of the capital invested. Our ability to achieve an acceptable rate of return on any particular investment is subject to a number of factors which are beyond our control, including increased competition and loss of market share, quality of management, cyclical or uneven financial results, technological obsolescence, foreign currency risks and regulatory delays.

We may make acquisitions and investments that may yield low or negative returns for an extended period of time, which could temporarily or permanently depress our return on shareholders' equity.

We generally make acquisitions and investments that tend to be long term in nature. We acquire businesses that we believe to be undervalued or may benefit from additional capital, restructuring of operations or management or improved competitiveness through operational efficiencies with our existing operations. We may not be able to develop acceptable revenue streams and investment returns. We may lose part or all of our investment in these assets. The negative impacts on cash flows, income, assets and shareholders' equity may be temporary or permanent. We make acquisitions for the purpose of enhancing and realizing additional value by means of appropriate levels of shareholder influence and control. This may involve restructuring of the financing or management of the entities in which we invest and initiating or facilitating mergers and acquisitions. These processes can consume considerable amounts of time and resources. Consequently, costs incurred as a result of these acquisitions and investments may exceed their revenues and/or increases in their values for an extended period of time until we are able to develop the potential of these acquisitions and investments and increase the revenues, profits and/or values of these acquisitions.. Ultimately, however, we may not be able to develop the potential of these assets that we originally anticipated.

We may not be able to sell our investments when it is advantageous to do so and we may have to sell these investments at a discount to fair value.

No active market exists for some of the companies in which we invest. We acquire stakes in private companies that are not as liquid as investments in public companies. Additionally, some of our acquisitions may be in restricted or unregistered stock of U.S. public companies. Moreover, even our investments for which there is an established market are subject to dramatic fluctuations in their market price. These illiquidity factors may affect our ability to divest some of our acquisitions and could affect the value that we receive for the sale of such investments.

Our acquisitions of and investments in foreign companies subject us to additional market and liquidity risks which could affect the value of our stock.

We have acquired, and may continue to acquire, shares of stock in foreign public companies. Typically, these foreign companies are not registered with the SEC and regulation of these companies is under the jurisdiction of the relevant foreign country. The respective foreign regulatory regime may limit our ability to obtain timely and comprehensive financial information for the foreign companies in which we have invested. In addition, if a foreign company in which we invest were to take actions which could be deleterious to its shareholders, foreign legal systems may make it difficult or time-consuming for us to challenge such actions. These factors may affect our ability to acquire controlling stakes, or to dispose of our foreign investments, or to realize the full fair value of our foreign investments. In addition, investments in foreign countries may give rise to complex cross-border tax issues. We aim to manage our tax affairs efficiently, but given the complexity of dealing with domestic and foreign tax jurisdictions, we may have to pay tax in both the U.S. and in foreign countries, and we may be unable to offset any U.S. tax liabilities with foreign tax credits. If we are unable to manage our foreign tax issues efficiently, our financial condition and the results of operations and cash flows could be adversely affected.

If we underestimate the amount of insurance claims, our financial condition could be materially misstated and our financial condition could suffer.

Our insurance subsidiaries may not have established reserves that are adequate to meet the ultimate cost of losses arising from claims. It has been, and will continue to be, necessary for our insurance subsidiaries to review and make appropriate adjustments to reserves for claims and expenses for settling claims. Inadequate reserves could have a material adverse effect on our business, financial condition, and the results of operations and cash flows. Inadequate reserves could cause our financial condition to fluctuate from period to period and cause our financial condition to appear to be better than it actually is for periods in which insurance claims reserves are understated. In subsequent periods when we discover the underestimation and pay the additional claims, our cash needs will be greater than expected and our financial results of operations for that period will be worse than they would have been had our reserves been accurately estimated originally.

The inherent uncertainties in estimating loss reserves are greater for some insurance products than for others, and are dependent on various factors including:

- the length of time in reporting claims;
- the diversity of historical losses among claims;

- the amount of historical information available during the estimation process;
- the degree of impact that changing regulations and legal precedents may have on open claims; and

- the consistency of reinsurance programs over time.

Because medical malpractice liability, commercial property and casualty, and workers' compensation claims may not be completely paid off for several years, estimating reserves for these types of claims can be more uncertain than estimating reserves for other types of insurance. As a result, precise reserve estimates cannot be made for several years following the year for which reserves were initially established.

During the past several years, the levels of the reserves for our insurance subsidiaries have been very volatile. We have had to significantly increase and decrease these reserves in the past several years.

Furthermore, we have reinsurance agreements on all of our insurance books of business with reinsurance companies. We base the level of reinsurance purchased on our direct reserves on our assessment of the overall direct underwriting risk.

We attempt to ensure that we have acceptable net risk, but it is possible that we may underestimate the amount of reinsurance required to achieve the desired level of net claims risk.

In addition, while we carefully review the credit worthiness of the companies we have reinsured part, or all, of our initial direct underwriting risk with, our reinsurers could default on amounts owed to us for their portion of the direct insurance claim. Our insurance subsidiaries, as direct writers of lines of insurance, have ultimate responsibility for the payment of claims, and any defaults by reinsurers may result in our established reserves not being adequate to meet the ultimate cost of losses arising from claims.

Significant increases in the reserves may be necessary in the future, and the level of reserves for our insurance subsidiaries may be volatile in the future. These increases or volatility may have an adverse effect on our business, financial condition, and the results of operations and cash flows.

State regulators could require changes to our capitalization and/or to the operations of our insurance subsidiaries, and/or place them into rehabilitation or liquidation.

Beginning in 1994, Physicians and Citation became subject to the provisions of the Risk-Based Capital for Insurers Model Act which has been adopted by the National Association of Insurance Commissioners for the purpose of helping regulators identify insurers that may be in financial difficulty. The Model Act contains a formula which takes into account asset risk, credit risk, underwriting risk and all other relevant risks. Under this formula, each insurer is required to report to regulators using formulas which measure the quality of its capital and the relationship of its modified capital base to the level of risk assumed in specific aspects of its operations. The formula does not address all of the risks associated with the operations of an insurer. The formula is intended to provide a minimum threshold measure of capital adequacy by individual insurance company and does not purport to compute a target level of capital. Companies which fall below the threshold will be placed into one of four categories: Company Action Level, where the insurer must submit a plan of corrective action; Regulatory Action Level, where the insurer must submit such a plan of corrective action, the regulator is required to perform such examination or analysis the Superintendent of Insurance considers necessary and the regulator must issue a corrective order; Authorized Control Level, which includes the above actions and may include rehabilitation or liquidation; and Mandatory Control Level, where the regulator must rehabilitate or liquidate the insurer. All companies' risk-based capital results as of December 31, 2005 exceed the Company Action Level.

If we are required to register as an investment company, then we will be subject to a significant regulatory burden.

At all times we intend to conduct our business so as to avoid being regulated as an investment company under the Investment Company Act of 1940. However, if we were required to register as an investment company, our ability to use debt would be substantially reduced, and we would be subject to significant additional disclosure obligations and restrictions on our operational activities. Because of the additional requirements imposed on an investment company with regard to the distribution of earnings, operational activities and the use of debt, in addition to increased expenditures due to additional reporting responsibilities, our cash available for investments would be reduced. The additional expenses would reduce income. These factors would adversely affect our business, financial condition, and the results of operations and cash flows.

We are directly impacted by international affairs, which directly exposes us to the adverse effects of any foreign economic or governmental instability.

As a result of global investment diversification, our business, financial condition, the results of operations and cash flows may be adversely affected by:

- exposure to fluctuations in exchange rates;
- the imposition of governmental controls;

- the need to comply with a wide variety of foreign and U.S. export laws;
- political and economic instability;

- trade restrictions;
- changes in tariffs and taxes;

- volatile interest rates;
- changes in certain commodity prices;

- exchange controls which may limit our ability to withdraw money;
- the greater difficulty of administering business overseas; and

- general economic conditions outside the United States.

Changes in any or all of these factors could result in reduced market values of investments, loss of assets, additional expenses, reduced investment income, reductions in shareholders' equity due to foreign currency fluctuations and a reduction in our global diversification.

Because our operations are diverse, analysts and investors may not be able to evaluate us adequately, which may negatively influence our share price.

PICO is a diversified holding company with operations in real estate and related water rights and mineral rights; water resource development and water storage; insurance operations in run-off; and business acquisitions and financing. Each of these areas is unique, complex in nature, and difficult to understand. In particular, the water resource business is a developing industry within the western United States with very little historical data, very few experts and a limited following of analysts. Because we are complex, analysts and investors may not be able to adequately evaluate our operations and PICO in total. This could cause them to make inaccurate evaluations of our stock, or to overlook PICO, in general. These factors could have a negative impact on the trading volume and price of our stock.

Fluctuations in the market price of our common stock may affect your ability to sell your shares.

The trading price of our common stock has historically been, and is expected to be, subject to fluctuations. The market price of the common stock may be significantly impacted by:

- quarterly variations in financial performance and condition;
- shortfalls in revenue or earnings from levels forecast by securities analysts;
- changes in estimates by such analysts;
- product introductions;
- our competitors' announcements of extraordinary events such as acquisitions;
- litigation; and
- general economic conditions.

Our results of operations have been subject to significant fluctuations, particularly on a quarterly basis, and our future results of operations could fluctuate significantly from quarter to quarter and from year to year. Causes of such fluctuations may include the inclusion or exclusion of operating earnings from newly acquired or sold operations. At June 30, 2006, the closing price of our common stock on the NASDAQ Global Market was \$32.25 per share, compared to \$15.67 at December 31, 2003. On a quarterly basis between these two dates, closing prices have ranged from a high of \$35.37 to a low of \$15.31.

Statements or changes in opinions, ratings, or earnings estimates made by brokerage firms or industry analysts relating to the markets in which we do business or relating to us specifically could result in an immediate and adverse effect on the market price of our common stock.

We may not be able to retain key management personnel we need to succeed, which could adversely affect our ability to make sound investment decisions.

We rely on the services of several key executive officers. If they depart, it could have a significant adverse effect. Messrs. Langley and Hart, our Chairman and CEO, respectively, are key to the implementation of our strategic focus, and our ability to successfully develop our current strategy is dependent upon our ability to retain the services of

Messrs. Langley and Hart.

We use estimates and assumptions in preparing financial statements in accordance with accounting principles generally accepted in the United States of America.

The preparation of our financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities at the date of financial statements and the reported amount of revenues and expenses during the reporting period. We regularly evaluate our estimates, which are based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. The result of these evaluations forms the basis for making judgments about the carrying values of assets and liabilities and the reported amount of revenues and expenses that are not readily apparent from other sources. The carrying values of assets and liabilities and the reported amount of revenues and expenses may differ by using different assumptions. In addition, in future periods, in order to incorporate all known experience at that time, we may have to revise assumptions previously made which may change the value of previously reported assets and liabilities. This potential subsequent change in value may have a material adverse effect on our business, financial condition, and the results of operations and cash flows.

Repurchases of our common stock could have a negative effect on our cash flows and our stock price.

Our Board of Directors has authorized the repurchase of up to \$10 million of our common stock. The stock purchases may be made from time to time at prevailing prices through open market, or negotiated transactions, depending on market conditions, and will be funded from available cash resources of the company. Such a repurchase program may have a negative impact on our cash flows, and could result in market pressure to sell our common stock.

Future changes in financial accounting standards may cause adverse unexpected revenue fluctuations and affect our reported results of operations.

A change in accounting standards could have a significant effect on our reported results and may even affect our reporting transactions completed before the change is effective. New accounting pronouncements and varying interpretations of pronouncements have occurred and may occur in the future. Changes to existing rules or the questioning of current practices may adversely affect our reported financial results of the way we conduct our business.

Compliance with changing regulation of corporate governance and public disclosure may result in additional expenses.

Changing laws, regulations and standards relating to corporate governance and public disclosure, SEC regulations and NASDAQ Stock Market rules, are creating uncertainty for companies such as ours. These new or changed laws, regulations and standards are subject to varying interpretations in many cases due to their lack of specificity, and as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies, which could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. We are committed to maintaining high standards of corporate governance and public disclosure. As a result, our efforts to comply with evolving laws, regulations and standards have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. In particular, our efforts to comply with Section 404 of the Sarbanes-Oxley Act of 2002 and the related regulations regarding our required assessment of our internal controls over financial reporting and our external auditors' audit of that assessment has required the commitment of substantial financial and managerial resources. We expect these efforts to require the continued commitment of significant resources. Further, our board members, chief executive officer, and chief financial officer could face an increased risk of personal liability in connection with the performance of their duties and we may be required to indemnify them for any expenses incurred in defending against claims. As a result, we may have difficulty attracting and retaining qualified board members and executive officers, which could harm our business. If our efforts to comply with new or changes laws, regulations, and standards differ from the activities intended by regulatory or governing bodies due to ambiguities related to practice, our reputation could be harmed.

Absence of dividends could reduce our attractiveness to investors.

Some investors favor companies that pay dividends, particularly in market downturns. We have never declared or paid any cash dividends on our common stock. We currently intend to retain any future earnings for funding growth and, therefore, we do not currently anticipate paying cash dividends on our common stock.

We may need additional capital in the future to fund the growth of our business, and financing may not be available.

We currently anticipate that our available capital resources and operating income will be sufficient to meet our expected working capital and capital expenditure requirements for at least the next 12 months. However, we cannot

assure you that such resources will be sufficient to fund the long-term growth of our business. We may raise additional funds through public or private debt or equity financings if such financings become available on favorable terms, but such financing may dilute our stockholders. We cannot assure you that any additional financing we need will be available on terms favorable to us, or at all. If adequate funds are not available or are not available on acceptable terms, we may not be able to take advantage of unanticipated opportunities or otherwise respond to competitive pressures. In any such case, our business, operating results or financial condition could be materially adversely affected.

Litigation may harm our business or otherwise distract our management.

Substantial, complex or extended litigation could cause us to incur large expenditures and distract our management. For example, lawsuits by employees, stockholders or customers could be very costly and substantially disrupt our business. Disputes from time to time with such companies or individuals are not uncommon, and we cannot assure that that we will always be able to resolve such disputes out of court or on terms favorable to us.

THE FOREGOING FACTORS, INDIVIDUALLY OR IN AGGREGATE, COULD MATERIALLY ADVERSELY AFFECT OUR OPERATING RESULTS AND CASH FLOWS AND FINANCIAL CONDITION AND COULD MAKE COMPARISON OF HISTORIC OPERATING RESULTS AND CASH FLOWS AND BALANCES DIFFICULT OR NOT MEANINGFUL.

Item 3: Quantitative and Qualitative Disclosure about Market Risk

PICO's balance sheets include a significant amount of assets and liabilities whose fair value are subject to market risk. Market risk is the risk of loss arising from adverse changes in market interest rates or prices. PICO currently has interest rate risk as it relates to its fixed maturity securities and mortgage participation interests, equity price risk as it relates to its marketable equity securities, and foreign currency risk as it relates to investments denominated in foreign currencies. Generally, PICO's borrowings are short to medium term in nature and therefore approximate fair value. At June 30, 2006, PICO had \$93.4 million of fixed maturity securities, \$188.4 million of marketable equity securities that were subject to market risk, of which \$108.7 million were denominated in foreign currencies, primarily Swiss francs. PICO's investment strategy is to manage the duration of the portfolio relative to the duration of the liabilities while managing interest rate risk.

PICO uses two models to report the sensitivity of its assets and liabilities subject to the above risks. For its fixed maturity securities, and mortgage participation interests, PICO uses duration modeling to calculate changes in fair value. The sensitivity analysis duration model calculates the price of a fixed maturity assuming a theoretical 100 basis point increase in interest rates and compares that to the actual quoted price if the security. At June 30, 2006, the model calculated a loss in fair value of \$1.8 million. For its marketable securities, PICO uses a hypothetical 20% decrease in the fair value to analyze the sensitivity of its market risk assets and liabilities. For investments denominated in foreign currencies, PICO uses a hypothetical 20% decrease in the local currency of that investment. Actual results may differ from the hypothetical results assumed in this disclosure due to possible actions taken by management to mitigate adverse changes in fair value and because the fair value of securities may be affected by credit concerns of the issuer, prepayment rates, liquidity, and other general market conditions. The hypothetical 20% decrease in fair value of PICO's marketable equity securities produced a loss in fair value of \$37.7 million that would impact the unrealized appreciation in shareholders' equity, before the related tax effect. The hypothetical 20% decrease in the local currency of PICO's foreign denominated investments produced a loss of \$19.2 million that would impact the foreign currency translation in shareholders' equity.

Item 4: Controls and Procedures

Under the supervision of and with the participation of our management, including our principal executive officer and principal financial officer, we evaluated the effectiveness of our disclosure controls and procedures, as such term is defined under Rules 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report. There were no material changes in our internal controls over financial reporting for the three months ended June 30, 2006.

Part II: Other Information

Item 1: Legal Proceedings

The Company is subject to various litigation that arises in the ordinary course of its business. Based upon information presently available, management is of the opinion that such litigation will not have a material adverse effect on the consolidated financial position, results of operations or cash flows of the Company.

Item 1A: Risk Factors

A description of the risk factors associated with our business is included under “Risk Factors” in “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, contained in Item 2 of Part I of this report. Such description includes any changes to and supersedes the description of the risk factors associated with our business previously disclosed in Item 1 of our 2005 Annual Report on Form 10-K and is incorporated herein by reference. There are no material changes to the risk factors described in our Form 10-K.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds

On May 4, 2006, the Company completed a private placement of 2.6 million newly-issued common shares to accredited investors at a price of \$30.00 per share, for net proceeds of \$73.9 million. Merriman, Curham, Ford and Co. served as placement agent for the transaction. The aggregate offering price was \$78 million and the aggregate commissions were \$3.9 million. The sale of these shares was exempt from the registration requirements of the Securities Act of 1933, as amended, pursuant to Section 4(2) thereof. Under the terms of the agreement between the Company and the accredited investors, the Company filed a Registration Statement on Form S-3 with the SEC to register these 2.6 million common shares for resale and naming the accredited investors as Selling Shareholders therein. The SEC declared the registration statement effective June 7, 2006. The Selling Shareholders table from the registration statement is incorporated by reference into this Item 2 of Part II of this report.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total number of shares purchased	(b) Average Price Paid per Share	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs (1)	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs (1)
4/1/06 - 4/30/06	-	-		
5/1/06 - 5/31/06	-	-		
6/1/06 - 6/30/06	-	-		

(1) In October 2002, PICO's Board of Directors authorized the repurchase of up to \$10 million of PICO common stock. The stock purchases may be made from time to time at prevailing prices through open market or negotiated transactions, depending on market conditions, and will be funded from available cash. As of June 30, 2006, no stock had been repurchased under this authorization.

Item 3: Defaults Upon Senior Securities

None

Item 4: Submission of Matters to a Vote of Security Holders

None

Item 5: Other Information
