Item 2.02 Results of Operations and Financial Condition

On July 27, 2016, we issued a press release reporting our financial results for the three months ended June 30, 2016 (the Press Release). The Press Release is attached as Exhibit 99.1 to this Form 8-K and is available on our website at <http://investors.ryder.com>.

The Press Release includes information regarding non-GAAP financial measures, as defined by SEC regulations, as well as a reconciliation of each non-GAAP financial measure to the nearest GAAP measure in the tables following the press release. Set forth in the table below is an explanation of each non-GAAP measure and why management believes that presentation of each non-GAAP financial measure provides useful information to investors:

Non-GAAP Financial Measures

Operating Revenue Measures:

Operating Revenue

FMS Operating Revenue

DTS Operating Revenue

SCS Operating Revenue

FMS EBT as a % of Operating Revenue

DTS EBT as a % of Operating Revenue

SCS EBT as a % of Operating Revenue

Operating revenue is defined as total revenue for Ryder System, Inc. or each business segment (FMS, DTS and SCS), respectively, excluding any (1) fuel and (2) subcontracted transportation. We use operating revenue to evaluate the operating performance of our core businesses and as a measure of sales activity at the consolidated level for Ryder System, Inc. as well as for each of our business segments. We also use segment EBT as a percentage of operating revenue for each business segment for the same reason.

Fuel: We exclude FMS, DTS and SCS fuel from the calculation of our operating revenue measures, as fuel is an ancillary service that we provide our

customers, which is impacted by fluctuations in market fuel prices, and the costs are largely a pass-through to our customers, resulting in minimal changes in our profitability during periods of steady market fuel prices. However, profitability may be positively or negatively impacted by rapid changes in market fuel prices during a short period of time as customer pricing for fuel services is established based on trailing market fuel costs. Subcontracted transportation: We also exclude subcontracted transportation from the calculation of our operating revenue measures as these services are also typically a pass-through to our customers and therefore fluctuations result in minimal changes to our profitability. While our DTS and SCS business segments subcontract certain transportation services to third party providers, our FMS business

segment does not engage in subcontracted transportation and, therefore, this item is not applicable to FMS.

Operating revenue growth excluding foreign exchange is calculated by dividing the results for the current and prior year periods by the exchange rates in effect on June 30, 2015, which was the last day of the prior year period, rather than the actual exchange rates in effect as of June 30, 2016. Ryder's period-over-period operating revenue growth excluding foreign exchange excludes the effects of changes in foreign currency exchange rates from our operating revenue financial measure. Due to the variability of foreign exchange rates from period to period, we use operating revenue growth excluding foreign exchange to evaluate period-over-period operating performance.

Operating Revenue Growth Excluding Foreign Exchange

Comparable Earnings Measures:

Comparable Earnings

Comparable EPS

Comparable EPS Forecast

Comparable Earnings Before Income Tax

Comparable earnings, comparable earnings per

Comparable Tax Rate

diluted common share (EPS), comparable EPS forecast, comparable earnings before income tax and comparable tax rate are defined, respectively, as GAAP earnings, EPS, EPS forecast, earnings before income tax and tax rate, all from continuing operations, excluding (1) non-operating pension costs and (2) any other significant items that are not representative of our business operations. We believe these comparable earnings measures provide useful information to investors and allow for better year-over-year comparison of operating performance. Non-Operating Pension Costs: Our comparable earnings measures exclude non-operating pension costs, which include the amortization of net actuarial loss, interest cost and expected return on plan assets components of

pension and postretirement costs. We exclude non-operating pension costs because we consider these to be impacted by financial market performance and outside the operational performance of our business.

**Other Significant Items:** Our comparable earnings measures also exclude other significant items that are not representative of our business operations. These other significant items vary from period to period and, in some periods, there may be no such significant items. In this reporting period, we exclude the following other significant items from our comparable earnings measures in this Form 8-K:

\_\_\_(1)  
Pension-related charge (in the second quarter 2016 and year to date 2016). This charge represents a one-time, non-cash charge for benefit improvements made in 2009 that were not fully

reflected in our projected benefit obligation.

\_\_\_\_(2) Professional fees (in the second quarter 2015 and year to date 2015). These charges represent professional fees associated with the assessment of potential cost savings initiatives.

\_\_\_\_(3) A benefit from a tax law change (for the year to date 2015).

In the second quarter of 2015, the states of

Connecticut and Texas and the city of New York enacted changes to their tax systems, which decreased Ryder's provision for income taxes in each jurisdiction.

Calculation of comparable tax rate: The

comparable provision for income taxes is computed using the same methodology as the GAAP provision for income taxes.

Income tax effects of non-GAAP adjustments are calculated based on the statutory tax rates of the jurisdictions to which the non-GAAP adjustments relate.

Adjusted Return on Average Capital (ROC)  
Adjusted ROC Spread

Adjusted ROC:  
Adjusted ROC is defined as adjusted net earnings divided by average adjusted total capital and represents the rate of return generated by the capital deployed in our business. The adjustments represent the comparable items described above which are excluded, as applicable, from the calculation of net earnings and average shareholder's equity (a component of average total capital).

Adjusted ROC Spread:  
Adjusted ROC spread is defined as the difference between adjusted ROC and the weighted average cost of capital. We use adjusted ROC

and adjusted  
ROC spread  
as internal  
measures of  
how  
effectively we  
use the capital  
invested  
(borrowed or  
owned) in our  
operations.

Cash Flow Measures:  
Total Cash Generated  
Free Cash Flow

We consider  
total cash  
generated and  
free cash flow  
to be  
important  
measures of  
comparative  
operating  
performance  
as our  
principal  
sources of  
operating  
liquidity are  
cash from  
operations and  
proceeds from  
the sale of  
revenue  
earning  
equipment.  
Total Cash  
Generated:  
Total cash  
generated is  
defined as the  
sum of (1) net  
cash provided  
by operating  
activities and  
(2) net cash  
provided by  
the sale of  
revenue  
earning  
equipment  
and (3)  
operating

property and equipment, (4) collections on direct finance leases and (5) other cash inflows from investing activities. We believe total cash generated is an important measure of total cash flows generated from our ongoing business activities. Free Cash Flow: We refer to the net amount of cash generated from operating activities and investing activities (excluding changes in restricted cash and acquisitions) from continuing operations as “free cash flow”. We calculate free cash flow as the sum of (1) net cash provided by operating activities and (2) net cash provided by

the sale of  
revenue  
earning  
equipment  
and (3)  
operating  
property and  
equipment, (4)  
collections on  
direct finance  
leases and (5)  
other cash  
inflows from  
investing  
activities, less  
(6) purchases  
of property  
and revenue  
earning  
equipment.  
We believe  
free cash flow  
provides  
investors with  
an important  
perspective on  
the cash  
available for  
debt service  
and for  
shareholders  
after making  
capital  
investments  
required to  
support  
ongoing  
business  
operations.  
Our  
calculation of  
free cash flow  
may be  
different from  
the calculation  
used by other  
companies  
and therefore  
comparability  
may be  
limited.
