FINANCIAL STATEMENT NOTES

CONSOLIDATED

(1) Operations preparation bases and summary of significant accounting policies:

Grupo Simec, S.A. de C.V. and its Subsidiaries ("the Company") are subsidiaries of Industrias CH, S.A. de C.V. ("ICH"), and their main activities consist of the manufacturing and sale of steel products primarily destined for the construction sector of Mexico and other countries.

Significant accounting policies and practices followed by the Companies which affect the principal captions of the financial statements are described below:

a. Financial statement presentation - The consolidated financial statements have been prepared in accordance with principles generally accepted in Mexico, which include the recognition of the effects of inflation on the financial information and the presentation in constant Mexican pesos.

b. Principles of Consolidation - As part of the financial debt restructuring agreement into during 1997, Compañía Siderúrgica de Guadalajara, S.A. de C.V. ("CSG") assumed all of the debt of the Company in return for an equity interest in its subsidiaries. As a result of the above, the Company is the principal shareholder of CSG, and CSG is the principal shareholder of the other subsidiaries that Grupo Simec, S.A. de C.V. ("Simec") controlled before the restructuring.

The main subsidiaries of CSG are the following:

- Compañía Siderúrgica de California, S.A. de C.V.
- Industrias del Acero y del Alambre, S.A. de C.V.
- Pacific Steel Inc.
- SimRep Corporation and PAV Republic and Subsidiaries

All significant intercompany balances and transactions have been eliminated in consolidation.

c. Cash and cash equivalents - The Company considers short-term investments with original maturities not greater than three months to be cash equivalent. Cash equivalents include temporary investments and Mexican Government Treasury Bonds, and are stated at market value, which approximates cost plus earned interest. Any increase in market value is credited to operations for the period.

d. Inventories - The inventories are originally stated at average cost and subsequently adjusted to replacement value at the balance sheet date. The replacement values do not exceed market and are determined as follows:

Billet finished goods and work in process - At the latest production cost for the month.

Raw materials - According to purchase prices prevailing in the market at the balance sheet date.

Materials, supplies and rollers - At historical cost, restated by applying the steel industry inflation index.

The Company presents as non-current inventories the rollers and spare parts, which according to historical data and production trends will not be used within a one-year period.

e. Derivative financial instruments-- The Company is using derivative financial instruments for hedging risks associated with natural gas prices and conducted studies on historical consumption, future requirements and commitments; thus it avoided exposure to risks other than the normal operating risks. Management of the Company examines its financial risks by continually analyzing price, credit and liquidity risks.

The Company uses futures contracts for hedging risks from fluctuations in natural gas prices, which are based on demand and supply at the principal international markets.

As applicable, the Company recognized the fair value of instruments either as liabilities or assets. Such fair value and thus, the value of these assets or liabilities were restated at each month's-end. The Company opted for the early adoption of Bulletin C-10 "Derivative Financial Instruments and Hedging"; therefore, at December 31, 2003 the fair value of natural gas in force during 2004, 2005 and 2006 and which effective portions will not be offset against the asset risks until consumed, were recognized within the comprehensive income account in stockholders' equity.

f. Property, plant and equipment - Property, plant and equipment of domestic origin are restated by using factors derived from The National Consumer Price Index ("NCPI") from the date of their acquisition, and imported machinery and equipment are restated by applying devaluation and inflation factors of the country of origin. Depreciation recorded in the consolidated statement of income (loss) is computed based upon the estimated useful life and the restated cost of each asset. In addition, Financial expense incurred during the construction period is capitalized as construction in progress. The capitalized amounts are restated using a factor derived from the NCPI cumulative from the date of capitalization through period-end and are amortized over the average depreciation period of the corresponding assets. The estimated useful lives of assets as of June 30, 2006 are as follows:

Years

Buildings.....	15 to 50
Machinery and equipment	10 to 40
Buildings and improvements (Republic).....	10 to 25
Land improvements (Republic).....	5 to 25
Machinery and equipment (Republic).....	5 to 20

g. Other assets - Organization and pre-operating expenses are capitalized and restated using a factor derived from the NCPI cumulative from the date of generation through period-end, and their amortization is calculated by the straight-line method over a period of 20 years.

h. Seniority premiums and severance payments - According to Federal Labor Law, employees are entitled to seniority premiums after fifteen years or more of services. These premiums are recognized as expenses in the years in which the services are rendered, using actuarial calculations based on the projected unit credit method, and since 1996 by applying real interest and salary increases.

Any other payments to which employees may be entitled in case of separation, disability or death, are charged to operations in the period in which they become payable.

i. Pension plan - Until 1995, the Company provided pension benefits for all personnel with a minimum of 10 years of service and 35 years of age. The Company had established an irrevocable trust for its contributions, which were based on actuarial calculations. In December 1995, the board of directors of the Company, in agreement with the trade union, discontinued these benefits and related contributions to the trust fund. This decision was made because of the new Mexican pension fund system, Administradoras de Fondos para el Retiro, which establishes similar benefits for the employees. The balance of the trust fund will be applied to the retirement benefits of qualifying employees until

the fund is exhausted due to the irrevocable status of the fund.

The Company does not have any contractual obligation regarding the payment of pensions of retirements.

j. Cost of sales - Cost of sales related to sales of inventory items is recorded at standard cost, which approximates the replacement cost at the date of sale.

k. Income tax and employee profit sharing - In 1999, the Mexican Institute of Public Accountants issued Bulletin D-4, "Accounting for Income and Asset Taxes and Employee Profit Sharing", which is effective for all fiscal years beginning January 1, 2000. Bulletin D-4 establishes financial accounting and reporting standards for the effects of asset tax, income tax and employee profit sharing that result from enterprise activities during the current and preceding years.

The Company and its subsidiaries are included in the consolidated tax returns of the company's parent.

l. Foreign currency transactions and exchange differences - All transactions in foreign currency are recorded at the exchange rates prevailing on the date of their execution or liquidation. Foreign currency denominated assets and liabilities are translated at the exchange rates prevailing at the balance sheet date. Any exchange differences incurred with regard to assets or liabilities denominated in foreign currency are charged to operations of the period and are included in financial income (expense) in the accompanying consolidated statements of income (loss).

For consolidation purposes, the financial statements of the subsidiaries abroad, SimRep and subsidiaries, Pacific Steel and Undershaft Investment, were translated into pesos in conformity with Mexican accounting Bulletin B-15, Transactions in Foreign Currency and Translation of Financial Statements of Foreign Operations.

The subsidiary SimRep was considered as a foreign entity for translation purposes; therefore the financial statements as reported by the subsidiary abroad were adjusted to conform with Mexican GAAP, which includes the recognition of the effects of inflation as required by Mexican accounting Bulletin B-10, applying inflation adjustment factors derived from the U.S. Consumer Price Index (CPI) published by the U.S. labor department, The financial information already restated to include inflationary effects, is translated to Mexican pesos as follows:

- By applying the prevailing exchange rate at the consolidated balance sheet date for monetary and non-monetary assets and liabilities.
- By applying the prevailing exchange rate for stockholders' equity accounts, at the time capital contributions were made and earnings were generated.
- By applying the prevailing exchange rate at the consolidated balance sheet date for revenues and expenses during the reporting period.
- The related effect of translation is recorded in stockholders' equity under the caption Equity adjustments for non monetary assets.
- The resulting amounts were restated applying adjustment factors derived from the NCPI, in conformity with Mexican accounting Bulletin B-10.

The subsidiaries Pacific Steel and Undershaft Investment, were considered an "integral part of the operations" of the Company; and the financial statements of such subsidiaries were translated into Mexican pesos as follows:

By applying the prevailing exchange rate at the consolidated balance sheet date for monetary items.

By applying the prevailing exchange rate at the time the non-monetary assets and capital are generated, and the weighted average exchange rate of the period for income statement items.

The related effect of translation is recorded in the statement of operations as part of the caption Comprehensive financing cost.

The resulting amounts were restated applying adjustment factors derived from the Mexican NCPI, in conformity with Mexican accounting Bulletin B-10.

m. Geographic concentration of credit risk - The Company sells its products primarily to distributors for the construction industry with no specific geographic concentration. Additionally, no single customer accounted for a significant amount of the Company's sales, and there were no significant accounts receivable from a single customer or affiliate at September 30, 2005 and at September 30, 2006, direct sales to two customers accounted for approximately 10% and 16.6% of the Republic's sales. The Company performs evaluations of its customers' credit histories and establishes an allowance for doubtful accounts based upon the credit risk of specific customers and historical trends.

n. Other income (expenses) - Other income (expenses) shown in the consolidated statements of operations primarily includes other financial operations.

o. Gain on monetary position - The gain on monetary position in the consolidated statements of income (loss) is determined by applying to net monetary assets or liabilities at the beginning of each month the factor of inflation derived from the NCPI and is restated at period-end with the corresponding factor.

p. Restatement of capital stock and retained earnings (losses) - This is determined by multiplying capital stock contributions and retained earnings (losses) by factors derived from the NCPI, which measure the cumulative inflation from the date when capital stock contributions were made and earnings (losses) were generated, through the latest period-end.

q. Effect of restatement of stockholders' equity - The effect resulting from restating stockholders' equity includes the accumulated effect from holding non-monetary assets, which represents the change in the specific price level of those assets compared to the change in the NCPI.

(2) Financial Debt:

At September 30, 2006 Simec's total consolidated debt consisted of U.S. \$302,000 of 8 7/8% medium-term notes ("MTN's") due 1998 (accrued interest at June 30, 2006 was U.S. \$329,997 dollars. At December 31, 2005, Simec's total consolidated debt consisted of U.S. \$38 million (Ps. 420 million), of which \$33.4 million was debt held by GE Capital, \$4.3 million dollars held by the Ohio Department of Development Loan, and U.S. \$302,000 of 8 7/8% medium-term notes ("MTN's") due 1998 (accrued interest at December 31, 2005 was U.S. 309,311 dollars).

(3) Commitments and contingent liabilities:

a. Pacific Steel, Inc. (a wholly-owned subsidiary located in the U.S.A.) has been named in various claims and suits relating to the generation, storage, transport, disposal and cleanup of materials classified as hazardous waste. The Company has accrued approximately Ps. 13,311 (U.S. \$1,208,398) at September 30, 2006, (included in accrued liabilities) relating to these actions; the reduction of this reserve from previous levels reflects clean-up activities undertaken by Simec. Management believes the ultimate liability with respect to this matter will not exceed the amounts that have been accrued.

b. The Company is subject to various other legal proceeding and claims, which have arisen, in the ordinary course of its business. It is the opinion of management that their ultimate resolution will not have a material adverse effect on the Company's consolidated financial position or consolidated results of operations.

c. Compañía Siderúrgica de Guadalajara, S.A. de C.V. has entered into a gas and liquid oxygen purchase agreement with Praxair de México, S.A. de C.V., under which it is committed to acquire monthly over a fifteen-year period beginning January 1, 1989, a certain amount of product. At present required purchases amount to Ps. 1,500 per month.
