As part of a restructuring plan formulated by Variagenics during the quarter ended June 30, 2002, management identified certain laboratory equipment with a net book value of \$2.3 million that will no longer be required by Variagenics. These assets were decommissioned and determined to be available for sale. During the quarter ending June 30, 2002, an impairment charge of \$0.9 million related to this equipment was recorded to write the assets down to their estimated net realizable value in accordance with FAS 144 Accounting for Impairment or Disposal of Long-Lived Assets. During the quarter ended December 31, 2002, upon a change in market conditions, Variagenics determined that an additional write down of \$1.3 million was required in order to bring the carrying amount of these assets to their net realizable value.
