QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission file number 0-20914

OHIO VALLEY BANC CORP.
(Exact name of registrant as specified in its charter)

Ohio 31-1359191
(State of Incorporation) (I.R.S. Employer Identification No.)

420 Third Avenue
Gallipolis, Ohio 45631
(Address of principal executive offices) (ZIP Code)

(740) 446-2631
(Issuer's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

The number of common shares of the registrant outstanding as of November 9, 2016 was 4,665,765.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(dollars in thousands, except per share data)

NOTE 1- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION: The accompanying consolidated financial statements include the accounts of Ohio Valley Banc Corp. ("Ohio Valley") and its wholly-owned subsidiaries, The Ohio Valley Bank Company (the "Bank"), Loan Central, Inc. ("Loan Central"), a consumer finance company, Ohio Valley Financial Services Agency, LLC ("Ohio Valley Financial Services"), an insurance agency, and OVBC Captive, Inc. ("the Captive"), a limited purpose property and casualty insurance company. Ohio Valley and its subsidiaries are collectively referred to as the "Company". All material intercompany accounts and transactions have been eliminated in consolidation.

These interim financial statements are prepared by the Company without audit and reflect all adjustments of a normal recurring nature which, in the opinion of management, are necessary to present fairly the consolidated financial position of the Company at September 30, 2016, and its results of operations and cash flows for the periods presented. The results of operations for the nine months ended September 30, 2016 are not necessarily indicative of the operating results to be anticipated for the full fiscal year ending December 31, 2016. The accompanying consolidated financial statements do not purport to contain all the necessary financial disclosures required by U.S. generally accepted accounting principles ("US GAAP") that might otherwise be necessary in the circumstances. The Annual Report of the Company for the year ended December 31, 2015 contains consolidated financial statements and related notes which should be read in conjunction with the accompanying consolidated financial statements.

On August 5, 2016, the Company completed the merger of Milton Bancorp, Inc. ("Milton Bancorp") into Ohio Valley ("the Merger"). Immediately following the Merger, Milton Bancorp's wholly-owned subsidiary, The Milton Banking Company ("Milton Bank"), was merged with and into the Bank. Further information regarding the merger can be found within Note 2 – Business Combinations of this Form 10-Q.

The consolidated financial statements for 2015 have been reclassified to conform to the presentation for 2016. These reclassifications had no effect on the net results of operations or shareholders' equity.

USE OF ESTIMATES IN THE PREPARATION OF FINANCIAL STATEMENTS: The accounting and reporting policies followed by the Company conform to US GAAP established by the Financial Accounting Standards Board ("FASB"). The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the disclosures provided, and actual results could differ.

INDUSTRY SEGMENT INFORMATION: Internal financial information is primarily reported and aggregated in two lines of business, banking and consumer finance.

EARNINGS PER SHARE: Earnings per share are computed based on net income divided by the weighted average number of common shares outstanding during the period. The weighted average common shares outstanding were 4,466,601 and 4,246,311 for the three and nine months ended September 30, 2016, respectively. The weighted average common shares outstanding were 4,117,675 for the three and nine months ended September 30, 2015. Ohio Valley had no dilutive effect and no potential common shares issuable under stock options or other agreements for any period presented.

NEW ACCOUNTING PRONOUNCEMENTS: In May 2014, the FASB issued Accounting Standards Update ("ASU") 2014-09, "Revenue from Contracts with Customers (Topic 606)". The ASU creates a new topic, Topic 606, to provide guidance on revenue recognition for entities that enter into contracts with customers to transfer goods or services or enter into contracts for the transfer of nonfinancial assets. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Additional disclosures are required to provide quantitative and qualitative information regarding the nature, amount, timing, and

uncertainty of revenue and cash flows arising from contracts with customers. The new guidance is effective for annual reporting periods, and interim reporting periods within those annual periods, beginning after December 15, 2018, with early adoption permitted on January 1, 2017. Management is currently evaluating the impact of the adoption of this guidance on the Company's financial statements.

In January 2016, the FASB issued ASU No. 2016-01, "Recognition and Measurement of Financial Assets and Financial Liabilities". The update provides updated accounting and reporting requirements for both public and non-public entities. The most significant provisions that will impact the Company are: 1) equity securities available for sale will be measured at fair value, with the changes in fair value recognized in the income statement; 2) eliminate the requirement to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments at amortized cost on the balance sheet; 3) utilization of the exit price notion when measuring the fair value of financial instruments for disclosure purposes; and 4) require separate presentation of both financial assets and liabilities by measurement category and form of financial asset on the balance sheet or accompanying notes to the financial statements. The update will be effective for interim and annual periods beginning after December 15, 2017, using a cumulative-effect adjustment to the balance sheet as of the beginning of the year of adoption. Early adoption is not permitted. Management is currently evaluating the impact of this update on its Consolidated Financial Statements.

In February 2016, the FASB issued an update (ASU 2016-02, Leases) which will require lessees to record most leases on their balance sheet and recognize leasing expenses in the income statement. Operating leases, except for short-term leases that are subject to an accounting policy election, will be recorded on the balance sheet for lessees by establishing a lease liability and corresponding right-of-use asset. The guidance in this ASU will become effective for interim and annual reporting periods beginning after December 15, 2018, with early adoption permitted. Management is currently evaluating the impact of this update on its Consolidated Financial Statements.

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments - Credit Losses". ASU 2016-13 requires entities to report "expected" credit losses on financial instruments and other commitments to extend credit rather than the current "incurred loss" model. These expected credit losses for financial assets held at the reporting date are to be based on historical experience, current conditions, and reasonable and supportable forecasts. This ASU will also require enhanced disclosures to help investors and other financial statement users better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an entity's portfolio. These disclosures include qualitative and quantitative requirements that provide additional information about the amounts recorded in the financial statements. This ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2019. Early adoption is permitted, for annual periods and interim periods within those annual periods, beginning after December 15, 2018. Management is currently evaluating the impact this update will have on the Company's financial statements and results of operations.

In August 2016, FASB issued ASU 2016-15, "Statement of Cash Flows" (Topic 230), Classification of Certain Cash Receipts and Cash Payments, which amends the guidance in ASC 230 on the classification of certain cash receipts and payments in the statement of cash flows. The primary purpose of the ASU is to reduce the diversity in practice that has resulted from the lack of consistent principles on this topic. The ASU's amendments add or clarify guidance on eight cash flow issues:

- Debt prepayment or debt extinguishment costs.
- Settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing.
- Contingent consideration payments made after a business combination.
- Proceeds from the settlement of insurance claims.
- Proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies.
- Distributions received from equity method investees.
- Beneficial interests in securitization transactions.
- Separately identifiable cash flows and application of the predominance principle.

For public business entities, the guidance in the ASU is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted for all entities. Entities must apply the guidance retrospectively to all periods presented but may apply it prospectively from the earliest date practicable if retrospective application would be impracticable. Management is currently evaluating the impact of the adoption of this guidance on the Company's consolidated financial statements.

NOTE 2 – BUSINESS COMBINATIONS

As of the close of business on August 5, 2016, Ohio Valley completed its merger with Milton Bancorp pursuant to the terms of the Agreement and Plan of Merger dated as of January 7, 2016, by and between Ohio Valley and Milton Bancorp (the "Merger Agreement"). Pursuant to the terms of the Merger Agreement, Milton Bancorp was merged with and into Ohio Valley. Immediately following the Merger, Milton Bank was merged with and into the Bank. As a result of the Merger and in accordance with the terms of the Merger Agreement, each Milton Bancorp share was converted into the right to receive either 1,636 Ohio Valley common shares, no par value, or cash in the amount of \$37,219, subject to certain allocation procedures set forth in the Merger Agreement pursuant to which 80% of the 400 outstanding Milton Bancorp common shares were converted into the right to receive Ohio Valley common shares and

the remaining 20% of the outstanding Milton Bancorp common shares were converted into the right to receive cash. Each of the 1,237 Milton Bancorp preferred shares issued and outstanding were converted into the right to receive a cash payment in the amount of \$3,600 per preferred share. The consideration paid for Milton Bancorp totaled \$18,875, of which \$11,444 was the market value of the Company's common shares and \$7,431 was cash. Ohio Valley financed part of the cash portion of the purchase price through \$5,000 in borrowed funds. Milton Bank's results of operations were included in the Company's results beginning August 6, 2016. Through September 30, 2016, merger-related costs of \$777 associated with the acquisition have been expensed, and the remaining merger-related costs will be expensed in future periods as incurred. Since the majority of merger costs have been incurred at September 30, 2016, the Company expects the remaining merger-related expenses to be immaterial. The fair value of the common shares issued as part of the consideration paid for Milton Bancorp was determined in the basis of the closing price of the Company's common shares on the acquisition date. After the Merger, the Company's assets totaled approximately \$950 million and branches increased to 19 locations.

Goodwill of \$5,785 arising from the acquisition consisted largely of synergies from combining the operations of the companies. The following table summarizes the consideration paid for Milton Bancorp and the amounts of the assets acquired and liabilities assumed recognized at the acquisition date:

Consideration:

Cash	\$7,431
Equity Instruments	11,444
Fair value of total consideration transferred	\$18,875

Recognized amounts of identifiable assets acquired and liabilities assumed

Cash and cash equivalents	\$9,117
Securities	5,868
Restricted investments in bank stock	364
Loans	113,298
Premises and equipment	2,216
Other real estate owned	641
Bank owned life insurance	272
Other assets	520
Total assets acquired	132,296
Deposits	119,215
Other liabilities	(9)
Total liabilities assumed	119,206
Total identifiable net assets	13,090
Goodwill	5,785
	\$18,875

The fair value of net assets acquired reflect only the fair value adjustments to securities. We are continuing to evaluate the fair value adjustments associated with loans, premises and equipment, and time deposits, as well as the valuation of intangible assets related to core deposits. As such, the amounts presented in the table above are considered to be preliminary and are subject to change. The remaining purchase accounting adjustments are expected to be posted in the fourth quarter of 2016. Currently, management does not believe that purchase credit impaired loans acquired in the acquisition to be material.

NOTE 3 – FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair values:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The following is a description of the Company's valuation methodologies used to measure and disclose the fair values of its financial assets and liabilities on a recurring or nonrecurring basis:

Securities: The fair values for securities are determined by quoted market prices, if available (Level 1). For securities where quoted prices are not available, fair values are calculated based on market prices of similar securities (Level 2). For securities where quoted prices or market prices of similar securities are not available, fair values are calculated using discounted cash flows or other market indicators (Level 3). During times when trading is more liquid, broker quotes are used (if available) to validate the model. Rating agency and industry research reports as well as defaults and deferrals on individual securities are reviewed and incorporated into the calculations.

Impaired Loans: At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Impaired loans carried at fair value generally receive specific allocations of the allowance for loan losses. For collateral dependent loans, fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a Level 3 fair value classification. Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly.

Other Real Estate Owned: Assets acquired through or instead of loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Appraisals for both collateral-dependent impaired loans and other real estate owned are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed and verified by the Company. Once received, a member of management reviews the assumptions and approaches utilized in the appraisal as well as the overall resulting fair value in comparison with management's own assumptions of fair value based on factors that include recent market

data or industry-wide statistics. On an as-needed basis, the Company reviews the fair value of collateral, taking into consideration current market data, as well as all selling costs that typically approximate 10%.

11

Assets and Liabilities Measured on a Recurring Basis

Assets and liabilities measured at fair value on a recurring basis are summarized below:

	Fair Value Measurements at September 30, 2016 Using Quoted Prices in Active Markets for Significant Identical Assets (Level 1)			Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
<u>Assets:</u>					
U.S. Government sponsored entity securities	----	\$ 10,636	----		
Agency mortgage-backed securities, residential	----	94,224	----

At September 30, 2016, the recorded investment of impaired loans measured for impairment using the fair value of collateral for collateral-dependent loans totaled \$9,169, with a corresponding valuation allowance of \$2,881, resulting in an increase of \$819 in provision expense during the three months ended September 30, 2016, and an increase of \$2,477 during the nine months ended September 30, 2016, with no additional charge-offs recognized. This is compared to an increase of \$107 in provision expense during the three months ended September 30, 2015, and an increase of \$94 in provision expense during the nine months ended September 30, 2015, with \$1,782 in additional charge-offs recognized. At December 31, 2015, the recorded investment of impaired loans measured for impairment using the fair value of collateral for collateral-dependent loans totaled \$7,811, with a corresponding valuation allowance of \$1,559, resulting in an increase of \$741 in provision expense during the year ended December 31, 2015, with \$1,422 in additional charge-offs recognized.

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

Other real estate owned that was measured at fair value less costs to sell at September 30, 2016 and December 31, 2015 had a net carrying amount of \$1,147, which is made up of the outstanding balance of \$2,217, net of a valuation allowance of \$1,070 at December 31, 2015. There were no corresponding write downs during the three and nine months ended September 30, 2016 and 2015.

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a non-recurring basis at September 30, 2016 and December 31, 2015:

<u>September 30, 2016</u>	Fair Value	Valuation Technique(s)	Unobservable Input(s)	Range	(Weighted Average)
Impaired loans:					
Commercial real estate:					
Owner-occupied	\$ 3,843	Sales approach	Adjustment to comparables	0% to 45%	15.99%
		Cost approach	Adjustment to comparables	0% to 29.5%	14.76%
Nonowner-occupied	2,147	Sales approach	Adjustment to comparables	0% to 12.5%	6.9%
				0.9% to	
Commercial and industrial	298	Sales approach	Adjustment to comparables	9.7%	5.2%

The methods and assumptions, not previously presented, used to estimate fair values are described as follows:

Cash and Cash Equivalents: The carrying amounts of cash and short-term instruments approximate fair values and are classified as Level 1.

Certificates of Deposit in Financial Institutions: The carrying amounts of certificates of deposit in financial institutions approximate fair values and are classified as Level 2.

Securities Held to Maturity: The fair values for securities held to maturity are determined in the same manner as securities held for sale and discussed earlier in this note. Level 3 securities consist of nonrated municipal bonds and tax credit ("QZAB") bonds.

Restricted Investments in Bank Stocks: It is not practical to determine the fair value of Federal Home Loan Bank, Federal Reserve Bank and United Bankers Bank stock due to restrictions placed on its transferability.

Loans: Fair values of loans are estimated as follows: The fair value of fixed rate loans is estimated by discounting future cash flows using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality resulting in a Level 3 classification. For variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values resulting in a Level 3 classification. Impaired loans are valued at the lower of cost or fair value as described previously. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

Deposit Liabilities: The fair values disclosed for noninterest-bearing deposits are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amount) resulting in a Level 1 classification. The carrying amounts of variable rate, fixed-term money market accounts and certificates of deposit approximate their fair values at the reporting date resulting in a Level 2 classification. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flows calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits resulting in a Level 2 classification.

Other Borrowed Funds: The carrying values of the Company's short-term borrowings, generally maturing within ninety days, approximate their fair values resulting in a Level 2 classification. The fair values of the Company's

long-term borrowings are estimated using discounted cash flow analyses based on the current borrowing rates for similar types of borrowing arrangements resulting in a Level 2 classification.

Subordinated Debentures: The fair values of the Company's Subordinated Debentures are estimated using discounted cash flow analyses based on the current borrowing rates for similar types of borrowing arrangements resulting in a Level 2 classification.

Accrued Interest Receivable and Payable: The carrying amount of accrued interest approximates fair value, resulting in a classification that is consistent with the earning assets and interest-bearing liabilities with which it is associated.

Off-balance Sheet Instruments: Fair values for off-balance sheet, credit-related financial instruments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The fair value of commitments is not material.

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

NOTE 4 – SECURITIES

The following table summarizes the amortized cost and fair value of securities available for sale and securities held to maturity at September 30, 2016 and December 31, 2015 and the corresponding amounts of gross unrealized gains and losses recognized in accumulated other comprehensive income (loss) and gross unrecognized gains and losses:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
<u>Securities Available for Sale</u>				
<u>September 30, 2016</u>				
U.S. Government sponsored entity securities	\$ 10,627	\$ 9	\$ ----	\$ 10,636

Total held to maturity	\$995	\$ (5)	\$----	\$ ----	\$995	\$ (5)

There were no sales of investment securities during the three and nine months ended September 30, 2016. During the three and nine months ended September 30, 2015, the Company had proceeds of \$10,550 pertaining to securities sales on available for sale securities with gross gains recognized of \$28 and \$163 for both periods. Unrealized losses on the Company's debt securities have not been recognized into income because the issuers' securities are of high credit quality as of September 30, 2016, and management does not intend to sell and it is likely that management will not be required to sell the securities prior to their anticipated recovery. Management does not believe any individual unrealized loss at September 30, 2016 and December 31, 2015 represents an other-than-temporary impairment.

NOTE 5 – LOANS AND ALLOWANCE FOR LOAN LOSSES

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

	September	December
Loans are comprised of the following:	30,	31,

Total	\$16,575	\$ 193	\$ 193	\$16,455	\$ 545	\$ 545

The recorded investment of a loan is its carrying value excluding accrued interest and deferred loan fees.

Nonaccrual loans and loans past due 90 days or more and still accruing include both smaller balance homogenous loans that are collectively evaluated for impairment and individually classified as impaired loans.

The Company transfers loans to other real estate owned, at fair value less cost to sell, in the period the Company obtains physical possession of the property (through legal title or through a deed in lieu). As of September 30, 2016 and December 31, 2015, other real estate owned secured by residential real estate totaled \$986 and \$1,131, respectively. In addition, nonaccrual residential mortgage loans that are in the process of foreclosure had a recorded investment of \$1,042 and \$988 as of September 30, 2016 and December 31, 2015, respectively.

19

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

The following table presents the recorded investment of nonaccrual loans and loans past due 90 days or more and still accruing by class of loans as of September 30, 2016 and December 31, 2015:

Troubled Debt Restructurings:

A troubled debt restructuring ("TDR") occurs when the Company has agreed to a loan modification in the form of a concession for a borrower who is experiencing financial difficulty. All TDR's are considered to be impaired. The modification of the terms of such loans included one or a combination of the following: a reduction of the stated interest rate of the loan; an extension of the maturity date at a stated rate of interest lower than the current market rate for new debt with similar risk; a reduction in the contractual principal and interest payments of the loan; or short-term interest-only payment terms.

The Company has allocated reserves for a portion of its TDR's to reflect the fair values of the underlying collateral or the present value of the concessionary terms granted to the customer.

The following table presents the types of TDR loan modifications by class of loans as of September 30, 2016 and December 31, 2015:

	TDR's Performing to Modified Terms	TDR's Not Performing to Modified Terms	Total TDR's

Total TDR's	\$ 12,957	\$ 3,096	\$16,053

During the three months ended September 30, 2016, the TDR's described above increased the provision expense and the allowance for loan losses by \$14, with corresponding charge-offs of \$11. During the nine months ended September 30, 2016, the TDR's described above decreased the provision expense and the allowance for loan losses by \$1,105, with corresponding charge-offs of \$11. These results are compared to a \$44 decrease in both the provision expense and the allowance for loan losses during the three and nine months ended September 30, 2015, with corresponding charge-offs of \$1,422. During the year ended December 31, 2015, the TDR's described above increased the allowance for loan losses and provision expense by \$93 with corresponding charge-offs of \$1,422. The charge-offs of \$1,422 during 2015 included \$1,304 that were related to specific reserves that had already been provided for during 2014, and, as a result, did not impact provision expense during 2015.

At September 30, 2016, the balance in TDR loans increased \$869, or 5.4%, from year-end 2015. The increase was largely from additional funds advanced to one commercial and industrial loan relationship during the third quarter of 2016. The Company had 82% of its TDR's performing according to their modified terms at September 30, 2016, as compared to 81% at December 31, 2015. The Company's specific allocations in reserves to customers whose loan terms have been modified in TDR's totaled \$553 at September 30, 2016, as compared to \$1,669 in reserves at December 31, 2015. At September 30, 2016, the Company had \$1,292 in commitments to lend additional amounts to customers with outstanding loans that are classified as TDR's, as compared to \$995 at December 31, 2015.

There were no TDR loan modifications during the three months ended September 30, 2016. The following table presents the pre- and post-modification balances of TDR loan modifications by class of loans that occurred during the three months ended September 30, 2015:

Total TDR's	\$ 1,520	\$ 1,520	\$ ----	\$ ----

During the third quarter of 2016, the Company placed one commercial real estate TDR totaling \$226 on nonaccrual status. The borrower continues to experience financial difficulty and the Company has started the foreclosure process. The Company reviewed the loan's collateral during the third quarter and identified \$11 in collateral impairment, which resulted in a partial charge-off of principal. There were no specific allocations of the allowance for loan losses recorded on the impaired TDR loan at September 30, 2016. All of the Company's loans that were restructured during the nine months ended September 30, 2015 were performing in accordance with their modified terms. Excluding the commercial real estate loan of \$226 previously mentioned, there were no other TDR's described above at September 30, 2016 and 2015 that experienced any payment defaults within twelve months following their loan modification. A default is considered to have occurred once the TDR is past due 90 days or more or it has been placed on nonaccrual. TDR loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. The loans modified during the nine months ended September 30, 2016 increased the provision expense and the allowance for loan losses by \$11. As of September 30, 2016, the Company had no allocation of reserves to customers whose loan terms were modified during the first nine months of 2016. The loans modified during the nine months ended September 30, 2015 had no impact on the provision expense or the allowance for loan losses. As of September 30, 2015, the Company had no allocation of reserves to customers whose loan terms were modified during the first nine months of 2015.

Credit Quality Indicators:

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt, such as: current financial information, historical payment experience, credit documentation, public

information, and current economic trends, among other factors. These risk categories are represented by a loan grading scale from 1 through 10. The Company analyzes loans individually with a higher credit risk rating and groups these loans into categories called "criticized" and "classified" assets. The Company considers its criticized assets to be loans that are graded 8 and its classified assets to be loans that are graded 9 through 10. The Company's risk categories are reviewed at least annually on loans that have aggregate borrowing amounts that meet or exceed \$500.

The Company uses the following definitions for its criticized loan risk ratings:

Special Mention (Loan Grade 8). Loans classified as special mention indicate considerable risk due to deterioration of repayment (in the earliest stages) due to potential weak primary repayment source, or payment delinquency. These loans will be under constant supervision, are not classified and do not expose the institution to sufficient risks to warrant classification. These deficiencies should be correctable within the normal course of business, although significant changes in company structure or policy may be necessary to correct the deficiencies. These loans are considered bankable assets with no apparent loss of principal or interest envisioned. The perceived risk in continued lending is considered to have increased beyond the level where such loans would normally be granted. Credits that are defined as a troubled debt restructuring should be graded no higher than special mention until they have been reported as performing over one year after restructuring.

The Company uses the following definitions for its classified loan risk ratings:

Substandard (Loan Grade 9). Loans classified as substandard represent very high risk, serious delinquency, nonaccrual, or unacceptable credit. Repayment through the primary source of repayment is in jeopardy due to the existence of one or more well defined weaknesses and the collateral pledged may inadequately protect collection of the loans. Loss of principal is not likely if weaknesses are corrected, although financial statements normally reveal significant weakness. Loans are still considered collectible, although loss of principal is more likely than with special mention loan grade 8 loans. Collateral liquidation considered likely to satisfy debt.

Doubtful (Loan Grade 10). Loans classified as doubtful display a high probability of loss, although the amount of actual loss at the time of classification is undetermined. This should be a temporary category until such time that actual loss can be identified, or improvements made to reduce the seriousness of the classification. These loans exhibit all substandard characteristics with the addition that weaknesses make collection or liquidation in full highly questionable and improbable. This classification consists of loans where the possibility of loss is high after collateral liquidation based upon existing facts, market conditions, and value. Loss is deferred until certain important and reasonable specific pending factors which may strengthen the credit can be more accurately determined. These factors may include proposed acquisitions, liquidation procedures, capital injection, receipt of additional collateral, mergers, or refinancing plans. A doubtful classification for an entire credit should be avoided when collection of a specific portion appears highly probable with the adequately secured portion graded substandard.

Criticized and classified loans will mostly consist of commercial and industrial and commercial real estate loans. The Company considers its loans that do not meet the criteria for a criticized and classified asset rating as pass rated loans, which will include loans graded from 1 (Prime) to 7 (Watch). All commercial loans are categorized into a risk category either at the time of origination or reevaluation date. As of September 30, 2016 and December 31, 2015, and based on the most recent analysis performed, the risk category of commercial loans by class of loans was as follows:

<u>September 30, 2016</u>	Pass	Criticized	Classified	Total
Commercial real estate:				
Owner-occupied	\$72,943	\$ 370	\$ 8,891	\$82,204
Nonowner-occupied	88,613	367	9,943	98,923
Construction	33,951	----	543	34,494
Commercial and industrial	94,011	----	3,181	97,192
Total	\$289,518	\$ 737	\$ 22,558	\$312,813

<u>December 31, 2015</u>	Pass	Criticized	Classified	Total
Commercial real estate:				
Owner-occupied	\$62,287	\$ 6,738	\$ 4,433	\$73,458
Nonowner-occupied	61,577	6,305	4,120	72,002
Construction	23,080	----	772	23,852

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

Commercial and industrial	70,852	5,232	5,852	81,936
Total	\$217,796	\$ 18,275	\$ 15,177	\$251,248

The Company also obtains the credit scores of its borrowers upon origination (if available by the credit bureau), but the scores are not updated. The Company focuses mostly on the performance and repayment ability of the borrower as an indicator of credit risk and does not consider a borrower's credit score to be a significant influence in the determination of a loan's credit risk grading.

24

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

For residential and consumer loan classes, the Company evaluates credit quality based on the aging status of the loan, which was previously presented, and by payment activity. The following table presents the recorded investment of residential and consumer loans by class of loans based on repayment activity as of September 30, 2016 and December 31, 2015:

	Consumer				Total
	Automobile	Home Equity	Other	Residential Real Estate	
Performing	\$58,290	\$20,124	\$56,792	\$269,796	\$405,002
Nonperforming	69	35	129	3,539	3,772
Total	\$58,359	\$20,159	\$56,921	\$273,335	\$408,774

	Consumer				Total
	Automobile	Home Equity	Other	Residential Real Estate	
Performing	\$44,521	\$20,745	\$45,218	\$221,807	\$332,291
Nonperforming	45	96	4	2,068	2,213
Total	\$44,566	\$20,841	\$45,222	\$223,875	\$334,504

The Company, through its subsidiaries, originates residential, consumer, and commercial loans to customers located primarily in the southeastern areas of Ohio as well as the western counties of West Virginia. Approximately 5.09% of total loans were unsecured at September 30, 2016, down from 6.06% at December 31, 2015.

NOTE 6 - FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

The Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and financial guarantees. The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit, and financial guarantees written, is represented by the contractual amount of those instruments. The contract amounts of these instruments are not included in the consolidated financial statements. At September 30, 2016, the contract amounts of these instruments totaled approximately \$67,556, compared to \$62,415 at December 31, 2015. The Bank uses the same credit policies in making commitments and conditional obligations as it does for instruments recorded on the balance sheet. Since many of these instruments are expected to expire without being drawn upon, the total contract amounts do not necessarily represent future cash requirements.

NOTE 7 - OTHER BORROWED FUNDS

Other borrowed funds at September 30, 2016 and December 31, 2015 are comprised of advances from the Federal Home Loan Bank ("FHLB") of Cincinnati and promissory notes. At September 30, 2016 and December 31, 2015, FHLB Borrowings included \$84 and \$117 in capitalized lease obligations, respectively.

	FHLB Borrowings	Promissory Notes	Totals
September 30, 2016	\$ 26,747	\$ 8,918	\$35,665
December 31, 2015	\$ 20,028	\$ 3,918	\$23,946

Pursuant to collateral agreements with the FHLB, advances were secured by \$263,867 in qualifying mortgage loans, \$80,092 in commercial loans and \$5,365 in FHLB stock at September 30, 2016. Fixed-rate FHLB advances of \$26,663 mature through 2042 and have interest rates ranging from 1.34% to 3.31% and a year-to-date weighted average cost of 2.08%. There were no variable-rate FHLB borrowings at September 30, 2016.

At September 30, 2016, the Company had a cash management line of credit enabling it to borrow up to \$75,000 from the FHLB. All cash management advances have an original maturity of 90 days. The line of credit must be renewed on an annual basis. There was \$75,000 available on this line of credit at September 30, 2016.

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

Based on the Company's current FHLB stock ownership, total assets and pledgeable loans, the Company had the ability to obtain borrowings from the FHLB up to a maximum of \$189,639 at September 30, 2016. Of this maximum borrowing capacity, the Company had \$115,976 available to use as additional borrowings, of which \$75,000 could be used for short-term, cash management advances, as mentioned above.

Promissory notes, issued primarily by Ohio Valley, are due at various dates through a final maturity date of August 1, 2026, and have fixed rates ranging from 1.25% to 4.09% through August 1, 2021 and a year-to-date weighted average cost of 2.05% at September 30, 2016, as compared to 1.38% at December 31, 2015. Promissory notes payable by Ohio Valley to related parties totaled \$360 at September 30, 2016. Promissory notes payable to other banks totaled \$5,000 at September 30, 2016.

Letters of credit issued on the Bank's behalf by the FHLB to collateralize certain public unit deposits as required by law totaled \$47,000 at September 30, 2016 and \$34,800 at December 31, 2015.

Scheduled principal payments as of September 30, 2016:

	FHLB Borrowings	Promissory Notes	Totals
2016	\$ 585	\$ 1,905	\$2,490
2017	5,022	2,019	7,041
2018	1,967	946	2,913
2019	1,906	453	2,359
2020	1,817	471	2,288
Thereafter	15,450	3,124	18,574
	\$ 26,747	\$ 8,918	\$35,665

NOTE 8 – SEGMENT INFORMATION

The reportable segments are determined by the products and services offered, primarily distinguished between banking and consumer finance. They are also distinguished by the level of information provided to the chief operating decision maker, who uses such information to review performance of various components of the business, which are then aggregated if operating performance, products/services, and customers are similar. Loans, investments, and deposits provide the majority of the net revenues from the banking operation, while loans provide the majority of the net revenues for the consumer finance segment. All Company segments are domestic.

Total revenues from the banking segment, which accounted for the majority of the Company's total revenues, totaled 90.9% and 90.2% of total consolidated revenues for the quarters ended September 30, 2016 and 2015, respectively.

The accounting policies used for the Company's reportable segments are the same as those described in Note 1 - Summary of Significant Accounting Policies. Income taxes are allocated based on income before tax expense.

Information for the Company's reportable segments is as follows:

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(dollars in thousands, except share and per share data)

Forward Looking Statements

Except for the historical statements and discussions contained herein, statements contained in this report constitute "forward looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the

Securities Act of 1934 and as defined in the Private Securities Litigation Reform Act of 1995. Such statements are often, but not always, identified by the use of such words as "believes," "anticipates," "expects," and similar expressions. Such statements involve various important assumptions, risks, uncertainties, and other factors, many of which are beyond our control and which could cause actual results to differ materially from those expressed in such forward looking statements. These factors include, but are not limited to: changes in political, economic or other factors, such as inflation rates, recessionary or expansive trends, taxes, the effects of implementation of legislation and the continuing economic uncertainty in various parts of the world; competitive pressures; fluctuations in interest rates; the level of defaults and prepayment on loans made by the Company; unanticipated litigation, claims, or assessments; fluctuations in the cost of obtaining funds to make loans; and regulatory changes. Additional detailed information concerning a number of important factors which could cause actual results to differ materially from the forward-looking statements contained in management's discussion and analysis is available in the Company's filings with the Securities and Exchange Commission, under the Securities Exchange Act of 1934, including the disclosure under the heading "Item 1A. Risk Factors" of Part 1 of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015, and Part II, Item 1.A. "Risk Factors" in the Company's Quarterly Reports on Form 10-Q for the quarters ended March 31, 2016, and June 30, 2016. Readers are cautioned not to place undue reliance on such forward looking statements, which speak only as of the date hereof. The Company undertakes no obligation and disclaims any intention to republish revised or updated forward looking statements, whether as a result of new information, unanticipated future events or otherwise.

Financial Overview

The Company is primarily engaged in commercial and retail banking, offering a blend of commercial and consumer banking services within southeastern Ohio as well as western West Virginia. The banking services offered by the Bank include the acceptance of deposits in checking, savings, time and money market accounts; the making and servicing of personal, commercial, floor plan and student loans; the making of construction and real estate loans; and credit card services. The Bank also offers individual retirement accounts, safe deposit boxes, wire transfers and other standard banking products and services. In addition, the Bank is one of a limited number of financial institutions that facilitates the payment of tax refunds through a third-party tax refund product provider. The Bank has facilitated the payment of these tax refunds through electronic refund check/deposit ("ERC/ERD") transactions. ERC/ERD transactions involve the payment of a tax refund to the taxpayer after the Bank has received the refund from the federal/state government. ERC/ERD transactions occur primarily during the tax refund season, typically during the first quarter of each year. Loan Central also provides refund anticipation loans ("RALs") to its customers. RALs are short-term cash advances against a customer's anticipated income tax refund.

On August 5, 2016, the Company completed the merger of Milton Bancorp, Inc. ("Milton Bancorp") into Ohio Valley. Immediately following the merger, Milton Bancorp's wholly-owned subsidiary, The Milton Banking Company ("Milton Bank"), was merged with and into the Bank. Milton Bank's results of operations were included in the Company's results beginning August 6, 2016. This transaction resulted in the addition of \$132 million in assets and 5 branch locations in Jackson, Madison and Pickaway counties in Ohio.

Net income totaled \$358 during the third quarter of 2016, a decrease of \$1,284, or 78.2%, compared to \$1,642 during the third quarter of 2015. Earnings per share for the third quarter of 2016 also decreased by \$.32, or 80.0%, compared to the third quarter of 2015, to finish at \$.08 per share. The Company's net income during the nine months ended September 30, 2016 totaled \$4,896, a decrease of \$1,780, or 26.7%, compared to \$6,676 during the nine months ended September 30, 2015. Earnings per share during the first nine months of 2016 decreased by \$.47, or 29.0%, compared to the first nine months of 2015, to finish at \$1.15 per share. Lower earnings were impacted primarily by higher provision expense experienced during the third quarter of 2016 due to increased specific allocations associated with two asset impairments. Merger expenses related to acquisition activities also contributed to the decline in net income for the three and nine months ended September 30, 2016.

The annualized net income to average asset ratio, or return on assets ("ROA"), decreased to 0.74% at September 30, 2016, compared to 1.06% at September 30, 2015. The Company's net income to average equity ratio, or return on equity ("ROE"), also decreased to 6.85% at September 30, 2016, compared to 10.10% at September 30, 2015.

Net interest income for the three and nine months ended September 30, 2016 showed positive growth over the same periods in 2015. The increase came primarily from interest revenues associated with \$113 million in loans acquired from Milton Bank. The acquisition of loans also contributed to a \$97 million increase in the Company's average earning assets during the third quarter of 2016. Also contributing to net interest income growth was higher interest recorded from the Company's interest-bearing Federal Reserve clearing account. Average interest-bearing balances maintained at the Federal Reserve during the first nine months of 2016 grew 6.2% over 2015, impacted by seasonal tax processing activity. However, it has been the Federal Reserve's action of increasing short-term interest rates in December 2015 by 25 basis points that contributed most to higher interest income on deposits.

During the three months ended September 30, 2016, provision expense increased \$1,719 from the prior year's third quarter, and increased \$1,618 during the nine months ended 2016 versus the same period in 2015. Higher provision expense during both periods was largely due to an increase in specific allocations associated with two commercial real estate loans. Management's analysis of both collateral dependent impaired loans identified asset impairment, which resulted in charges to provision expense of \$814 during the three months ended September 30, 2016, and \$2,399 during the nine months ended September 30, 2016. The general reserve for loan losses remained relatively stable from year-end 2016 due to improved economic risk factors resulting from lower historical loan losses and smaller

criticized asset balances. The allowance for loan losses was 1.04 percent of total loans at September 30, 2016, compared to 1.13 percent at December 31, 2015 and 1.18 percent at September 30, 2015.

Total noninterest income during the three months ended September 30, 2016 increased \$109, or 6.9%, over the third quarter in 2015, but decreased \$201, or 2.9%, during the first nine months of 2016 as compared to the same period in 2015. On a year-to-date basis, the Company's lower noninterest income has been largely due to less tax processing fees through ERC/ERD transactions. Although the volume of tax refunds processed increased during 2016, tax refund processing fees totaled \$2,037, a decrease of \$325 from the same period during 2015. This decrease was due to the per-item fees received by the Company being lower under the new contract with the third-party tax refund product provider. The remaining noninterest categories were impacted by lower gains on sale of securities combined with increasing service charges on deposit accounts, earnings from tax-free bank owned life insurance ("BOLI") investments and interchange fees earned on debit and credit card transactions. The acquisition of Milton Bank provided the largest impact to the quarterly noninterest income growth, coming mostly from service charges on deposits.

Total noninterest expense increased \$1,101 for the third quarter of 2016, and increased \$1,862 during the first nine months of 2016, as compared to the same periods in 2015. Higher overhead expense was primarily related to merger expenses from the acquisition of Milton Bancorp. Merger expenses include integration costs, legal and accounting fees, and investment banking expenses. Further impacting overhead expense were increases in salaries and employee benefit costs due to annual merit increases and higher health insurance.

At September 30, 2016, total assets were \$970,230, compared to \$796,285 at year-end 2015. The increase was impacted by \$132 million in assets acquired from Milton Bank, consisting mostly of \$113 million in loans and \$6 million in securities. Gross loan balances of \$721,587 at September 30, 2016 increased by \$135,835 from year-end 2015. In addition to Milton Bank loan acquisitions, the Company also benefited from new commercial real estate loan originations during 2016 within the Athens, Ohio market. In late 2015, the Company's new loan production office opened in Athens, Ohio, and as of September 30, 2016, had nearly \$17 million in loans outstanding. Asset growth was also impacted by an \$11,966 increase to interest-bearing deposits from the Company's Federal Reserve clearing account that were generated from seasonal tax clearing activities during the first nine months of 2016. Total investment securities also increased 11.6% from year-end 2015, due mostly to new purchases of mortgage-backed securities during 2016 and investment securities acquired from Milton Bank.

Total liabilities were \$864,442 at September 30, 2016, up \$158,627 since December 31, 2015. The increase came mostly from \$119 million in deposits acquired from Milton Bank, consisting of \$27 million in checking account balances, \$46 million in savings and NOW accounts, and \$46 million in time deposits. The Company also experienced organic deposit growth during 2016 from its noninterest-bearing demand accounts, as well as its interest-bearing deposit accounts, coming mostly from municipal public fund deposits and statement savings account balances. In addition, Ohio Valley issued a \$5,000 promissory note to a bank during the third quarter of 2016 which increased liabilities. The borrowed funds were used to finance part of the purchase price of the Milton acquisition.

At September 30, 2016, total shareholders' equity was \$105,788, up \$15,318 since December 31, 2015. The consideration paid for Milton Bancorp totaled \$18,875, of which \$11,444 was the market value of Ohio Valley's common shares and \$7,431 was cash. Regulatory capital ratios of the Company remained significantly higher than the "well capitalized" minimums.

Comparison of Financial Condition at September 30, 2016 and December 31, 2015

The following discussion focuses, in more detail, on the consolidated financial condition of the Company at September 30, 2016 compared to December 31, 2015. This discussion should be read in conjunction with the interim consolidated financial statements and the footnotes included in this Form 10 Q.

Cash and Cash Equivalents

At September 30, 2016, cash and cash equivalents increased \$16,355, to finish at \$61,885, compared to \$45,530 at December 31, 2015. The increase in cash and cash equivalents was largely due to deposit liability growth from year-end 2015, mostly from seasonal increases in ERC/ERD transactions. The Company continues to utilize its interest-bearing Federal Reserve Bank clearing account to maintain these excess funds. The interest rate paid on both the required and excess reserve balances is based on the targeted federal funds rate established by the Federal Open Market Committee, which currently is 0.50%.

29

In December 2015, short-term interest rates were increased by 25 basis points, which had a corresponding effect to the interest revenue growth experienced during the three and nine months ended September 30, 2016 on Federal Reserve Bank clearing account balances. This interest rate is higher than what the Company would have received from its investments in federal funds sold, currently in range of less than 0.50%. Furthermore, Federal Reserve Bank balances are 100% secured.

The Company also recognized \$1,686 in net cash acquired from the Milton merger on August 5, 2016 which contributed to the increase in cash and cash equivalents at September 30, 2016. This increase came mostly from \$9,117 in cash and cash equivalents acquired from Milton Bank partially offset by \$7,431 in cash paid for common and preferred shares as part of the total purchase price of the merger.

As liquidity levels vary continuously based on consumer activities, amounts of cash and cash equivalents can vary widely at any given point in time. The Company's focus will be to invest excess funds into longer-term, higher-yielding assets, primarily loans, when the opportunities arise.

Certificates of deposit

At September 30, 2016, the Company had \$1,670 in certificates of deposit owned by the Captive, relatively unchanged from year-end 2015. The deposits on hand at September 30, 2016 consist of six certificates with maturity terms ranging from less than 1 year up to 3 years.

Securities

The balance of total securities increased \$12,957, or 11.6%, compared to year-end 2015. The acquired investment securities from Milton Bank totaled \$5,868, consisting mostly of U.S. Government sponsored entity securities of \$2,628 and U.S. Government agency ("Agency") mortgage-backed securities of \$2,845. The Company's investment securities portfolio is made up mostly of Agency mortgage-backed securities, which increased \$11,538, or 14.0%, from year-end 2015 and represented 75.7% of total investments at September 30, 2016. During the first nine months of 2016, the Company invested \$20,313 in new Agency mortgage-backed securities, while receiving principal repayments of \$13,256. The monthly repayment of principal has been the primary advantage of Agency mortgage-backed securities as compared to other types of investment securities, which deliver proceeds upon maturity or call date.

Loans

The loan portfolio represents the Company's largest asset category and is its most significant source of interest income. Gross loan balances totaled \$721,587 at September 30, 2016, representing an increase of \$135,835, or 23.2%, as compared to \$585,752 at December 31, 2015. This loan growth was attributable to the \$113,298 in loans acquired from Milton Bank in addition to \$28,247 of organic loan growth during the year, coming mostly from the Athens, Ohio market. Loan balance growth came mostly from higher commercial real estate balances.

The commercial lending segment increased \$61,565, or 24.5%, from year-end 2015, which came mostly from the commercial real estate loan portfolio, which increased \$46,309, or 27.4%, from year-end 2015. The commercial real estate loan segment comprises the largest portion of the Company's total commercial loan portfolio, representing 68.9% at September 30, 2016. At September 30, 2016, the outstanding balance of commercial real estate loans acquired from Milton Bank totaled \$24,047. The Company's growth in commercial real estate loans was also impacted by its Athens, Ohio market. In December 2015, the Company opened a loan production office in Athens, Ohio to expand its market presence. Loan demand was very responsive within the Athens location, producing \$5,284 in loans during the first quarter of 2016 and \$9,900 in loans during the second quarter of 2016. As a result, commercial real estate loan balances from the Athens loan production office have increased \$16,757 since year-end 2015. Furthermore, organic loan volume contributed to construction loans being up \$10,642, or 44.6%, from year-end

2015. Commercial and industrial loans consist of loans to corporate borrowers primarily in small to mid-sized industrial and commercial companies that include service, retail and wholesale merchants. Collateral securing these loans includes equipment, inventory, and stock. At September 30, 2016, the outstanding balance of commercial and industrial loans acquired from Milton Bank totaled \$14,725, which contributed to most of the year-to-date growth within this portfolio segment. While management believes lending opportunities exist in the Company's markets, future commercial lending activities will depend upon economic and related conditions, such as general demand for loans in the Company's primary markets, interest rates offered by the Company, the effects of competitive pressure and normal underwriting considerations. Management will continue to place emphasis on its commercial lending, which generally yields a higher return on investment as compared to other types of loans.

Consumer loan balances increased \$24,810, or 22.4%, from year-end 2015. At September 30, 2016, the outstanding balance of consumer loans acquired from Milton Bank totaled \$22,820, which contributed to most of the year-to-date growth. Most of Milton Bank's acquired consumer loans were from automobile loans, totaling \$8,945 at the end of the third quarter of 2016. Total automobile loans were up \$13,793, or 31.0%, and represent the Company's largest consumer loan segment at 43.2% of total consumer loans. Further impacting consumer loan growth were loans secured by deposits and unsecured loans. The Company will continue to monitor its auto lending segment while maintaining strict loan underwriting processes to limit future loss exposure.

The residential real estate loan segment comprises the largest portion of the Company's loan portfolio at 37.9% and consists primarily of one- to four-family residential mortgages and carries many of the same customer and industry risks as the commercial loan portfolio. Residential real estate loan balances during the first nine months of 2016 increased \$49,460, or 22.1%, from year-end 2015. At September 30, 2016, the outstanding balance of residential real estate loans acquired from Milton Bank totaled \$45,996, which contributed to most of the year-to-date growth. The organic loan production within the real estate portfolio consists of increasing short-term adjustable-rate mortgages partially offset by decreasing long-term fixed-rate mortgages. As part of management's interest rate risk strategy, the Company continues to sell most of its long-term fixed-rate residential mortgages to the Federal Home Loan Mortgage Corporation, while maintaining the servicing rights for those mortgages. A customer that does not qualify for a long-term, secondary market loan may choose from one of the Company's other adjustable-rate mortgage products, which contributed to higher balances of adjustable-rate mortgages from year-end 2015.

Allowance for Loan Losses

The Company established a \$7,537 allowance for loan losses at September 30, 2016, which was an increase from the \$6,648 allowance at year-end 2015. The allowance was impacted by higher specific allocations from year-end 2015. Specific allocations of the allowance for loan losses identify loan impairment by measuring fair value of the underlying collateral and the present value of estimated future cash flows. When re-evaluating the impaired loan balances to their corresponding collateral values at September 30, 2016, a specific allocation of \$2,952 was needed to fund the allowance for loan losses, representing an increase of \$788, or 36.4%, from year-end 2015. This higher reserve allocation was impacted mostly by two impaired commercial real estate loan relationships that required specific reserves of \$2,399 at September 30, 2016. Of this, a total of \$1,585 in specific reserves had been provided for during the second quarter of 2016, with the remaining portion being recorded during the third quarter of 2016 based on updated collateral values. This was partially offset by the charge-off of a collateral dependent impaired loan's specific allocation of \$586 during the third quarter of 2016. This specific reserve had been allocated for during 2015 which resulted in no corresponding provision expense impact in 2016. Further offsetting the specific reserve increase was the reduction of \$1,155 in specific reserves that were previously related to one commercial and industrial loan relationship. During the second quarter of 2016, a re-evaluation of this borrower's financial performance identified significant improvement, which resulted in a credit quality upgrade to the borrower relationship and no identified collateral impairment at September 30, 2016.

As part of the Company's quarterly analysis of the allowance for loan losses, management reviewed various factors that directly impact the general allocation need of the allowance, which include: historical loan losses, loan delinquency levels, local economic conditions and unemployment rates, criticized/classified asset coverage levels and loan loss recoveries. During the first nine months of 2016, the general allocation component of the allowance for loan losses was relatively stable, increasing \$101, or 2.3%, from year-end 2015. A portion of the increase can be attributed to a higher balance of classified assets at September 30, 2016, being partially offset by lower criticized assets from year-end 2015. The changes in classified and criticized assets from year-end 2015 came primarily from commercial real estate and commercial and industrial loans. Also partially offsetting increases to the general reserve is a decreasing historical loss factor from year-end 2015.

The Company also experienced increases in its troubled assets, with nonperforming loans to total loans finishing at 1.31% at September 30, 2016, as compared to 1.24% at December 31, 2015. The Company's nonperforming assets to

total assets finished at 1.25% at September 30, 2016, an increase of 4 basis points from year-end 2015. Impaired loans at September 30, 2016 increased \$6,202, or 36.0%, from year-end 2015. This increase was largely from the debt restructuring of one owner-occupied commercial real estate loan relationship during the second quarter of 2016.

The Company maintained its allowance for loan losses to total loans ratio at 1.04% at September 30, 2016 and 1.13% at year-end 2015. Management believes that the allowance for loan losses at September 30, 2016 was adequate and reflected probable incurred losses in the loan portfolio. There can be no assurance, however, that adjustments to the allowance for loan losses will not be required in the future. Changes in the circumstances of particular borrowers, as well as adverse developments in the economy, are factors that could change and make adjustments to the allowance for loan losses necessary. Asset quality will continue to remain a key focus, as management continues to stress not just loan growth, but quality in loan underwriting as well.

Deposits

Deposits continue to be the most significant source of funds used by the Company to meet obligations for depositor withdrawals, to fund the borrowing needs of loan customers, and to fund ongoing operations. Total deposits at September 30, 2016 increased \$145,037, or 22.0%, from year-end 2015. This deposit growth was largely impacted by the \$119,215 in deposits acquired from Milton Bank on August 5, 2016. The acquired deposits consisted of \$46,283 in time deposits, \$45,687 in savings, NOW and money market accounts, and \$27,245 in noninterest-bearing demand deposits.

Deposit growth came primarily from interest-bearing NOW accounts, which increased \$34,462, or 27.7%, during the first nine months of 2016 as compared to year-end 2015. This increase was largely driven by growth in municipal NOW products. Interest-bearing deposit growth also came from statement savings account balances, which increased \$36,448, or 61.3%, from year-end 2015.

Also during the first nine months of 2016, the Company experienced an increase in its noninterest-bearing demand deposit accounts, which increased \$39,434, or 22.3%, from year-end 2015. The increase came largely from business checking and incentive-based checking products.

During the first nine months of 2016, time deposits increased \$32,453, or 20.4%, from year-end 2015. As CD market rates continue to adjust downward, the spread between a short-term CD rate and a statement savings rate has become small enough that many customers choose to invest balances into a more liquid product, perhaps hoping for rising rates in the near future. This change in time deposits from year-end 2015 fits within management's strategy of focusing on more "core" deposit balances that include interest-bearing demand, savings, money market and noninterest-bearing deposit balances.

While facing increased competition for deposits in its market areas, the Company will continue to emphasize growth and retention in its core deposit relationships during the remainder of 2016, reflecting the Company's efforts to reduce its reliance on higher cost funding and improving net interest income.

Other Borrowed Funds

Other borrowed funds were \$35,665 at September 30, 2016, an increase of \$11,719, or 48.9%, from year-end 2015. The increase was related to management's decision to fund specific fixed-rate loans with like-term FHLB advances during the first and second quarters of 2016. Furthermore, Ohio Valley issued a \$5,000 promissory note to a bank during the third quarter of 2016 to help finance the cash disbursements related to the Milton Bancorp acquisition. The note has a 10-year maturity that is fixed for 5 years. While deposits continue to be the primary source of funding for growth in earning assets, management will continue to utilize Federal Home Loan Bank advances and promissory notes to help manage interest rate sensitivity and liquidity.

Shareholders' Equity

The Company maintains a capital level that exceeds regulatory requirements as a margin of safety for its depositors. At September 30, 2016, the Bank's capital exceeded the minimum requirements to be deemed "well capitalized" under applicable prompt corrective action regulations. Total shareholders' equity at September 30, 2016 of \$105,788 increased \$15,318, or 16.9%, as compared to \$90,470 at December 31, 2015. Shareholders' equity at September 30, 2016 included \$11,444 from the 523,518 shares of common stock that were issued in conjunction with the acquisition of Milton Bancorp. Further contributing to capital growth was year-to-date net income of \$4,896, partially offset by cash dividends paid of \$2,605, or \$.61 per share. The change in unrealized gains on investment securities increased capital by \$1,008 during the nine months ended September 30, 2016.

Comparison of Results of Operations
for the Three and Nine Months Ended
September 30, 2016 and 2015

The following discussion focuses, in more detail, on the consolidated results of operations of the Company for the three and nine months ended September 30, 2016 compared to the same periods in 2015. This discussion should be read in conjunction with the interim consolidated financial statements and the footnotes included in this Form 10 Q.

Net Interest Income

The most significant portion of the Company's revenue, net interest income, results from properly managing the spread between interest income on earning assets and interest expense incurred on interest-bearing liabilities. During the third quarter of 2016, net interest income increased \$700, or 8.4%, as compared to the third quarter of 2015. During the nine months ended September 30, 2016, net interest income increased \$927, or 3.7%, as compared to the nine months ended September 30, 2015. Net interest income for both periods was impacted by the Milton Bank acquisition, which included interest income on over \$119 million of earning assets partially offset by interest expense on over \$119 million of interest-bearing deposits. In total, the Company benefited from \$896 in net interest income generated by the Milton Bank acquisition during the third quarter of 2016.

Total interest and fee income recognized on the Company's earning assets increased \$808, or 9.0%, during the third quarter of 2016, which contributed to a year-to-date increase of \$998, or 3.6%, as compared to the same periods in 2015. While the Company generated loan growth primarily through the Milton Bank merger, there were already trends of loan origination improvement making a positive impact to loan earnings. The Athens, Ohio loan production office has generated over \$16 million in commercial real estate loans since year-end 2015, while construction loans have grown over 44.6% since year-end 2015. With the merger and improved loan production, the Company's loan income now comprises a larger share of interest and fee income compared to the third quarter of 2015. As a result, total interest and fees on loans increased \$762, or 9.2%, during the third quarter of 2016, while the Company's year-to-date loan revenue improved over the prior year by \$775, or 3.1%.

During the three and nine months ended September 30, 2016, total other interest income increased \$40 and \$186, as compared to the same periods in 2015, respectively. The increases were primarily due to higher interest revenue recorded from the Company's interest-bearing Federal Reserve clearing account. The Company continues to utilize its Federal Reserve clearing account to manage seasonal tax refund deposits and fund earning asset growth. This interest-bearing account carried an interest rate of 0.25% during most of 2015. In December 2015, the Federal Reserve increased short-term rates by 25 basis points, which increased the Federal Reserve clearing account's interest rate from 0.25% to 0.50%. The timing of this rate adjustment benefited the Company, as it entered into the first quarter experiencing significant levels of excess funds impacted by the large volume of ERC/ERD transactions that were maintained within the Federal Reserve clearing account.

The remaining interest income categories increased \$6 and \$37 during the three and nine months ended September 30, 2016, as compared to the same periods in 2015, respectively. The increase came primarily from Agency mortgage-backed securities. The investment prices for Agency mortgage-backed securities continue to adjust closer to their par values, resulting in less monthly premium expense and higher return yields.

Total yields on the Company's earning assets decreased from the prior year. While yields on loans remain below the prior year, yields on investment securities continue to improve, with newer Agency mortgage-backed security purchases being acquired at higher investment rates. Asset yields have also been positively impacted by the Federal Reserve's 25 basis point increase in short-term interest rates from December 2015. The effect of this rate adjustment was felt mostly in the higher average balances associated with the Federal Reserve clearing account due to seasonal tax refund deposits. As a result of these factors, the earning asset yield at September 30, 2016 was 4.69%, compared to 4.75% at September 30, 2015.

Total interest expense incurred on the Company's interest-bearing liabilities during the third quarter of 2016 increased \$108, or 14.8%, and increased \$71, or 3.3%, during the first nine months of 2016, as compared to the same periods in 2015. The increases were primarily from the Milton Bank acquired deposits that generated more interest expense. However, the Company's interest expense continues to be minimized by a sustained low-rate environment that has impacted the repricings of various Bank deposit products, including certain interest-bearing demand accounts. This has contributed to a lower weighted average cost of the Company's core deposits, which finished at 0.23% at September 30, 2016, as compared to 0.28% at September 30, 2015. The Company continues to utilize more of its lower cost, core deposit funding sources to further reduce interest expense. In addition, over 60% of the acquired Milton Bank deposits consisted of core deposit funding sources. As a result, the Company's average interest- and non-interest bearing core deposits increased \$47,449, or 8.9%, while the average balances of higher costing time deposits decreased \$9,147, or 5.4%, during the first nine months of 2016, as compared to the same period in 2015. The decreases in average market interest rates and the continued emphasis on utilizing lower costing deposit balances have caused the Company's total weighted average costs on interest-bearing deposits to decrease by 3 basis points from 0.45% at September 30, 2015 to 0.42% at September 30, 2016.

During 2016, the Company's average asset yields have completely offset the decline in funding costs. As a result, the Company's net interest margin results were lower from the prior year, finishing at 4.29% during the third quarter of 2016 and 4.34% during the first nine months of 2016, as compared to 4.46% and 4.38% during the same periods in 2015, respectively. While the Company benefited in the first half of 2016 from a heightened level of excess funds within its Federal Reserve clearing account, the focus will be on re-deploying the retained portion of these funds to higher yielding assets as opportunities arise. The Company will continue to face pressure on its net interest income and margin improvement unless loan balances continue to expand and remain a larger component of overall earning assets.

Provision for Loan Losses

During the third quarter of 2016, the Company experienced an increase in provision expense of \$1,719 compared to negative provision expense during the third quarter of 2015. As a result, provision expense during the nine months ended September 30, 2016 increased by \$1,618, as compared to the first nine months of 2015. The quarterly increase in provision expense was primarily due to an increase in specific allocations associated with two commercial real estate loans. As previously mentioned, management determined there was collateral impairment on both loans, which resulted in an increase of \$814 to specific reserves and a corresponding charge to provision expense during the third quarter of 2016. Further impacting the comparison of quarterly provision expense were the payoffs of two commercial real estate loans during the third quarter of 2015. Prior to payoff, a specific allocation of \$621 had been provided for based on the collateral values associated with the two impaired commercial loans. In September 2015, the Company was successful in collecting the full amount of principal on both loans, which resulted in none of the specific allocation being used.

Net charge-offs increased \$574 during the third quarter of 2016, but decreased \$703 during the first nine months of 2016, as compared to the same periods in 2015. The quarterly increase was largely from the charge-off of a \$586 specific allocation associated with a commercial and industrial loan relationship. The provision expense impact was limited to just the general reserve allocation, as the specific allocation had already been provided for during the second quarter of 2015. The year-to-date decrease in net charge-offs was largely from a \$1,304 charge-off of a collateral dependent impaired loan's specific reserve which occurred in the second quarter of 2015. Since the specific reserve had been allocated for during 2014, there was no corresponding provision expense impact associated with this charge-off in 2015. Excluding the charge-offs of both specific reserves from 2016 and 2015, the remaining net charge-offs during the year-to-date period at September 30, 2016 were comparable to 2015.

Future provisions to the allowance for loan losses will continue to be based on management's quarterly in-depth evaluation that is discussed in further detail under the caption "Critical Accounting Policies - Allowance for Loan Losses" within this Management's Discussion and Analysis.

Noninterest Income

Noninterest income for the three months ended September 30, 2016 increased \$109, or 6.9%, from the three months ended September 30, 2015. However, noninterest income for the nine months ended September 30, 2016 decreased \$201, or 2.9%, from the nine months ended September 30, 2015. Noninterest income for both periods was impacted by the Milton Bank acquisition, which included revenue primarily from service charges on deposit accounts and ATM fees. In total, the Company benefited from \$101 in noninterest income generated by the Milton Bank acquisition during the third quarter of 2016. Yet, these positive contributions were not enough to offset the decreased earnings in other areas of noninterest income on a year-to-date basis. Lower noninterest income during the first nine months of 2016 has been largely affected by the Company's seasonal ERC/ERD fees, which decreased \$325, or 13.8%, compared to the same period in 2015. In the fourth quarter of 2014, the Bank entered into a new agreement with a third-party tax refund product provider, which lowered the per-item fee associated with each refund facilitated. As a result, even though the Company experienced an increase in the number of ERC/ERD transactions that were facilitated, the lower fee structure caused tax processing revenues to be lower than the year before. As a result of ERC/ERD fee activity being mostly seasonal during the first half of 2016, only a minimal amount of income is expected during the fourth

quarter of 2016.

34

Also impacting lower noninterest income during both the quarterly and year-to-date periods of 2016 were gains on sale of securities. During the second and third quarters of 2015, the Company sold some of its lower-yielding, Agency mortgage-backed securities resulting in gains of \$28 and \$163, respectively, while reinvesting the proceeds into higher-yielding securities. The Company has not sold any of its securities during 2016.

The Company recognized positive contributions from its remaining noninterest income categories, which were primarily due to increases in service charges on deposit accounts, earnings from tax-free BOLI investments and interchange fees earned on debit and credit card transactions.

Noninterest Expense

Noninterest expense during the third quarter of 2016 increased \$1,101, or 14.2%, from the third quarter in 2015. Noninterest expense during the first nine months of 2016 also increased \$1,862, or 8.2%, over the first nine months of 2015. The acquisition of Milton Bank contributed to an increase in most of the noninterest expense categories, reflecting both merger related expenses and recurring expenses related to having a larger organization after the merger. Excluding merger related expenses, the Company recognized \$574 from various recurring noninterest expenses generated by the Milton Bank acquisition during the third quarter of 2016. Management expects noninterest categories such as salaries and employee benefits, and occupancy, furniture and equipment expense to increase for future periods due to the merger.

The Company's largest noninterest expense item, salaries and employee benefits, increased \$476, or 10.4%, during the three months ended September 30, 2016, and \$748, or 5.6%, during the nine months ended September 30, 2016, as compared to the same periods in 2015. The increase was primarily related to adding Milton Bank employees, annual merit increases and higher health insurance costs.

The Company has also recorded merger related expenses totaling \$416 during the three months ended September 30, 2016, and \$777 during the nine months ended September 30, 2016, as compared to the same periods in 2015. The merger was closed on August 5, 2016. As of September 30, 2016, the Company has incurred the majority of its merger related expenses and anticipates these expenses to decrease during the fourth quarter of 2016.

The remaining noninterest expense categories increased \$209, or 6.6%, during the third quarter of 2016, as compared to the third quarter of 2015. During the first nine months of 2016, the remaining noninterest expense categories increased \$337, or 3.6%, as compared to the first nine months of 2015. The changes during both periods were primarily due to higher software, building and equipment, and foreclosure costs partially offset by lower FDIC assessment expense.

Provision for income tax expense during the three months ended September 30, 2016 resulted in a benefit of \$216 as compared to tax expense of \$511 during the three months ended September 30, 2015. Provision for tax expense finished at \$1,286 and \$2,260 during the nine months ended September 30, 2016 and 2015, respectively. The contributing factor to the Company's negative tax expense during the third quarter of 2016 was the significant decrease in income before taxes, which finished at \$142 during the third quarter of 2016 compared to \$2,153 during the third quarter of 2015.

The Company's efficiency ratio is defined as noninterest expense as a percentage of fully tax-equivalent net interest income plus noninterest income. The effects from provision expense are excluded from the efficiency ratio. Management continues to place emphasis on managing its balance sheet mix and interest rate sensitivity as well as developing more innovative ways to generate noninterest revenue. During the quarterly and year-to-date periods ending September 30, 2016, the Company was successful in generating more net interest income primarily due to higher average earning assets while minimizing funding costs. However, a 13.8% year-over-year decline in tax processing fees combined with higher personnel and merger costs caused overhead expense to outpace net revenue levels during 2016. As a result, the Company's efficiency levels have regressed, finishing at 81.5% and 73.2% during both the quarterly and year-to-date periods ended September 30, 2016, as compared to the stronger 77.0% and 69.1% efficiency levels during the same periods in 2015.

Capital Resources

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet capital requirements can initiate regulatory action. The final rules implementing Basel Committee on Banking Supervision's capital guidelines for U.S. banks (Basel III rules) became effective for the Company and the Bank on January 1, 2015 with full compliance with all of the requirements being phased in over a multi-year schedule, and fully phased in by January 1, 2019. Under the final rules, minimum requirements increased for both the quantity and quality of capital held by the Company and the Bank. The rules include a new common equity tier 1 capital to risk-weighted assets ratio of 4.5% and a capital conservation buffer of 2.5% of risk-weighted assets. The capital conservation buffer began to phase in on January 1, 2016 at 0.625%, and will be phased in over a four-year period, increasing by the same amount on each subsequent January 1, until fully phased-in on January 1, 2019. Further, Basel III rules increased the minimum ratio of tier 1 capital to risk-weighted assets increased from 4.0% to 6.0% and all banks are now subject to a 4.0% minimum leverage ratio. The required total risk-based capital ratio was unchanged. Failure to maintain the required common equity tier 1 capital conservation buffer will result in potential restrictions on a bank's ability to pay dividends, repurchase stock and/or pay discretionary compensation to its employees. Effective May 15, 2015, the Federal Reserve Board amended the Small Bank Holding Company Policy ("the Policy") that increased from \$500 million to \$1 billion the asset threshold for a bank to qualify under the Policy. With assets of approximately \$970 million at September 30, 2016, the Company qualified for treatment under the Policy and was not subject to the consolidated capital rules at the bank holding company level. The net unrealized gain or loss on available for sale securities is not included in computing regulatory capital. Management believes that as of September 30, 2016 and year-end 2015, the Bank met all capital adequacy requirements to which it was subject. Furthermore, when compared to the regulatory minimum, the Bank's tier 1, common equity tier 1, and total risk-based capital ratios exceeded the new capital conservation buffer of 0.625% at September 30, 2016. While the Company expects assets to exceed \$1 billion at March 31, 2017, we believe all capital adequacy requirements will be met at the holding company level at that time.

Prompt corrective action regulations provide five classifications: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and capital restoration plans are required. At September 30, 2016 and year-end 2015, the Bank met the capital requirements to be deemed well capitalized under the regulatory framework for prompt corrective action.

The following table summarizes the capital ratios of the Company and Bank and the minimum regulatory requirements:

	9/30/16	12/31/15	Regulatory Minimum
Common equity tier 1 risk-based capital ratio			
Company	14.2%	15.6%	N/A
Bank	14.4%	15.1%	4.5%
Tier 1 risk-based capital ratio			
Company	15.4%	17.1%	N/A
Bank	14.4%	15.1%	6.0%
Total risk-based capital ratio			
Company	16.5%	18.2%	N/A

Edgar Filing: OHIO VALLEY BANC CORP - Form 10-Q

Bank	15.4%	16.3%	8.0%
Leverage ratio			
Company	11.7%	12.2%	N/A
Bank	11.0%	10.8%	4.0%

Cash dividends paid by the Company were \$2,605 during the first nine months of 2016 and \$2,801 during the first nine months of 2015. The year-to-date dividends paid totaled \$0.61 per share for 2016 and \$0.68 for 2015.

36

Liquidity

Liquidity relates to the Company's ability to meet the cash demands and credit needs of its customers and is provided by the ability to readily convert assets to cash and raise funds in the marketplace. Total cash and cash equivalents, held to maturity securities maturing within one year and available for sale securities, totaling \$167,140, represented 17.2% of total assets at September 30, 2016. In addition, the FHLB offers advances to the Bank, which further enhances the Bank's ability to meet liquidity demands. At September 30, 2016, the Bank could borrow an additional \$115,976 from the FHLB, of which \$75,000 could be used for short-term, cash management advances. Furthermore, the Bank has established a borrowing line with the Federal Reserve. At June 30, 2016, this line had total availability of \$42,967. Lastly, the Bank also has the ability to purchase federal funds from a correspondent bank.

Off-Balance Sheet Arrangements

As discussed in Note 6 – Financial Instruments with Off-Balance Sheet Risk, the Company engages in certain off-balance sheet credit-related activities, including commitments to extend credit and standby letters of credit, which could require the Company to make cash payments in the event that specified future events occur. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Standby letters of credit are conditional commitments to guarantee the performance of a customer to a third party. While these commitments are necessary to meet the financing needs of the Company's customers, many of these commitments are expected to expire without being drawn upon. Therefore, the total amount of commitments does not necessarily represent future cash requirements.

Critical Accounting Policies

The most significant accounting policies followed by the Company are presented in Note A to the financial statements in the Company's 2015 Annual Report to Shareholders. These policies, along with the disclosures presented in the other financial statement notes, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Management views critical accounting policies to be those which are highly dependent on subjective or complex judgments, estimates and assumptions, and where changes in those estimates and assumptions could have a significant impact on the financial statements. Management currently views the adequacy of the allowance for loan losses and business combinations to be critical accounting policies.

Allowance for loan losses:

The allowance for loan losses is a valuation allowance for probable incurred credit losses. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. Management estimates the allowance balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged off.

The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired. A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired loans generally consist of loans with balances of \$200 or more on nonaccrual status or nonperforming in nature. Loans for which the terms have been modified, and for which the borrower is experiencing financial difficulties, are considered troubled debt restructurings and classified as impaired.

Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the

significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length and reasons for the delay, the borrower's prior payment record, and the amount of shortfall in relation to the principal and interest owed.

Commercial and commercial real estate loans are individually evaluated for impairment. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Smaller balance homogeneous loans, such as consumer and most residential real estate, are collectively evaluated for impairment, and accordingly, they are not separately identified for impairment disclosure. Troubled debt restructurings are measured at the present value of estimated future cash flows using the loan's effective rate at inception. If a troubled debt restructuring is considered to be a collateral dependent loan, the loan is reported, net, at the fair value of the collateral. For troubled debt restructurings that subsequently default, the Company determines the amount of reserve in accordance with the accounting policy for the allowance for loan losses.

The general component covers non-impaired loans and impaired loans that are not individually reviewed for impairment and is based on historical loss experience adjusted for current factors. The historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by the Company over the most recent 3 years for the consumer and real estate portfolio segment and 5 years for the commercial portfolio segment. The total loan portfolio's actual loss experience is supplemented with other economic factors based on the risks present for each portfolio segment. These economic factors include consideration of the following: levels of and trends in delinquencies and impaired loans; levels of and trends in charge-offs and recoveries; trends in volume and terms of loans; effects of any changes in risk selection and underwriting standards; other changes in lending policies, procedures, and practices; experience, ability, and depth of lending management and other relevant staff; national and local economic trends and conditions; industry conditions; and effects of changes in credit concentrations. The following portfolio segments have been identified: Commercial Real Estate, Commercial and Industrial, Residential Real Estate, and Consumer.

Commercial and industrial loans consist of borrowings for commercial purposes by individuals, corporations, partnerships, sole proprietorships, and other business enterprises. Commercial and industrial loans are generally secured by business assets such as equipment, accounts receivable, inventory, or any other asset excluding real estate and generally made to finance capital expenditures or operations. The Company's risk exposure is related to deterioration in the value of collateral securing the loan should foreclosure become necessary. Generally, business assets used or produced in operations do not maintain their value upon foreclosure, which may require the Company to write down the value significantly to sell.

Commercial real estate consists of nonfarm, nonresidential loans secured by owner-occupied and nonowner-occupied commercial real estate as well as commercial construction loans. An owner-occupied loan relates to a borrower purchased building or space for which the repayment of principal is dependent upon cash flows from the ongoing business operations conducted by the party, or an affiliate of the party, who owns the property. Owner-occupied loans that are dependent on cash flows from operations can be adversely affected by current market conditions for their product or service. A nonowner-occupied loan is a property loan for which the repayment of principal is dependent upon rental income associated with the property or the subsequent sale of the property. Nonowner-occupied loans that are dependent upon rental income are primarily impacted by local economic conditions which dictate occupancy rates and the amount of rent charged. Commercial construction loans consist of borrowings to purchase and develop raw land into one- to four-family residential properties. Construction loans are extended to individuals as well as corporations for the construction of an individual or multiple properties and are secured by raw land and the subsequent improvements. Repayment of the loans to real estate developers is dependent upon the sale of properties to third parties in a timely fashion upon completion. Should there be delays in construction or a downturn in the market for those properties, there may be significant erosion in value which may be absorbed by the Company.

Residential real estate loans consist of loans to individuals for the purchase of one- to four-family primary residences with repayment primarily through wage or other income sources of the individual borrower. The Company's loss exposure to these loans is dependent on local market conditions for residential properties as loan amounts are determined, in part, by the fair value of the property at origination.

Consumer loans are comprised of loans to individuals secured by automobiles, open-end home equity loans and other loans to individuals for household, family, and other personal expenditures, both secured and unsecured. These loans typically have maturities of 6 years or less with repayment dependent on individual wages and income. The risk of loss on consumer loans is elevated as the collateral securing these loans, if any, rapidly depreciate in value or may be worthless and/or difficult to locate if repossession is necessary. During the last several years, one of the most significant portions of the Company's net loan charge-offs have been from consumer loans. Nevertheless, the Company has allocated the highest percentage of its allowance for loan losses as a percentage of loans to the other identified loan portfolio segments due to the larger dollar balances associated with such portfolios.

Business combinations:

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred and the amount of any noncontrolling interest in the acquiree. Acquisition related transaction costs are expensed and included in other operational result. When a business is acquired, the Company assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. We are required to record the assets acquired, including identified intangible assets, and the liabilities assumed at their fair value. These often involve estimates based on third party valuations, such as appraisals, or internal valuations based on discounted cash flow analyses or other valuation techniques that may include estimates of attrition, inflation, asset growth rates, or other relevant factors. In addition, the determination of the useful lives over which an intangible asset will be amortized is subjective. Under FASB ASC 350 (SFAS No. 142 Goodwill and Other Intangible Assets), goodwill and indefinite-lived assets recorded must be reviewed for impairment on an annual basis, as well as on an interim basis if events or changes indicate that the asset might be impaired. An impairment loss must be recognized for any excess of carrying value over fair value of the goodwill or the indefinite-lived intangible asset.

Concentration of Credit Risk

The Company maintains a diversified credit portfolio, with residential real estate loans currently comprising the most significant portion. Credit risk is primarily subject to loans made to businesses and individuals in southeastern Ohio and western West Virginia. Management believes this risk to be general in nature, as there are no material concentrations of loans to any industry or consumer group. To the extent possible, the Company diversifies its loan portfolio to limit credit risk by avoiding industry concentrations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's goal for interest rate sensitivity management is to maintain a balance between steady net interest income growth and the risks associated with interest rate fluctuations. Interest rate risk ("IRR") is the exposure of the Company's financial condition to adverse movements in interest rates. Accepting this risk can be an important source of profitability, but excessive levels of IRR can threaten the Company's earnings and capital.

The Company evaluates IRR through the use of an earnings simulation model to analyze net interest income sensitivity to changing interest rates. The modeling process starts with a base case simulation, which assumes a static balance sheet and flat interest rates. The base case scenario is compared to rising and falling interest rate scenarios assuming a parallel shift in all interest rates. Comparisons of net interest income and net income fluctuations from the flat rate scenario illustrate the risks associated with the current balance sheet structure.

The Company's Asset/Liability Committee monitors and manages IRR within Board approved policy limits. The current IRR policy limits anticipated changes in net interest income to an instantaneous increase or decrease in market interest rates over a 12 month horizon to +/- 5% for a 100 basis point rate shock, +/- 7.5% for a 200 basis point rate shock and +/- 10% for a 300 basis point rate shock. Based on the level of interest rates, management did not test interest rates down 200 or 300 basis points.

The following table presents the Company's estimated net interest income sensitivity:

Change in Interest Rates in Basis Points	September 30, 2016	December 31, 2015
	Percentage Change in Net Interest Income	Percentage Change in Net Interest Income
+300	(.32%)	(.03%)
+200	.04%	.18%
+100	.19%	.19%
-100	(2.16%)	(2.48%)

The estimated percentage change in net interest income due to a change in interest rates was within the policy guidelines established by the Board. With the historical low interest rate environment, management generally has been focused on limiting the duration of assets, while trying to extend the duration of our funding sources to the extent customer preferences will permit the Company to do so. At September 30, 2016, the interest rate risk profile reflects limited exposure to an increase in interest rates, which is consistent with the interest rate risk profile at December 31, 2015. In a declining rate environment, net interest income is impacted by the interest rate on many deposit accounts not being able to adjust downward. With interest rates so low, deposit accounts are perceived to be at or near an interest rate floor. As a result, net interest income decreases in a declining interest rate environment. Overall, management is comfortable with the current interest rate risk profile which reflects minimal exposure to interest rate changes.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

With the participation of the Chief Executive Officer (the principal executive officer) and the Vice President and Chief Financial Officer (the principal financial officer) of Ohio Valley, Ohio Valley's management has evaluated the effectiveness of Ohio Valley's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the quarterly period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, Ohio Valley's Chief Executive Officer and Vice President and Chief Financial Officer have concluded that Ohio Valley's disclosure controls and procedures are effective as of the end of the quarterly period covered by this Quarterly Report on Form 10-Q to ensure that information required to be disclosed by Ohio Valley in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by Ohio Valley in the reports that it files or submits under the Exchange Act is accumulated and communicated to Ohio Valley's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in Ohio Valley's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during Ohio Valley's fiscal quarter ended September 30, 2016, that has materially affected, or is reasonably likely to materially affect, Ohio Valley's internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Not applicable.

ITEM 1A. RISK FACTORS

You should carefully consider the risk factors disclosed in Part I, Item 1.A. "Risk Factors" in Ohio Valley's Annual Report for Form 10-K for the fiscal year ended December 31, 2015, and Quarterly Reports on Form 10-Q for the quarters ended March 31, and June 30, 2016, as filed with the Securities and Exchange Commission. These risk factors could materially affect the Company's business, financial condition or future results. The risk factors described in the Annual Report on Form 10-K are not the only risks facing the Company. Additional risks and uncertainties not currently known to the Company or that management currently deems to be immaterial also may materially adversely affect the Company's business, financial condition and/or operating results. Moreover, the Company undertakes no obligation and disclaims any intention to publish revised information or updates to forward looking statements contained in such risk factors or in any other statement made at any time by any director, officer, employee or other representative of the Company unless and until any such revisions or updates are expressly required to be disclosed by applicable securities laws or regulations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Ohio Valley did not purchase any of its shares during the three months ended September 30, 2016.

During the acquisition of Milton Bancorp, there were 523,518 shares issued as part of the transaction that was completed on August 5, 2016. Further information regarding such issuance was reported on a Current Report on Form 8-K filed with the Securities and Exchange Commission on August 8, 2016.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

Not applicable.

ITEM 6. EXHIBITS

EXHIBIT INDEX

The following exhibits are included in this Form 10-Q or are incorporated by reference as noted in the following table:

Exhibit Number	Exhibit Description
2(a)	Agreement and Plan of Merger between Ohio Valley Banc Corp. and Milton Bancorp, Inc., dated January 7, 2016: Incorporated herein by reference to Exhibit 2.1 to Ohio Valley's Current Report on Form 8-K filed on January 7, 2016 (SEC File No. 0-20914).
2(b)	Amendment to Agreement and Plan of Merger by and between Ohio Valley Banc Corp. and Milton Bancorp, Inc., effective April 20, 2016: Incorporated herein by reference to Exhibit 2.1 to Ohio Valley's Current Report on Form 8-K filed on April 21, 2016 (SEC File No. 0-20914).
3(a)	Amended Articles of Incorporation of Ohio Valley (reflects amendments through April 7, 1999) [for SEC reporting compliance only - - not filed with the Ohio Secretary of State]. Incorporated herein by reference to Exhibit 3(a) to Ohio Valley's Annual Report on Form 10-K for fiscal year ended December 31, 2007 (SEC File No. 0-20914).
3(b)	Code of Regulations of Ohio Valley (as amended by the shareholders on May 12, 2010): Incorporated herein by reference to Exhibit 3(b) to Ohio Valley's Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2010 (SEC File No. 0-20914).
4	Agreement to furnish instruments and agreements defining rights of holders of long-term debt: Filed herewith.
31.1	Rule 13a-14(a)/15d-14(a) Certification (Principal Executive Officer): Filed herewith.
