UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

**FORM 6-K**

**REPORT OF FOREIGN PRIVATE ISSUER**

**PURSUANT TO RULE 13a-16 OR 15d-16**

**UNDER THE SECURITIES EXCHANGE ACT OF 1934**

For the month of June 2007

Commission File Number: 001-15248

**VEOLIA ENVIRONNEMENT**

(Exact name of registrant as specified in its charter)

36-38, avenue Kléber

75116 Paris, France

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F  x

Form 40-F  o

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): \_\_\_\_\_

Edgar Filing: VEOLIA ENVIRONNEMENT - Form 6-K

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): \_\_\_\_\_

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes

No

If  marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-\_\_\_\_\_

## PRESS RELEASE

# VEOLIA WATER IS CHOSEN TO BUILD ONE OF THE WORLD'S LARGEST DESALINATION PLANTS IN SAUDI ARABIA

**Paris, June 28, 2007. Veolia Water Solutions & Technologies, through its thermal desalination specialist SIDEM (Veolia WST-Sidem), has been chosen to design and build one of the world's largest desalination plants in Saudi Arabia. Considered of national importance, the plant will provide 800,000m<sup>3</sup>/day of desalinated water to Jubail Industrial City and the Eastern Province of Saudi Arabia – a desert region facing massive industrialization plans and a growing population.**

The contract, worth around US\$945 million (702 million Euros), for Veolia Water, is for the complete design and build of the desalination plant by Veolia WST-Sidem, which is included in an Independent Water and Power Production Project (IWPP), led by MARAFIQ, the Power and Water Utility Company for Jubail and Yanbu, Saudi Arabia. This forms part of a long-term expansion plan for power and desalination capacities in the Eastern Province of Saudi Arabia, and involves the supply not only of desalinated water but also the production of 2750 MW of electricity. The overall IWPP Project was won by a Consortium of developers composed of Suez Energy International in partnership with ACWA Power and Gulf Investment Corporation, which placed an Engineering Procurement and Construction (EPC) contract to a consortium for the new Power and Desalination Plant. The members of this consortium are General Electric (USA), Hyundai Heavy Industries (Korea) and SIDEM (France). Within the construction framework of this new water and electricity production plant, Veolia WST-Sidem will supply the thermal desalination units by recuperating the heat from the power station, General Electric will assure the supply of the power station equipment, and Hyundai Heavy Industries will assure the construction of the seawater intake unit and work for reject into the sea.

The desalination plant will be based on SIDEM's unique Multiple Effect Distillation (MED) process, and will include 27 desalination units, each having a capacity of 29,630 m<sup>3</sup>/day, and a remineralization plant. The MED process is one of the leading technologies incorporated within the project. It recovers the exhaust heat from the power plant and uses it to evaporate sea water at low temperature. As its electrical consumption is low (only one third of that of competing processes), it is the ideal solution for addressing the normally large energy consumption required for desalinating seawater.

The project will be completed by 2010. It will be designed to serve an increasing population, in the Eastern Province of Saudi Arabia, a country holding the world's largest oil reserves.

Commenting on the contract, Antoine Frérot, Chief Executive Officer of Veolia Water said "We are extremely pleased to be associated with this vital Power and Water project for Saudi Arabia. The challenge of designing and building a plant that will produce 800,000m<sup>3</sup> of desalinated water/day requires great coordination and understanding between all parties concerned. As leading specialists in this sector, we are able to implement the latest state-of-the-art solutions and technologies that will contribute to the successful realisation of such an impressive project."

## Edgar Filing: VEOLIA ENVIRONNEMENT - Form 6-K

SIDEM, part of Veolia Water Solutions & Technologies, is one of the world leaders in thermal sea water desalination through low temperature distillation processes such as Multiple Effect Distillation (MED), Multiple Effect Distillation with Thermal Vapour Compression (MED-TVC), and Multiple Effect Distillation with Mechanical Vapour Compression (MED-MVC). The company has been present in Saudi Arabia since the 1970s. To date, SIDEM has already completed 46 desalination units in Saudi Arabia, including a plant of 267,000m<sup>3</sup>/day in Al Khobar. Recent contracts include the Al Hidd Power and Desalination Plant in Bahrain (270 000 m<sup>3</sup>/day), and Al Taweelah A1, in the UAE (240,000m<sup>3</sup>/day).

*Veolia Water, the water division of Veolia Environnement, is the world leader in water and wastewater services. Specialized in outsourcing services for municipal authorities, as well as industrial and service companies, it is also one of the world's major designers of technological solutions and constructor of facilities needed in water and wastewater services. Veolia Water serves 108 million people worldwide. With 70,700 employees, its 2006 revenues amounted to ~10.08 billion. [www.veoliawater.com](http://www.veoliawater.com). Veolia Water Solutions & Technologies (VWS) is the technology subsidiary of Veolia Water. The company specializes in the engineering, design and construction of turnkey facilities, and creates technological solutions that are integral to these units.*

*Veolia Environnement (Paris Euronext: VIE and NYSE: VE) is world leader in environmental services. With more than 300,000 employees the company has operations all around the world and provides tailored solutions to meet the needs of municipal and industrial customers in four complementary segments: water management, waste management, energy management and freight and passenger transportation. Veolia Environnement recorded revenue of €28.6 billion in 2006 [www.veolia.com](http://www.veolia.com)*

**Important Disclaimer.** Veolia Environnement is a corporation listed on the NYSE and Euronext Paris.
