Drybulk Industry - Oversupply Casts Shadows

Current orderbook additions will result in strong expansion (+10.4%) in 2009 and even larger growth (+14.2%) in 2010

Analysts expect only 40 - 60 mdwt of the current 2010 orderbook (100 mdwt) to be delivered, which would result in net fleet growth in the 1 - 5% range

With roughly 100 mdwt (23% of worldwide fleet) over 22 years old, of which 60 mdwt (14%) over 25 years old, deletions will be primarily driven by increased scrapping activity

Analysts expect negative bulk cargo volume growth of (-3.0%) and ton mile growth of (-0.4%) in 2009

A rebound is expected in 2010, fuelled by above-trend growth in China mainly due to stronger investment growth, especially from private investment with both bulk cargo volumes and ton miles projected to grow 2.0% year-over-year.
