ULTRAPETROL REPORTS FINANCIAL RESULTS
FOR THIRD QUARTER 2012

NASSAU, Bahamas, November 14, 2012 -- Ultrapetrol (Bahamas) Limited (NASDAQ: ULTR), an industrial transportation company serving marine transportation needs in three markets (River Business, Offshore Supply Business and Ocean Business), today announced financial results for the third quarter ended September 30, 2012.

Third Quarter 2012 and subsequent events highlights:

Recorded third quarter 2012 revenues of \$82.8 million;

Recorded adjusted EBITDA before financial loss and other financial expense of \$9.8 million in the third quarter of 2012; 1 which includes adjusted negative EBITDA of (\$0.3) million from our River Business segment, adjusted EBITDA of \$6.3 million from our Offshore Supply Business segment, and adjusted EBITDA of \$3.8 million from our Ocean Business segment. After including \$(0.7) million from financial loss and other financial expense (mainly attributable to foreign currency exchange variance), our adjusted consolidated EBITDA for the third quarter of 2012 was \$9.1 million;

Total adjusted net loss and adjusted net loss per share of \$(11.5) million and \$(0.39), respectively, in the third quarter of 2012, which excludes a \$(0.5) million loss for deferred taxes on an unrealized foreign currency exchange gain on U.S. dollar-denominated debt of our Brazilian subsidiary in our Offshore Supply Business. 2 Including the effect of this loss and excluding the effect of the gain related to the sale of six dry barges which were subsequently leased back to the Company (for accounting purposes such gain will be deferred over the term of the lease up to the present value of the lease payments), the net loss and net loss per share are \$(12.9) million and \$(0.44) per share, respectively;

On November 13, 2012, the Company entered into an Investment Agreement with Sparrow Capital Investments Ltd. Under the terms of the agreement, Southern Cross will purchase approximately \$220 million of newly issued common stock at a purchase price of \$2.00 per share. Immediately after the close of the transaction, Southern Cross will own approximately 78.38% of the outstanding common shares of Ultrapetrol. The agreement is subject to certain closing conditions, including but not limited to a waiver by holders of certain repurchase rights pursuant to the Company's Convertible Senior Notes due 2017 indenture. If all such conditions are satisfied, including the waiver from such noteholders of their repurchase rights which may or may not be received, then the agreement is expected to close in December 2012 (for complete details of the transaction please refer to the Company's 6-K filed earlier);

Third quarter 2012 Adjusted EBITDA for our Offshore Supply Business segment increased 12% to \$6.3 million as compared to \$5.6 million in the same period of 2011;

The Company has nine vessels operating in its Platform Supply Vessel, or PSV, fleet. On August 10, 2012, our recently delivered newly built PSV, UP Jade, commenced operations in Brazil under a long term time charter with Petrobras.

Edgar Filing: ULTRAPETROL BAHAMAS LTD - Form 6-K

During the third quarter 2012, we received the sixth re-engined pushboat, Cavalier XII, and continued with the re-engining works of our seventh pushboat included in the re-engining program. We expect the seventh pushboat will be operational in March 2013 with which 68% of this program will be executed;

During the third quarter of 2012 we entered into a Master Agreement whereby we agreed to build and sell from our Punta Alvear yard a second set of seven newly built jumbo dry barges and seven newly built jumbo tank barges to a third party for export to Colombia; and

During the third quarter of 2012 we delivered from our barge building facility nine barges related to the barge building contracts entered into with two third parties during the second quarter 2012.

- 1 For a reconciliation of non-GAAP measures, please see the tables included under the supplemental information section of this release.
 - 2 For a detailed explanation of these adjustments and other adjustments elsewhere in this release, see "Overview of Financial Results" and the tables included under the Supplemental Information section of this release
-

Felipe Menéndez, Ultrapetrol's President and Chief Executive Officer, stated, "The Company has entered into an Investment Agreement with Southern Cross Group through which, provided certain conditions are satisfied, the Company will receive a \$220.0 million capital infusion. We are pleased to have entered into this transaction which enables us to continue with the implementation of our growth plan and strengthens our balance sheet. Southern Cross Group has strong leadership capabilities and a successful track record of partnering with companies that operate in Latin America."

Mr. Menéndez continued, "While it has been a very difficult year for our River Business because of the severe drought the new planting season has commenced very successfully and experts anticipate very strong crops in the regions we serve for 2013. Our new building yard has achieved high productivity levels and is fully employed building barges for us and third parties. In our Offshore Supply Business, we have completed financing for two of the last four PSVs in our newbuild program and expect to have the balance of the program fully financed by early 2013."

Mr. Menéndez concluded, "We look forward to a strong 2013 with an expanded and fuel efficient river fleet in operation which we expect will meet high transportation demand and a very modern offshore fleet now enhanced by the delivery of new vessels as well as higher time charter rates and a good performance of our ocean feeder container service."

Overview of Financial Results

Total revenues for the third quarter 2012 were \$82.8 million as compared with \$80.0 million in the same period of 2011.

Adjusted EBITDA for the third quarter 2012 was \$9.1 million as compared with \$13.3 million in the same period of 2011. For a reconciliation of adjusted EBITDA to cash flows from operating activities, please see the tables at the end of this release.

Adjusted net loss for the third quarter of 2012 was \$(11.5) million, or \$(0.39) per share as compared with net loss of \$(2.9) million, or \$(0.10) per share, during the same period of 2011. Third quarter 2012 adjusted net loss excludes a \$(0.5) million loss for deferred taxes on an unrealized foreign currency exchange gain on U.S. dollar-denominated debt of our Brazilian subsidiary in the Offshore Supply Business and includes a \$0.8 million gain related to the sale of six dry barges which were leased back to the Company (for accounting purposes such gain will be deferred over the term of the lease up to the present value of the lease payments). Without these adjustments, the net loss for the third quarter of 2012 was \$(12.9) million, or \$(0.44) per share.

Len Hoskinson, Ultrapetrol's Chief Financial Officer, said, "To date, 2012 has been a challenging year due to the drought related weather effects in our River Business. Third party sale of barges from our new building yard have partially compensated this effect. In our Offshore Supply Business, we have concluded a \$42.0 million post-delivery financing on our UP Jade and UP Amber with DVB Bank America NV and NIBC. We expect to complete the remaining two vessels, UP Pearl and UP Onyx, which will be delivered in 2013."

Business Segment Highlights

River

Third quarter 2012 River Business segment adjusted EBITDA decreased to a \$(0.3) million loss from an \$8.3 million gain when compared to the same period of 2011. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

This quarter's result had a combined effect of a severe drought that affected the soybean production in the region earlier in the year which reduced significantly the volumes of soy products transported and by lower than usual water levels in the Upper Paraguay River which translated into a 27% decrease in the volume of cargo transported in the third quarter of 2012 as compared with the same period of 2011.

Our operating costs in the River Business, particularly manning and maintenance costs, have been impacted by salary increases and by inflationary pressure on costs not adjusted by a proportional devaluation of the local currencies with respect to the U.S. dollar.

According to the United States Department of Agriculture, the soybean crop in Paraguay for 2012 has dropped to 4.0 million tons down from 8.4 million tons in 2011, a decrease of 52% year over year. This decrease is mainly attributable to the effects of a severe drought and higher than average temperatures in January and February 2012 in large parts of Argentina and central Brazil, as well as Paraguay. Soybean, particularly the early variety crop in Paraguay suffered severe impacts on its yields. Compounding this effect, low river levels limited the draft at which we could operate through the Upper Paraguay River during the third quarter. The Company has partially offset the milder prospects for agricultural products in the Hidrovia region for 2012 by skewing cargo mix to include higher proportions of iron ore which produce lower margins. As a result, longer transit times and fuel costs have impacted substantially the Company's result of operations of its river activity.

During the third quarter 2012 river levels through the Upper Paraguay River decreased earlier and even further than anticipated, which prevented us from loading as much iron ore as expected.

Despite the severe drought in 2012, the seeded area is expected to continue to grow in 2013 and beyond fostered by the strong prices of soybean and other agricultural commodities. Argentina, Brazil, Bolivia, Paraguay and Uruguay are estimated to account for approximately 55% of world soybean production in 2013, as compared to 30% in 1995. This steady long-term growth trend represents an important demand driver for Ultrapetrol's future River Business. The Company continues to add capacity and implement various margin-expansionary initiatives to profitably capitalize on the long-term growing demand of the agricultural sector along the Hidrovia which remains strong.

The Company's barge building shipyard, which we believe is one of the most modern in South America, has been in operation since the first quarter of 2010. During the third quarter of 2012 the Company delivered nine barges in connection with the contracts with third parties entered into during the second quarter of 2012:

In addition to these contracts, in the third quarter we entered into another contract to build seven tank and seven dry barges for a total of \$20.3 million. These barges will be exported to Colombia and the buyers have advanced a portion of the purchase price. The yard will continue to be fully employed until the end of the first quarter 2013 addressing the construction of barges to be delivered under the shipbuilding contracts already signed and also barges for the Company's own use.

The Company has successfully continued its re-engining and re-powering programs that aim to change the engines on a substantial portion of its line pushboats from diesel to heavy fuel consuming ones. Having finalized the re-engining of two pushboats in the second quarter of 2012, six heavy fuel-consuming pushboats are now in operation (compared to only two pushboats in operation a year ago) and the next re-engined pushboat is expected to commence operation within the first quarter of 2013 bringing the total to seven where we will have installed 17 out of a total of 25 new engines purchased. We expect this program to lead to substantial savings in fuel expense and to an increase in tow size and navigation speed which will enhance our EBITDA margins in the future.

Offshore Supply

In the Offshore Supply Business, with the commencement of operation of our UP Jade in August 2012 we now operate a fleet of nine PSVs. The adjusted EBITDA generated by the Offshore Supply Business segment during the third quarter of 2012 was \$6.3 million, 12% higher than the \$5.6 million generated in the same period of 2011. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

Total revenues from the Offshore Supply Business for the third quarter of 2012 remained unchanged when compared with the same period of 2011. Revenues related to the operation of our UP Jasper and UP Jade were partially offset by the offhire days of our PSV fleet during the third quarter of 2012.

In Brazil, operating costs, particularly manning costs, have been increasing as a result of the revaluation of the local currency and inflationary pressure on salaries and expenses both of which affected our earnings during a significant part of 2011. During the third quarter of 2012 the Brazilian real has seen a devaluation which if sustained may ease the upward trend of our costs.

As planned, Ultrapetrol continues its PSV building program in India that will add three additional newbuilt vessels to the fleet. Delivery of the first PSV out of three currently under construction in India, UP Amber, is expected to take place by 2012 year end.

Ocean

The Ocean Business segment generated adjusted EBITDA of \$3.8 million in the third quarter of 2012 as compared to adjusted EBITDA of \$2.0 million in the same period of 2011. For a reconciliation of segment adjusted EBITDA to operating profit (loss), please see the tables at the end of this release.

The 15% increase in revenues from the Ocean Business from \$17.4 million in the third quarter of 2011 to \$19.9 million in the same period of 2012 is mainly attributable to the effect of the tariff increases of our container feeder vessels M.V. Asturiano and M.V. Argentino as well as increases on TEUs transported year on year; the effect of the adjustment in the hire of our Product Tanker fleet to reflect increased manning costs; and the operation of our tank barge Paraná Petrol.

The Company operated a total of four vessels in its Product Tanker fleet in the third quarter of 2012 (Miranda I, Amadeo, Alejandrina, and Austral) which continue to be employed in the South American coastal trade on charters with oil majors that operate in the region. During a portion of the third quarter we also employed our barge Paraná Petrol.

In our Ocean Business, inflationary pressures particularly in manning costs not compensated by a proportional devaluation of the local currency against the U.S. dollar have resulted in increased operating costs. The volumes in our container service particularly in the southbound leg have been sustained at high levels.

Use of Non-GAAP Measures

Ultrapetrol believes that the disclosed non-Generally Accepted Accounting Principles, or GAAP, measures such as adjusted EBITDA, adjusted net income and any other adjustments thereto, when presented in conjunction with comparable GAAP measures, are useful for investors to use in evaluating the liquidity of the company. These non-GAAP measures should not be considered a substitute for, or superior to, measures of liquidity prepared in accordance with GAAP. A reconciliation of adjusted EBITDA to segment operating profit and cash flow from operations is presented in the tables that accompany this press release.

Investment Community Conference Call

Ultrapetrol will host a conference call for investors and analysts on Thursday, November 15, 2012, at 9:00 a.m. EDT accessible via telephone and Internet with an accompanying slide presentation. Investors and analysts may participate in the live conference call by dialing 1-888-324-2905 (toll-free U.S.) or +1-517-308-9165 (outside of the U.S.); passcode: ULTR. Please register at least 10 minutes before the conference call begins. A replay of the call will be available for one week via telephone starting approximately one hour after the call ends. The replay can be accessed at 1-888-568-0627 (toll-free U.S.) or +1-402-998-1528 (outside of the U.S.); passcode: 1512. The webcast will be archived on Ultrapetrol's Web site for 30 days after the call.

About Ultrapetrol

Ultrapetrol is an industrial transportation company serving the marine transportation needs of its clients in the markets on which it focuses. It serves the shipping markets for containers, grain and soya bean products, forest products, minerals, crude oil, petroleum, and refined petroleum products, as well as the offshore oil platform supply market with its extensive and diverse fleet of vessels. These include river barges and pushboats, platform supply vessels, tankers and two container feeder vessels. More information on Ultrapetrol can be found at www.ultrapetrol.net.

Forward-Looking Language

The forward-looking statements in this press release are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, our management's examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections.

In addition to these important factors, other important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include future operating or financial results; pending or recent acquisitions, business strategy and expected capital spending or operating expenses, including dry docking and insurance costs; general market conditions and trends, including charter rates, vessel values, and factors affecting vessel supply and demand; our ability to obtain additional financing; our financial condition and liquidity, including our ability to obtain financing in the future to fund capital expenditures, acquisitions and other general corporate activities; our expectations about the availability of vessels to purchase, the time that it may take to construct new vessels, or vessels' useful lives; our dependence upon the abilities and efforts of our management team; changes in governmental rules and regulations or actions taken by regulatory authorities; adverse weather conditions that can affect production of the goods we transport and navigability of the river system; the highly competitive nature of the oceangoing transportation industry; the loss of one or more key customers; fluctuations in foreign exchange rates and devaluations; potential liability from future litigation; and other factors. Please see our filings with the

Securities and Exchange Commission for a more complete discussion of these and other risks and uncertainties.
