Notes to Consolidated Financial Statements (Unaudited)

Note 1. Basis of presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and the instructions for Form - 10Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2002 are not necessarily indicative of the results that may be expected for the year ending December 31, 2002. For further information, refer to the consolidated financial statements and footnotes thereto included in the Corporation's annual report on Form 10-K for the year ended December 31, 2001.

Note 2. Earnings per common share

A reconciliation of the numerators and denominators used in the computation of basic earnings per common share and diluted earnings per common share is presented below. Earnings per common share are presented below for the three months ended March 31, 2002 and 2001:

	Three Months Ended March 31,	
	2002	2001
	----	----
Basic Earnings Per Common Share:		
Numerator		
Net Income	\$593,000	\$819,000
	=====	=====
Denominator		
Weighted average common shares Outstanding	1,735,080	1,723,798
	=====	=====
Basic earnings per common share	\$0.34	\$0.48
	=====	=====
Diluted Earnings Per Common Share:		
Numerator		

Edgar Filing: FENTURA FINANCIAL INC - Form 10-Q

Net Income	\$ 593,000	\$819,000
	=====	=====
Denominator		
Weighted average common shares Outstanding for basic earnings per Common share	1,735,080	1,723,798
Add: Dilutive effects of assumed Exercises of stock options	3,556	3,206
	-----	-----
Weighted average common shares And dilutive potential common Shares outstanding	1,738,636	1,727,004
	=====	=====
Diluted earnings per common share	\$0.34	\$0.47
	=====	=====

Stock options for 6,841 and 6,975 shares of common stock for the three-month periods ended March 31, 2002 and 2001 were not considered in computing diluted earnings per common share because they were not dilutive.

Note 3. Stock Option Plans

Stock Option Plans

The Nonemployee Director Stock Option Plan grants options to nonemployee directors to purchase the Corporation's common stock on April 1 each year. The purchase price of the shares is the fair market value at the date of the grant, and there is a three-year vesting period before options may be exercised. Options to acquire no more than 6,720 shares of stock may be granted under the Plan in any calendar year and options to acquire not more than 67,200 shares in the aggregate may be outstanding at any one time.

The Employee Stock Option Plan grants options to eligible employees to purchase the Corporation's common stock at or above, the fair market value of the stock at the date of the grant. Awards granted under this plan are limited to an aggregate of 72,000 shares. The administrator of the plan is a committee of directors. The administrator has the power to determine the number of options to be granted, the exercise price of the options and other terms of the options, subject to consistency with the terms of the plan. Options covering 2,947 shares were granted under this Plan on January 31, 2002.

The following table summarizes stock option activity:

	Number of Options	Weighted Average Price
	-----	-----
Options outstanding at December 31, 2000	19,671	\$26.0
Options granted 2001	32,44	25.1
Options forfeited 2001	(322)	30.8

Options outstanding at December 31, 2001	22,583	25.8
Options granted 2002	2,947	26.5

Options outstanding at March 31, 2002	25,530	\$25.9

=====

The stock option plans are accounted for in accordance with Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25) as permitted under Financial Accounting Standards No. 123, Accounting for Stock Based Compensation (SFAS 123). In accordance with APB 25, no compensation expense is required nor has been recognized for the options issued under existing plans. Had the Corporation chosen not to elect APB 25, SFAS 123 would apply and compensation expense would have been recognized, and the Corporation's earnings would have been as follows (in thousands, except per share data):

	1st Quarter 2002 ----	1st Quarter 2001 ----
Net Income		
As reported	\$ 593	\$81
Proforma	565	81
Basic net income per share		
As reported	0.34	0.4
Proforma	0.33	0.4
Diluted net income per share		
As reported	0.34	0.4
Proforma	0.33	0.4

Proforma net income includes compensation cost for the Corporation's stock option plan based on the fair values of the grants as of the dates of the awards consistent with the method prescribed by SFAS 123. The fair value of each option grant is estimated using the Black-Scholes option-pricing model. Assumptions used in the model for options granted during 2002 were as follows: an expected life of 10 years, a dividend yield of 3%, a risk free return of 4.91% and expected volatility of 67%.

Note 4. Commitments and contingencies

There are various contingent liabilities that are not reflected in the financial statements including claims and legal actions arising in the ordinary course of business. In the opinion of management, after consultation with legal counsel, the ultimate disposition of these matters is not expected to have a material effect on the Corporation's consolidated financial condition or results of operations.

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations

As indicated in the income statement, earnings for the three months ended March 31, 2002 were \$593,000 compared to \$819,000 for the same period in 2001. Earnings decreased as a result of a decrease in net interest income and an increase in operating expenses. The Corporation continues to focus on core banking activities and new opportunities in current and surrounding markets. Management believes that the softening of the economy that took place in 2001 and projected stable economic condition for the first half of 2002 may continue to place pressure on earnings.

Edgar Filing: FENTURA FINANCIAL INC - Form 10-Q

The banking industry uses standard performance indicators to help evaluate a banking institution's performance. Return on average assets is one of these indicators. For the three months ended March 31, 2002 the Corporation's return on average assets (annualized) was 0.79% compared to 1.08% for the same period in 2001. Net income per share-basic was \$0.34 in the first three months of 2002 compared to \$0.48 for the same period in 2001.

Net Interest Income

Net interest income and average balances and yields on major categories of interest-earning assets and interest-bearing liabilities for the three months ended March 31, 2002 and 2001 are summarized in Table 2. The effects of changes in average interest rates and average balances are detailed in Table 1 below.

Table 1

(000'S OMITTED)	THREE MONTHS ENDED MARCH 31, 2002 COMPARED TO 2001 INCREASE (DECREASE) DUE TO:		
	VOL	YIELD/ RATE	TOTAL
TAXABLE SECURITIES	(\$449)	(\$37)	(\$486)
TAX-EXEMPT SECURITIES	40	(45)	(5)
FEDERAL FUNDS SOLD	(31)	(163)	(194)
TOTAL LOANS	325	(1,042)	(717)
LOANS HELD FOR SALE	44	(12)	32
TOTAL EARNING ASSETS	(71)	(1,299)	(1,370)
INTEREST BEARING DEMAND DEPOSITS	10	(72)	(62)
SAVINGS DEPOSITS	150	(402)	(252)
TIME CD'S \$100,000 AND OVER	(296)	(114)	(410)
OTHER TIME DEPOSITS	(75)	(241)	(316)
OTHER BORROWINGS	(1)	(19)	(20)
TOTAL INTEREST BEARING LIABILITIES	(212)	(848)	(1,060)
NET INTEREST INCOME	(\$141)	(\$451)	(\$310)

As indicated in Table 1, during the three months ended March 31, 2002, net interest income decreased compared to the same period in 2001, principally because of the decrease in prime rate that caused all of the variable rate loan products to reprice to a lower rate. Interest expense decreased largely due to the lowering of core deposit rates and the repricing of certificates of deposits as they have matured and renewed at lower rates.

Edgar Filing: FENTURA FINANCIAL INC - Form 10-Q

Net interest income (displayed without consideration of full tax equivalency), average balance sheet amounts, and the corresponding yields for the three months ended March 31, 2002 and 2001 are shown in Table 2. Net interest income for the three months ended March 31, 2002 was \$2,857,000 a decrease of \$310,000 over the same period in 2001. This represents a decrease of 9.8%. The primary factor contributing to the net interest income decrease was reductions in interest rates by the Federal Reserve Board.

Management expects the economy to slowly pickup in the second half of 2002. Accordingly, the Corporation will seek to strategically manage the balance sheet structure to create stability in net interest income. The Corporation expects to aggressively seek out new loan opportunities while continuing to maintain sound credit quality.

As indicated in Table 2, for the three months ended March 31, 2002, the Corporation's net interest margin (without consideration of full tax equivalency) was 4.19% compared with 4.55% for the same period in 2001. This decline is attributable to the impact of interest rate reductions by the Federal Reserve Board. The decrease in interest rates impacts the net interest income in the short term because loans have repriced more quickly than deposits thus reducing net interest income.

Average earning assets decreased 1.9% or approximately \$5,425,000 comparing the first quarter of 2002 to the same time period in 2001. Loans, the highest yielding component of earning assets, represented 77.0% of earning assets in 2002 compared to 70.7% in 2001. Average interest bearing liabilities decreased 2.3% or \$5,288,000 comparing the first quarter of 2002 to the same time period in 2001. Non-interest bearing deposits amounted to 15.0% of average earning assets in the first quarter of 2002 compared with 13.1% in the same time period of 2001.

Management continually monitors the Corporation's balance sheet to insulate net interest income from significant swings caused by interest rate volatility. If market rates continue to change in 2002, corresponding changes in funding costs will be considered to avoid any potential negative impact on net interest income. The Corporation's policies in this regard are further discussed in the section titled "Interest Rate Sensitivity Management".

		=====		

ALLOWANCE AND PROVISION FOR LOAN LOSSES

The allowance for loan losses (ALL) reflects management's judgment as to the level considered appropriate to absorb losses inherent in the loan portfolio. Fentura's subsidiary banks' methodology in determining the adequacy of the ALL includes a review of individual loans, historical loss experience, current economic conditions, portfolio trends, and other pertinent factors. Although portions of the allowance have been allocated to various portfolio segments, the ALL is general in nature and is available for the portfolio in its entirety. At March 31, 2002, the ALL was \$3,103,000, or 1.44% of total loans. This compares with \$3,125,000, or 1.46%, at December 31, 2001. The decrease of the ALL as a percentage of total loans reflects a decrease in the allowance for loan losses and increased loan totals. Management believes that the decrease in allowance to gross loans percentage is appropriate given the changes in the portfolio mix and overall asset quality.

The provision for loan losses was \$33,000 in the first three months of 2002 and \$138,000 for the same time period in 2001. The Corporation decreased the provision in 2002 compared to 2001 to fund the allowance for loan losses to the level management believes is necessary to cover losses inherent in the loan portfolio, particularly considering the

smaller growth in the loan portfolio in the 2002 period.

Table 3 also summarizes loan losses and recoveries for the first three months of 2002 and 2001. During the first three months of 2002 the Corporation experienced net charge-offs of \$55,000, compared with net charge-offs of \$120,000 for the three months ended March 31, 2001. Accordingly, the net charge-off ratio for the first three months of 2002 was .03% compared to .06% for the same period in 2001.

The Corporation maintains formal policies and procedures to control and monitor credit risk. Management believes the allowance for loan losses is adequate to meet normal credit risks in the loan portfolio. The Corporation's loan portfolio has no significant concentrations in any one industry nor any exposure in foreign loans. The Corporation has not extended credit to finance highly leveraged transactions nor does it intend to do so in the future. Employment levels and other economic conditions in the Corporation's local markets may have a significant impact on the level of loan losses. Management continues to identify and devote attention to credits that may not be performing as agreed. As the overall credit quality of the loan portfolio improves, management expects a modest reduction in the allowance for loan losses as a percentage to gross loans in 2002. Of course, deterioration of economic conditions could have an impact on the Corporation's credit quality, which could impact the need for greater provision for loan losses and the level of ALL as a percentage of gross loans. Non-performing loans are discussed further in the section titled Non-Performing Assets .

NON-INTEREST INCOME

TABLE 4

Analysis of Non-Interest Income (000's omitted)	Three Months Ended March 31	
	2002	2001
Service Charges on Deposit Accounts	\$554	\$479
Gain on Sale of Mortgages	\$142	\$59
Mortgage Servicing Fees	\$0	\$33
Trust Income	\$134	\$165
Other Operating Income	\$226	\$292
Gain on sale of securities - AFS	\$0	\$0
Total Non-Interest Income	\$1,056	\$1,028

Non-interest income increased in the three months ended March 31, 2002 as compared to the same period in 2001, primarily due to an increase in service charges on deposit accounts, and an increase in the gain on sale of mortgages. Overall non-interest income was \$1,056,000 for the three months ended March 31, 2002 compared to \$1,028,000 for the same period in 2001. These figures represent an increase of 2.7%. Table 4 provides a more detailed breakdown of the components of non-interest income than can be found in the income statement on page 4.

The most significant category of non-interest income is service charges on deposit accounts. These fees were \$554,000 in the first three months of 2002 compared to \$479,000 for the same period of 2001. This represents an increase of 15.7%. Increases are attributable to service charges from growth in core deposits.

Gains on the sale of mortgage loans originated by the Banks and sold in the secondary market were \$142,000 in the three months ended March 31, 2002 and \$59,000 in the same period in 2001. The change is due to an increase in loans sold in the secondary market due to the increase in residential mortgage refinance activity and new loan volumes due to the downward movement of market interest rates.

Mortgage servicing fees were \$33,000 in the three months ended March 31, 2001 compared to \$0 in the same time period in 2002. This is a decline of \$33,000 or 100.0%. The decline is attributable to the sale of a significant portion of the Corporation's serviced loans, in the last quarter of 2000. Servicing income was recognized in January of 2001 until these serviced loans were actually transferred to the purchaser.

Fiduciary income decreased \$31,000 in the three months ended March 31, 2002 comparing to the same period in the prior year. This 18.8% decrease in fees is attributable to the decline in the value of assets under management within the Corporation's Trust Department.

Other operating income decreased \$66,000 to \$226,000 in the first three months of 2002 compared to \$292,000 in the same time period in 2001. This is a decrease of 22.6%. Other operating income decreased due to decreases in income from the sale of official checks and a decrease in income from the sale of consumer investment products.

Non-Interest Expense

TABLE 5

Edgar Filing: FENTURA FINANCIAL INC - Form 10-Q

Analysis of Non-Interest Expense	Three Months Ended March 31,	
	2002	2001
(000's omitted)		
Salaries and Benefits	\$1,707	\$1,579
Equipment	\$368	\$327
Net Occupancy	\$257	\$215
Office Supplies	\$44	\$46
Loan & Collection Expense	\$38	\$26
Advertising	\$67	\$74
Other Operating Expense	\$553	\$632
Total Non-Interest Expense	\$3,034	\$2,899

Total non-interest expense was \$3,034,000 in the three months ended March 31, 2002 compared with \$2,899,000 in the same period of 2001. This is an increase of 4.7%. This increase is largely attributable to an increase in salaries and benefits expense and net occupancy expenses.

Salary and benefit costs, Fentura's largest non-interest expense category, were \$1,707,000 in the three months ended March 31, 2002, compared with \$1,579,000, or an increase of 8.1%, for the same time period in 2001. Increased costs are primarily a result of a modest increase in the number of employees and an increase in employee benefit costs and commission expenses paid to mortgage originators.

During the three months ended March 31, 2002 equipment expenses were \$368,000 compared to \$327,000 for the same period in 2001, an increase of 12.5%. The increases in expenses are attributable to additions to equipment maintenance contracts and equipment depreciation, which increased due to the opening of the Silver Lake Parkway and Grand Blanc branch bank offices.

Occupancy expenses at \$257,000 increased in the three months ended March 31, 2002 comparing to the same period in 2001 by \$42,000 or 19.5%. The increases are attributable to increases in facility repairs, opening of the Grand Blanc & Silver Lake Parkway offices and operation of the Davison State Bank new main office, which opened in the second quarter of 2001 and maintenance contracts expense.

During the three months ended March 31, 2002 office supplies expense at \$44,000 decreased \$2,000 comparing to the \$46,000 in expense for the same period in 2001. The decrease is attributable to volume decreases of regular office supplies and preprinted forms in 2002.

Loan and collection expenses, at \$38,000, were up \$12,000 during the three months ended March 31, 2002 comparing to the same time period in 2001. The increase is primarily attributable to an increase in other loan expense and increased credit reports expense.

Advertising expenses were \$67,000 in the three months ended March 31, 2002 compared with \$74,000 for the same period in 2001. The decrease of \$7,000 or 9.5% was primarily due to the decrease in shareholder expenses and promotional expenses to our over 50 years of age customer segment.

Other operating expenses were \$553,000 in the three months ended March 31, 2002 compared to \$632,000 in the same time period in 2001, a decrease of \$79,000 or 12.5%. The decrease is attributable to a decrease in the amount of overdrawn deposit account charge-offs and a decrease in legal and consulting expenses.

Financial Condition

Proper management of the volume and composition of the Corporation's earning assets and funding sources is essential for ensuring strong and consistent earnings performance, maintaining adequate liquidity and limiting exposure to risks caused by changing market conditions. The Corporation's securities portfolio is structured to provide a source of liquidity through maturities and generate an income stream with relatively low levels of principal risk. The Corporation does not engage in securities trading. Loans comprise the largest component of earning assets and are the Corporation's highest yielding assets. Customer deposits are the primary source of funding for earning assets while short-term debt and other sources of funds could be utilized if market conditions and liquidity needs change.

The Corporation's total assets equaled \$298 million for March 31, 2002 compared to December 31, 2001 total assets of \$309 million. Loans comprised 72.1% of total assets at March 31, 2002 compared to 69.3% at December 31, 2001. Loans grew \$1 million with commercial loans and tax-exempt loans leading the advance which together grew \$2.0 million while other loan categories experienced reductions or remained steady. The ratio of non-interest bearing deposits to total deposits was 15.1% at March 31, 2002 compared to 16.0% at December 31, 2001. Interest bearing deposit liabilities totaled \$217 million at March 31, 2002 compared to \$223 million at December 31, 2001. Deposits decreased \$9.3 million and Fed Funds Purchased decreased \$1.6 million to make up the change in interest bearing liabilities at March 31, 2002.

Bank premises and equipment increased \$922,000 to \$9.5 million at March 31, 2002 comparing to \$8.5 million at December 31, 2001. The increase is attributable to the opening of the Silver Lake Parkway branch.

NON-PERFORMING ASSETS

Non-performing assets include loans on which interest accruals have ceased, loans that have been renegotiated, and real estate acquired through foreclosure. Past due loans are loans which were delinquent 90 days or more, but have not been placed on non-accrual status. Table 6 represents the levels of these assets at March 31, 2002 and December 31, 2001.

Non-performing assets increased at March 31, 2002 compared to December 31, 2001. This increase is attributable to an increase in repossessed assets partially offset by a decrease in non-performing loans. The non-accrual loans increased because new loans were placed on non-accrual totaling \$35,000, and other non-performing assets increased because of an increase in repossessed assets.

The level and composition of non-performing assets are affected by economic conditions in the Corporation's local markets. Non-performing assets, charge-offs, and provisions for loan losses tend to decline in a strong economy and increase in a weak economy, potentially impacting the Corporation's operating results. In addition to non-performing loans, management carefully monitors other credits that are current in terms of principal and interest payments but, in management's opinion, may deteriorate in quality if economic conditions change. Based on the current economic conditions, management continues to closely monitor credit quality.

Table 6

Non-Performing Assets and Past Due Loans

	March 31, 2002	December 31, 2001

Non-Performing Loans:		
Loans Past Due 90 Days or More & Still Accruing	\$118,000	\$186,000
Non-Accrual Loans	336,000	321,000
Renegotiated Loans	0	0

Total Non-Performing Loans	454,000	507,000

Other Non-Performing Assets:		
Other Real Estate	0	0
REO in Redemption	0	0
Other Non-Performing Assets	138,000	10,000

Total Other Non-Performing Assets	138,000	10,000

Total Non-Performing Assets	\$592,000	\$517,000
	=====	
Non-Performing Loans as a % of Total Loans	0.21%	0.24%
Allowance for Loan Losses as a % of Non-Performing Loans	683.48%	616.37%
Accruing Loans Past Due 90 Days or More to Total Loans	0.05%	0.09%
Non-performing Assets as a % of Total Assets	.20%	0.17%

LIQUIDITY AND INTEREST RATE RISK MANAGEMENT

Asset/Liability management is designed to assure liquidity and reduce interest rate risks. The goal in managing interest rate risk is to maintain a strong and relatively stable net interest margin. It is the responsibility of the Asset/Liability Management Committee (ALCO) to set policy guidelines and to establish short-term and long-term strategies with respect to interest rate exposure and liquidity. The ALCO, which is comprised of key members of management, meets regularly to review financial performance and soundness, including interest rate risk and liquidity exposure in relation to present and prospective markets, business conditions, and product lines. Accordingly, the committee adopts funding and balance sheet management strategies that are intended to maintain earnings, liquidity, and growth rates consistent with policy and prudent business standards.

Liquidity maintenance together with a solid capital base and strong earnings performance are key objectives of the Corporation. The Corporation's liquidity is derived from a strong deposit base comprised of individual and business deposits. Deposit accounts of customers in the mature market represent a substantial portion of deposits of individuals. The Bank's deposit base plus other funding sources (federal funds purchased, other liabilities and shareholders' equity) provided primarily all funding needs in the first three months of 2002. While these sources of funds are expected to continue to be available to provide funds in the future, the mix and availability of funds will depend upon future economic conditions. The Corporation does not foresee any difficulty in meeting its funding requirements.

Primary liquidity is provided through short-term investments or borrowings (including federal funds sold and purchased) while the investment portfolio provides secondary liquidity. As of March 31, 2002 federal funds sold represented 4.3% of total assets, compared to 7.4% at December 31, 2001. The Corporation regularly monitors

liquidity to ensure adequate cash flows to cover unanticipated reductions in the availability of funding sources.

Interest rate risk is managed by controlling and limiting the level of earnings volatility arising from rate movements. The Corporation regularly performs reviews and analysis of those factors impacting interest rate risk. Factors include maturity and re-pricing frequency of balance sheet components, impact of rate changes on interest margin and prepayment speeds, market value impacts of rate changes, and other issues. Both actual and projected performance is reviewed, analyzed, and compared to policy and objectives to assure present and future financial viability.

As indicated in the statement of cash flows, cash used in financing activities was \$11,252,000 in the first three months of 2002 due to the decrease in deposits. Comparatively, in the first three months of 2001, cash used in financing activities was \$17,612,000 because of increases in deposits. Cash used in investing activities was \$4,398,000 during the first three months of 2002. Cash flow from investing activities decreased for the first quarter of 2002 primarily because of securities purchases.

CAPITAL MANAGEMENT

Total shareholders' equity rose 0.3% to \$38,550,000 at March 31, 2002 compared with \$38,433,000 at December 31, 2001. The Corporation's equity to asset ratio was 12.9% at March 31, 2002 and 12.4% at December 31, 2001. The increase in the amount of capital resulted primarily from the increase in retained earnings.

As indicated on the balance sheet at December 31, 2001 the Corporation had accumulated other comprehensive income of \$92,000 compared to accumulated other comprehensive income at March 31, 2002 of \$30,000. The decrease in the income position is attributable to the fluctuation of the market price of securities held in the available for sale portfolio.

Regulatory Capital Requirements

Bank holding companies and their bank subsidiaries are required by banking industry regulators to maintain certain levels of capital. These are expressed in the form of certain ratios. These ratios are based on the degree of credit risk in the Corporation's assets. All assets and off-balance sheet items such as outstanding loan commitments are assigned risk factors to create an overall risk-weighted asset total. Capital is separated into two levels, Tier I capital (essentially total common shareholders' equity less goodwill) and Tier II capital (essentially the allowance for loan losses limited to 1.25% of gross risk-weighted assets). Capital levels are then measured as a percentage of total risk weighted assets. The regulatory minimum for Tier I capital to risk weighted assets is 4% and the minimum for Total capital (Tier I plus Tier II) to risk weighted assets is 8%. The Tier I leverage ratio measures Tier I capital to average assets and must be a minimum of 4%. As reflected in Table 7, at March 31, 2002 and at December 31, 2001, the Corporation was well in excess of the minimum capital and leverage requirements necessary to be considered a well capitalized banking company.

The FDIC has adopted a risk-based insurance premium system based in part on a bank's capital adequacy. Under this system a depository institution is classified as well capitalized, adequately capitalized, or undercapitalized according to its regulatory capital levels. Subsequently, a financial institution's premium levels are based on these classifications and its regulatory supervisory rating (the higher the classification the lower the premium). It is the Corporation's goal to maintain capital levels sufficient to retain a designation of well capitalized.

Table 7

	Capital Ratios			Mar 2
	Regulatory Minimum For "Well Capitalized"	March 31, 2002	Fentura Financial, Inc. December 31, 2001	
Total Capital to risk				
Weighted assets	10%	16.29%	16.20%	14
Tier 1 Capital to risk	6%	15.07%	15.00%	13
Weighted assets				
Tier 1 Capital to average				
Assets	5%	12.61%	12.50%	11

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The information concerning quantitative and qualitative disclosures about market risk contained on pages 47 through 48 in Fentura's Annual Report on Form 10-K, is here incorporated by reference.

Fentura Financial, Inc. faces market risk to the extent that both earnings and the fair value of its financial instruments are affected by changes in interest rates. The Corporation manages this risk with static GAP analysis and has begun simulation modeling. For the first three months of 2002, the results of these measurement techniques were within the Corporation's policy guidelines. The Corporation does not believe that there has been a material change in the nature of the Corporation's primary market risk exposures, including the categories of market risk to which the Corporation is exposed and the particular markets that present the primary risk of loss to the Corporation, or in how those exposures are managed in 2002 compared to 2001.

The Corporation's market risk exposure is mainly comprised of its vulnerability to interest rate risk. Prevailing interest rates and interest rate relationships in the future will be primarily determined by market factors, which are outside of the Corporation's control. All information provided in this section consists of forward-looking statements. Reference is made to the section captioned "Forward Looking Statements" in this quarterly report for a discussion of the limitations on the Corporation's responsibility for such statements.

INTEREST RATE SENSITIVITY MANAGEMENT

Interest rate sensitivity management seeks to maximize net interest income as a result of changing interest rates, within prudent ranges of risk. The Corporation attempts to accomplish this objective by structuring the balance sheet so that re-pricing opportunities exist for both assets and liabilities in roughly equivalent amounts at approximately the same time intervals. Imbalances in these re-pricing opportunities at any point in time constitute a bank's interest rate sensitivity. The Corporation currently does not utilize derivatives in managing interest rate risk.

An indicator of the interest rate sensitivity structure of a financial institution's balance sheet is the difference between rate sensitive assets and rate sensitive liabilities, and is referred to as "GAP".

Table 8 sets forth the distribution of re-pricing of the Corporation's earning assets and interest bearing liabilities as of March 31, 2002, the interest rate sensitivity GAP, as defined above, the cumulative interest rate sensitivity GAP, the interest rate sensitivity GAP ratio (i.e. interest rate sensitive assets divided by interest rate sensitive liabilities) and the

cumulative sensitivity GAP ratio. The table also sets forth the time periods in which earning assets and liabilities will mature or may re-price in accordance with their contractual terms.

Table 8 GAP ANALYSIS MARCH 31, 2002

(000's Omitted)	Within Three Months	Three Months to One Year	One to Five Years	After Five Years
Earning Assets:				
Federal Funds Sold	\$ 12,850	\$ 0	\$ 0	\$ 0
Securities	4,655	5,277	26,254	4,966
Loans	105,397	14,185	78,143	17,386
Loans Held for Sale	2,538	0	0	0
Total Earning Assets	\$125,440	\$ 19,462	\$ 104,397	\$ 22,352
Interest Bearing Liabilities:				
Interest Bearing Demand Deposits	\$ 39,804	\$ 0	\$ 0	\$ 0
Savings Deposits	84,665	0	0	0
Time Deposits Less than \$100,000	19,081	32,278	20,678	0
Time Deposits Greater than \$100,000	10,878	4,709	5,168	0
Short term borrowings	529	0	0	0
Other Borrowings	15	0	276	847
Total Interest Bearing Liabilities	\$154,972	\$ 36,987	\$ 26,122	\$ 847
Interest Rate Sensitivity GAP	\$ (29,532)	\$ (17,525)	\$ 78,275	\$ 21,505
Cumulative Interest Rate Sensitivity GAP	\$ (29,532)	\$ (47,057)	\$ 31,218	\$ 52,723
Interest Rate Sensitivity GAP Cumulative Interest Rate Sensitivity GAP Ratio	(0.81)	(0.53)	4.00	26.39
	(0.81)	(0.75)	1.14	1.24

As indicated in Table 8, the short-term (one year and less) cumulative interest rate sensitivity gap is negative. Accordingly, if market interest rates increase, this negative gap position would have a short-term negative impact on interest margin. Conversely, if market rates continue to decline this should theoretically have a short-term positive impact. However, gap analysis is limited and may not provide an accurate indication of the impact of general interest rate movements on the net interest margin since the re-pricing of various categories of assets and liabilities is subject to the Corporation's needs, competitive pressures, and the needs of the Corporation's customers. In addition, various assets and liabilities indicated as re-pricing within the same period may in fact re-price at different times within such period and at different rate volumes. These limitations are evident when considering the Corporation's Gap position at March 31, 2002 and the change in net interest income for the three months ended March 31, 2002 compared to the same time period in 2001. At March 31, 2001 the Corporation was negatively gapped through one year and since that time interest rates have declined considerably, yet net interest income declined comparing the first three months of 2002 to the same period in 2001. This occurred because certain deposit categories, specifically interest bearing demand and savings, did not re-price at the same time or at the same level as asset portfolios. Additionally, simulation modeling, which measures the impact of upward and downward movements of interest rates on interest margin and the market value of equity, indicates that an upward movement of interest rates would not significantly impact net

interest income.

FORWARD LOOKING STATEMENTS

This report contains forward looking statements as that term is used in the securities laws. All statements regarding the Corporation's expected financial position, performance, business and strategies are forward looking statements. These statements are based on management's beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy, and about the Corporation itself. Words such as anticipates, believes, estimates, expects, forecasts, intends, is likely, plans, projects, variations of such words and similar expressions are intended to identify such forward looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions (Future Factors), which are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Therefore, actual results and outcomes may materially differ from what may be expressed or forecast in such forward-looking statements. The Corporation undertakes no obligation to update, amend or clarify forward looking statements as a result of new information, future events, or otherwise.

Future Factors that could cause a difference between an ultimate actual outcome and a preceding forward looking statements contained in this report include, but are not limited to, changes in interest rate and interest rate relationships, demands for products and services, the degree of competition by traditional and non-traditional competitors, changes in banking laws or regulations, changes in tax laws, changes in prices, the impact of technological advances, government and regulatory policy changes, the outcome of pending and future litigation and contingencies, trends in customer's behaviors as well as their ability to repay loans, and the local economy. Further information concerning us and our business, including additional factors that could materially affect our financial results, is included in our other filings with the Securities and Exchange Commission.

CERTIFICATE OF AMENDMENT TO THE ARTICLES OF INCORPORATION

For use by Domestic Profit and Nonprofit Corporations
(Please read information and instructions on the last page)

Pursuant to the provisions of Act 284, Public Acts of 1972 (profit corporations), or Act 162, Public Acts of 1982 (nonprofit corporations), the undersigned corporation executes the following Certificate:

1.	The present name of the corporation is: <u>FENTURA BANCORP, INC.</u>
2.	The identification number assigned by the Bureau is: <u>403566</u>

3.	Article <u>1</u> of the Articles of Incorporation is hereby amended to read as follows: The name of the Corporation is Fentura Financial, Inc.
----	---

COMPLETE ONLY ONE OF THE FOLLOWING:

4. (For amendments adopted by unanimous consent of incorporators before the first meeting of the board of directors or trustees.)	
The foregoing amendment to the Articles of Incorporation was duly adopted on the ____ day of _____, _____, in accordance with the provisions of the Act by the unanimous consent of the incorporator(s) before the first meeting of the Board of Directors or Trustees.	
Signed this ____ day of _____, _____	
_____ (Signature)	_____ (Signature)
_____ (Type or Print Name)	_____ (Type or Print Name)
