Securities owned by the Fund on July 31, 2009 (Unaudited)

	Value
Short-term investments 1.19%	\$5,599,978
(Cost \$5,599,978)	

	Rate	Par Value	Value
Commercial Paper 1.19%			5,599,978
Chevron Funding Corp.	0.0700%	\$5,600,000	5,599,978
Total investments (Cost \$851,805,932) 148.40%			\$699,603,406
Other assets and liabilities, net (48.40%)			(\$228,181,584)
Total net assets 100.00%			\$471,421,822

The percentage shown for each investment category is the total value of the category as a percentage of the net assets of the Fund.

(I) Non-income producing security.

(P) Variable rate obligation. The coupon rate shown represents the rate at period end.

(S) These securities are exempt from registration under Rule 144A of the Securities Act of 1933. Such securities may be resold, normally to qualified institutional buyers, in transactions exempt from registration.

(Z) All or a portion of this security is segregated as collateral for the Committed Facility Agreement. Total collateral value at July 31, 2009 was \$590,985,250.

□ At July 31, 2009, the aggregate cost of investment securities for federal income tax purposes was \$854,632,699. Net unrealized depreciation aggregated \$155,029,293, of which \$18,420,822 related to appreciated investment securities and \$173,450,115 related to depreciated investment securities.

Page 4

Notes to the Schedule of Investments (Unaudited)

Security valuation

Investments are stated at value as of the close of the regular trading on the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. Equity securities held by the Fund are valued at the last sale price or official closing price (closing bid price or last evaluated price if no sale has occurred) as of the close of business on the principal securities exchange (domestic or foreign) on which they trade. Debt obligations are valued based on the evaluated prices provided by an independent pricing service, which utilizes both dealer-supplied and electronic data processing techniques, which take into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data. Foreign securities and currencies are valued in U.S. dollars, based on foreign currency exchange rates supplied by an independent pricing service. Securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Equity and debt obligations, for which there are no prices available from an independent pricing service, are valued based on broker quotes or fair value as described below. Certain short-term debt instruments are valued at amortized cost.

Other portfolio securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by the Fund's Pricing Committee in accordance with procedures adopted by the Board of Trustees. Generally, trading in non-U.S. securities is substantially completed each day at various times prior to

the close of trading on the NYSE. The values of such securities used in computing the net asset value of the Fund's shares are generally determined as of such times. Occasionally, significant events that affect the values of such securities may occur between the times at which such values are generally determined and the close of the NYSE. Upon such an occurrence, these securities will be valued at fair value as determined in good faith under consistently applied procedures established by and under the General supervision of the Board of Trustees.

Valuations change in response to many factors including the historical and prospective earnings of the issuer, the value of the issuer's assets, general economic and market conditions, interest rates, investor perceptions and market liquidity.

Fair Value Measurements

The Fund uses a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs and the valuation techniques used are summarized below:

Level 1 – Exchange traded prices in active markets for identical securities. This technique is used for exchange-traded domestic common and preferred equities, certain foreign equities, warrants, rights, options and futures. In addition, investment companies, including mutual funds, are valued using this technique.

Level 2 – Prices determined using significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these techniques are received from independent pricing vendors and are based on an evaluation of the inputs described. These techniques are used for certain domestic preferred equities, certain foreign equities, unlisted rights and warrants, and fixed income securities. Also, over-the-counter derivative contracts, including swaps, foreign forward currency contracts, and certain options use these techniques.

5

Level 3 – Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable, such as when there is little or no market activity for an investment, unobservable inputs may be used. Unobservable inputs reflect the Fund's Pricing Committee's own assumptions about the factors that market participants would use in pricing an investment and would be based on the best information available. Securities using this technique are generally thinly traded or privately placed, and may be valued using broker quotes, which may not only use observable or unobservable inputs but may also include the use of the brokers' own judgments about the assumptions that market participants would use.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Funds' investments as of July 31, 2009, by major security category or security type.

Investments in Securities	Level 1	Level 2	Level 3	Total
Consumer Discretionary	\$5,621,418	-	-	\$5,621,418
Consumer Staples	-	\$14,253,891	-	14,253,891
Energy	23,083,200	19,634,484	-	42,717,684
Financials	225,198,196	-	-	225,198,196
Industrials	10,634,000	-	-	10,634,000
Telecommunication Services	18,197,077	-	-	18,197,077

Utilities	247,832,006	129,471,474	\$77,682	377,381,162
Short-term Investments	-	5,599,978	-	5,599,978
Total Investments in Securities	\$530,565,897	\$168,959,827	\$77,682	\$699,603,406

The following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value:

	Consumer Staples	Utilities	Total
Balance as of 10/31/08	\$19,621,875	\$111,457	\$19,733,332
Accrued discounts/premiums	-	-	-
Realized gain (loss)	-	-	-
Change in Unrealized appreciation (depreciation)	-	(33,775)	(33,775)
Net purchases (sales)	-	-	-
Transfers in and/or out of Level 3	(19,621,875)	-	(19,621,875)
Balance as of 7/31/09	-	\$77,682	\$77,682

Fixed income risk

Fixed income securities are subject to credit and interest rate risk and involve some risk of default in connection with principal and interest payments.

Leverage utilization risk

The Fund utilizes leverage to increase assets available for investment. The Fund has a Committed Facility Agreement (CFA) with a third party commercial bank that allows it to borrow up to \$284 million and to invest the borrowings in accordance with its investment practices. Borrowings under the CFA are secured by the assets of the Fund.

6

Sector risk

The Fund may concentrate investments in a particular industry, sector of the economy or invest in a limited number of companies. The concentration is closely tied to a single sector of the economy which may cause the Fund to underperform other sectors. Specifically, utilities can be hurt by higher interest costs in connection with capital construction programs, costs associated with environmental and other regulations and the effects of economic declines, surplus capacity and increased competition. Accordingly, the concentration may make the Fund's value more volatile and investment values may rise and fall more rapidly.

7

ITEM 2. CONTROLS AND PROCEDURES.

(a) Based upon their evaluation of the registrant's disclosure controls and procedures as conducted within 90 days of the filing date of this Form N-Q, the registrant's principal executive officer and principal accounting officer have concluded that those disclosure controls and procedures provide reasonable assurance that the material information required to be disclosed by the registrant on this report is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

(b) There were no changes in the registrant's internal control over financial reporting that occurred during the registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 3. EXHIBITS.

Separate certifications for the registrant's principal executive officer and principal accounting officer, as required by Rule 30a-2(a) under the Investment Company Act of 1940, are attached.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
