Message from the Trustees

Dear Fellow Shareholder:

The U.S. economy and most economies around the world have continued to strengthen in early 2011, building on last year's solid growth. The U.S. stock market added gains, delivering one of the best January returns in several years. Investors are encouraged by positive economic data, healthy corporate earnings, extended tax cuts, and historically low interest rates. Bond markets remain mixed, however, as U.S. Treasury yields have risen from their historic lows and investors have sought returns in riskier asset classes.

Putnam's investment team maintains a positive outlook for U.S. equities in 2011, encouraged by steadily improving conditions in both the economy and in corporate America. The global outlook is less certain, with ongoing European

debt issues, signs of inflation in emerging markets, and recent political uprisings in Egypt and other countries. While these global developments may well lead to future market volatility, we also believe that an active, research-focused manager like Putnam can uncover opportunities for shareholders in this environment.

In developments affecting oversight of your fund, we wish to thank Richard B. Worley and Myra R. Drucker, who have retired from the Board of Trustees, for their many years of dedicated and thoughtful leadership.

Lastly, we would like to take this opportunity to welcome new shareholders to the fund and to thank all of our investors for your continued confidence in Putnam.

About the fund

Seeking broad diversification across global bond markets

When Putnam Premier Income Trust was launched in 1988, its three-pronged focus on U.S. investment-grade bonds, high-yield corporate bonds, and non-U.S. bonds was considered innovative. Lower-rated, higher-yielding corporate bonds were relatively new, having just been established in the late 1970s. And, at the time of the fund's launch, few investors were venturing outside the United States for fixed-income opportunities.

The bond investment landscape has undergone a transformation in the two decades since the fund's launch. The U.S. investment-grade market added new sectors such as asset-backed securities, and the high-yield corporate bond sector has grown significantly. Outside the United States, the advent of the euro has resulted in a large market of European bonds. And there are also growing opportunities to invest in the debt of emerging-market countries.

The fund is designed to keep pace with this market expansion. To process the market's increasing complexity, Putnam's fixed-income group aligns teams of specialists with the varied investment opportunities. Each group identifies what it considers to be compelling strategies within its area of expertise. The fund's portfolio managers select from among these strategies, systematically building a diversified portfolio that seeks to carefully balance risk and return.

This multi-strategy approach is designed to suit the expanding opportunities of today's global bond marketplace. As different factors drive the performance of the various fixed-income sectors, the managers seek to take advantage of changing market leadership in pursuit of high current income.

Consider these risks before investing: International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Additional risks may be associated with emerging-market securities, including illiquidity and volatility. Lower-rated bonds may offer higher yields in return for more risk. Funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk. Funds that invest in bonds are subject to certain risks including interest-rate risk, credit risk, and inflation risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond funds have ongoing fees and expenses. The fund's shares trade on a stock exchange at market prices, which may be lower than the fund's net asset value.

How do closed-end funds differ from open-end funds?

More assets at work While open-end funds need to maintain a cash position to meet redemptions, closed-end funds are not subject to redemptions and can keep more of their assets invested in the market.

Traded like stocks Closed-end fund shares are traded on stock exchanges, and their market prices fluctuate in response to supply and demand, among other factors.

Net asset value vs. market price Like an open-end fund's net asset value (NAV) per share, the NAV of a closed-end fund share is equal to the current value of the fund's assets, minus its liabilities, divided by the number of shares outstanding. However, when buying or selling closed-end fund shares, the price you pay or receive is the market price. Market price reflects current market supply and demand and may be higher or lower than the NAV.

Putnam Premier Income Trust balances risk and return across multiple sectors.

2

3

Data are historical. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return and net asset value will fluctuate, and you may have a gain or a loss when you sell your shares. Performance assumes reinvestment of distributions and does not account for taxes. Fund returns in the bar chart are at NAV. See pages 5 and 10-11 for additional performance information, including fund returns at market price. Index and Lipper results should be compared to fund performance at NAV. Lipper calculates performance differently than the closed-end funds it ranks, due to varying methods for determining a fund's monthly reinvestment NAV.

**** Returns for the six-month period are not annualized, but cumulative.***

4

Interview with your fund's portfolio manager

D. William Kohli

Bill, what was the bond market environment like during the six months ended January 31, 2011?

Driven by investor demand for higher-yielding assets and general improvement in world economies, bonds from riskier sectors — including high-yield bonds, floating-rate bank loans, commercial mortgage-backed securities [CMBS], and emerging-market debt — led all fixed-income categories. Additional factors helping to boost riskier market sectors included robust corporate profitability and stronger balance sheets — including near-record cash levels.

In early November, the Federal Reserve Board [the Fed] announced a second round of quantitative easing, dubbed "QE2." Under the program, the Fed committed to purchase an additional \$600 billion of longer-term Treasury securities by the end of the second quarter of 2011. The central bank's goals are to keep interest rates low, spur lending, and stimulate demand for riskier assets. Following this announcement, investors expressed their concerns about the full magnitude of QE2 by selling Treasuries and pushing yields higher across all but the shortest end of the yield curve. Other government securities also posted relatively weak returns, as did the Barclays Capital Aggregate Bond Index, a measure of the broad, investment-grade bond market.

How did Putnam Premier Income Trust perform in this environment during the past six months?

4

l'm pleased to report that the fund returned 6.30% at net asset value, beating both its benchmark, the Barclays Capital Government Bond Index, which registered a mark of 0.55%, and its Lipper peer group average, Flexible Income Funds (closed-end), which advanced 5.92%. The fund outperformed its benchmark and peer group average

This comparison shows your fund's performance in the context of broad market indexes for the six months ended 1/31/11. See pages 4 and 10-11 for additional fund performance information. Index descriptions can be found on page 12.

5

primarily because of solid contributions from high-yield corporate bonds, non-agency residential mortgage-backed securities (RMBS), structured mortgage-backed bonds, and emerging-market debt, and as a result of favorable yield-curve positioning.

The fund outperformed its benchmark by a substantial margin. What factors drove this outperformance?

The first reason the fund outperformed is because its benchmark is highly concentrated in U.S. government securities, which generally lagged other bond-market sectors during the period.

Consistent with our core policy of seeking returns via a multi-faceted approach to fixed-income investing, the fund benefited from a variety of strategies and market sectors. From a big-picture perspective, our balanced approach to prepayment risk, credit risk, and liquidity risk, as well as our successful yield-curve strategy, were the key drivers of the fund's outperformance.

A significant allocation to high-yield bonds was a key contributor to the fund's outperformance, as the high-yield category was the top-performing bond-market sector for the period. Generally strong corporate fundamentals and positive credit trends bolstered high-yield bonds. Lower-rated securities outperformed their higher-rated counterparts, and default rates decreased to well below their historical average.

Credit qualities are shown as a percentage of net assets as of 1/31/11. A bond rated Baa or higher (Prime-3 or higher, for short-term debt) is considered investment grade. The chart reflects Moody's ratings; percentages may include bonds or derivatives not rated by Moody's but rated by Standard & Poor's or, if unrated by S&P, by Fitch, and then included in the closest equivalent Moody's rating. Ratings will vary over time.

Credit quality includes bonds and represents only the fixed-income portion of the portfolio. Derivative instruments, including currency forwards, are only included to the extent of any unrealized gain or loss on such instruments and are shown in the not-rated category. The fund itself has not been rated by an independent rating agency.

6

Our mortgage credit and liquidity strategies continued to produce solid gains. Specifically, within non-agency RMBS, our holdings of Alternative-A (Alt-A), home equity, and manufactured housing bonds added value as home prices showed signs of stabilizing. In addition, the technical environment (the balance of supply and demand) continued to improve as the forced selling of nonagency RMBS that was so prevalent during the credit crisis dwindled to a small subset of investors. By way of background, Alt-A mortgage bonds are considered riskier than bonds backed by standard prime mortgages. However, because Alt-A borrowers must have reasonably solid credit histories, these securities have higher credit quality than bonds backed by subprime mortgages. Within our

mortgage prepayment strategy, exposure to interest-only collateralized mortgage obligations [IO CMOs] aided results as rising interest rates removed refinancing incentives for lower-rate mortgage pools, and securities were repriced to reflect higher expected cash flows. IO CMOs are designed so that the longer homeowners take to pay down their mortgages, the more money security holders will make from interest payments on those loans. Refinancing activity on the mortgage pools underlying the IO CMOs we held remained at low levels. As a result, these securities generated steady cash flows throughout the period with minimal prepayment risk.

In implementing our IO CMO strategy, we used interest-rate swaps and options to hedge the fund's duration or sensitivity to interest-rate changes to isolate the prepayment risk that we believed was attractively priced.

Security selection in emerging-market debt also boosted performance, with bonds from Argentina and oil-rich Russia and Venezuela delivering the best results.

This table shows the fund's top holdings across three key sectors and the percentage of the fund's net assets that each represented as of 1/31/11. Short-term holdings are excluded. Holdings will vary over time.

7

A modest position in short-term CMBS rounded out the top contributors. Our holdings of bonds in the highly liquid topmost part of the capital structure benefited from investors' perception that even though commercial mortgage delinquencies have continued to grow, senior CMBSs have enough structural protection to withstand losses.

How did your yield curve positioning help performance?

In preparing for QE2, we correctly concluded that the intermediate-maturity, five-to-ten-year portion of the curve would underperform the long end of the curve, and, using interest-rate swaps, futures, and options, we positioned the fund to benefit from that outcome. [The yield curve is a graphical representation of the difference in yields between shorter- and longer-term bonds.] Relative to its benchmark, the fund was helped by a short-duration strategy in the United States as bond yields rose and the shorter end of the yield curve steepened. Late in the period, we shifted to a more neutral curve positioning, and plan to take a more opportunistic approach to the yield curve in 2011. We also used interest-rate futures and swap contracts to cost-effectively manage the fund's exposure to changes in the yield curve.

Which strategies detracted from results?

Active currency management detracted from returns due to tactical positioning in the British pound sterling, and short positions in the Swiss franc, Japanese yen, and Canadian dollar. The negative effect of these trades was partially offset by the positive contribution from long positions in the Australian dollar and Swedish krona. We used currency-forward contracts to gain exposure to currencies and hedge the portfolio's foreign exchange risk.

Additionally, the fund was underweight investment-grade corporate bonds on a duration-adjusted basis versus the benchmark, which modestly dampened relative performance.

What is your outlook for the credit markets over the coming months, and how do you plan to position the fund?

Since late 2008, credit spreads have narrowed greatly, yet they remain attractive by historical norms in many market segments. As a result, we plan to maintain the fund's holdings of

This chart shows how the fund's top weightings have changed over the past six months. Weightings are shown as a percentage of net assets. Summary information may differ from the portfolio schedule included in the financial statements due to the inclusion of derivative securities and the exclusion of as-of trades, if any, and the use of

different classifications of securities for presentation purposes. Holdings will vary over time.

Data in the chart reflect a new calculation methodology placed in effect within the past six months.

8

CMBS, IO CMOs, and RMBS. In our view, senior CMBSs can continue to generate stable cash flows with sufficient principal protection, given their seniority in the capital structure. We believe IO CMOs should fare relatively well amid ongoing weakness in the housing market. And we believe RMBS can continue to produce high yields supported by valuations that can accommodate even worst-case scenarios. In addition, we have a favorable view of both investment-grade and high-yield corporate bonds, as both sectors are benefiting from improving corporate fundamentals and supportive technical environments.

In the current environment, it is difficult to make a clear call on the future direction of interest rates. Given the prospect of huge government budget deficits for years to come, with corresponding Treasury-supply and inflationary pressures, our inclination is to keep duration short. However, the Fed has made clear its intention to anchor both short- and long-term interest rates for an extended period of time. Consequently, our overall term structure position is neutral to slightly long, recognizing the possibility of some consolidation in the rate markets in the near future.

Thanks for bringing us up to date, Bill.

The views expressed in this report are exclusively those of Putnam Management. They are not meant as investment advice.

Please note that the holdings discussed in this report may not have been held by the fund for the entire period. Portfolio composition is subject to review in accordance with the fund's investment strategy and may vary in the future. Current and future portfolio holdings are subject to risk.

Portfolio Manager **D. William Kohli** is Team Leader of Portfolio Construction and Global Strategies at Putnam. He has an M.B.A. from the Haas School of Business at the University of California, Berkeley, and a B.A. from the University of California, San Diego. Bill joined Putnam in 1994 and has been in the investment industry since 1987.

In addition to Bill, your fund's portfolio managers are Michael Atkin, Rob Bloemker, Kevin Murphy, and Paul Scanlon. (After the close of the period, Rob Bloemker announced his departure from Putnam Investments.)

IN THE NEWS

Inflationary forces are gathering steam around the world, particularly in fast-growing emerging markets. While these economies remain at the forefront of global economic growth, inflation rates have risen along with commodity prices. In January, global food prices hit record highs because of tight supplies, increased demand, and severe weather. The Food and Agriculture Organization's Food Price Index surged to its highest level since the index launched in 1990. Consumers in developing nations, where food often represents 80% of a household's budget, were hit particularly hard, the United Nations noted. To fight inflation, China's central bank has raised interest rates three times since October. Central banks in Brazil, India, and Poland also have raised rates in response to accelerating inflation.

9

Your fund's performance

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

This section shows your fund's performance, price, and distribution information for periods ended January 31, 2011, the end of the first half of its current fiscal year. In accordance with regulatory requirements for mutual funds, we also include performance as of the most recent calendar quarter-end. Performance should always be considered in light of a fund's investment strategy. Data represent past performance. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return, net asset value, and market price will fluctuate, and you may have a gain or a loss when you sell your shares.

Fund performance Total return and comparative index results for periods ended 1/31/11

	NAV	Market price	Barclays Capital Government Bond Index	Lipper Flexible Income Funds (closed-end) category average*
Annual average				
Life of fund (since 2/29/88)	8.05%	7.78%	6.91%	7.51%
10 years	110.33	126.86	67.83	76.77

Terms and definitions

Important terms

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities, divided by the number of outstanding shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on exchanges such as the New York Stock Exchange.

Current yield is the annual rate of return earned from dividends or interest of an investment. Current yield is expressed as a percentage of the price of a security, fund share, or principal investment.

Comparative indexes

Barclays Capital Aggregate Bond Index is an unmanaged index of U.S. investment-grade fixed-income securities.

Barclays Capital Government Bond Index is an unmanaged index of U.S. Treasury and agency securities.

BofA (Bank of America) Merrill Lynch U.S. 3-Month Treasury Bill Index is an unmanaged index that seeks to measure the performance of U.S. Treasury bills available in the marketplace.

S&P 500 Index is an unmanaged index of common stock performance.

Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

Lipper is a third-party industry-ranking entity that ranks mutual funds. Its rankings do not reflect sales charges. Lipper rankings are based on total return at net asset value relative to other funds that have similar current investment styles or objectives as determined by Lipper. Lipper may change a fund's category assignment at its discretion. Lipper category averages reflect performance trends for funds within a category.

12

Other information for shareholders

Important notice regarding share repurchase program

In September 2010, the Trustees of your fund approved the renewal of a share repurchase program that had been in effect since 2005. This renewal will allow your fund to repurchase, in the 12 months beginning October 8, 2010, up to 10% of the fund's common shares outstanding as of October 7, 2010.

Important notice regarding delivery of shareholder documents

In accordance with SEC regulations, Putnam sends a single copy of annual and semiannual shareholder reports, prospectuses, and proxy statements to Putnam shareholders who share the same address, unless a shareholder requests otherwise. If you prefer to receive your own copy of these documents, please call Putnam at 1-800-225-1581, and Putnam will begin sending individual copies within 30 days.

Proxy voting

Putnam is committed to managing our mutual funds in the best interests of our shareholders. The Putnam funds' proxy voting guidelines and procedures, as well as information regarding how your fund voted proxies relating to portfolio securities during the 12-month period ended June 30, 2010, are available in the Individual Investors section of putnam.com, and on the SEC's Web site, www.sec.gov. If you have questions about finding forms on the SEC's Web site, you may call the SEC at 1-800-SEC-0330. You may also obtain the Putnam funds' proxy voting guidelines and procedures at no charge by calling Putnam's Shareholder Services at 1-800-225-1581.

Fund portfolio holdings

The fund will file a complete schedule of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. Shareholders may obtain the fund's Forms N-Q on the SEC's Web site at www.sec.gov. In addition, the fund's Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. You may call the SEC at 1-800-SEC-0330 for information about the SEC's Web site or the operation of the Public Reference Room.

Trustee and employee fund ownership

Putnam employees and members of the Board of Trustees place their faith, confidence, and, most importantly, investment dollars in Putnam mutual funds. As of January 31, 2011, Putnam employees had approximately \$352,000,000 and the Trustees had approximately \$68,000,000 invested in Putnam mutual funds. These amounts include investments by the Trustees' and employees' immediate family members as well as investments through retirement and deferred compensation plans.

13

Financial statements

A guide to financial statements

These sections of the report, as well as the accompanying Notes, constitute the fund's financial statements.

The fund's portfolio lists all the fund's investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund's net assets and share price are determined. All investment and non-investment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share. (For funds with preferred shares, the amount subtracted from total assets includes the liquidation preference of preferred shares.)

Statement of operations shows the fund's net investment gain or loss. This is done by first adding up all the fund's earnings — from dividends and interest income — and subtracting its operating expenses to determine net investment income (or loss). Then, any net gain or loss the fund realized on the sales of its holdings — as well as any unrealized gains or losses over the period — is added to or subtracted from the net investment result to determine the fund's net gain or loss for the fiscal period.

Statement of changes in net assets shows how the fund's net assets were affected by the fund's net investment gain or loss, by distributions to shareholders, and by changes in the number of the fund's shares. It lists distributions and their sources (net investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid in a different period from the one in which they were earned. Dividend sources are estimated at the time of declaration. Actual results may vary. Any non-taxable return of capital cannot be determined until final tax calculations are completed after the end of the fund's fiscal year.

Financial highlights provide an overview of the fund's investment results, per-share distributions, expense ratios, net investment income ratios, and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlights table also includes the current reporting period.

Notes to the fund's portfolio

Unless noted otherwise, the notes to the fund's portfolio are for the close of the fund's reporting period, which ran from August 1, 2010 through January 31, 2011 (the reporting period).

* Percentages indicated are based on net assets of \$896,924,417.

□ Non-income-producing security.

□ The interest rate and date shown parenthetically represent the new interest rate to be paid and the date the fund will begin accruing interest at this rate.

□ Restricted, excluding 144A securities, as to public resale. The total market value of restricted securities held at the close of the reporting period was \$25,935, or less than 0.1% of net assets.

□ Income may be received in cash or additional securities at the discretion of the issuer.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

These securities, in part or in entirety, were pledged and segregated with the broker to cover margin requirements for futures contracts at the close of the reporting period.

These securities, in part or in entirety, were pledged and segregated with the custodian for collateral on certain derivatives contracts at the close of the reporting period.

C Senior loans are exempt from registration under the Securities Act of 1933, as amended, but contain certain restrictions on resale and cannot be sold publicly. These loans pay interest at rates which adjust periodically. The interest rates shown for senior loans are the current interest rates at the close of the reporting period. Senior loans are also subject to mandatory and/or optional prepayment which cannot be predicted. As a result, the remaining maturity may be substantially less than the stated maturity shown (Notes 1 and 7).

e See Note 6 to the financial statements regarding investments in Putnam Money Market Liquidity Fund. The rate quoted in the security description is the annualized 7-day yield of the fund at the close of the reporting period.

F Is valued at fair value following procedures approved by the Trustees. Securities may be classified as Level 2 or Level 3 for Accounting Standards Codification ASC 820 *Fair Value Measurements and Disclosures* (ASC 820) based on the securities' valuation inputs.

i Securities purchased with cash or securities received, that were pledged to the fund for collateral on certain derivatives contracts (Note 1).

R Real Estate Investment Trust.

At the close of the reporting period, the fund maintained liquid assets totaling \$709,895,617 to cover certain derivatives contracts.

Debt obligations are considered secured unless otherwise indicated.

144A after the name of an issuer represents securities exempt from registration under Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.

The rates shown on FRB and FRN are the current interest rates at the close of the reporting period.

The dates shown on debt obligations are the original maturity dates.

IFB are securities that pay interest rates that vary inversely to changes in the market interest rates. As interest rates rise, inverse floaters produce less current income. The interest rates shown are the current interest rates at the close of the reporting period.

* Payments related to the referenced debt are made upon a credit default event.

** Upfront premium is based on the difference between the original spread on issue and the market spread on day of execution.

*** Ratings are presented for credit default contracts in which the fund has sold protection on the underlying referenced debt. Ratings for an underlying index represent the average of the ratings of all the securities included in that index. The Moody's, Standard & Poor's or Fitch ratings are believed to be the most recent ratings available at January 31, 2011. Securities rated by Putnam are indicated by \square /P. Securities rated by Fitch are indicated by \square /F.

ASC 820 establishes a three-level hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of the fund's investments. The three levels are defined as follows:

Level 1 \square Valuations based on quoted prices for identical securities in active markets.

Level 2 \square Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 \square Valuations based on inputs that are unobservable and significant to the fair value measurement.

The following is a summary of the inputs used to value the fund's net assets as of the close of the reporting period:

	Valuation inputs		
Investments in securities:	Level 1	Level 2	Level 3

** Unaudited.

a Per share net investment income has been determined on the basis of the weighted average number of shares outstanding during the period.

b Total return assumes dividend reinvestment.

c Includes amounts paid through expense offset arrangements (Note 2).

d Portfolio turnover excludes dollar roll transactions.

e Includes interest accrued in connection with certain terminated derivatives contracts, which amounted to 0.01% and 0.05% of average net assets for the periods ended July 31, 2010 and July 31, 2009, respectively.

f Reflects waivers of certain fund expenses in connection with Putnam Prime Money Market Fund in effect during the period. As a result of such waivers, the expenses of the fund for the periods ended July 31, 2009, July 31, 2008, July 31, 2007 and July 31, 2006, reflect a reduction of less than 0.01%, less than 0.01%, 0.01% and 0.01% of average net assets, respectively.

The accompanying notes are an integral part of these financial statements.

70

Notes to financial statements 1/31/11 (Unaudited)

Note 1: Significant accounting policies

Putnam Premier Income Trust (the fund), a non-diversified Massachusetts business trust, is registered under the Investment Company Act of 1940, as amended, as a closed-end management investment company. The fund's investment objective is to seek high current income consistent with the preservation of capital by allocating its investments among the U.S. government sector, high yield sector and international sector of the fixed-income securities market. The fund invests in higher yielding, lower-rated bonds that have a higher rate of default due to the nature of the investments. The fund may invest a significant portion of their assets in securitized debt instruments, including mortgage-backed and asset-backed investments. The yields and values of these investments are sensitive to changes in interest rates, the rate of principal payments on the underlying assets and the market's perception of the issuers. The market for these investments may be volatile and limited, which may make them difficult to buy or sell.

In the normal course of business, the fund enters into contracts that may include agreements to indemnify another party under given circumstances. The fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be, but have not yet been, made against the fund. However, the fund's management team expects the risk of material loss to be remote.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations. Actual results could differ from those estimates. Subsequent events after the Statement of assets and liabilities date through the date that the financial statements were issued have been evaluated in the preparation of the financial statements. Unless otherwise noted, the "reporting period" represents the period from August 1, 2010 through January 31, 2011.

A) Security valuation Investments for which market quotations are readily available are valued at the last reported sales price on their principal exchange, or official closing price for certain markets, and are classified as Level 1 securities. If no sales are reported □ as in the case of some securities traded over-the-counter □ a security is valued at its last reported bid price and is generally categorized as a Level 2 security.

Market quotations are not considered to be readily available for certain debt obligations; such investments are valued on the basis of valuations furnished by an independent pricing service approved by the Trustees or dealers selected by Putnam Investment Management, LLC (Putnam Management), the fund's manager, an indirect wholly-owned subsidiary of Putnam Investments, LLC. Such services or dealers determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and various relationships, generally recognized by institutional traders, between securities (which consider such factors as security prices, yields, maturities and ratings). These securities will generally be categorized as Level 2.

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore the closing prices for securities in such markets or on such exchanges may not fully reflect events that occur after such close but before the close of the New York Stock Exchange. Accordingly, on certain days, the fund will fair value foreign equity securities taking into account multiple factors including movements in the U.S. securities markets, currency valuations and comparisons to the valuation of American Depository Receipts, exchange-traded funds and futures contracts. These securities, which will generally represent a transfer from a Level 1 to a Level 2 security, will be classified as Level 2. The number of days on which fair value prices will be used will depend on market activity and it is possible that fair value prices will be used by the fund to a significant extent. Securities quoted in foreign currencies, if any, are translated into U.S. dollars at the current exchange rate.

To the extent a pricing service or dealer is unable to value a security or provides a valuation that Putnam Management does not believe accurately reflects the security's fair value, the security will be valued at fair value by Putnam Management. Certain investments, including certain restricted and illiquid securities and derivatives, are also valued at fair value following procedures approved by the Trustees. These valuations consider such factors as significant market or specific security events such as interest rate or credit quality changes, various relationships with other securities, discount rates, U.S. Treasury, U.S. swap and credit yields, index levels, convexity exposures and recovery rates. These securities are classified as Level 2 or as Level 3 depending on the priority of the significant inputs.

71

Such valuations and procedures are reviewed periodically by the Trustees. Certain securities may be valued on the basis of a price provided by a single source. The fair value of securities is generally determined as the amount that the fund could reasonably expect to realize from an orderly disposition of such securities over a reasonable period of time. By its nature, a fair value price is a good faith estimate of the value of a security in a current sale and does not reflect an actual market price, which may be different by a material amount.

B) Security transactions and related investment income Security transactions are recorded on the trade date (the date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis. Interest income is recorded on the accrual basis. Dividend income, net of applicable withholding taxes, is recognized on the ex-dividend date except that certain dividends from foreign securities, if any, are recognized as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Dividends representing a return of capital or capital gains, if any, are reflected as a reduction of cost and/or as a realized gain. All premiums/discounts are amortized/accreted on a yield-to-maturity basis.

The fund earned certain fees in connection with its senior loan purchasing activities. These fees are treated as market discount and are recorded as income in the Statement of operations.

C) Stripped securities The fund may invest in stripped securities which represent a participation in securities that may be structured in classes with rights to receive different portions of the interest and principal. Interest-only securities receive all of the interest and principal-only securities receive all of the principal. If the interest-only securities experience greater than anticipated prepayments of principal, the fund may fail to recoup fully its initial investment in these securities. Conversely, principal-only securities increase in value if prepayments are greater than anticipated and decline if prepayments are slower than anticipated. The market value of these securities is highly sensitive to changes in interest rates.

D) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities is recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when earned or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized

and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.

The fund may be subject to taxes imposed by governments of countries in which it invests. Such taxes are generally based on either income or gains earned or repatriated. The fund accrues and applies such taxes to net investment income, net realized gains and net unrealized gains as income and/or capital gains are earned.

E) Futures contracts The fund uses futures contracts to hedge interest rate risk and to gain exposure to interest rates. The potential risk to the fund is that the change in value of futures contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments if there is an illiquid secondary market for the contracts, if interest or exchange rates move unexpectedly or if the counterparty to the contract is unable to perform. With futures, there is minimal counterparty credit risk to the fund since futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default. Risks may exceed amounts recognized on the Statement of assets and liabilities. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. The fund and the broker agree to exchange an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin." Futures contracts outstanding at period end, if any, are listed after the fund's portfolio. The fund had an average number of contracts of approximately 3,000 on futures contracts for the reporting period.

72

F) Options contracts The fund uses options contracts to hedge duration, convexity and prepayment risk and to gain exposure to interest rates and volatility. The potential risk to the fund is that the change in value of options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments if there is an illiquid secondary market for the contracts, if interest or exchange rates move unexpectedly or if the counterparty to the contract is unable to perform. Realized gains and losses on purchased options are included in realized gains and losses on investment securities. If a written call option is exercised, the premium originally received is recorded as an addition to sales proceeds. If a written put option is exercised, the premium originally received is recorded as a reduction to the cost of investments.

Exchange traded options are valued at the last sale price or, if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers. Written option contracts outstanding at period end, if any, are listed after the fund's portfolio. The fund had an average contract amount of approximately \$680,500,000 on purchased options contracts for the reporting period. See Note 3 for the volume of written options contracts activity for the reporting period.

G) Forward currency contracts The fund buys and sells forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to hedge foreign exchange risk and to gain exposure on currency. The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked to market daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position. Risks may exceed amounts recognized on the Statement of assets and liabilities. Forward currency contracts outstanding at period end, if any, are listed after the fund's portfolio. Outstanding contracts on forward currency contracts at the close of the reporting period are indicative of the volume of activity during the period.

H) Total return swap contracts The fund enters into total return swap contracts, which are arrangements to exchange a market linked return for a periodic payment, both based on a notional principal amount to hedge sector exposure, to manage exposure to specific sectors or industries, and to gain exposure to specific sectors/industries. To the extent that the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the fund will receive a payment from or make a payment to the counterparty. Total return swap contracts are marked

to market daily based upon quotations from market makers and the change, if any, is recorded as an unrealized gain or loss. Payments received or made are recorded as realized gains or losses. Certain total return swap contracts may include extended effective dates. Payments related to these swap contracts are accrued based on the terms of the contract. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or in the price of the underlying security or index, the possibility that there is no liquid market for these agreements or that the counterparty may default on its obligation to perform. The fund's maximum risk of loss from counterparty risk is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the fund and the counterparty. Risk of loss may exceed amounts recognized on the Statement of assets and liabilities. Total return swap contracts outstanding at period end, if any, are listed after the fund's portfolio. Outstanding notional on total return swap contracts at the close of the reporting period are indicative of the volume of activity during the period.

I) Interest rate swap contracts The fund enters into interest rate swap contracts, which are arrangements between two parties to exchange cash flows based on a notional principal amount, to hedge interest rate risk and to gain exposure on interest rates. An interest rate swap can be purchased or sold with an upfront premium. An upfront payment received by the fund is recorded as a liability on the fund's books. An upfront payment made by the fund is recorded as an asset on the fund's books. Interest rate swap contracts are marked to market daily based upon quotations from an independent pricing service or market makers and the change, if any, is recorded as an unrealized gain or loss. Payments received or made are recorded as realized gains or losses. Certain interest rate swap contracts may include extended effective dates. Payments related to these swap contracts are accrued based on the terms of the contract. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults on its obligation to perform. The fund's maximum risk of loss from counterparty risk is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the fund and the counterparty. Risk of loss may exceed amounts recognized on the Statement of assets and liabilities. Interest rate swap contracts outstanding at period end, if any, are listed after the

73

fund's portfolio. The fund had an average notional amount of approximately \$8,864,200,000 on interest rate swap contracts for the reporting period.

J) Credit default contracts The fund enters into credit default contracts to gain exposure on individual names and/or baskets of securities. In a credit default contract, the protection buyer typically makes an up front payment and a periodic stream of payments to a counterparty, the protection seller, in exchange for the right to receive a contingent payment upon the occurrence of a credit event on the reference obligation or all other equally ranked obligations of the reference entity. Credit events are contract specific but may include bankruptcy, failure to pay, restructuring and obligation acceleration. An upfront payment received by the fund, as the protection seller, is recorded as a liability on the fund's books. An upfront payment made by the fund, as the protection buyer, is recorded as an asset on the fund's books. Periodic payments received or paid by the fund are recorded as realized gains or losses. The credit default contracts are marked to market daily based upon quotations from an independent pricing service or market makers and the change, if any, is recorded as an unrealized gain or loss. Upon the occurrence of a credit event, the difference between the par value and market value of the reference obligation, net of any proportional amount of the upfront payment, is recorded as a realized gain or loss.

In addition to bearing the risk that the credit event will occur, the fund could be exposed to market risk due to unfavorable changes in interest rates or in the price of the underlying security or index or the possibility that the fund may be unable to close out its position at the same time or at the same price as if it had purchased the underlying reference obligations. In certain circumstances, the fund may enter into offsetting credit default contracts which would mitigate its risk of loss. Risks of loss may exceed amounts recognized on the Statement of assets and liabilities. The fund's maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the fund and the counterparty. Where the fund is a seller of protection, the maximum potential amount of future payments the fund may be required to make is equal to the notional amount of the relevant credit default contract. Credit default contracts outstanding, including their respective notional amounts at period end, if any, are listed after the fund's portfolio. Outstanding notional on credit default swap contracts at the close of the reporting period are indicative of the volume of activity during the period.

K) Master agreements The fund is a party to ISDA (International Swap and Derivatives Association, Inc.) Master Agreements (Master Agreements) with certain counterparties that govern over-the-counter derivative and foreign exchange contracts entered into from time to time. The Master Agreements may contain provisions regarding, among other things, the parties' general obligations, representations, agreements, collateral requirements, events of default and early termination. With respect to certain counterparties, in accordance with the terms of the Master Agreements, collateral posted to the fund is held in a segregated account by the fund's custodian and with respect to those amounts which can be sold or repledged, are presented in the fund's portfolio. Collateral posted to the fund which cannot be sold or repledged totaled \$8,197,987 at the close of the reporting period. Collateral pledged by the fund is segregated by the fund's custodian and identified in the fund's portfolio. Collateral can be in the form of cash or debt securities issued by the U.S. Government or related agencies or other securities as agreed to by the fund and the applicable counterparty. Collateral requirements are determined based on the fund's net position with each counterparty. Termination events applicable to the fund may occur upon a decline in the fund's net assets below a specified threshold over a

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

certain period of time. Termination events applicable to counterparties may occur upon a decline in the counterparty's long-term and short-term credit ratings below a specified level. In each case, upon occurrence, the other party may elect to terminate early and cause settlement of all derivative and foreign exchange contracts outstanding, including the payment of any losses and costs resulting from such early termination, as reasonably determined by the terminating party. Any decision by one or more of the fund's counterparties to elect early termination could impact the fund's future derivative activity.

At the close of the reporting period, the fund had a net liability position of \$146,914,477 on derivative contracts subject to the Master Agreements. Collateral posted by the fund totaled \$128,076,546.

L) TBA purchase commitments The fund may enter into TBA (to be announced) commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, it is anticipated that the amount of the commitments will not significantly differ from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk

74

of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at fair value of the underlying securities, according to the procedures described under "Security valuation" above. The contract is marked to market daily and the change in market value is recorded by the fund as an unrealized gain or loss.

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for its portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

M) TBA sale commitments The fund may enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction.

Unsettled TBA sale commitments are valued at the fair value of the underlying securities, generally according to the procedures described under "Security valuation" above. The contract is marked to market daily and the change in market value is recorded by the fund as an unrealized gain or loss. If the TBA sale commitment is closed through the acquisition of an offsetting TBA purchase commitment, the fund realizes a gain or loss. If the fund delivers securities under the commitment, the fund realizes a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into. TBA sale commitments outstanding at period end, if any, are listed after the fund's portfolio.

N) Dollar rolls To enhance returns, the fund may enter into dollar rolls (principally using TBAs) in which the fund sells securities for delivery in the current month and simultaneously contracts to purchase similar securities on a specified future date. During the period between the sale and subsequent purchase, the fund will not be entitled to receive income and principal payments on the securities sold. The fund will, however, retain the difference between the initial sales price and the forward price for the future purchase. The fund will also be able to earn interest on the cash proceeds that are received from the initial sale on settlement date. The fund may be exposed to market or credit risk if the price of the security changes unfavorably or the counterparty fails to perform under the terms of the agreement.

O) Interfund lending Effective July 2010, the fund, along with other Putnam funds, may participate in an interfund lending program pursuant to an exemptive order issued by the SEC. This program allows the fund to lend to other Putnam funds that permit such transactions. Interfund lending transactions are subject to each fund's investment policies and borrowing and lending limits. Interest earned or paid on the interfund lending transaction will be based on the average of certain current market rates. During the reporting period, the fund did not utilize the program.

P) Federal taxes It is the policy of the fund to distribute all of its taxable income within the prescribed time period and otherwise comply with the provisions of the Internal Revenue Code of 1986, as amended (the Code), applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Code. The fund is subject to the provisions of Accounting Standards Codification ASC 740 *Income Taxes* (ASC 740). ASC 740 sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. The fund did not have a liability to record for any unrecognized tax benefits in the

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

accompanying financial statements. No provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains. Each of the fund's federal tax returns for the prior three fiscal years remains subject to examination by the Internal Revenue Service.

At July 31, 2010, the fund had a capital loss carryover of \$248,391,079 available to the extent allowed by the Code to offset future net capital gain, if any. The amounts of the carryovers and the expiration dates are:

Loss carryover	Expiration
\$80,119,935	July 31, 2011
6,338,093	July 31, 2015
17,302,669	July 31, 2016
58,742,308	July 31, 2017
85,888,074	July 31, 2018

75

Pursuant to federal income tax regulations applicable to regulated investment companies, the fund has elected to defer to its fiscal year ending July 31, 2011 \$4,831,408 of losses recognized during the period November 1, 2009 to July 31, 2010.

The aggregate identified cost on a tax basis is \$1,005,725,925, resulting in gross unrealized appreciation and depreciation of \$48,742,502 and \$26,733,496, respectively, or net unrealized appreciation of \$22,009,006.

Q) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Dividend sources are estimated at the time of declaration. Actual results may vary. Any non-taxable return of capital cannot be determined until final tax calculations are completed after the end of the fund's fiscal year. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations.

Note 2: Management fee, administrative services and other transactions

The fund pays Putnam Management for management and investment advisory services quarterly based on the average net assets (including assets, but excluding liabilities, attributable to leverage for investment purposes) of the fund. The fee is based on the following annual rates: 0.75% of the first \$500 million, 0.65% of the next \$500 million, 0.60% of the next \$500 million, and 0.55% of the next \$5 billion, with additional breakpoints at higher asset levels.

Putnam Investments Limited (PIL), an affiliate of Putnam Management, is authorized by the Trustees to manage a separate portion of the assets of the fund as determined by Putnam Management from time to time. Putnam Management pays a quarterly sub-management fee to PIL for its services at an annual rate of 0.40% of the average net assets (including assets, but excluding liabilities, attributable to leverage for investment purposes) of the portion of the fund managed by PIL.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

Custodial functions for the fund's assets are provided by State Street Bank and Trust Company (State Street). Custody fees are based on the fund's asset level, the number of its security holdings and transaction volumes.

Putnam Investor Services, a division of Putnam Fiduciary Trust Company (PFTC), which is an affiliate of Putnam Management, provided investor servicing agent functions to the fund through December 31, 2010. Subsequent to December 31, 2010 these services were provided by Putnam Investor Services, Inc, an affiliate of Putnam Management. Both Putnam Investor Services and Putnam Investor Services, Inc. were paid a monthly fee for investor servicing at an annual rate of 0.05% of the fund's average net assets. The amounts incurred for investor servicing agent functions during the reporting period are included in Investor servicing fees in the Statement of operations.

The fund has entered into expense offset arrangements with PFTC and State Street whereby PFTC's and State Street's fees are reduced by credits allowed on cash balances. For the reporting period, the fund's expenses were reduced by \$1,916 under the expense offset arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$564, as a quarterly retainer, has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees also are reimbursed for expenses they incur relating to their services as Trustees.

The fund has adopted a Trustee Fee Deferral Plan (the Deferral Plan) which allows the Trustees to defer the receipt of all or a portion of Trustees fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the Pension Plan) covering all Trustees of the fund who have served as a Trustee for at least five years and were first elected prior to 2004. Benefits under the Pension Plan are equal to 50% of the Trustee's average annual attendance and retainer fees for the three years ended December 31, 2005. The retirement benefit is payable during a Trustee's lifetime, beginning the year following retirement, for the number of years of service through December 31, 2006. Pension expense for the fund is included in Trustee compensation and expenses in the Statement of operations. Accrued pension liability is included in Payable for Trustee compensation and expenses in the Statement of assets and liabilities. The Trustees have terminated the Pension Plan with respect to any Trustee first elected after 2003.

76

Note 3: Purchases and sales of securities

During the reporting period, cost of purchases and proceeds from sales of investment securities other than short-term investments aggregated \$581,183,905 and \$702,639,068, respectively. There were no purchases or proceeds from sales of long-term U.S. government securities.

Written option transactions during the reporting period are summarized as follows:

		Contract amounts	Premiums received
Written options outstanding	USD	1,072,209,000	\$55,803,959
at the beginning of the period	CHF	□	\$□
Options	USD	840,603,730	29,509,837
opened	CHF	146,640,000	160,099
Options	USD	(28,067,900)	(1,198,479)
exercised	CHF	□	□
Options	USD	(28,067,900)	(1,198,479)

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

expired	CHF		
Written options outstanding	USD	1,856,676,930	\$82,916,838
at the end of the period	CHF	146,640,000	\$160,099

Note 4: Shares repurchased

In September 2010, the Trustees approved the renewal of the repurchase program to allow the fund to repurchase up to 10% of its outstanding common shares over the 12-month period ending October 7, 2011 (based on shares outstanding as of October 7, 2010). Prior to this renewal, the Trustees had approved a repurchase program to allow the fund to repurchase up to 10% of its outstanding common shares over the 12-month period ending October 7, 2010 (based on shares outstanding as of October 7, 2009) and prior to that, to allow the fund to repurchase up to 10% of its outstanding common shares over the 12-month period ending October 7, 2009 (based on shares outstanding as of October 5, 2008). Repurchases are made when the fund's shares are trading at less than net asset value and in accordance with procedures approved by the fund's Trustees. For the reporting period, the fund did not repurchase any shares.

Note 5: Summary of derivative activity

The following is a summary of the market values of derivative instruments as of the close of the reporting period:

Market values of derivative instruments as of the close of the reporting period

Derivatives not accounted for as hedging instruments under ASC 815	Asset derivatives		Liability derivatives	
	Statement of assets and liabilities location	Market value	Statement of assets and liabilities location	Market value
Credit contracts	Receivables	\$1,236,518	Payables	\$1,118,289
Foreign exchange contracts	Receivables	1,906,680	Payables	3,465,371
Equity contracts	Investments, Receivables	60,278	Payables	
Interest rate contracts	Investments, Receivables, Net assets Unrealized appreciation/ (depreciation)	62,276,121*	Payables, Net assets Unrealized appreciation/ (depreciation)	220,470,459*
Total		\$65,479,597		\$225,054,119

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

* Includes cumulative appreciation/depreciation of futures contracts as reported in the fund's portfolio. Only current day's variation margin is reported within the Statement of assets and liabilities.

77

The following is a summary of realized and change in unrealized gains or losses of derivative instruments on the Statement of operations for the reporting period (see Note 1):

Amount of realized gain or (loss) on derivatives recognized in net gain or (loss) on investments

Derivatives not accounted for as hedging instruments under ASC 815	Options	Warrants	Futures	Forward currency contracts	Swaps	Total
Credit contracts	\$0	\$0	\$0	\$0	\$300,174	\$300,174
Foreign exchange contracts	0	0	0	(901,615)	0	(901,615)
Equity contracts	0	(202)	0	0	0	(202)
Interest rate contracts	1,721,589	0	(8,647,334)	0	7,513,961	588,216
Total	\$1,721,589	\$(202)	\$(8,647,334)	\$(901,615)	\$7,814,135	\$(13,427)

Change in unrealized appreciation or (depreciation) on derivatives recognized in net gain or (loss) on investments

Derivatives not accounted for as hedging instruments under ASC 815	Options	Warrants	Futures	Forward currency contracts	Swaps	Total
Credit contracts	\$0	\$0	\$0	\$0	\$497,441	\$497,441
Foreign exchange contracts	0	0	0	(3,384,662)	0	(3,384,662)
Equity contracts	0	8,394	0	0	0	8,394

Interest rate contracts	1,691,500	□	(20,948,001)	□	(4,753,147)	(24,009,648)
Total	\$1,691,500	\$8,394	\$(20,948,001)	\$(3,384,662)	\$(4,255,706)	\$(26,888,475)

Note 6: Investment in Putnam Money Market Liquidity Fund

The fund invested in Putnam Money Market Liquidity Fund, an open-end management investment company managed by Putnam Management. Investments in Putnam Money Market Liquidity Fund are valued at its closing net asset value each business day. Income distributions earned by the fund are recorded as interest income in the Statement of operations and totaled \$15,383 for the reporting period. During the reporting period, cost of purchases and proceeds of sales of investments in Putnam Money Market Liquidity Fund aggregated \$353,426,102 and \$246,541,975, respectively. Management fees charged to Putnam Money Market Liquidity Fund have been waived by Putnam Management.

Note 7: Senior loan commitments

Senior loans are purchased or sold on a when-issued or delayed delivery basis and may be settled a month or more after the trade date, which from time to time can delay the actual investment of available cash balances; interest income is accrued based on the terms of the securities. Senior loans can be acquired through an agent, by assignment from another holder of the loan, or as a participation interest in another holder's portion of the loan. When the fund invests in a loan or participation, the fund is subject to the risk that an intermediate participant between the fund and the borrower will fail to meet its obligations to the fund, in addition to the risk that the borrower under the loan may default on its obligations.

Note 8: Regulatory matters and litigation

In late 2003 and 2004, Putnam Management settled charges brought by the Securities and Exchange Commission (the SEC) and the Massachusetts Securities Division in connection with excessive short-term trading in Putnam funds. Distribution of payments from Putnam Management to certain open-end Putnam funds and their shareholders is expected to be completed in the next several months. These allegations and related matters have served as the general basis for certain lawsuits, including purported class action lawsuits against Putnam Management and, in a limited number of cases, some Putnam funds. Putnam Management believes that these lawsuits will have

78

no material adverse effect on the funds or on Putnam Management's ability to provide investment management services. In addition, Putnam Management has agreed to bear any costs incurred by the Putnam funds as a result of these matters.

Note 9: Market and credit risk

In the normal course of business, the fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the contracting party to the transaction to perform (credit risk). The fund may be exposed to additional credit risk that an institution or other entity with which the fund has unsettled or open transactions will default.

79

Shareholder meeting results (Unaudited)**January 28, 2011 meeting**

January 1 -				
January 31, 2011	-	-	-	14,085,964

* In October 2005, the Board of Trustees of the Putnam Funds initiated the closed-end fund share repurchase program, which, as subsequently amended, authorized the repurchase of up to 10% of the fund's outstanding common shares over the two-years ending October 5, 2007. The Trustees subsequently renewed the program on four occasions, to permit the repurchase of an additional 10% of the fund's outstanding common shares over each of the twelve-month periods beginning on October 8, 2007, October 8, 2008, October 8, 2009 and October 8, 2010. The October 8, 2008 - October 7, 2009 program, which was announced in September 2008, allowed repurchases up to a total of 14,564,288 shares of the fund. The October 8, 2009 - October 7, 2010 program, which was announced in September 2009, allowed repurchases up to a total of 14,017,462 shares of the fund. The October 8, 2010 - October 7, 2011 program, which was announced in September 2010, allows repurchases up to a total of 14,085,964 shares of the fund.

**Information prior to October 7, 2010 is based on the total number of shares eligible for repurchase under the program, as amended through September 2009. Information from October 8, 2010 forward is based on the total number of shares eligible for repurchase under the program, as amended through September 2010.

Item 10. Submission of Matters to a Vote of Security Holders:

Not applicable

Item 11. Controls and Procedures:

(a) The registrant's principal executive officer and principal financial officer have concluded, based on their evaluation of the effectiveness of the design and operation of the registrant's disclosure controls and procedures as of a date within 90 days of the filing date of this report, that the design and operation of such procedures are generally effective to provide reasonable assurance that information required to be disclosed by the registrant in this report is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

(b) Changes in internal control over financial reporting: Not applicable

Item 12. Exhibits:

(a)(1) Not applicable

(a)(2) Separate certifications for the principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are filed herewith.

Edgar Filing: PUTNAM PREMIER INCOME TRUST - Form N-CSRS

(b) The certifications required by Rule 30a-2(b) under the Investment Company Act of 1940, as amended, are filed herewith.
