PART I

ITEM 1. BUSINESS

BACKGROUND

Nocopi Technologies, Inc. (hereinafter "Nocopi", "Registrant" or the "Company") was organized in 1983 to exploit a technology developed by its founders for impeding the reproduction of documents on office copiers. In its early stages of development, Nocopi's business consisted primarily of selling copy resistant paper to protect corporate documents and information. More recently, Registrant has increasingly focused on developing and marketing technologies for document and product authentication which can reduce losses caused by fraudulent document

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

reproduction or by product counterfeiting and/or diversion. Registrant derives revenues by licensing its technologies, both to end-users and to value-added resellers, and by selling products incorporating its technologies and technical support services.

The decline in Registrant's financial condition has not stabilized or been reversed. By the end of 2002, the decline had led to a severe working capital deficiency and adverse liquidity that threatened and continues to threaten to require the imminent cessation of Registrant's operations. During 2002, Registrant received new capital investments totaling \$411,000 from a variety of sources including existing and new stockholders and received \$160,400 in loans from three individuals including the Company's Chairman of the Board. In 2003, Registrant received an additional \$4,500 in demand loans from its Chairman of the Board. Registrant also repaid its Chairman of the Board \$15,000 of the demand loans previously provided by him. During 2004, Registrant received new capital investments totaling \$152,100 from three new stockholders and converted demand notes and accrued interest totaling \$175,400 into 1,753,940 shares of Registrant's common stock.

During 2003, Registrant settled its dispute with Euro-Nocopi, S.A., its former European licensee, relocated its operations to a smaller, lower cost facility after the termination of its lease at its former location and hired two former employees who have significant knowledge of the Registrant's technologies and production methods. The \$900,000 received in the arbitration settlement with Euro-Nocopi, S.A. has permitted Registrant to continue in operation to the current date. It remains highly uncertain whether Registrant can achieve positive cash flow before its adverse liquidity forces it to cease or suspend operations. Registrant's management intends to seek additional capital, if possible, and may continue to explore possible business combination opportunities if such opportunities are presented. Additional capital is also needed to fund programs and activities designed to increase Registrant's operating revenues to levels that will sustain its operations.

In late 2003, Registrant developed and began to market a new technology, named "Rub-n-Color", which consists of a system of removable dyes in a large variety of colors that can be activated through rubbing with a fingernail or a firm object. Registrant believes this technology has applications in children's activity products such as a coloring book without crayons and in educational testing review products. Registrant has demonstrated this technology to several potential licensees, participated in trade shows including the 2004 and 2005 American International Toy Fair in New York City and has received several industry awards. There can be no assurances that these initiatives will generate additional operating revenues that will allow Registrant to sustain its operations.

ANTI-COUNTERFEITING AND ANTI-DIVERSION TECHNOLOGIES AND PRODUCTS

Continuing developments in copying and printing technologies have made it ever easier to counterfeit a wide variety of documents. Lottery tickets, gift certificates, event and transportation tickets, travelers' checks and the like are all susceptible to counterfeiting, and Registrant believes that losses from such counterfeiting have increased substantially with improvements in the copying and printing technologies. Product counterfeiting has long caused losses to manufacturers of brand name products, and Registrant believes these losses have also increased as the counterfeiting of labeling and packaging has become easier.

Registrant's proprietary document authentication technologies are useful to

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

businesses desiring to authenticate a wide variety of printed materials and products. These include a technology with the ability to print invisibly on certain areas of a document. The invisible printing can be activated or revealed by use of a special highlighter pen when authentication is required. This technology is marketed under the trademark COPIMARK(TM). Other variations of the COPIMARK(TM) technology involve multiple color responses from a common pen, visible marks of one color that turn another color with the pen or visible and invisible marks that turn into a multicolored image. A related technology is Nocopi's RUB & REVEAL(R) system, which permits the invisible printing of an authenticating symbol or code that can be revealed by rubbing a fingernail over the printed area. These technologies provide users with the ability to authenticate documents and detect counterfeit documents. Applications include the authentication of documents having intrinsic value, such as merchandise receipts, checks, travelers' checks, gift certificates and event tickets, and the authentication of product labeling and packaging. When applied to product labels and packaging, such technologies can be used to detect counterfeit products whose labels and packaging would not contain the authenticating marks invisibly printed on the packaging or labels of the legitimate product, as well as to combat product diversion (i.e. sale of legitimate products through unauthorized distribution channels or in unauthorized markets). Registrant's related invisible inkjet technology permits manufacturers and distributors to track the movement of products from production to ultimate consumption when coupled with proprietary software. Management believes that the "track and trace" capability provided by this technology should be attractive to brand owners and marketers. In late 2003, Registrant participated in a national public meeting held by the US Food and Drug Administration that focused on the problem of counterfeit and diverted pharmaceutical products where Registrant's patented anti-counterfeiting and anti-diversion technologies were presented to the meeting attendees.

DOCUMENT SECURITY PRODUCTS

Registrant continues to offer a line of burgundy colored papers that deter photocopying and transmission by facsimile. This colored paper inhibits photocopier reproduction at the cost of loss of easy legibility to the reader. Registrant currently offers its copy resistant papers in three grades, each balancing improved copy resistance against diminished legibility. Registrant also sells user defined, pre-printed forms on which selected areas are colored to inhibit reproduction. An example is a doctor's prescription form with the signature area protected. This product line is called SELECTIVE NOCOPI(TM). Registrant also offers several inks that impede photocopying by color copiers. This technology is called COLORBLOC(R).

Since late 1999, Registrant has, in addition to marketing its own technologies and products, acted as a distributor for a line of Pantograph security paper. This patented product, complementary to the Registrant's line of security paper, produces a message, such as "unauthorized copy", when a copy of an original document that was printed or typed on the Pantograph paper, is reproduced on a photocopier. This product line is called COPI-ALERT.

ENTERTAINMENT AND TOY PRODUCTS

As mentioned above, in late 2003, after the re-employment of two former members of the Registrant's technical staff, a new technology was developed that consists of removable dyes that can be produced in a variety of colors and can be revealed by rubbing with a fingernail or other firm object such as a plastic pen cap. This technology has been named Rub-n-Color. Registrant believes that this new technology does not compromise the confidentiality of its security and authentication technologies. Applications include children's activity products such as a coloring book without crayons or a restaurant place mat, educational instruction books and testing review manuals. Registrant has obtained certifications of non-toxicity from the Consumer Products Services, Inc. and the

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

American Society for Testing and Materials laboratories. In February 2004, Registrant inaugurated its marketing efforts for this new technology at the American International Toy Fair in New York City and it attended the Toy Fair again in February 2005. During 2004, Registrant received awards from Creative Child Magazine and Spectrum Magazine for its rub-it and Color Activity Book. As a result of its participation and marketing activities, Registrant has identified a number of potential licensees in the children's and educational markets and has had preliminary contact, to date consisting primarily of negotiating non-disclosure and non-analysis agreements, with several businesses in these target markets. There are no assurances that the resources that Registrant, even with additional investment, can devote to marketing and further technical development of this new product line will be sufficient to increase the Company's revenues to levels resulting in positive cash flow.

2

The following table illustrates the approximate percentage of Registrant's revenues accounted for by each type of its products for each of the two last fiscal years:

	Year Ended December 31,
Product Type -----	2004 ----
Anti-Counterfeiting & Anti-Diversion Technologies and Products	85%
Document Security Products	15%
Entertainment and Toy Products	0%

MARKETING

The marketing approach of Registrant is to offer sufficient flexibility in its products and technologies so as to provide cost effective solutions to a wide variety of counterfeiting, diversion and copier fraud problems. As a technology company, Registrant generates revenues primarily by collecting license fees from market-specific manufacturers who incorporate Registrant's technologies into their manufacturing process and their products. Registrant also licenses its technologies directly to end-users.

Registrant has identified a number of major markets for its technologies and products, including security printers, manufacturers of labels, packaging materials and specialty paper products and distributors of brand name products. Within each market, key potential users have been identified, and several have been licensed. Within North America, sales efforts include direct selling by Company personnel to create end user demand and selling through licensee sales forces and sales agents with support from company personnel. Registrant has determined that technical sales support by its personnel is of great importance to increasing its licensees' sales of products incorporating Registrant's technologies and, therefore, seeks to maintain, to the extent permitted by its limited resources, its commitment to providing such support.

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

Since 1999, Registrant's management has refocused the Company's marketing efforts somewhat in view of the limited resources available to the Company for marketing and the need to improve the Registrant's cash flow. Current marketing efforts are focused on Registrant's more mature technologies that can be utilized by customers with relatively less development efforts.

As continued improvements in color copier and desktop publishing technology make counterfeiting and fraud opportunities less expensive and more available, Registrant intends, to the extent feasible, to maintain an interactive product development and enhancement program with the combined efforts of marketing, applications engineering and research and development. Registrant's objective is to concentrate its efforts on developing market-ready products with the most beneficial ratios of market potential to development time and cost.

Except in Europe, Registrant markets its technologies through its own employees and through independent sales representatives. In Europe, its security technologies are marketed by Euro-Nocopi, S.A., a former affiliate of Registrant which holds certain European marketing rights with respect to those technologies.

Registrant is presently considering a number of marketing strategies for its newly developed "Rub-n-Color" product line including licensing and direct sales through product retailers.

Registrant has taken several steps to improve the marketing of its technologies. These include the implementation of a new web site and online store designed both to more effectively promote the Company's products and to provide for smoother online ordering of certain products.

MAJOR CUSTOMERS

During 2004, Registrant made sales or obtained revenues equal to 10% or more of Registrant's 2004 total revenues from two non-affiliated customers who individually accounted for approximately 32% and 20% of 2004 revenues.

3

MANUFACTURING

Registrant has a small facility for the manufacture of its security inks. Except for this facility, Registrant does not maintain manufacturing facilities. Registrant presently subcontracts the manufacture of its applications (mainly printing and coating) to third party manufacturers and expects to continue such subcontracting. Because some of the processes that Nocopi uses in its applications are based on relatively common manufacturing technologies, there appears to be no technical or economic reason for Registrant to invest capital in its own manufacturing facilities.

Registrant has established a quality control program that currently entails laboratory analysis of developed technologies. When warranted, Registrant's specially trained technicians travel to third party production facilities to install equipment, train client staff and monitor the manufacturing process.

PATENTS

Nocopi has received various patents and/or has patents pending in the United States, Canada, South Africa, Saudi Arabia, Australia, New Zealand, Japan, France, the United Kingdom, Belgium, the Netherlands, Germany, Austria, Italy,

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

Sweden, Switzerland, Luxembourg, and Liechtenstein. Patent applications for Registrant's technology (including improvements in the technology) have also been filed in numerous other jurisdictions where commercial usage is foreseen, including other countries in Europe, Japan, Australia, and New Zealand, and the rights under such applications have been assigned to Registrant. Registrant's patent counsel, which conducted the appropriate searches in Canada and the United States, has reviewed the results of searches conducted in Europe and advised management that effective patent protection for Registrant's technology should be obtainable in all countries in which the patent applications have been filed. There can be no assurance, however, that such protection will be obtained. Registrant currently has obtained patent protection on substantially all its security inks including the RUB & REVEAL(R) system and has patents pending on the newly marketed Rub-n-Color technology. Patents on Registrant's line of burgundy colored papers, presently a minor portion of Registrant's product line, have expired.

When a new product or process is developed, the developer may seek to preserve for itself the economic benefit of the product or process by applying for a patent in each jurisdiction in which the product or process is likely to be exploited. Generally speaking, in order for a patent to be granted, the product or process must be new and be inventively different from what has been previously patented or otherwise known anywhere in the world. Patents generally have a duration of 17 years from the date of grant or 20 years from the date of application depending on the jurisdiction concerned, after which time any person is free to exploit the product or process covered by a patent. A person who is the owner of a patent has, within the jurisdiction in which the patent is granted, the exclusive right to exploit the patent either directly or through licensees, and is entitled to prevent any person from infringing on the patent.

The granting of a patent does not prevent a third party from seeking a judicial determination that the patent is invalid. Such challenges to the validity of a patent are not uncommon and are occasionally successful. There can be no assurance that a challenge will not be filed to one or more of Registrant's patents and that, if filed, such challenge(s) will not be successful.

In the United States and Canada, the details of the product or process that is the subject of a patent application are not publicly disclosed until a patent is granted. However, in some other countries, patent applications are automatically published at a specified time after filing.

RESEARCH AND DEVELOPMENT

Nocopi has been involved in research and development since its inception. Although Registrant's deteriorating financial condition has forced it to reduce funding for research and development in recent years, it intends to continue its research and development activities in three areas, to the extent feasible. First, Registrant will seek to continue to refine its present family of products. Second, Registrant will seek to develop specific customer applications. Finally, Registrant will seek to expand its technology into new areas of implementation. There can be no assurances that Registrant will be able to obtain funds necessary to continue its research and development activities.

During the years ended December 31, 2004 and 2003, Nocopi expended approximately \$170,300 and \$202,800 respectively, on research and development.

COMPETITION

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

In the area of document and product authentication and serialization, Registrant is aware of other technologies, both covert and overt surface marking techniques, requiring decoding implements or analytical methods to reveal the relevant information. These technologies are offered by other companies for the same anti-counterfeiting and anti-diversion purposes the Registrant markets its covert technologies. These include, among others, biological DNA codes, microtaggants, thermochronic, UV and infrared inks as well as encryption, 2D symbology and laser engraving. Registrant believes its patented and proprietary technologies provide a unique and cost-effective solution to the problem of counterfeiting and gray marketing in the document and product authentication markets it has traditionally sought to exploit.

Registrant is not aware of any competitors that market paper which functions in the same way as Nocopi security papers, although management is aware of a limited number of competitors which are attempting different approaches to the same problems which Registrant's products address. Registrant is aware of a Japanese company that has developed a film overlay that is advertised as providing protection from photocopying. Registrant has examined the film overlay and believes that it has a limited number of applications. Nocopi security paper is also considerably less expensive than the film overlay.

Other indirect competitors are marketing products utilizing the hologram and copy void technologies. The hologram, which has been incorporated into credit cards to foil counterfeiting, is considerably more costly than Registrant's technology. Copy void is a security device that has been developed to indicate whether a document has been photocopied. Registrant also markets a product that has similar features to the copy void technology.

The Educational and Toy Products markets include numerous potential competitors who have significantly greater financial resources and presence in these markets than Registrant.

Registrant currently has extremely limited resources, and there can be no assurance that other businesses with greater resources than Registrant will not enter Registrant's markets and compete successfully with Registrant.

EURO-NOCOPI, S.A.

Registrant formed Euro-Nocopi, S.A. in 1994, to market the Company's technologies in Europe under an exclusive licensing arrangement. Registrant then owned approximately an 18% interest in Euro-Nocopi, S.A. During 2000, there arose between Registrant and Euro-Nocopi, S.A. a number of areas of conflict and dispute, leading each party to the licensing arrangement to assert informally that the other was in breach of its obligations under that arrangement.

In December 2000, Registrant was informed by Euro-Nocopi, S.A. that it had adopted resolutions to liquidate and dissolve. In December 2000, Registrant terminated its license agreement with Euro-Nocopi, S.A. and discontinued the provision of support (including the sale of proprietary inks) to Euro Nocopi, S.A. and its customers. Euro-Nocopi S.A. responded by denying that Registrant's termination of the licensing agreement was permissible or effective, and by asserting a claim that, as a result of alleged breaches of the licensing arrangement by Registrant, it was entitled to a royalty-free license to exploit Registrant's technologies in Europe.

In March 2001, Euro-Nocopi, S.A. commenced an arbitration proceeding before the American Arbitration Association against Registrant asserting a claim for an award in the nature of a declaratory judgment to the effect that, because Registrant had (allegedly) breached the license agreement, Euro-Nocopi, S.A. was entitled to a perpetual royalty-free license to exploit Registrant's technologies in Europe. The matter was resolved by a settlement in June 2003. The settlement and proceedings are described below under the heading "Legal

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

Proceedings."

5

EMPLOYEES

At March 15, 2005, Registrant had three full-time and two part-time employees. Registrant believes that its relations with its employees are good.

FINANCIAL INFORMATION ABOUT FOREIGN AND DOMESTIC OPERATIONS

Certain information concerning Registrant's foreign and domestic operations is contained in Note 9 to Registrant's Financial Statements included elsewhere in this Annual Report on Form 10-KSB/A.

ITEM 2. PROPERTIES

Registrant's corporate headquarters, research and ink production facilities are located at 9C Portland Road, West Conshohocken, Pennsylvania 19428. Its telephone number is (610) 834-9600. These premises consist of approximately 5,000 square feet of space in a multi-tenant building leased by the Registrant from an unaffiliated third party pursuant to a lease expiring in March 2008. Current monthly rent under this lease is \$2,925 escalating four percent on each anniversary date of the lease. Registrant is also responsible for its pro-rata share of the operating costs of the building. Registrant incurred leasehold improvement expenditures of approximately \$70,000 through December 31, 2004 and believes that additional leasehold improvement expenditures will not be significant. Registrant believes that this space will be adequate for its current needs.

ITEM 3. LEGAL PROCEEDINGS

Except as set forth below, Registrant is not aware of any material pending litigation (other than ordinary routine litigation incidental to its business where, in management's view, the amount involved is less than 10% of Registrant's current assets) to which Registrant is or may be a party, or to which any of its properties is or may be subject, nor is it aware of any pending or contemplated proceedings against it by any governmental authority. Registrant knows of no material legal proceedings pending or threatened, or judgments entered against, any director or officer of Registrant in his capacity as such.

In March 2001, Euro-Nocopi, S.A. commenced arbitration proceedings against Registrant before the American Arbitration Association in New York, NY. In these proceedings, Euro-Nocopi, S.A. has sought an award in the nature of a declaratory judgment to the effect that, due to alleged breaches by Registrant of the licensing arrangement between Registrant and Euro-Nocopi, S.A., it was entitled to a royalty-free license to exploit Registrant's technologies in Europe.

These arbitration proceedings were resolved by a settlement reached in June 2003. Under the agreement settling the dispute, Euro-Nocopi, S.A.'s exclusive license with respect to Registrant's existing security technologies was reinstated and amended; Registrant's equity interest in Euro-Nocopi, S.A. was redeemed; Euro-Nocopi, S.A. agreed to pay to Registrant the sum of \$1.1 million (of which \$900,000 was paid currently with the balance due in four annual installments commencing in March 2004); and the parties exchanged full releases. Through the current date, Registrant has received two installments totaling \$100,000 in accordance with the settlement agreement.

In March 2001 certain shareholders of Euro-Nocopi, S.A. filed suit in a court in Paris, France against certain current and former officers and directors of

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

Registrant, and against a licensee of Registrant. Registrant was not named as a defendant in the suit. The suit sought damages in excess of \$7 million from the defendants for various alleged acts of oppression, self-dealing and fraud in connection with the organization and capitalization of Euro-Nocopi, S.A., the management of that company and Registrant's management of its relationship with that company. The defendants in this litigation have denied any liability to the plaintiffs and have claimed indemnification from Registrant in connection with the lawsuit, and Registrant has advanced certain funds toward payment of the costs of defense.

Under the settlement of the arbitration proceedings referred to above, this lawsuit was substantially resolved, without any liability of, or payment by, any of the individual defendants or by Registrant. This resolution has been implemented and Registrant is currently awaiting payment from its insurance carrier for amounts advanced on behalf of the defendants in excess of the policy retention.

6

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

During the fourth quarter of the fiscal year ended December 31, 2004, no matters were submitted to a vote of Registrant's security holders.

PART II

ITEM 5. MARKET FOR COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND SMALL BUSINESS ISSUER PURCHASES OF EQUITY SECURITIES

Registrant's Common Stock is traded on the over-the-counter market and quoted on the NASD over-the-counter Bulletin Board under the symbol "NNUP". The table below presents the range of high and low bid quotations of Registrant's Common Stock by calendar quarter for the last two full fiscal years and for a recent date, as reported by the National Quotation Bureau, Inc. The quotations represent prices between dealers and do not include retail markup, markdown, or commissions; hence, such quotations do not represent actual transactions.

	High Bid -----	Low Bid -----
January 1, 2003 to March 31, 2003	\$.07	\$.03
April 1, 2003 to June 30, 2003	\$.05	\$.04
July 1, 2003 to September 30, 2003	\$.20	\$.04
October 1, 2003 to December 31, 2003	\$.20	\$.08
January 1, 2004 to March 31, 2004	\$.24	\$.13
April 1, 2004 to June 30, 2004	\$.19	\$.12
July 1, 2004 to September 30, 2004	\$.17	\$.08
October 1, 2004 to December 31, 2004	\$.16	\$.12
January 1, 2005 to March 15, 2005	\$.13	\$.11

As of March 15, 2005, 50,586,181 shares of Registrant's Common Stock were outstanding. The number of holders of record of Registrant's Common Stock was approximately 600. However, Registrant estimates that it has a significantly greater number of Common Stockholders because a number of shares of Registrant's Common Stock are held of record by broker-dealers for their customers in street name. In addition to the 50,586,181 shares of Common Stock which are outstanding, Registrant, at March 15, 2005, has reserved for issuance 2,700,000

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

shares of its Common Stock which underlie options to purchase Common Stock of the Registrant. In September 2004, Registrant entered into an Agreement of Terms with Entrevest I Associates pursuant to which, as consideration for the release of certain stock option rights to purchase up to 40,000,000 shares of the Company's common stock and the release of the right to designate a member to the board of directors, the Company agreed to issue 1,250,000 shares of restricted common stock in the Company to Entrevest pursuant to a valid private placement, which were valued at par. Subsequent to the transaction, Entrevest I Associates owned 4,583,333 shares of common stock of the Company

The Company did not pay dividends in 2004 or 2003 and does not anticipate paying any such dividends in the foreseeable future. Any determination to pay dividends in the future will be at the discretion of the Company's Board of Directors and will be dependent upon the Company's results of operations, financial condition, contractual restrictions and other factors deemed relevant by the Board of Directors.

RECENT SALES OF UNREGISTERED SECURITIES

During 2004, The Company issued the securities listed below which were not registered under the Securities Act of 1933, as amended (the Act). Each of such issuances was made by private offering in reliance on the exemption from the registration provisions of the Act provided by Section 4(2) of the Act. The facts relied upon to establish such exemption included the recipients' representations as to their investment intent with respect to such securities and restrictions on the transfer of such securities by the Company.

7

The Company sold or issued shares of its Common Stock during the past year in private transactions that were not registered with the Securities and Exchange Commission as follows:

2004

4,613,940 shares

These shares were sold or issued in transactions that were exempt from registration requirements because they were private placements under Section 4(2) of the Securities Act of 1933, as amended.

During 2004, the Company sold 1,610,000 restricted shares of its common stock to three non-affiliated individual investors for \$161,000 (\$152,100 net of offering expenses) pursuant to a valid private placement. These shares were sold at the market value on the date of sale. In 2004, the Company entered into a Conversion Agreement with three individuals whereby demand loans in the aggregate principal amount of \$149,900 together with \$25,500 of accrued interest on the demand loans were converted into shares of restricted common stock of the Company at \$.10, the market price at the date of issue. As a result, an aggregate of 1,753,940 shares of restricted common stock were issued including 449,080 shares to Michael A. Feinstein, M.D., the Company's Chairman of the Board. Also in 2004, the Company entered into an Agreement of Terms with Entrevest I Associates pursuant to which, as consideration for the release of certain stock option rights to purchase up to 40,000,000 shares of the Company's common stock and the release of the right to designate a member to the Board of Directors, the Company agreed to issue 1,250,000 shares of restricted common stock in the Company to Entrevest pursuant to a valid private placement, which were valued at par. Subsequent to the transaction, Entrevest I Associates owned 4,583,333 shares of common stock of the Company. Also, as part of the Agreement, Michael Solomon resigned from the Board of Directors.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

FORWARD-LOOKING INFORMATION

The information in this Management's Discussion and Analysis of Results of Operations and Financial Condition contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause our actual results, performance or achievements or industry results to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. Such factors include those described in the section captioned "Risk Factors." The forward-looking statements included in this report may prove to be inaccurate. In light of the significant uncertainties inherent in these forward-looking statements, you should not consider this information to be a guarantee by us or any other person that our objectives and plans will be achieved. The Company does not undertake to publicly update or revise its forward-looking statements even if experience or future changes make it clear that any projected results (expressed or implied) will not be realized.

RESULTS OF OPERATIONS

The Company's revenues are derived from royalties paid by licensees of the Company's technologies, fees for the provision of technical services to licensees and from the direct sale of products incorporating the Company's technologies, such as inks, security paper and pressure sensitive labels, and equipment used to support the application of the Company's technologies, such as ink-jet printing systems. Royalties consist of guaranteed minimum royalties payable by the Company's licensees in certain cases and additional royalties which typically vary with the licensee's sales or production of products incorporating the licensed technology. Service fee and sales revenues vary directly with the number of units of service or product provided.

8

Because the Company has a relatively high level of fixed costs, its operating results are substantially dependent on revenue levels. Because revenues derived from licenses and royalties carry a much higher gross profit margin than other revenues, operating results are also significantly affected by changes in revenue mix.

Both the absolute amounts of the Company's revenues and the mix among the various sources of revenue are subject to substantial fluctuation. The Company has a relatively small number of substantial customers rather than a large number of small customers. Accordingly, changes in the revenue received from a significant customer can have a substantial effect on the Company's total revenue and on its revenue mix and overall financial performance. Such changes may result from a customer's product development delays, engineering changes, changes in product marketing strategies and the like. In addition, certain customers have, from time to time, sought to renegotiate certain provisions of their license agreements and, when the Company agrees to revise terms, revenues from the customer may be affected.

Revenues for 2004 were \$628,300, an increase of approximately 10%, or \$56,800,

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

from \$571,500 in 2003. Licenses, royalties and fees increased in 2004 by approximately 14% to \$373,200 from \$327,700 in 2003. The increase in licenses, royalties and fees is due primarily to the inception of a license with a new licensee offset in part by the termination or non-renewal of license arrangements with three licensees during 2003. Product and other sales increased by \$11,300, or approximately 5% to \$255,100 in 2004 from \$243,800 in 2003. The increase in product and other sales reflects higher sales of the Company's security inks in 2004 offset in part by a lower level of sales of the Company's line of security papers in 2004 compared to 2003.

Gross profit increased to \$365,200 or approximately 58% of revenues in 2004 from \$259,400 or approximately 45% of revenues in 2003. Licenses, royalties and fees have historically carried a higher gross profit than product sales, which generally consist of supplies or other manufactured products which incorporate the Company's technologies or equipment used to support the application of its technologies. These items (except for inks which are manufactured by the Company) are generally purchased from third-party vendors and resold to the end-user or licensee and carry a lower gross profit than licenses, royalties and fees. The higher gross profit in 2004 compared to 2003 results principally from an increase in revenues represented by licenses, royalties and fees as well as lower costs of production of the ink products used by licensees and paper purchased for resale. Additionally, the Company experienced lower rent and occupancy costs resulting from the move of the facility in the second half of 2003.

Research and development expenses decreased to \$170,300 in 2004 from \$202,800 in 2003. The decrease in 2004 relates primarily to lower rent, occupancy and employee benefit expenses in 2004 compared to 2003.

Sales and marketing expenses decreased to \$142,000 in 2004 from \$171,500 in 2003. The decrease relates primarily to the departure of a sales executive late in the first quarter of 2003 and lower consulting fees as well as lower rent and occupancy costs in 2004 compared to 2003 offset in part by marketing costs associated with the introduction of the Company's new Rub-n-Color product for the Educational and Toy Market.

General and administrative expenses (exclusive of legal expenses) increased to \$260,200 in 2004 from \$239,100 in 2003. The increase in 2004 compared to 2003 is due primarily to \$75,000 in expenses recorded in connection with the issuance to members of the Company's Board of Directors and two consultants of options to purchase shares of the Company's common stock during the second quarter of 2004 offset in part by lower rent, occupancy and public relations costs.

Legal expenses increased to \$121,200 in 2004 from \$87,300 in 2003. The increase relates to compliance with recently enacted securities legislation and regulations and to legal fees incurred in structuring agreements related to the conversion of the Company's demand loans into common stock and the release of certain stock option rights during 2004, discussed above. Legal fees incurred in 2003 associated with the Euro-Nocopi, S.A. arbitration proceedings that were settled in June 2003 were offset against the settlement proceeds.

Other income (expense) includes interest income on funds invested and interest expense on the demand loans through September 30, 2004 when they were converted into shares of common stock of the Company. Net proceeds from arbitration settlement in 2003 includes the net gain of \$909,400 representing the proceeds of the arbitration settlement with Euro-Nocopi, S.A., net of the Company's \$110,600 investment in Euro-Nocopi, S.A. and legal expenses incurred during 2003 related to the arbitration.

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

The net loss of \$339,000 in 2004 compared to the net earnings of \$458,800 in 2003 results primarily from the settlement of the arbitration proceedings with Euro-Nocopi, S.A. during 2003, the expense associated with the issuance of stock options to Directors and consultants during 2004, lower rent and occupancy costs due to the move to a new facility in 2003 and staff reductions during 2004 and 2003.

PLAN OF OPERATION, LIQUIDITY AND CAPITAL RESOURCES

The Company's cash and cash equivalents decreased to \$24,000 at December 31, 2004 from \$89,900 at December 31, 2003. During 2004, the Company sold 1,610,000 shares of its common stock to three non-affiliated individual investors for \$161,000 (\$152,100 net of offering expenses) and used \$218,000, including a portion of cash on hand at the beginning of the year, to fund operations and capital spending.

The loss of a number of customers during the past three years and the loss of periodic fees under the license agreement with Euro-Nocopi, S.A. commencing in 2000 have had a material adverse effect on the Company's revenues and results of operations and upon its liquidity and capital resources. During 2004, the Company raised \$161,000 (\$152,100 net of offering expenses) in a private placement whereby 1,610,000 shares of the Company's common stock were sold to three non-affiliated individual investors pursuant to a valid private placement. This investment, combined with the receipt of \$900,000 in June 2003 in conjunction with the settlement of its arbitration proceedings with Euro-Nocopi, S.A. has permitted the Company to continue in operation to the current date. As a result of the settlement, a significant ongoing expense for related legal fees has been eliminated. Additionally, the Company has reduced staff and, during the third quarter of 2003, completed its relocation to a new facility that it believes will enable the Company to further reduce its operating expenses. Management of the Company believes that it will need to obtain additional capital in the future both to fund investments needed to increase its operating revenues to levels that will sustain its operations and to fund operating deficits that it anticipates will continue until revenue increases can be realized. There can be no assurances that the Company will be successful in obtaining sufficient additional capital, or if it does, that the additional capital will enable the Company to improve its business so as to have a material positive effect on the Company's operations and cash flow. The Company believes that without additional investment, it may be forced to cease operations at an undetermined future date.

The Company, in response to the ongoing adverse liquidity situation, has maintained a cost reduction program including staff reductions, where possible, and curtailment of discretionary research and development and sales and marketing expenses.

The Company does not currently plan any significant additional capital investment over the next twelve months.

UNCERTAINTIES THAT MAY AFFECT THE COMPANY, ITS OPERATING RESULTS AND STOCK PRICE

The Company's operating results, financial condition and stock price are subject to certain risks, some of which are beyond the Company's control. These risks could cause actual operating and financial results to differ materially from those expressed in the Company's forward looking statements, including the risks described below and the risks identified in other documents which are filed and furnished with the SEC:

Inability to Continue in Operation Without New Capital Investment. The Company

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

had a negative working capital of \$499,800 at December 31, 2004. Additionally, it experienced negative cash flow from operations of \$217,200 in the year ended December 31, 2004. Management of the Company believes that while certain staff reductions initiated in 2003 and the move of the Company's operations to a new facility, which was completed during the third quarter of 2003, will reduce the Company's negative cash flow, it anticipates that the negative cash flow will continue until it can achieve revenue increases. Management believes that it will need to obtain additional capital in the future both to fund investments needed to increase its operating revenues to levels that will sustain its operations and to fund operating deficits that it anticipates will continue until revenue increases can be realized. There can be no assurances that the Company will be successful in obtaining sufficient additional capital, or if it does, that the additional capital will enable the Company to improve its business so as to have a material positive effect on the Company's operations and cash flow. The Company believes that without additional investment, it may be forced to cease operations at an undetermined future date. It is uncertain whether the Company's assets will retain any value if the Company ceases operations. There are no assurances that the Company will be able to secure additional equity investment before it may be forced to cease operations.

Possible Inability to Develop New Business. Even if the Company is able to raise cash through additional capital investment or otherwise, it must quickly improve its operating cash flow. Because the Company has already significantly reduced its operating expenses, Management believes that any significant improvement in the Company's cash flow must result from increases in its revenues from traditional sources and from new revenue sources. The Company's ability to develop new revenues may depend on the extent of both its marketing activities and its research and development activities, both of which are limited. There are no assurances that the resources the Company, even with additional investment, can devote to marketing and to research and development will be sufficient to increase the Company's revenues to levels resulting in positive cash flow.

Inability to Obtain Raw Materials and Products for Resale. The Company's adverse financial condition has required it to significantly defer payments due vendors who supply raw materials and other components of the Company's security inks and security paper that the Company purchases for resale and professional and other services. As a result, the Company is required to pay cash in advance of shipment to certain of its suppliers. Delays in shipments to customers caused by the Company's inability to obtain materials on a timely basis and the possibility that certain current vendors may permanently discontinue to supply the Company with needed products could impact the Company's ability to service its customers and adversely affect its customer and licensee relationships. While receipt of funds in conjunction with the settlement of the arbitration with Euro-Nocopi, S.A. and sales of shares of the Company's common stock in 2004 have allowed the Company to continue in operation to the current date, there can be no assurances that the Company will be able to maintain its vendor relationships in an acceptable manner.

Uneven Pattern of Quarterly and Annual Operating Results. The Company's revenues, which are derived primarily from licensing and royalties, are difficult to forecast due to the long sales cycle of the Company's technologies, the potential for customer delay or deferral of implementation of the Company's technologies, the size and timing of inception of individual license agreements, the success of the Company's licensees and strategic partners in exploiting the market for the licensed products, modifications of customer budgets, and uneven patterns of royalty revenue and product orders. As the Company's revenue base is not substantial, delays in finalizing license contracts, implementing the technology to initiate the revenue stream and customer ordering decisions can have a material adverse effect on the Company's quarterly and annual revenue expectations and, as the Company's operating expenses are substantially fixed, income expectations will be subject to a similar adverse outcome.

Volatility of Stock Price. The market price for the Company's common stock has historically experienced significant fluctuations and may continue to do so. The Company has, since its inception, operated at a loss and has not produced revenue levels traditionally associated with publicly traded companies. The Company's common stock is not listed on a national or regional securities exchange and, consequently, the Company receives limited publicity regarding its business achievements and prospects, nor do securities analysts and traders extensively follow it and it is thinly traded. The market price may be affected by announcements of new relationships or modifications to existing relationships. The stock prices of many developing public companies, particularly those with small capitalizations, have experienced wide fluctuations not necessarily related to operating performance. Such fluctuations may adversely affect the market price of the Company's common stock.

Intellectual Property. The Company relies on a combination of protections provided under applicable international patent, trademark and trade secret laws. It also relies on confidentiality, non-analysis and licensing agreements to establish and protect its rights in its proprietary technologies. While the Company actively attempts to protect these rights, the Company's technologies could possibly be compromised through reverse engineering or other means. In addition, the Company's ability to enforce its intellectual property rights through appropriate legal action has been and will continue to be limited by the Company's adverse liquidity. There can be no assurances that the Company will be able to protect the basis of its technologies from discovery by unauthorized third parties or to preclude unauthorized persons from conducting activities that infringe on the Company's rights. The Company's adverse liquidity situation has also impacted its ability to obtain patent protection on its intellectual property and to maintain protection on previously issued patents. The Company has been advised by its patent counsel that patent maintenance fees approximating \$12,000 will be due during 2005. The Company has not yet made a decision on keeping any or all of these patents in force. There can be no assurances that the Company will be able to continue to prosecute new patents and maintain issued patents. As a result, the Company's customer and licensee relationships could be adversely affected and the value of the Company's technologies and intellectual property (including their value upon a liquidation of the Company) could be substantially diminished.

11

RECENTLY ISSUED ACCOUNTING STANDARDS

In December 2004, the FASB revised SFAS 123, "Accounting for Stock-Based Compensation" to require all companies to expense the fair value of employee stock options. SFAS 123R is effective for the first period ending after December 15, 2005 for a small business issuer.

The following recently issued accounting pronouncements are currently not applicable to the Company.

In December 2002, the FASB issued Statement of Financial Accounting Standard No. 148 ("SFAS 148"), Accounting for Stock-Based Compensation - Transition and Disclosure. SFAS 148 provides alternative methods of transition for voluntary change to the fair value based method of accounting for stock-based employee compensation. SFAS 148 also requires prominent disclosure in the "Summary of Significant Accounting Policies" of both annual and interim financial statements about the method used on reported results.

In January 2003, subsequently revised December 2003, the FASB issued FASB Interpretation No. 46R ("FIN 46R"), Consolidation of Variable Interest Entities - An Interpretation of AARB N. 51. FIN 46R requires that if any entity has a

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

controlling financial interest in a variable interest entity, the assets, liabilities and results of activities of the variable interest entity should be included in the consolidated financial statements of the entity. FIN 46R provisions are effective for all arrangements entered into after January 31, 2003. FIN 46R provisions are required to be adopted for the first period ending after December 15, 2004 for a small business issuer.

In April 2003, FASB issued Statement of Financial Accounting Standards No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities ("SFAS No. 149"). SFAS No. 149 amends and clarifies accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133. SFAS No. 149 is effective for contracts and hedging relationships entered into or modified after June 30, 2003.

In May 2003, FASB issued Statement of Financial Accounting Standards No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity ("SFAS No. 150"). SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both debt and equity and requires an issuer to classify the following instruments as liabilities in its balance sheet:

1. a financial instrument issued in the form of shares that is mandatorily redeemable and embodies an unconditional obligation that requires the issuer to redeem it by transferring its assets at a specified or determinable date or upon an event that is certain to occur;
2. a financial instrument, other than an outstanding share, that embodies an obligation to repurchase the issuer's equity shares, or is indexed to such an obligation, and requires the issuer to settle the obligation by transferring assets; and
3. financial instrument that embodies an unconditional obligation that the issuer must settle by issuing a variable number of its equity shares if the monetary value of the obligation is based solely or predominantly on (1) a fixed monetary amount, (2) variations in something other than the fair value of the issuer's equity shares, or (3) variations inversely related to changes in the fair value of the issuer's equity shares.

12

In November 2003, FASB issued FASB Staff Position No. 150-3 ("FAS 150-3") which deferred the effective dates for applying certain provisions of SFAS No. 150 related to mandatorily redeemable financial instruments of certain non-public entities and certain mandatorily redeemable non-controlling interests for public and non-public companies. For public entities SFAS No. 150 is effective for mandatorily redeemable financial instruments entered into or modified after May 31, 2003 and is effective for all other financial instruments as of the first interim period beginning after June 15, 2003. For mandatorily redeemable non-controlling interest that would not have to be classified as liabilities by a subsidiary under the exception in paragraph 9 of SFAS No. 150, but would be classified as liabilities by the parent, the classification and measurement provisions of SFAS No. 150 are deferred indefinitely. The measurement provisions of SFAS No. 150 are also deferred indefinitely for other mandatorily redeemable non-controlling interests that were issued before November 4, 2003. For those instruments, the measurement guidance for redeemable shares and non-controlling interests in other literature shall apply during the deferral period.

On December 17, 2003, the Staff of the SEC issued Staff Accounting bulletin No. 104 (SAB No. 104), Revenue Recognition, which supersedes SAB No. 101, "Revenue Recognition in Financial Statements." SAB No. 104's primary purpose is to rescind accounting guidance contained in SAB No. 101 related to multiple element

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

revenue arrangements, superseded as a result of the issuance of EITF 00-21, "Accounting for Revenue Arrangements with Multiple Deliverables." Additionally, SAB No. 104 rescinds the SEC's Revenue Recognition in Financial Statements Frequently Asked Questions and Answers (the FAQ) issued with SAB No. 101 that had been codified in SEC Top 13, Revenue Recognition. Selected portions of the FAQ have been incorporated into SAB No. 104. While the wording of SAB No. 104 has changed to reflect the issuance of EITF 00-21, the revenue recognition principles of SAB No. 101 remain largely unchanged by the issuance of SAB No. 104.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have any off-balance sheet arrangements.

ITEM 7. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Financial Statements of Registrant meeting the requirements of Regulation S-B (except section 228.310 and Article 11 of Regulation S-X thereof) are included herein beginning at page F-1 of this Annual Report on Form 10-KSB/A.

For information required with respect to this Item 7, see "Financial Statements and Schedules on pages F-1 through F-14 of this report.

ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 8A. CONTROLS AND PROCEDURES

The Company's disclosure controls and procedures are designed to provide reasonable assurance that material information required to be included in its periodic SEC reports is recorded, processed, summarized and reported within the time periods specified in the relevant SEC rules and forms. The Company has carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded, as of the end of the period covered by this report, that the Company's disclosure controls and procedures are effective.

There have been no changes in the Company's internal controls during our fourth fiscal quarter of 2004 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

ITEM 8B. OTHER INFORMATION

None.

PART III

ITEM 9. DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS AND CONTROL PERSONS; COMPLIANCE WITH SECTION 16(A) OF THE EXCHANGE ACT.

The directors and officers of the Company, their ages, present positions with the Company, and a summary of their business experience are set forth below.

Michael A. Feinstein, M.D., 58, Chairman of the Board of Directors since December 1999 and Nocopi's acting Chief Executive Officer since February 2000, has been a practicing physician in Philadelphia for more than twenty years,

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

-serving for more than ten years as the President of a group medical practice including three physicians. He is a Fellow of the American College of Obstetrics and Gynecology and of the American Board of Obstetrics and Gynecology. He received his B.A. from LaSalle College and his M.D. from Jefferson Medical College. He has been an active private investor for more than thirty years, during which he has consulted with the management of the companies in which he invested on a number of occasions.

13

Stanley G. Hart, 44, a director since March 2001, is President and CEO of S.G. Hart Associates, LLC, a strategic brand protection consulting company which helps firms develop and implement strategies designed to protect global supply chains from counterfeiting, diversion, theft and product tampering. From its formation in 2000 until its merger in 2003, Mr. Hart was President and CEO of Westvaco Brand Security, Inc., a wholly owned subsidiary of MeadWestvaco Corporation. Mr. Hart founded the company and established operations in the USA, Japan, Hong Kong, Singapore, Brazil, Belgium and Israel. Prior thereto, Mr. Hart served Westvaco Corporation (parent company of Westvaco Brand Security, Inc.) for more than ten years in various management capacities. Mr. Hart has over 20 years of international general management experience within the brand protection, chemical, packaging and paper industries. With five years as an expatriate, Mr. Hart's diverse experience includes new ventures, international business, sales and marketing, mergers and acquisitions, technology assessment and strategic planning. Mr. Hart has a B.A. degree in Chemistry from the University of North Carolina at Chapel Hill, and a MBA from the Fuqua School of Business at Duke University. Mr. Hart is a member of the National Association of Corporate Directors, the American Management Association, the American Consultants League and is an Accredited Professional Consultant.

Richard Levitt, 48, a director since December 1999, has been engaged in the network services segment of the computer industry since 1988. In 1995, he participated in the founding of XiTech Corporation, a Pittsburgh, Pennsylvania-based provider of computing and computer networking hardware and network design and implementation services which in five years has grown to over 100 employees and over \$40 million in annual sales. Since founding XiTech, he has served as one of its corporate principals as a Network Consultant and as the Manager of its Network Sales force. In these capacities, Mr. Levitt played a crucial role in the strategic and financial planning for XiTech, as well as the development of new accounts. Before joining XiTech, Mr. Levitt served as a network sales executive for Digital Equipment Corporation from 1988 to 1994 and as a network consultant for TriLogic Corporation during 1994 and 1995. Mr. Levitt holds a B.S. in Marketing from Kent State University.

Rudolph A. Lutterschmidt, 58, has been Vice President and Chief Financial Officer of the Company for more than five years, serving in this capacity on a part-time basis since January 2000. From January 2002 to March 2005, Mr. Lutterschmidt was employed by CitySort LP, a data to delivery mailing business, serving as its Chief Financial Officer from January 2002 to February 2005. From January 2000 through November 2001, he had been employed as a management consultant by Smart & Associates, LLP, an accounting and professional services firm. He is a graduate of Syracuse University, a member of Financial Executives International, the Institute of Management Accountants and is a Certified Management Accountant.

The terms of the current directors will expire at the 2005 annual meeting of stockholders of the Company.

AUDIT COMMITTEE FINANCIAL EXPERT

The Company does not have an audit committee financial expert serving on its

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

audit committee because it has no audit committee and is not required to have such a committee as it is not a listed issuer as defined in Section 240.10A-3. The Company, however, anticipates that it will establish an audit committee in the near future.

CODE OF ETHICS

The Company has adopted a Code of Ethics that applies to its Chief Executive Officer, Chief Financial Officer and persons performing similar functions. See Exhibit 14.1.

14

COMPLIANCE WITH SECTION 16(A) OF THE EXCHANGE ACT

Section 16(a) of the Exchange Act requires persons who become directors and/or executive officers of a public company (such as Nocopi) to file reports with the SEC regarding their beneficial ownership of the company's securities. A report must be filed shortly after a person becomes an executive officer or director, and shortly after an executive officer or director experiences a change in his beneficial ownership of his company's securities. Except as set forth below, based on a review of all Forms 3, 4 and 5 submitted during or in respect of the Company's most recent fiscal year, to the Company's knowledge, none of its executive officers and directors failed to file, on a timely basis, reports required under Section 16 of the Exchange Act during or in respect of such year. Michael A. Feinstein, M.D., the Company's Chairman and Chief Executive Officer, has both directly and indirectly acquired common stock and stock options of the Company in a number of transactions for which he has failed to file Form 4 reports on a timely basis. Messrs. Hart, Levitt and Lutterschmidt directly acquired stock options of the Company and failed to file Form 4 reports on a timely basis. Mr. Lutterschmidt has filed a Form 4 and the Company is advised that such reports for the other individuals are being prepared and will be filed promptly.

ITEM 10. EXECUTIVE COMPENSATION

EXECUTIVE OFFICER COMPENSATION

During 2004, the Company did not pay any cash compensation to Dr. Feinstein, who has served since February 2000 as the Company's acting Chief Executive Officer, and no other executive officer of the Company received compensation equal to or greater than \$100,000. In 2004, Dr. Feinstein received options to purchase 150,000 shares of common stock of the Company, expiring in April 2009, at \$.17 per share, representing 60% of the options granted to all employees during the year. At December 31, 2004, 50,000 of these options were exercisable; however, none of the 150,000 options held by Dr. Feinstein were in the money at year-end 2004. The Company does reimburse the expenses incurred by its officers in the performance of their duties.

DIRECTOR COMPENSATION

Directors have not been paid any fees for their services as such during the year ended December 31, 2004. During 2004, three directors received options to purchase an aggregate of 400,000 shares of common stock of the Company at \$.17 per share. All directors have been and will be reimbursed for reasonable expenses incurred in connection with attendance at Board of Directors meetings or other activities undertaken by them on behalf of the Company.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The following table sets forth, as of March 15, 2005, the stock ownership of (1)

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

each person or group known by the Registrant to beneficially own 5% or more of Registrant's common stock and (2) each director and Named Executive (as set forth under the heading "Executive Compensation") individually, and of all directors and executive officers of the Company as a group.

	Common S ----- Number Of Shares Beneficially Owned -----
Name of Beneficial Owner	
5% Stockholders	
Entrevest I Associates (2) 350 Sentry Parkway, Bldg. 640 Blue Bell, PA 19422	4,583,333

(b) Exhibits - See Exhibit Index.

(c) No Current Reports on Form 8-K have been filed by the Registrant during the quarter ended December 31, 2004.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The Company has retained the public accounting firm of Cogen Sklar, LLP, ("Cogen"), whose principal business address is 150 Monument Rd., Suite 500, Bala Cynwyd, PA 19004, to perform its annual audit for inclusion of its report in Form 10-KSB, and perform SAS 100 reviews of quarterly information in connection with Form 10-QSB filings.

AUDIT FEES

During 2004 and 2003, the aggregate fees billed for professional services rendered by our principal accountant for the audit of our annual financial statements and review of our quarterly financial statements was \$22,500 and \$21,000, respectively.

AUDIT-RELATED FEES

During 2004 and 2003, our principal accountant did not render assurance and related services reasonably related to the performance of the audit or review of financial statements.

TAX FEES

During 2004 and 2003, the aggregate fees billed for professional services rendered by our principal accountant for tax compliance, tax advice and tax planning were \$4,500 in each year.

17

ALL OTHER FEES

During 2004 and 2003, there were no fees billed for products and services provided by the principal accountant other than those set forth above.

AUDIT COMMITTEE APPROVAL

We do not have an audit committee currently serving and as a result our Chief Executive Officer, Michael A. Feinstein, M.D. performs the duties of an audit

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

committee. Our Chief Executive Officer will evaluate and approve in advance, the scope and cost of the engagement of an auditor before the auditor renders audit and non-audit services. We do not rely on pre-approval policies and procedures.

18

SIGNATURES

Pursuant to the requirements of Section 13 of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

REPORT OF INDEPENDENT REGISTERED CERTIFIED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors
of Nocopi Technologies, Inc.
West Conshohocken, Pennsylvania

We have audited the accompanying balance sheet of Nocopi Technologies, Inc. as of December 31, 2004 and the related statements of operations, stockholders' equity, and cash flows for each of the two years in the period ended December

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

31, 2004. The financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States) generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Nocopi Technologies, Inc. at December 31, 2004, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2004 in conformity with accounting principles generally accepted in the United States.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 3 to the financial statements, the Company has suffered recurring losses from operations that raises substantial doubt about its ability to continue as a going concern. Management's plans in regard to this matter are also described in Note 3. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

F-5

NOCOPI TECHNOLOGIES, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2004 AND 2003

1. ORGANIZATION OF THE COMPANY

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

Nocopi Technologies, Inc. (the Company) is organized under the laws of the State of Maryland. Its main business activities are the development and distribution of document security products and the licensing of its patented authentication technologies in the United States and foreign countries. The Company operates in one principal industry segment.

2. SIGNIFICANT ACCOUNTING POLICIES

ESTIMATES - The preparation of the financial statements in conformity with Accounting Principles Generally Accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the dates of financial statements and the reported amounts of revenues and expenses during the reported periods. Actual results could differ from those estimates.

CASH AND CASH EQUIVALENTS - Cash equivalents consist principally of time deposits and highly liquid investments with an original maturity of three months or less placed with major banks and financial institutions. Cash equivalents are carried at the lower of cost, plus accrued interest, or market value and are held in money market accounts at a local bank. At December 31, 2004, Nocopi's investments in money market accounts amounted to \$7,700.

CONCENTRATION OF CREDIT RISK INVOLVING CASH - During the year, the Company had deposits with a major financial institution that exceeded Federal Deposit Insurance limits. This financial institution has a strong credit rating, and Management believes that credit risk related to these deposits is minimal. The Company maintains uninsured cash balances at one financial institution. At December 31, 2004, the total balance was \$7,700.

FIXED ASSETS are carried at cost less accumulated depreciation and amortization. Furniture, fixtures and equipment are generally depreciated on the straight-line method over their estimated service lives. Leasehold improvements are amortized on a straight-line basis over the shorter of five years or the term of the lease. Major renovations and betterments are capitalized. Maintenance, repairs and minor items are expensed as incurred. Upon disposal, assets and related depreciation are removed from the accounts and the net amount, less proceeds from disposal, is charged or credited to income.

PATENT COSTS are charged to expense as incurred due to the uncertainty of their recoverability as a result of the Company's adverse liquidity situation.

REVENUES, consisting primarily of license fees and royalties, are recorded as earned over the license term. Product sales are recognized upon shipment of products.

INCOME TAXES - Deferred income taxes are provided for all temporary differences and net operating loss and tax credit carryforwards. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

FAIR VALUE - The carrying amounts reflected in the balance sheets for

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

cash, cash equivalents, receivables, accounts payable and accrued expenses approximate fair value due to the short maturities of these instruments. The fair value of the settlement receivable approximates the carrying value because of the current low interest rates that would be used in discounting future cash flows. The fair values represent estimates of possible value that may not be realized in the future.

EARNINGS (LOSS) PER SHARE - The Company follows Statement of Financial Accounting Standards No. 128, "Earnings Per Share" resulting in the presentation of basic and diluted earnings per share. Options to purchase 525,000 shares of common stock at exercise prices of \$.30 and \$.45 per share were outstanding during 2003 but were not included in the calculation of diluted earnings per share because the exercise price was greater than the average market price of the common shares. Because the Company reported a net loss in 2004, common stock equivalents, including stock options and warrants were anti-dilutive.

COMPREHENSIVE INCOME (LOSS) - The Company follows Statement of Financial Accounting Standards No. 130, "Reporting Comprehensive Income". Since the Company has no items of comprehensive income (loss), Comprehensive income (loss) is equal to net income (loss).

RECOVERABILITY OF LONG-LIVED ASSETS

The Company follows Statement of Financial Accounting Standard ("SFAS") No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." The Statement requires that long-lived assets and certain identifiable intangibles be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. The Company is not aware of any events or circumstances which indicate the existence of an impairment which would be material to the Company's annual financial statements.

RECENTLY ISSUED ACCOUNTING STANDARDS

In December 2004, the FASB revised SFAS 123, "Accounting for Stock-Based Compensation" to require all companies to expense the fair value of employee stock options. SFAS 123R is effective for the first period ending after December 15, 2005 for a small business issuer.

The following recently issued accounting pronouncements are currently not applicable to the Company.

In December 2002, the FASB issued Statement of Financial Accounting Standard No. 148 ("SFAS 148"), Accounting for Stock-Based Compensation - Transition and Disclosure. SFAS 148 provides alternative methods of transition for voluntary change to the fair value based method of accounting for stock-based employee compensation. SFAS 148 also requires prominent disclosure in the "Summary of Significant Accounting Policies" of both annual and interim financial statements about the method used on reported results.

F-7

In January 2003, subsequently revised December 2003, the FASB issued FASB Interpretation No. 46R ("FIN 46R"), Consolidation of Variable Interest Entities - An Interpretation of AARB N. 51. FIN 46R requires that if any entity has a controlling financial interest in a variable interest entity, the assets, liabilities and results of activities of the variable interest entity should be included in the consolidated financial statements of the entity. FIN 46R provisions are effective for all arrangements entered into

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

after January 31, 2003. FIN 46R provisions are required to be adopted for the first period ending after December 15, 2004 for a small business issuer.

In April 2003, FASB issued Statement of financial Accounting Standards No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities ("SFAS No. 149"). SFAS No. 149 amends and clarifies accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No. 133. SFAS No. 149 is effective for contracts and hedging relationships entered into or modified after June 30, 2003.

In May 2003, FASB issued Statement of Financial Accounting Standards No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity ("SFAS No. 150"). SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both debt and equity and requires an issuer to classify the following instruments as liabilities in its balance sheet:

1. a financial instrument issued in the form of shares that is mandatorily redeemable and embodies an unconditional obligation that requires the issuer to redeem it by transferring its assets at a specified or determinable date or upon an event that is certain to occur;
2. a financial instrument, other than an outstanding share, that embodies an obligation to repurchase the issuer's equity shares, or is indexed to such an obligation, and requires the issuer to settle the obligation by transferring assets; and
3. financial instrument that embodies an unconditional obligation that the issuer must settle by issuing a variable number of its equity shares if the monetary value of the obligation is based solely or predominantly on (1) a fixed monetary amount, (2) variations in something other than the fair value of the issuer's equity shares, or (3) variations inversely related to changes in the fair value of the issuer's equity shares.

In November 2003, FASB issued FASB Staff Position No. 150-3 ("FAS 150-3") which deferred the effective dates for applying certain provisions of SFAS No. 150 related to mandatorily redeemable financial instruments of certain non-public entities and certain mandatorily redeemable non-controlling interests for public and non-public companies. For public entities SFAS No. 150 is effective for mandatorily redeemable financial instruments entered into or modified after May 31, 2003 and is effective for all other financial instruments as of the first interim period beginning after June 15, 2003. For mandatorily redeemable non-controlling interest that would not have to be classified as liabilities by a subsidiary under the exception in paragraph 9 of SFAS No. 150, but would be classified as liabilities by the parent, the classification and measurement provisions of SFAS No. 150 are deferred indefinitely. The measurement provisions of SFAS No. 150 are also deferred indefinitely for other mandatorily redeemable non-controlling interests that were issued before November 4, 2003. For those instruments, the measurement guidance for redeemable shares and non-controlling interests in other literature shall apply during the deferral period.

F-8

On December 17, 2003, the Staff of the SEC issued Staff Accounting bulletin No. 104 (SAB No. 104), Revenue Recognition, which supersedes SAB

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

No. 101, "Revenue Recognition in Financial Statements." SAB No. 104's primary purpose is to rescind accounting guidance contained in SAB No. 101 related to multiple element revenue arrangements, superseded as a result of the issuance of EITF 00-21, "Accounting for Revenue Arrangements with Multiple Deliverables." Additionally, SAB No. 104 rescinds the SEC's Revenue Recognition in Financial Statements Frequently Asked Questions and Answers (the FAQ) issued with SAB No. 101 that had been codified in SEC Top 13, Revenue Recognition. Selected portions of the FAQ have been incorporated into SAB No. 104. While the wording of SAB No. 104 has changed to reflect the issuance of EITF 00-21, the revenue recognition principles of SAB No. 101 remain largely unchanged by the issuance of SAB No. 104.

3. GOING CONCERN

Since its inception, the Company has incurred significant losses and, as of December 31, 2004, had accumulated losses of \$12,351,100. For the years ended December 31, 2004 and 2003, the Company's losses from operations were \$328,500 and \$441,300, respectively. In addition, the Company had negative working capital of \$499,800 at December 31, 2004. The Company may incur further operating losses and experience negative cash flow in the future. Achieving profitability and positive cash flow depends on the Company's ability to generate and sustain significant increases in revenues and gross profits from its traditional business. There can be no assurances that the Company will be able to generate sufficient revenues and gross profits to achieve and sustain profitability and positive cash flow in the future.

During 2004, the Company raised \$161,000 (\$152,100 net of offering expenses) in a private placement whereby 1,610,000 shares of the Company's common stock were sold to three non-affiliated individual investors pursuant to a valid private placement. These investments, combined with the receipt of \$900,000 in June 2003 in conjunction with the settlement of its arbitration proceedings with Euro-Nocopi, S.A. have permitted the Company to continue in operation to the current date. As a result of the settlement, the significant legal fees incurred in the arbitration have been eliminated. Additionally, the Company has reduced staff and, in 2003, completed its relocation to a new facility that it believes will enable the Company to further reduce its operating expenses. Management of the Company believes that it will need to obtain additional capital in the immediate future both to fund investments needed to increase its operating revenues to levels that will sustain its operations and to fund operating deficits that it anticipates will continue until revenue increases can be realized. There can be no assurances that the Company will be successful in obtaining sufficient additional capital, or if it does, that the additional capital will enable the Company to improve its business so as to have a material positive effect on the Company's operations and cash flow. The Company believes that without additional capital, whether in the form of debt, equity or both, it may be forced to cease operations at an undetermined future date.

The Company's independent certified public accountants have included a "going concern" explanatory paragraph in their audit report accompanying the 2004 financial statements. The paragraph states that the Company's recurring losses from operations raise substantial doubt about the Company's ability to continue as a going concern and cautions that the financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

4. DEMAND LOANS

In September 2004, the Company entered into a Conversion Agreement with three individuals whereby demand loans in the aggregate principal amount of \$149,900 together with \$25,500 of accrued interest on the demand loans were converted into shares of restricted common stock of the Company at \$.10, the market price at the date of issue. As a result, an aggregate of 1,753,940 shares of restricted common stock were issued including 449,080 shares to Michael A. Feinstein, M.D., the Company's Chairman of the Board.

During 2003, the Company received additional unsecured loans of \$4,500 from Dr. Feinstein, its Chairman of the Board and repaid \$15,000 in loans previously made by this individual. At December 31, 2003 the total demand loans outstanding was \$149,900. The loans bear interest at seven per cent per year and were payable on demand. The loans were used to finance the Company's working capital requirements.

5. STOCKHOLDERS' DEFICIENCY

During the third quarter of 2004, the Company sold 1,610,000 shares of its common stock to three non-affiliated individual investors for \$161,000 (\$152,100 net of offering expenses) pursuant to a valid private placement.

In September 2004, the Company entered into an Agreement of Terms with Entrevest I Associates pursuant to which, as consideration for the release of certain stock option rights to purchase up to 40,000,000 shares of the Company's common stock and the release of the right to designate a member to the Board of Directors, the Company agreed to issue 1,250,000 shares of restricted common stock in the Company to Entrevest pursuant to a valid private placement, which were valued at par. Prior to the transaction, Entrevest I Associates owned 3,333,333 shares of common stock of the Company. Also, as part of the Agreement, Michael Solomon has resigned from the Board of Directors.

6. INCOME TAXES

There is no provision for income taxes for 2004 due to the availability of net operating loss carryforwards for which the Company had previously established a 100% valuation allowance for deferred tax assets due to the uncertainty of their recoverability. At December 31, 2004, the Company had net operating loss carryforwards ("NOL's") approximating \$11,800,000. These operating losses are available to offset future taxable income through the year 2024. As a result of the sale of the Company's common stock in an equity offering in late 1997 and the issuance of additional shares, the amount of the NOL's carryforwards may be limited. Additionally, the utilization of these NOL's if available, to reduce the future income taxes will depend on the generation of sufficient taxable income prior to their expiration. There were no temporary differences for the years ended December 31, 2004 and 2003. The Company has established a 100% valuation allowance of approximately \$4,800,000 at December 31, 2004 for the deferred tax assets due to the uncertainty of their realization.

7. COMMITMENTS AND CONTINGENCIES

The Company conducts its operations in leased facilities and leases

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

equipment under non-cancelable operating leases expiring at various dates to 2008.

Future minimum lease payments under non-cancelable operating leases with initial or remaining terms of one year or more at December 31, 2004 are: \$36,100 - 2005; \$37,600 - 2006; \$39,100 - 2007 and \$9,900 - 2008.

Total rental expense under operating leases was \$37,700 and \$101,100 in 2004 and 2003, respectively.

The Company had a consulting agreement with a former executive officer and director, the term of which expired at December 31, 2002. The Board of Directors of the Company, in mid-2000, suspended cash payments to the consultant as a potential offset to certain payments made to the consultant by a licensee of the Company. All other provisions of the agreement remained in force throughout the term of the agreement. At December 31, 2004, unpaid consulting fees totaling \$166,300 were included in Accrued Expenses on the Balance Sheet.

From time to time, the Company may be subject to legal proceedings and claims that arise in the ordinary course of its business. During late 2000 and early 2001 several legal and arbitration proceedings were commenced by the Company's former European exclusive licensee and certain of its shareholders against the Company, certain former and present directors of the Company and against a licensee of the Company. These proceedings were settled during 2003 as described in Note 9.

8. STOCK OPTIONS AND 401(K) SAVINGS PLAN

The 1996 and 1999 Stock Option Plans provide for the granting of up to 2,700,000 incentive and non-qualified stock options to employees, non-employee directors, consultants and advisors to the Company. In the case of options designated as incentive stock options, the exercise price of the options granted must be not less than the fair market value of such shares on the date of grant. Non-qualified stock options may be granted at any amount established by the Stock Option Committee or, in the case of Discounted Options issued to non-employee directors in lieu of any portion of an Annual Retainer, in accordance with a formula designated in the Plan.

A summary of stock options under the Company's stock option plans follows:

	Number of Shares -----	Exercise Price Ran Per Shar -----
Outstanding at December 31, 2003 and 2002	525,000	\$.30 and \$
Options granted	1,150,000	.17
Options canceled	200,000	.17
Outstanding at December 31, 2004	1,475,000	\$.17 to \$.

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

	Option Shares -----	Exercise Price Ran Per Shar -----
Exercisable at year end:		
2003	525,000	\$.30 and \$
2004	675,000	\$.17 to \$
Options available for future grant under all plans:		
2003	2,175,000	
2004	1,225,000	

The following table summarizes information about stock options outstanding at December 31, 2004:

Range of exercise prices	\$.17 to \$.45
Number outstanding at December 31, 2004	1,475,000
Weighted average remaining contractual life (years)	3.18
Weighted average exercise price	\$.24
Exercisable options:	
Number outstanding at December 31, 2004	675,000
Weighted average remaining Contractual life (years)	1.81
Weighted average exercise price	\$.32

On April 30, 2004, the Company granted options to two consultants to purchase a total of 300,000 shares of its common stock at an exercise price of \$0.17 per share, vesting after one year, and expiring in five years. In accordance with the fair value method as described in accounting requirements of SFAS No. 123, the Company recognized consulting expense of \$28,000 during the year ended December 31, 2004.

F-12

On April 30, 2004, the Company granted options to four directors to purchase 50,000 shares each of its common stock at an exercise price of \$0.17 per share, vesting immediately, and expiring in five years. In accordance with the fair value method as described in accounting requirements of SFAS No. 123, the Company recognized consulting expense of \$18,000 during the year ended December 31, 2004.

On April 30, 2004, the Company granted options to four directors to purchase 100,000 shares each of its common stock at an exercise price of \$0.17 per share, vesting on January 1, 2005, and expiring in five years

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10KSB/A

from vesting date. The options are contingent on the directors attending a certain percentage of Board of Directors meetings during 2004. In accordance with the fair value method as described in accounting requirements of SFAS No. 123, The Company recognized consulting expense of \$29,000 during the year ended December 31, 2004.

On April 30, 2004, the Company granted options to two officers to purchase a total of 250,000 shares of its common stock at an exercise price of \$0.17 per share, which was the market price on grant date, expiring in five years and vesting at various dates through April 30, 2005.

The Company applies Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations in accounting for the issuance of its stock options. Accordingly, no compensation cost has been recognized for its stock options issued during the year ended December 31, 2004. Had compensation cost for the Company's issuance of vested stock options been determined based on the fair value at grant dates for options consistent with the method of SFAS No. 123, the Company's net loss would have been increased to the pro forma amounts indicated below. The net loss per share would not change. Fair value amounts were estimated using the Black-Scholes model with the following assumptions: no dividend yield, expected volatility of 60%, and a risk-free interest rate of 4% for the year ended December 31, 2004. There were no options issued for the year ended December 31, 2003.

		Year Ended December 31, 2004 -----	Year End December 31 -----
Net loss	As reported	(\$339,000)	\$45
	Pro forma	(\$362,000)	\$45
Net loss per share	As reported	(\$.01)	
	Pro forma	(\$.01)	

At December 31, 2004, the Company has reserved 2,700,000 shares of common stock for possible future issuance upon exercise of stock options. The Company sponsors a 401(k) savings plan, covering substantially all employees, providing for employee and employer contributions. Employer contributions are made at the discretion of the Company. There were no contributions charged to expense during 2004 or 2003.

9. SETTLEMENT OF ARBITRATION WITH AFFILIATE

In June 2003, the Company settled its arbitration proceeding commenced by Euro-Nocopi, S.A. (Euro). Under the terms of the settlement, Euro paid \$900,000 to Nocopi and will pay an additional \$200,000 in the future for back royalties and all other matters in dispute between the two companies, as well as the termination of Nocopi's 18% ownership of Euro. As part of the Settlement, the Company and Euro entered into an amended and restated license pursuant to which the Company has agreed that Euro may continue to market the Company's technologies in Europe. The \$200,000 is being paid in four equal annual installments which commenced in March 2004. The Company recorded a net settlement of \$909,400 in 2003 representing the proceeds of the settlement net of the Company's \$110,600 investment in Euro and legal

expenses incurred during 2003 related to the arbitration.

F-13

10. MAJOR CUSTOMER INFORMATION

The Company's largest non-affiliate customers accounted for approximately 52% and 49% of revenues in 2004 and 2003, respectively, and approximately 53% of accounts receivable at December 31, 2004. The Company performs ongoing credit evaluations of its customers and generally does not require collateral. The Company also maintains allowances for potential credit losses.
