Registrant's telephone number, including area code: 212-762-4000

Date of fiscal year end: May 31, 2004

Date of reporting period: November 30, 2003

Item 1 - Report to Shareholders

Welcome, Shareholder:

In this report, you'll learn about how your investment in Morgan Stanley Municipal Income Opportunities Trust performed during the semiannual period. We will provide an overview of the market conditions, and discuss some of the factors that affected performance during the reporting period. In addition, this report includes the Fund's financial statements and a list of Fund investments.

Market forecasts provided in this report may not necessarily come to pass. There is no assurance that the Fund will achieve its investment objective. The Fund is subject to market risk, which is the possibility that market values of securities owned by the Fund will decline and, therefore, the value of the Fund shares may be less than what you paid for them. Accordingly, you can lose money investing in this Fund.

FUND REPORT

For the six months ended November 30, 2003

MARKET OVERVIEW

Over the past six months, the U.S. economy showed increasing strength, culminating in 8.2 percent GDP growth in the third quarter of 2003. Some of the

most closely watched indicators, such as employment growth, improved but remained below potential. The Federal Reserve Board continued its stimulative monetary policy by keeping the federal funds target rate at a record low of 1.0 percent.

The municipal market began the period with yields near 40-year lows. By mid-June, yields began to climb as investors shifted their attention to the improving equity market. At the same time, municipal market participation by institutional taxable investors subsided as taxable yields rose faster than tax-exempt yields. Ongoing budgetary and fiscal difficulties at the state and local levels contributed to ratings downgrades for many municipal issues. Municipal issuance remained strong through July, but slowed over the last few months of the period. Overall, these forces combined to push municipal-bond yields higher than where they began the period.

PERFORMANCE ANALYSIS

The net asset value (NAV) of Morgan Stanley Municipal Income Opportunities Trust (OIA) decreased from \$7.91 to \$7.73 per share for the six months ended November 30, 2003. Based on this change plus reinvestment of tax-free dividends totaling \$0.26 per share the Fund's total NAV return was 0.97 percent. OIA's value on the New York Stock Exchange (NYSE) decreased from \$7.76 to \$7.19 per share during the same period. Based on this change plus reinvestment of tax-free dividends, the Fund's total market return was -4.14 percent. On November 30, 2003, OIA's NYSE market price was at a 7.0 percent discount to its NAV. (Past performance is no guarantee of future results.)

Monthly dividends for the fourth quarter of 2003, declared in September, were decreased from \$0.045 to \$0.04 per share. The new dividend reflects the level of the Fund's undistributed net investment income and projected earnings power. The Fund's level of undistributed net investment income was \$0.074 per share on November 30, 2003, versus \$0.075 per share six months earlier.*

From a strategic point of view, with interest rates at or near multi-decade lows, we have become increasingly cautious. As a result, we began to establish a hedge position by selling Treasury futures to reduce the portfolio's duration+ which has been shorter than its benchmark index. The portfolio's duration was 7.5 years. More than 50 percent of OIA's assets are in the non-rated sector. The prices of these securities are typically less sensitive than are those of investment-grade bonds to movements in interest rates. Purchases during the period focused on

* Income earned by certain securities in the portfolio may be subject to the federal alternative minimum tax (AMT).

+ Duration: a measure of the sensitivity of a bond's price to changes in interest rates, expressed in years. Each year of duration represents an expected one percent change in the price of a bond for every one percent change in interest rates. The longer a bond's duration, the greater the effect of interest-rate movements on its price. Typically, funds with shorter durations perform better in rising-rate environments, while funds with longer durations perform better when rates decline.

2

health care issues, to take advantage of supply and attractive yield opportunities. Three issues, representing 1.5 percent of net assets, are non-income producing. The Fund's net assets of \$159.7 million were diversified across 78 credits in 10 long-term sectors.

Edgar Filing: MORGAN STANLEY MUNICIPAL INCOME OPPORTUNITIES TRUST - Form N-CSRS

The Fund's procedure for reinvesting all dividends and distributions on common shares is through purchases in the open market. This method helps support the market value of the Fund's shares. In addition, we would like to remind you that the Trustees have approved a procedure whereby the Fund may, when appropriate, purchase shares in the open market or in privately negotiated transactions at a price not above market value or net asset value, whichever is lower at the time of purchase.

Morgan Stanley Municipal Income Opportunities Trust

NOTES TO FINANCIAL STATEMENTS - NOVEMBER 30, 2003 (UNAUDITED)

1. Organization and Accounting Policies

Morgan Stanley Municipal Income Opportunities Trust (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The Fund's investment objective is to provide a high level of current income which is exempt from federal income tax. The Fund was organized as a Massachusetts business trust on June 22, 1988 and commenced operations on September 19, 1988.

The following is a summary of significant accounting policies:

A. Valuation of Investments -- (1) portfolio securities are valued by an outside independent pricing service approved by the Trustees. The pricing service uses both a computerized grid matrix of tax-exempt securities and evaluations by its staff, in each case based on information concerning market transactions and quotations from dealers which reflect the mean between the last reported bid and asked price. The portfolio securities are thus valued by reference to a combination of transactions and quotations for the same or other securities believed to be comparable in quality, coupon, maturity, type of issue, call provisions, trading characteristics and other features deemed to be relevant. The Trustees believe that timely and reliable market quotations are generally not readily available for purposes of valuing tax-exempt securities and that the valuations supplied by the pricing service are more likely to approximate the fair value of such securities; (2) futures are valued at the latest sale price on the commodities exchange on which they trade unless it is determined that such price does not reflect their market value, in which case they will be valued at their fair value as determined in good faith under procedures established by and under the supervision of the Trustees; and (3) short-term debt securities having a maturity date of more than sixty days at time of purchase are valued on a mark-to-market basis until sixty days prior to maturity and thereafter at amortized cost based on their value on the 61st day. Short-term debt securities having a maturity date of sixty days or less at the time of purchase are valued at amortized cost.

B. Accounting for Investments -- Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses on security transactions are determined by the identified cost method. Discounts are accreted and premiums are amortized over the life of the respective securities. Interest income is accrued daily except where collection is not expected.

C. Federal Income Tax Policy -- It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable and nontaxable income to its shareholders. Accordingly, no federal income tax provision is required.

15

Morgan Stanley Municipal Income Opportunities Trust
NOTES TO FINANCIAL STATEMENTS - NOVEMBER 30, 2003 (UNAUDITED) continued

D. Dividends and Distributions to Shareholders -- Dividends and distributions to shareholders are recorded on the ex-dividend date.

E. Futures Contracts -- A futures contract is an agreement between two parties to buy and sell financial instruments or contracts based on financial indices at a set price on a future date. Upon entering into such a contract, the Fund is required to pledge to the broker cash, U.S. Government securities or other

liquid portfolio securities equal to the minimum initial margin requirements of the applicable futures exchange. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments known as variation margin are recorded by the Fund as unrealized gains and losses. Upon closing of the contract, the Fund realizes a gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

F. Use of Estimates -- The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and disclosures. Actual results could differ from those estimates.

2. Investment Advisory/Administration Agreements

Pursuant to an Investment Advisory Agreement with Morgan Stanley Investment Advisors Inc. (the "Investment Advisor"), the Fund pays an advisory fee, calculated weekly and payable monthly, by applying the annual rate of 0.50% to the Fund's weekly net assets.

Pursuant to an Administration Agreement with Morgan Stanley Services Company Inc. (the "Administrator"), an affiliate of the Investment Advisor, the Fund pays an administration fee, calculated weekly and payable monthly, by applying the annual rate of 0.30% to the Fund's weekly net assets.

3. Security Transactions and Transactions with Affiliates

The cost of purchases and proceeds from sales of portfolio securities, excluding short-term investments, for the six months ended November 30, 2003 aggregated \$11,405,070 and \$11,450,212, respectively.

Morgan Stanley Trust, an affiliate of the Investment Advisor and Administrator, is the Fund's transfer agent. At November 30, 2003, the Fund had transfer agent fees and expenses payable of approximately \$14,800.

The Fund has an unfunded noncontributory defined benefit pension plan covering certain independent Trustees of the Fund who will have served as independent Trustees for at least five years at the time

16

Morgan Stanley Municipal Income Opportunities Trust
NOTES TO FINANCIAL STATEMENTS - NOVEMBER 30, 2003 (UNAUDITED) continued

of retirement. Benefits under this plan are based on factors which include years of service and compensation. Aggregate pension costs for the six months ended November 30, 2003 included in Trustees' fees and expenses in the Statement of Operations amounted to \$3,720. At November 30, 2003, the Fund had an accrued pension liability of \$60,091 which is included in accrued expenses in the Statement of Assets and Liabilities.

On December 2, 2003, the Trustees voted to close the plan to new participants, eliminate the future benefits growth due to increases to compensation after July 31, 2003 and effective April 1, 2004, establish an unfunded deferred compensation plan which allows each independent trustee to defer payment of all, or a portion of the fees he receives for serving on the Board of Trustees throughout the year.

4. Shares of Beneficial Interest

Edgar Filing: MORGAN STANLEY MUNICIPAL INCOME OPPORTUNITIES TRUST - Form N-CSRS

Transactions in shares of beneficial interest were as follows:

	SHARES	PAR VALUE OF SHARES	CAPITAL PAID IN EXCESS OF PAR VALUE
	-----	-----	-----
Balance, May 31, 2002.....	20,932,272	\$209,322	\$198,359,9
Treasury shares purchased and retired (weighted average discount 5.83%)*.....	(175,800)	(1,758)	(1,294,6
Reclassification due to permanent book/tax differences.....	--	--	(10,136,5
	-----	-----	-----
Balance, May 31, 2003.....	20,756,472	207,564	186,928,7
Treasury shares purchased and retired (weighted average discount 5.20%)*.....	(83,200)	(832)	(604,0
	-----	-----	-----
Balance, November 30, 2003.....	20,673,272	\$206,732	\$186,324,7
	=====	=====	=====

* The Trustees have voted to retire the shares purchased.

5. Federal Income Tax Status

The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations which may differ from generally accepted accounting principles. These "book/tax" differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification. Dividends and distributions which exceed net investment income and net realized capital gains for tax purposes are reported as distributions of paid-in-capital.

As of May 31, 2003, the Fund had a net capital loss carryforward of \$12,523,360 of which \$5,243,406 will expire on May 31, 2004, \$700,037 will expire on May 31, 2006, \$87,017 will

17

Morgan Stanley Municipal Income Opportunities Trust
NOTES TO FINANCIAL STATEMENTS - NOVEMBER 30, 2003 (UNAUDITED) continued

expire on May 31, 2008, \$4,628,820 will expire on May 31, 2009 and \$1,864,080 will expire on May 31, 2011 to offset future capital gains to the extent provided by regulations.

As of May 31, 2003, the Fund had temporary book/tax differences attributable to book amortization of discount on debt securities and a non-deductible expense.

6. Dividends

The Fund declared the following dividends from net investment income:

DECLARATION	AMOUNT	RECORD	PAYABLE
-------------	--------	--------	---------

Edgar Filing: MORGAN STANLEY MUNICIPAL INCOME OPPORTUNITIES TRUST - Form N-CSRS

DATE	PER SHARE	DATE	DATE
September 23, 2003	\$0.04	December 5, 2003	December 19, 2003
December 30, 2003	\$0.04	January 9, 2004	January 23, 2004
December 30, 2003	\$0.04	February 6, 2004	February 20, 2004
December 30, 2003	\$0.04	March 5, 2004	March 19, 2004

7. Expense Offset

The expense offset represents a reduction of the custodian fees for earnings on cash balances maintained by the Fund.

8. Risks Relating to Certain Financial Instruments

The Fund may invest a portion of its assets in inverse floating rate municipal obligations. The prices of these securities are subject to greater market fluctuations during periods of changing prevailing interest rates than are comparable fixed rate obligations.

To hedge against adverse interest rate changes, the Fund may invest in financial futures contracts or municipal bond index futures contracts ("futures contracts").

These futures contracts involve elements of market risk in excess of the amount reflected in the Statement of Assets and Liabilities. The Fund bears the risk of an unfavorable change in the value of the underlying securities. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.
