CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. The use of any statements containing the words anticipate, intend, believe, estimate, project, expect, plan, should or similar expressions are intended to identify such statements. Forward-looking statements included in this report relate to, among other things, expected future production, expenses and cash flows in 2011 and beyond, the nature, timing and results of capital expenditure projects, amounts of future capital expenditures, our plans with respect to future acquisitions, our future debt levels and liquidity, future derivative activities and future compliance with covenants under our revolving credit facility. Although we believe that the expectations reflected in such forward-looking statements are reasonable, those expectations may prove to be incorrect. Disclosure of important factors that could cause actual results to differ materially from our expectations, or cautionary statements, are included under the heading Risk Factors in this report. All forward-looking statements speak only as of the date made. All subsequent written and oral forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by the cautionary statements. Except as required by law, we undertake no obligation to update any forward-looking statement. Factors that could cause actual results to differ materially from our expectations include, among others, those factors referenced in the Risk Factors section of this report and our Annual Report on Form 10-K for the year ended December 31, 2010, and such things as:

volatility of oil and gas prices, including reductions in prices that would adversely affect our revenue, income, cash flow from operations, liquidity and reserves;

discovery and development of, and our ability to replace, oil and gas reserves;

our future cash flow, liquidity and financial position;

the success of our business and financial strategy, derivative strategies and plans;

the amount, nature and timing of our capital expenditures, including future development costs;

a lack of available capital and financing;

the effectiveness and results of our CO₂ flood program;

the success of the development plan and production from our oil and gas properties, particularly our Aneth Field Properties;

the timing and amount of future production of oil and gas;

the completion, timing and success of exploratory drilling in the Bakken trend of the Williston Basin;

availability of drilling, completion and production equipment;

inaccuracy in reserve estimates and expected production rates;

our operating costs and other expenses;

the success in marketing oil and gas;

competition in the oil and gas industry;

operational problems, or uninsured or underinsured losses affecting our operations;

the impact and costs related to compliance with or changes in laws or regulations governing our oil and gas operations;

our relationship with the Navajo Nation, the local community in the area where we operate and Navajo Nation Oil and Gas Company, as well as the timing of when certain purchase rights held by Navajo Nation Oil and Gas Company become exercisable;

the impact of weather and the occurrence of disasters, such as fires, floods and other events and natural disasters;

environmental liabilities;

anticipated CO₂ supply, which is currently sourced exclusively from Kinder Morgan CO₂ Company, L.P.;

risks related to our level of indebtedness;

developments in oil and gas-producing countries;

loss of senior management or key technical personnel;

Table of Contents

acquisitions and other business opportunities (or the lack thereof) that may be presented to and pursued by us;
risk factors discussed or referenced in this report; and
other factors, many of which are beyond our control.

RESOLUTE ENERGY CORPORATION
Notes to Condensed Consolidated Financial Statements

Note 1 Organization and Nature of Business

Resolute Energy Corporation (Resolute or the Company), a Delaware corporation incorporated on July 28, 2009, is an independent oil and gas company engaged in the acquisition, exploration, development, and production of oil, gas and natural gas liquids. The Company conducts all of its activities in the United States of America, principally in the Paradox Basin in southeastern Utah and the Powder River Basin in Wyoming.

Note 2 Basis of Presentation and Summary of Significant Accounting Policies

Basis of Presentation

The unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial reporting and Regulation S-X for interim financial reporting. Except as disclosed herein, there has been no material change in our basis of presentation from the information disclosed in the notes to Resolute s consolidated financial statements for the year ended December 31, 2010. In the opinion of management, all adjustments consisting of normal recurring accruals considered necessary for a fair presentation of the interim financial information have been included. Operating results for the periods presented are not necessarily indicative of the results that may be expected for the full year. All intercompany balances and transactions have been eliminated in consolidation.

In connection with the preparation of the condensed consolidated financial statements, Resolute evaluated subsequent events after the balance sheet date.

Significant Accounting Policies

The significant accounting policies followed by Resolute are set forth in Resolute s consolidated financial statements for the year ended December 31, 2010. These unaudited condensed consolidated financial statements are to be read in conjunction with the consolidated financial statements appearing in Resolute s Annual Report on Form 10-K and related notes for the year ended December 31, 2010.

Assumptions, Judgments and Estimates

The preparation of the condensed consolidated financial statements in conformity with GAAP requires management to make various assumptions, judgments and estimates to determine the reported amounts of assets, liabilities, revenues and expenses, and in the disclosures of commitments and contingencies. Changes in these assumptions, judgments and estimates will occur as a result of the passage of time and the occurrence of future events. Accordingly, actual results could differ from amounts previously established.

Significant estimates with regard to the condensed consolidated financial statements include the estimate of proved oil and gas reserve volumes and the related present value of estimated future net cash flows and the ceiling test applied to capitalized oil and gas properties, the estimated cost and timing related to asset retirement obligations, the estimated fair value of derivative assets and liabilities, the estimated expense for share-based compensation and depletion, depreciation, and amortization.

Note 3 Asset Retirement Obligation

Asset retirement obligations relate to future costs associated with the plugging and abandonment of oil and gas wells, removal of equipment and facilities from leased acreage and returning such land to its original condition. The fair value of a liability for an asset retirement obligation is recorded in the period in which it is incurred and the cost of such liability is recorded as an increase in the carrying amount of the related long-lived asset by the same amount. The liability is accreted each period and the capitalized cost is depleted on a units-of-production basis as part of the full cost pool. Revisions to estimated retirement obligations result in adjustments to the related capitalized asset and corresponding liability.

Restricted cash of \$14.8 million is legally restricted for the purpose of settling certain asset retirement obligations of Resolute Aneth, LLC (Aneth), which is a wholly owned subsidiary of the Company.

Resolute s estimated asset retirement obligation liability is based on estimated economic lives, estimates as to the cost to abandon the wells in the future, and federal and state regulatory requirements. The liability is discounted using a credit-adjusted risk-free rate estimated at the time the liability is incurred or revised. Revisions to the liability could occur due to

Table of Contents

changes in estimated abandonment costs or well economic lives, or if federal or state regulators enact new requirements regarding the abandonment of wells. Asset retirement obligations are valued utilizing Level 3 fair value measurement inputs.

The following table provides a reconciliation of Resolute's asset retirement obligations for the three months ended March 31, (in thousands):

	2011	2010
Asset retirement obligations at beginning of period	\$ 14,765	\$ 10,438
Additional liability incurred		
Accretion expense	259	202
Liabilities settled	(74)	(1,274)
Revisions to previous estimates		17
Asset retirement obligations at March 31, 2011	14,950	9,383
Less: current asset retirement obligations	(2,999)	
Long term asset retirement obligations	\$ 11,951	\$ 9,383

Note 4 Earnings per Share

The Company computes basic net income (loss) per share using the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per share is computed using the weighted average number of shares of common stock and, if dilutive, potential shares of common stock outstanding during the period. Potentially dilutive shares consist of the incremental shares issuable under the outstanding warrants which entitle the holder to purchase one share of the Company's common stock at a price of \$13.00 per share and expire on September 25, 2014, and incremental shares issuable under the Company's 2009 Performance Incentive Plan (the Incentive Plan).

The treasury stock method is used to measure the dilutive impact of potentially dilutive shares. Dilutive potential shares of common stock prior to application of the treasury method for the three months ended March 31, 2011, included 45,123,730 shares issuable under the outstanding warrants, 946,284 shares of time-based restricted stock and 448,012 shares of restricted stock subject to a market condition. Due to the net loss during the first quarter of 2011, no potentially dilutive shares of common stock are included in the calculation of shares outstanding as their inclusion would be anti-dilutive. There were no dilutive shares for the three months ended March 31, 2010 as (i) 34,600,000 warrants were anti-dilutive as their exercise price was greater than the average price of the Company's common stock during the three months then ended; (ii) 13,800,000 warrants were considered contingently issuable as the last sales price of the Company's common stock, through March 31, 2010, had not exceeded \$13.75 for any 20 days within any 30 day trading period; and (iii) shares issuable under the Incentive Plan were considered contingently issuable.

Note 5 Long Term Debt

Resolute's credit facility is with a syndicate of banks led by Wells Fargo Bank, National Association (the Credit Facility) with Resolute as the borrower. The Credit Facility specifies a maximum borrowing base as determined by the lenders. The determination of the borrowing base takes into consideration the estimated value of Resolute's oil and gas properties in accordance with the lenders' customary practices for oil and gas loans. On March 30, 2010, the Company entered into an amended and restated Credit Facility agreement. Under the terms of the restated agreement, the borrowing base was increased from \$240.0 million to \$260.0 million and the maturity date was extended to March 2014. At Resolute's option, the outstanding balance under the Credit Facility accrued interest at either (a) the London Interbank Offered Rate, plus a margin which varies from 2.25% to 3.0% or (b) the Alternative Base Rate defined as the greater of (i) the Administrative Agent's Prime Rate, (ii) the Federal Funds Effective Rate plus 0.5%, or (iii) an adjusted London Interbank Offered Rate plus 1%, plus a margin which ranges from 1.25% to 2.0%. Each such margin was based on the level of utilization under the borrowing base. As of March 31, 2011, the weighted average interest rate on the outstanding balance under the Credit Facility was 2.61%. The recorded value of the Credit Facility

approximates its fair market value. The Company capitalized \$0.1 million of interest expense during the three months ended March 31, 2011.

The borrowing base is re-determined semi-annually, and the amount available for borrowing could be increased or decreased as a result of such re-determinations. Under certain circumstances, either Resolute or the lenders may request an interim re-determination. As of March 31, 2011, outstanding borrowings were \$82.0 million and unused availability under the borrowing base was \$174.7 million. The borrowing base availability had been reduced by \$3.3 million in conjunction with letters of credit issued to vendors at March 31, 2011. To the extent that the borrowing base, as adjusted from time to time, exceeds the outstanding balance, no repayments of principal are required prior to maturity. The Credit Facility is guaranteed by all of Resolute's subsidiaries and is collateralized by substantially all of the proved oil and gas assets of Aneth and Resolute Wyoming, Inc., which are subsidiaries of the Company.

- 6 -

Table of Contents

The Credit Facility includes terms and covenants that place limitations on certain types of activities, the payment of dividends, and require satisfaction of certain financial tests. Resolute was in compliance with all terms and covenants of the Credit Facility at March 31, 2011.

On April 18, 2011, the Company entered into the First Amendment to the amended and restated Credit Facility agreement. Under the terms of the amendment, the Company is permitted to use proceeds received from the exercise of outstanding warrants to repurchase equity securities. On April 25, 2011, the Company entered into the Second Amendment to the amended and restated credit facility agreement. Under the terms of this amendment, the borrowing base was increased from \$260.0 million to \$300.0 million. At Resolute's option, the outstanding balance under the Credit Facility accrues interest at either (a) the London Interbank Offered Rate, plus a margin which varies from 1.75% to 2.75% or (b) the Alternative Base Rate (as defined above) plus a margin which ranges from 0.75% to 1.75%. Each such margin is based on the level of utilization under the borrowing base.

As of May 3, 2011, Resolute had outstanding borrowings of \$57.6 million under the Credit Facility, resulting in an unused availability of \$239.1 million under the borrowing base.

Note 6 Income Taxes

Income tax expense during interim periods is based on applying an estimated annual effective income tax rate to year-to-date income, plus any significant unusual or infrequently occurring items which are recorded in the interim period. The provision for income taxes for the three month periods ended March 31, 2011 and 2010, differ from the amount that would be provided by applying the statutory U.S. federal income tax rate of 35% to income before income taxes. This difference relates primarily to state income taxes and estimated permanent differences.

The following table summarizes the components of the provision for income taxes (in thousands):

	Three Months Ended March 31,	
	2011	2010
Current income tax expense	\$	\$ (35)
Deferred income tax benefit (expense)	9,725	(2,650)
Total income tax benefit (expense)	\$ 9,725	\$ (2,685)

The Company had no reserve for uncertain tax positions as of March 31, 2011 or 2010.

The Company is subject to the following material taxing jurisdictions: U.S. federal, Colorado, Utah and North Dakota. The tax years that remain open to examination by the Internal Revenue Service (IRS) are the years 2007 through 2010. Certain tax returns of subsidiaries of the Company are currently under examination by the IRS for the years 2008 and 2009. The tax years that remain open to examination by state taxing authorities are 2006 through 2010.

Note 7 Stockholders Equity and Equity Based Awards**Preferred Stock**

The Company is authorized to issue up to 1,000,000 shares of preferred stock, par value \$0.0001 with such designations, voting and other rights and preferences as may be determined from time to time by the Board of Directors. No shares were issued and outstanding as of March 31, 2011 or December 31, 2010.

Common Stock

The authorized common stock of the Company consists of 225,000,000 shares. The holders of the common shares are entitled to one vote for each share of common stock. In addition, the holders of the common stock are entitled to receive dividends when, as and if declared by the Board of Directors. At March 31, 2011 and December 31, 2010, the Company had 58.5 million and 54.7 million shares of common stock issued and outstanding, respectively. During the three months ended March 31, 2011, 3,250,000 Earnout Shares vested. Earnout Shares are shares of the Company's common stock that were issued at the time of the merger between the Company and Hicks Acquisition Company I, Inc. in September 2009. These shares had voting rights and were transferable, but were not registered for resale and were not able to participate in dividends until the trading price of the Company's common stock exceeded \$15.00 per share for 20 consecutive trading days. This target was met and the Earnout Shares vested on February 2, 2011.

Table of Contents

During the first quarter of 2011, 3.3 million warrants were exercised for proceeds to the company of \$42.6 million. At March 31, 2011, 45.1 million warrants remain outstanding. Through May 3, 2011, an additional 2.4 million warrants had been exercised for proceeds of \$31.8 million.

Share-Based Compensation

The Company accounts for share-based compensation in accordance with FASB ASC Topic 718, *Stock Compensation*.

On July 31, 2009, the Company adopted the 2009 Performance Incentive Plan, providing for long-term share-based awards intended as a means for the Company to attract, motivate, retain and reward directors, officers, employees and other eligible persons through the grant of awards and incentives for high levels of individual performance and improved financial performance of the Company. The share-based awards are intended to further align the interests of award recipients and the Company's stockholders.

During the quarter ended March 31, 2011, pursuant to the Incentive Plan, the Company granted 528,385 shares of restricted stock to employees. No shares of restricted stock were granted to employees during the quarter ended March 31, 2010. Shares of restricted stock generally vest in four year increments at specified dates based on continued employment and the satisfaction of certain market performance metrics.

Two-thirds of each grant of restricted stock is time-based and will vest based on continued employment in four equal tranches. The compensation expense to be recognized for the time-based awards was measured based on the Company's traded stock price on the dates of grant, utilizing estimated forfeiture rates between 0% and 9%.

The remaining one-third of each grant is subject to the satisfaction of pre-established market performance targets. The performance-based shares will vest in equal tranches beginning on December 31st of the year of the grant if there has been a 10% annual appreciation in the trading price of the Company's common stock, compounded annually, from the twenty trading day average stock price ended on December 31st of the year prior to the grant (which was \$11.134 for 2010 grants and \$14.227 for 2011 grants). At the end of each year, the twenty trading day average stock price will be measured, and if the 10% threshold is met, the stock subject to the performance criteria will vest. If the 10% threshold is not met, shares that have not vested will be carried forward to the following year. In that way, an underperforming year can be offset by an over-performing year.

The compensation expense to be recognized for the performance-based awards incorporates forfeiture rates and was measured based on the estimated fair value at the date of grant using a binomial lattice model that incorporates a Monte Carlo simulation.

The valuation model for the performance-based awards used the following assumptions:

Grant Year	Average Expected Volatility	Expected Dividend Yield	Risk-Free Interest Rate
2010	70.5% - 76.4%	0%	1.04% - 1.75%
2011	71.4% - 71.9%	0%	1.59% - 1.77%

During the three months ended March 31, 2011 and 2010, pursuant to the Incentive Plan, the Company granted 16,128 shares and 5,492 shares of restricted stock to the Company's Board of Directors, respectively. One quarter of each Board of Director award was granted without restriction with the remainder vesting over a three year service period. The compensation expense to be recognized for the awards was measured based on the Company's closing stock price on the date of the grant.

Table of Contents

For the three months ended March 31, 2011, the Company recorded \$1.4 million of stock based compensation expense. No expense related to employee awards was recorded during the first quarter of 2010. There was unrecognized compensation expense for all awards of restricted stock under the Incentive Plan of approximately \$20.2 million, at March 31, 2011, which is expected to be recognized over a weighted-average period of 2.9 years. The following table summarizes the Company's restricted stock activity for the three month period ended March 31, 2011:

	Shares		Weighted Average Grant Date Fair Value
Non-vested, beginning of period	1,321,599	\$	11.40
Granted	544,513	\$	16.66
Vested	(5,404)	\$	16.07
Forfeited	(3,749)	\$	11.50
Non-vested, end of period	1,856,959	\$	12.93

Note 8 Derivative Instruments

Resolute enters into commodity derivative contracts to manage its exposure to oil and gas price volatility. Resolute has not elected to designate derivative instruments as hedges under the provisions of FASB ASC Topic 815, *Derivatives and Hedging*. As a result, these derivative instruments are marked to market at the end of each reporting period and changes in the fair value are recorded in the accompanying condensed consolidated statements of operations. Realized and unrealized gains and losses from Resolute's price risk management activities are recognized in other income (expense), with realized gains and losses recognized in the period in which the related production is sold. The cash flows from derivatives are reported as cash flows from operating activities unless the derivative contract is deemed to contain a financing element. Derivatives deemed to contain a financing element are reported as financing activities in the condensed consolidated statement of cash flows. Commodity derivative contracts may take the form of futures contracts, swaps or options.

The table below summarizes the location and amount of commodity derivative instrument gains (losses) reported in the condensed consolidated statements of operations (in thousands):

	Three Months Ended March 31,	
	2011	2010
Other income (expense):		
Realized losses	\$ (5,350)	\$ (2,136)
Unrealized gains (losses)	(34,624)	2,346
Total gains (losses) on derivative instruments	\$ (39,974)	\$ 210

As of March 31, 2011, Resolute had entered into certain commodity collar contracts. The following table represents Resolute's commodity collars.

Year	Bbl per Day	(NYMEX WTI)	
		Floor Price	Ceiling Price
2011	3,750	\$ 66.67	\$ 94.67
2012	875	\$ 69.71	\$ 98.14

Edgar Filing: Resolute Energy Corp - Form 10-Q

2013	775	\$ 80.00	\$ 105.00
2014	1,550	\$ 65.00	\$ 110.00

As of March 31, 2011, Resolute had entered into certain commodity swap contracts. The following table represents Resolute's commodity swaps through 2013:

Year	Bbl per Day	Oil (NYMEX WTI) Weighted Average Hedge Price per Bbl	MMBtu per Day	Gas (NYMEX HH) Weighted Average Hedge Price per MMBtu
2011	750	\$ 70.58	2,750	\$ 9.32
2012	3,250	\$ 68.26	2,100	\$ 7.42
2013	2,000	\$ 60.47	1,900	\$ 7.40

- 9 -

Table of Contents

Resolute also uses basis swaps in connection with gas swaps in order to fix the price differential between the NYMEX Henry Hub price and the index price at which the gas production is sold. The table below sets forth Resolute's outstanding basis swaps as of March 31, 2011.

Year	Index	MMBtu per Day	Weighted Average Hedged Price Differential per MMBtu
2011 - 2013	Rocky Mountain NWPL	1,800	\$ 2.10
2011	Rocky Mountain CIG	1,500	\$ 0.57
2012	Rocky Mountain CIG	1,000	\$ 0.575
2013	Rocky Mountain CIG	500	\$ 0.59
2014	Rocky Mountain CIG	1,000	\$ 0.59

Credit Risk and Contingent Features in Derivative Instruments

Resolute is exposed to credit risk to the extent of nonperformance by the counterparties in the derivative contracts discussed above. All counterparties are lenders under Resolute's Credit Facility. Accordingly, Resolute is not required to provide any credit support to its counterparties other than cross collateralization with the properties securing the Credit Facility. Resolute's derivative contracts are documented with industry standard contracts known as a Schedule to the Master Agreement and International Swaps and Derivative Association, Inc. Master Agreement (ISDA). Typical terms for each ISDA include credit support requirements, cross default provisions, termination events and set-off provisions. Resolute has set-off provisions with its lenders that, in the event of counterparty default, allow Resolute to set-off amounts owed under the Credit Facility or other general obligations against amounts owed for derivative contract liabilities.

The following is a listing of Resolute's assets and liabilities required to be measured at fair value on a recurring basis and where they are classified within the fair value hierarchy as of March 31, 2011 and December 31, 2010 (in thousands):

Description	Level 2	
	March 31, 2011	December 31, 2010
Assets		
Commodity swaps	\$ 4,020	\$ 4,745
Current assets: derivative instruments	\$ 4,020	\$ 4,745
Commodity swaps	\$ 2,683	\$ 3,098
Other assets: derivative instruments	\$ 2,683	\$ 3,098

Liabilities

Commodity swaps	\$ 19,913	\$	585
Commodity collars	21,549		30,608
Current liabilities: derivative instruments	\$ 41,462	\$	31,193
Commodity swaps	\$ 60,803	\$	50,793
Commodity collars	13,691		486
Long term liabilities: derivative instruments	\$ 74,494	\$	51,279

Note 9 Commitments and Contingencies**CO₂ Take-or-Pay Agreements**

Resolute is party to a take-or-pay purchase agreement with Kinder Morgan CO₂ Company, L.P., under which Resolute has committed to buy specified volumes of CO₂. The purchased CO₂ is for use in Resolute's enhanced tertiary recovery projects in Aneth Field. Resolute is obligated to purchase a minimum daily volume of CO₂ or pay for any deficiencies at the price in effect when delivery was to have occurred. The CO₂ volumes planned for use on the enhanced recovery projects generally exceed the minimum daily volumes provided in these take-or-pay purchase agreements. Therefore, Resolute expects to avoid any payments for deficiencies.

On October 5, 2010, Resolute entered into an amendment of the contract effective September 1, 2010. The amendment extended the term of the contract to December 31, 2020, and allows the Company flexibility to adjust the minimum purchase commitments; therefore, these yearly commitments may change.

- 10 -

Table of Contents

Future minimum CO₂ purchase commitments as of March 31, 2011 under this purchase agreement, based on prices in effect on March 31, 2011, are as follows (in thousands):

Year	CO₂ Purchase Commitments
2011	20,386
2012	28,067
2013	27,057
2014	22,392
2015	17,261
Thereafter	41,802
 Total	 \$ 156,965

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2010, as well as the accompanying financial statements and related notes contained elsewhere in this report. References to the Company, us or we refer to Resolute Energy Corporation (Resolute) and subsidiaries.

Overview

Resolute is an independent oil and gas company engaged in the exploration, exploitation and development of oil and gas properties located in Utah, Wyoming, North Dakota and, to a lesser extent, Alabama and Oklahoma. Approximately 88% of our revenue is generated from the sale of oil production. Our main focus is on increasing reserves and production from our properties located in Utah (Aneth Field Properties), from Hilight Field and related properties in Wyoming (Wyoming Properties), drilling and developing our properties in the Bakken Trend of the Williston Basin in North Dakota (the Bakken Properties), and improving efficiency and controlling costs in our operations. We have completed a number of exploitation projects that have increased our proved developed reserve base, and have plans for additional expansion and enhancement projects. We plan to further expand our reserve base through a focused acquisition strategy by looking to acquire properties that have upside potential through development drilling and exploitation projects and through the acquisition, exploration and exploitation of acreage that appears to contain relatively low risk and repeatable drilling opportunities. Also, we seek to reduce the effect of short-term commodity price fluctuations on our cash flow through the use of various derivative instruments.

Our largest asset, constituting 92% of our proved reserves, is our ownership of working interests in Greater Aneth Field, a mature, long-lived oil producing field located in the Paradox Basin on the Navajo Reservation in southeast Utah. We own a majority of the working interests in, and are the operator of, three federal production units covering approximately 43,000 gross acres. These are the Aneth Unit, in which we own a 62% working interest, the McElmo Creek Unit, in which we own a 75% working interest, and the Ratherford Unit, in which we own a 59% working interest.

Resolute's Wyoming Properties are largely located in the Powder River Basin of Wyoming and constitute approximately 7% of Resolute's net proved reserves. Hilight Field, anchoring the Wyoming production and reserves, produces oil and gas from the Muddy formation as well as shallow coalbed methane.

Resolute's Bakken Properties are in Williams and McKenzie Counties, North Dakota. These leaseholds are located within the Bakken shale trend of the Williston Basin. Although the Middle Bakken formation is the primary objective, secondary objectives include the Three Forks, Madison and Red River formations.

Resolute focuses its efforts on increasing reserves and production while controlling costs at a level that is appropriate for long-term operations. Resolute's future earnings and cash flow from existing operations are dependent on a variety of factors including commodity prices, exploitation and recovery activities and its ability to manage its overall cost structure at a level that allows for profitable production.

Resolute's management uses a variety of financial and operational measurements to analyze its operating performance. These measurements include: (i) production levels, trends and prices, (ii) reserve and production volumes and trends, (iii) operating expenses and general and administrative expenses, (iv) operating cash flow and (v) Adjusted EBITDA. The analysis of these measurements should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Resolute's Annual Report on Form 10-K for the year ended December 31, 2010.

Factors That Significantly Affect Resolute's Financial Results

Revenue, cash flow from operations and future growth depend substantially on factors beyond Resolute's control, such as economic, political and regulatory developments and competition from other sources of energy. Crude oil prices have historically been volatile and may fluctuate widely in the future. Sustained periods of low prices for crude oil could materially and adversely affect Resolute's financial position, its results of operations, the quantities of oil and gas that it can economically produce, and its ability to obtain capital.

Like all businesses engaged in the exploration for and production of oil and gas, Resolute faces the challenge of natural production declines. As initial reservoir pressures are depleted, oil and gas production from a given well decreases. Thus, an oil and gas exploration and production company depletes part of its asset base with each unit of oil or gas it produces. Resolute attempts to overcome this natural decline by implementing secondary and tertiary recovery techniques and by acquiring more reserves than it produces. Resolute's future growth will depend on its ability to enhance production levels from existing reserves and to continue to add reserves in excess of production through exploration, development and acquisition. Resolute will maintain its focus on costs necessary to produce its reserves as well as the costs necessary to add reserves through production enhancement, drilling and acquisitions. Resolute's ability to make capital expenditures to

Table of Contents

increase production from existing reserves and to acquire more reserves is dependent on availability of capital resources, and can be limited by many factors, including the ability to obtain capital in a cost-effective manner and to timely obtain permits and regulatory approvals.

Results of Operations

For the purposes of management's discussion and analysis of the results of operations of Resolute, management has analyzed the Company's operational results for the three months ended March 31, 2011 and March 31, 2010. The following table reflects the components of the Company's sales volumes and sets forth its sales prices, costs and expenses on a barrel of oil equivalent (Boe) basis for the periods indicated.

	Three Months Ended March 31,	
	2011	2010
Net Sales:		
Total sales (MBoe)	707	636
Average daily sales (Boe/d)	7,859	7,062
Average Sales Price (\$/Boe):		
Average sales price (excluding derivative settlements)	\$ 76.42	\$ 64.72
Operating Expenses (\$/Boe):		
Lease operating	\$ 20.34	\$ 20.80
Production and ad valorem taxes	11.02	9.95
General and administrative	6.15	4.17
General and administrative (excluding non-cash compensation expense)	4.21	3.90
Depletion, depreciation, amortization and accretion	18.33	16.86

Comparison of Quarter Ended March 31, 2011 to Quarter Ended March 31, 2010

Revenue. Revenue from oil and gas activities increased to \$54.1 million during 2011, from \$41.1 million during 2010. Of the \$13 million increase in revenue, approximately \$8.3 million was attributable to higher commodity prices, while \$4.7 million was attributable to increased production. Average sales price for the quarter, excluding derivative settlements, increased from \$64.72 per Boe in 2010 to \$76.42 per Boe in 2011, primarily as a function of increased commodity pricing. Sales volumes increased 11% during 2011 as compared to 2010, from 636 MBoe to 707 MBoe. This increase was largely due to the success of a well re-completion program in the McElmo Creek Unit during the second half of 2010 and increased response from the Company's CQflood projects in its Aneth field properties. Additionally, Hilight Unit sales volumes in the first quarter of 2011 increased versus sales volumes during the first quarter of 2010 due to limited compression capability at the Western Gas Resources Hilight plant during the first quarter of 2010.

Operating Expenses. Lease operating expenses include direct labor, contract services, field office rent, production and ad valorem taxes, vehicle expenses, supervision, transportation, minor maintenance, tools and supplies, workover expenses, utilities and other customary charges. Resolute assesses lease operating expenses in part by monitoring the expenses in relation to production volumes and the number of wells operated.

Lease operating expenses increased to \$14.4 million during 2011, from \$13.3 million during 2010. The \$1.1 million, or 8%, increase was attributable to increases in contract labor, equipment and maintenance costs and utilities and fuel. This overall increase was offset by decreases in company labor and compression and gathering costs.

Production and ad valorem taxes increased by 24% to \$7.8 million in 2011 versus \$6.3 million in 2010, mainly due to the increase in commodity pricing versus 2010. Production and ad valorem taxes were 14% of total revenue in 2011 as compared to 15% of total revenue in 2010.

Depletion, depreciation, amortization and accretion expenses increased to \$13.0 million during 2011, as compared to \$10.7 million during 2010. The \$2.3 million, or 21%, increase is principally due to an increase in the depletion, depreciation and amortization rate from \$16.86 per Boe in 2010 to \$18.33 per Boe in 2011.

Edgar Filing: Resolute Energy Corp - Form 10-Q

General and administrative expenses include the costs of employees and executive officers, related benefits, share-based compensation, office leases, professional fees, general corporate overhead and other costs not directly associated with field operations. Resolute monitors its general and administrative expenses carefully, attempting to balance the cash effect of incurring general and administrative costs against the related benefits with a focus on hiring and retaining highly qualified staff who can add value to the Company's asset base.

- 13 -

Table of Contents

General and administrative expenses for Resolute increased to \$4.4 million during 2011, as compared to \$2.7 million during 2010. The \$1.7 million, or 63%, increase in general and administrative expenses mainly resulted from a \$0.5 million increase in personnel costs due to additional employees versus 2010, \$0.8 million of increased cost related the Company's short term incentive compensation plan, which is being accrued ratably over the full year in 2011, but which did not occur until the last four months of 2010, and a \$1.2 million increase in stock based compensation expense. Equity awards were granted under the 2009 Performance Incentive Plan during the first quarter of 2011 but were not granted until the second quarter of 2010. These increases were offset by a decrease in professional service fees and an increase in overhead billings.

Other Income (Expense). All of our oil and gas derivative instruments are accounted for under mark-to-market accounting rules, which provide for the fair value of the contracts to be reflected as either an asset or a liability on the balance sheet. The change in the fair value during an accounting period is reflected in the income statement for that period. During 2011, the loss on oil and gas derivatives was \$40.0 million, consisting of \$34.6 million of unrealized losses and \$5.4 million of realized losses on derivative settlements. During 2010, the gain on oil and gas derivatives was \$0.2 million, consisting of unrealized gains of \$2.3 million offset by \$2.1 million of realized losses.

Interest expense was \$1.1 million during 2011 and 2010, due to generally consistent average outstanding debt balances and interest rates during both quarters.

Income Tax Benefit (Expense). Income tax benefit recognized during 2011 was \$9.7 million, or 36.7% of income before income taxes, as compared to income tax expense of \$2.7 million, or 36.3% of income before income taxes for Resolute in 2010.

Liquidity and Capital Resources

Resolute's primary sources of liquidity are cash generated from operations, amounts available under its revolving Credit Facility (as defined below) and proceeds from warrant exercises. For the purposes of management's discussion and analysis of liquidity and capital resources, management has analyzed the cash flows and capital resources for the three months ended March 31, 2011 and March 31, 2010.

	Three Months Ended March 31,	
	2011	2010
	(in thousands)	
Cash provided by operating activities	\$ 23,691	\$ 14,619
Cash used in investing activities	(20,188)	(14,488)
Cash provided by (used in) financing activities	(3,308)	1,787

Net cash provided by operating activities was \$23.7 million for the first three months of 2011 compared to \$14.6 million for the 2010 period.

Resolute plans to reinvest a sufficient amount of its cash flow in its development operations in order to maintain its production over the long term, and plans to use external financing sources as well as cash flow from operations and cash reserves to increase its production.

Net cash used in investing activities was \$20.2 million in 2011 compared to net cash used of \$14.5 million in 2010. The primary investing activities in 2011 and 2010 were capital expenditures of \$21.5 million and \$12.7 million, respectively. The 2011 capital expenditures were comprised of \$12.4 million in compression and facility related projects, \$3.5 million in CO₂ acquisition, \$5 million in drilling and completion activities in the Bakken trend of North Dakota and \$0.6 million in recompletion activities in the Company's Wyoming properties. The 2010 capital expenditures were comprised of \$5.9 million in leasehold costs in North Dakota, \$3.4 million in CO₂ acquisition and \$3.4 million in other capital expenditures.

Net cash used in financing activities was \$3.3 million in 2011 compared to net cash provided by financing activities of \$1.8 million in 2010. The primary financing activities in 2011 were \$45.9 million in net Credit Facility payments and proceeds of \$42.6 million from warrants exercised. Primary financing activities in 2010 were \$5.8 million in net borrowings under the Credit Facility and \$4.0 million in deferred financing costs related to the amended credit agreement entered into by the Company on March 30, 2010. During the period from April 1, 2011,

through May 3, 2011, the Company received \$31.8 million in proceeds from warrant exercises. The Company is unable to predict the amount or timing of future exercises.

If cash flow from operating activities does not meet expectations, Resolute may reduce its expected level of capital expenditures and/or fund a portion of its capital expenditures using borrowings under its Credit Facility, issuances of debt and equity securities or from other sources, such as asset sales. There can be no assurance that needed capital will be available on acceptable terms or at all. Resolute's ability to raise funds through the incurrence of additional indebtedness could be limited by the covenants in its Credit Facility. If Resolute is unable to obtain funds when needed or on acceptable terms, it may not

- 14 -

Table of Contents

be able to complete acquisitions that may be favorable to it or finance the capital expenditures necessary to maintain production or proved reserves.

Resolute plans to continue its practice of hedging a significant portion of its production through the use of various derivative transactions. Resolute's existing derivative transactions do not qualify as cash flow hedges, and the Company anticipates that future transactions will receive similar accounting treatment. Derivative arrangements are generally settled within five days of the end of the month. As is typical in the oil and gas industry, however, Resolute does not generally receive the proceeds from the sale of its crude oil production until the 20th day of the month following the month of production. As a result, when commodity prices increase above the fixed price in the derivative contracts, Resolute will be required to pay the derivative counterparty the difference between the fixed price in the derivative contract and the market price before receiving the proceeds from the sale of the hedged production. If this occurs, Resolute may use working capital borrowings to fund its operations.

Revolving Credit Facility

Resolute's credit facility is with a syndicate of banks led by Wells Fargo Bank, National Association (the Credit Facility) with Resolute as the borrower. The Credit Facility specifies a maximum borrowing base as determined by the lenders. The determination of the borrowing base takes into consideration the estimated value of Resolute's oil and gas properties in accordance with the lenders' customary practices for oil and gas loans. On March 30, 2010, the Company entered into an amended and restated Credit Facility agreement. Under the terms of the restated agreement, the borrowing base was increased from \$240.0 million to \$260.0 million and the maturity date was extended to March 2014. At Resolute's option, the outstanding balance under the Credit Facility accrued interest at either (a) the London Interbank Offered Rate, plus a margin which varies from 2.25% to 3.0%, or (b) the Alternative Base Rate defined as the greater of (i) the Administrative Agent's Prime Rate, (ii) the Federal Funds Effective Rate plus 0.5%, or (iii) an adjusted London Interbank Offered Rate plus 1%, plus a margin which ranges from 1.25% to 2.0%. Each such margin is based on the level of utilization under the borrowing base. As of March 31, 2011, the weighted average interest rate on the outstanding balance under the Credit Facility was 2.61%.

The borrowing base is re-determined semi-annually, and the amount available for borrowing could be increased or decreased as a result of such re-determinations. Under certain circumstances, either Resolute or the lenders may request an interim redetermination. As of March 31, 2011, outstanding borrowings were \$82.0 million and unused availability under the borrowing base was \$174.7 million. The borrowing base availability had been reduced by \$3.3 million in conjunction with letters of credit issued to vendors at March 31, 2011. To the extent that the borrowing base, as adjusted from time to time, exceeds the outstanding balance, no repayments of principal are required prior to maturity. The Credit Facility is collateralized by substantially all of the proved oil and gas assets of Aneth and RWI, and is guaranteed by Resolute's subsidiaries.

The Credit Facility includes terms and covenants that place limitations on certain types of activities, the payment of dividends, and require satisfaction of certain financial tests. Resolute was in compliance with all terms and covenants of the Credit Facility at March 31, 2011.

On April 18, 2011, the Company entered into the First Amendment to the amended and restated Credit Facility agreement. Under the terms of the amendment, the Company is permitted to use proceeds received from the exercise of outstanding warrants to repurchase equity securities. On April 25, 2011, the Company entered into the Second Amendment to the amended and restated Credit Facility agreement. Under the terms of this amendment, the borrowing base was increased from \$260.0 million to \$300.0 million. At Resolute's option, the outstanding balance under the Credit Facility accrues interest at either (a) the London Interbank Offered Rate, plus a margin which varies from 1.75% to 2.75% or (b) the Alternative Base Rate (as defined above) plus a margin which ranges from 0.75% to 1.75%. Each such margin is based on the level of utilization under the borrowing base.

Off Balance Sheet Arrangements

Resolute does not have any off-balance sheet financing arrangements other than operating leases. Resolute has not guaranteed any debt or commitments of other entities or entered into any options on non-financial assets.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**Commodity Price Risk and Derivative Arrangements**

Edgar Filing: Resolute Energy Corp - Form 10-Q

Resolute's major market risk exposure is in the pricing applicable to oil and gas production. Realized pricing on Resolute's unhedged volumes of production is primarily driven by the spot market prices applicable to oil production and the prevailing price for gas. Pricing for oil production has been volatile and unpredictable for several years, and Resolute expects this volatility to continue in the future. The prices Resolute receives for unhedged production depends on many factors outside of Resolute's control.

- 15 -

Table of Contents

Resolute periodically hedges a portion of its oil and gas production through swaps, puts, calls, collars and other such agreements. The purpose of the hedges is to provide a measure of stability to Resolute's cash flows in an environment of volatile oil and gas prices and to manage Resolute's exposure to commodity price risk.

Under the terms of Resolute's Credit Facility, the form of derivative instruments to be entered into is at Resolute's discretion, not to exceed 85% of its anticipated production from proved developed producing properties, utilizing economic parameters specified in its Credit Facility.

By removing the price volatility from a significant portion of Resolute's oil production, Resolute has mitigated, but not eliminated, the potential effects of changing prices on the cash flow from operations for those periods. While mitigating negative effects of falling commodity prices, certain of these derivative contracts also limit the benefits Resolute would receive from increases in commodity prices. It is Resolute's policy to enter into derivative contracts only with counterparties that are major, creditworthy financial institutions deemed by management as competent and competitive market makers, all of which are members of Resolute's Credit Facility bank syndicate at March 31, 2011.

As of March 31, 2011, Resolute had entered into certain commodity collar contracts. The following table represents Resolute's commodity collars with respect to its oil and production:

Year	Bbl per Day	(NYMEX WTI)	
		Floor Price	Ceiling Price
2011	3,750	\$ 66.67	\$ 94.67
2012	875	\$ 69.71	\$ 98.14
2013	775	\$ 80.00	\$ 105.00
2014	1,550	\$ 65.00	\$ 110.00

As of March 31, 2011, Resolute had entered into certain commodity swap contracts. The following table represents Resolute's commodity swaps with respect to its oil and gas production through 2013:

Year	Bbl per Day	Oil (NYMEX WTI)		Gas (NYMEX HH)	
		Weighted Average Hedge Price per Bbl	MMBtu per Day	Weighted Average Hedge Price per MMBtu	MMBtu per Day
2011	750	\$ 70.58	2,750	\$ 9.32	
2012	3,250	\$ 68.26	2,100	\$ 7.42	
2013	2,000	\$ 60.47	1,900	\$ 7.40	

Resolute also uses basis swaps in connection with gas swaps in order to fix the price differential between the NYMEX Henry Hub price and the index price at which the gas production is sold. The table below sets forth Resolute's outstanding basis swaps as of March 31, 2011:

Year	Index	MMBtu per Day	Weighted Average Hedged Price Differential per MMBtu	
			MMBtu per Day	Weighted Average Hedged Price Differential per MMBtu
2011	Rocky Mountain			
2011	NWPL	1,800	\$	2.10
2011	Rocky Mountain CIG	1,500	\$	0.57
2012	Rocky Mountain CIG	1,000	\$	0.575
2013	Rocky Mountain CIG	500	\$	0.59
2014	Rocky Mountain CIG	1,000	\$	0.59

Interest Rate Risk

At March 31, 2011, Resolute has \$82.0 million of outstanding debt. Interest is calculated under the terms of the agreement based generally on a LIBOR spread. A 10% increase in LIBOR would result in a less than \$0.1 million increase in annual interest expense. Resolute does not currently intend to enter into any derivative arrangements to protect against fluctuations in interest rates applicable to its outstanding indebtedness.

Credit Risk and Contingent Features in Derivative Instruments

Resolute is exposed to credit risk to the extent of nonperformance by the counterparties in the derivative contracts discussed above. All counterparties are also lenders under Resolute's Credit Facility. For these contracts, Resolute is not required to provide any credit support to its counterparties other than cross collateralization with the properties securing the Credit Facility. Resolute's derivative contracts are documented with industry standard contracts known as a Schedule to the Master Agreement and International Swaps and Derivative Association, Inc. Master Agreement (ISDA). Typical terms for the ISDAs include credit support requirements, cross default provisions, termination events, and set-off provisions. Resolute has set-off provisions with its lenders that, in the event of counterparty default, allow Resolute to set-off amounts owed under the Credit Facility or other general obligations against amounts owed for derivative contract liabilities.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Our management, with the participation of Nicholas J. Sutton, our Chief Executive Officer, and Theodore Gazulis, our Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2011. Based on the evaluation, those officers have concluded that:

our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports we file or submit under the Securities Exchange Act of 1934 was accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There has not been any change in the Company's internal control over financial reporting that occurred during the quarterly period ended March 31, 2011, that has materially affected, or is reasonably likely to affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Resolute is not a party to any material pending legal or governmental proceedings, other than ordinary routine litigation incidental to its business. While the ultimate outcome and impact of any proceeding cannot be predicted with certainty, Resolute's management believes that the resolution of any of its pending proceedings will not have a material adverse effect on its financial condition or results of operations.

ITEM 1A. RISK FACTORS

Information about material risks related to Resolute's business, financial condition and results of operations for the quarter ended March 31, 2011, does not materially differ from those set out in Part I, Item 1A of the Annual Report on Form 10-K for the year ended December 31, 2010. These risks and those described below are not the only risks facing the Company.

Exercise of outstanding Warrants would result in dilution to our stockholders and might have an adverse effect on the market price of our common stock.

At May 3, 2011, an aggregate of 21,875,503 Public Warrants and 20,800,000 Sponsor's Warrants and Founder's Warrants are exercisable at an exercise price of \$13.00 per share. These warrants would likely only be exercised if the market price of our common stock exceeds the \$13.00 per share exercise price. Exercise of these warrants at such time will result in dilution to our stockholders, which could cause the market price of our common stock to decline. Outstanding Warrants at such date represented approximately 41% of our total capitalization, assuming full exercise of the warrants. Our common stock price has exceeded \$13.00 per share since December 1, 2010. The Company is unable to predict the amount or timing of future exercises.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable

ITEM 4. (REMOVED AND RESERVED)

ITEM 5. OTHER INFORMATION

Not applicable.
