FORWARD LOOKING STATEMENT: This press release contains forward-looking statements, including forecasts of future revenue, GAAP and non-GAAP earnings per share, momentum in particular product areas and expected industry patterns, statements regarding completion of our proposed merger with VERITAS and other financial and business results. These statements are subject to known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to differ materially from results expressed or implied by this press release. Such risk factors include, among others: the sustainability of recent growth rates, particularly in consumer products; the anticipation of the growth of certain market segments, particularly enterprise security and international; the positioning of Symantec's products in those segments; the competitive environment in the software industry; general market conditions; fluctuations in currency exchange rates; the timing of new product releases and upgrades; changes to operating systems and product strategy by vendors of operating systems; satisfaction of the conditions to closing our proposed merger with VERITAS; and whether Symantec can successfully develop new products and integrate acquired businesses, and the degree to which these products and businesses gain market acceptance. Actual results may differ materially from those contained in the forward-looking statements in this press release. Additional information concerning these and other risk factors is contained in the Risk Factors sections of Symantec's recently filed Form 10-Q for the quarter ended December 31, 2004. Symantec assumes no obligation to update any forward-looking information contained in this press release.

USE OF NON-GAAP FINANCIAL INFORMATION: In addition to reporting financial results in accordance with generally accepted accounting principles, or GAAP, Symantec reports non-GAAP financial results. Non-GAAP net income and earnings per share exclude amortization of acquisition-related intangibles, amortization of deferred stock-based compensation, in-process research and development, and certain other identified charges, such as restructuring, patent settlement, and integration planning expenses associated with the proposed VERITAS merger, as well as the tax effect of these items, and the one-time tax effect associated with the company's cash repatriation under the American Jobs Creation Act. Symantec's management believes these non-GAAP measures are useful to investors because they provide supplemental information that facilitates comparisons to prior periods. Management uses these non-GAAP measures to evaluate its financial results, develop budgets and manage expenditures. The method Symantec uses to produce non-GAAP results is not computed according to GAAP, is likely to differ from the methods used by other companies and should not be regarded as a replacement for corresponding GAAP measures. Investors are encouraged to review the reconciliation of these non-GAAP financial measures to the comparable GAAP results, which is attached to this release and can also be found on the investor relations Web site at www.symantec.com/invest/center.html.
