### CAUTIONARY STATEMENT FOR PURPOSES OF THE "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 concerning, among other things, our prospects and business strategies. These forward-looking statements are included in various sections of this report, including "Management's Discussion and Analysis of Financial Condition and Results of Operations" appearing in Part I, Item 2. The words "may," "will," "believe," "should," "could," "plans," "expect," "anticipated," "estimates," and similar expressions (and variations thereof), identify these forward-looking statements. Although we believe that the expectations reflected in these forward-looking statements are based on reasonable assumptions, these expectations may not prove to be correct. Because these forward-looking statements are also subject to risks and uncertainties, actual results may differ materially from the expectations expressed in the forward-looking statements. Important factors that could cause actual results to differ materially from the expectations reflected in the forward-looking statements include:

- changes in consumer demand, prices and our ability to have our products included on top selling vehicles, such as the recent shift in consumer preferences from light trucks and SUVs to other vehicles in light of higher fuel costs (because the percentage of our North American OE revenues related to light trucks and SUVs is greater than the percentage of the total North American light vehicle build rate represented by light trucks and SUVs, our North American OE business is sensitive to this change in consumer preferences), and other factors impacting the cyclicity of automotive production and sales of automobiles which include our products, and the potential negative impact on our revenues and margins from such products;

1

- changes in automotive manufacturers' production rates and their actual and forecasted requirements for our products;
- the overall highly competitive nature of the automotive parts industry, and our resultant inability to realize the sales represented by our awarded book of business (which is based on anticipated pricing for the applicable program over its life, and is subject to increases or decreases due to changes in customer requirements, customer and consumer preferences, and the number of vehicles actually produced by customers);
- the loss of any of our large original equipment manufacturer ("OEM") customers (on whom we depend for a substantial portion of our revenues), or the loss of market shares by these customers if we are unable to achieve increased sales to other OEMs;
- general economic, business and market conditions, including without limitation the financial difficulties facing a number of companies in the automotive industry and the potential impact thereof on labor unrest, supply chain disruptions, weakness in demand and the collectibility of any accounts receivable due us from such companies;
- labor disruptions at our facilities or any labor or other economic disruptions at any of our significant customers or suppliers or any of

## Edgar Filing: TENNECO INC - Form 10-Q

- our customers' other suppliers;
- increases in the costs of raw materials, including our ability to successfully reduce the impact of any such cost increases through materials substitutions, cost reduction initiatives, low cost country sourcing, and price recovery efforts with aftermarket and OE customers;
  - the cyclical nature of the global vehicle industry, including the performance of the global aftermarket sector and the longer product lives of automobile parts;
  - our continued success in cost reduction and cash management programs and our ability to execute restructuring and other cost reduction plans and to realize anticipated benefits from these plans;
  - costs related to product warranties;
  - the impact of consolidation among automotive parts suppliers and customers on our ability to compete;
  - operating hazards associated with our business;
  - changes in distribution channels or competitive conditions in the markets and countries where we operate, including the impact of changes in distribution channels for aftermarket products on our ability to increase or maintain aftermarket sales;
  - the negative impact of higher fuel prices on discretionary purchases of aftermarket products by consumers;
  - the cost and outcome of existing and any future legal proceedings;
  - economic, exchange rate and political conditions in the foreign countries where we operate or sell our products;
  - customer acceptance of new products;
  - new technologies that reduce the demand for certain of our products or otherwise render them obsolete;
  - our ability to realize our business strategy of improving operating performance;
  - capital availability or costs, including changes in interest rates, market perceptions of the industries in which we operate or ratings of securities;
  - our inability to successfully integrate any acquisitions that we complete;
  - changes by the Financial Accounting Standards Board or the Securities and Exchange Commission of authoritative generally accepted accounting principles or policies;
- 2
- potential legislation, regulatory changes and other governmental actions, including the ability to receive regulatory approvals and the timing of such approvals;

## Edgar Filing: TENNECO INC - Form 10-Q

- the impact of changes in and compliance with laws and regulations, including environmental laws and regulations, and environmental liabilities in excess of the amount reserved;
- acts of war and/or terrorism, including, but not limited to, the events taking place in the Middle East, the current military action in Iraq and Afghanistan, the current situation in North Korea and the continuing war on terrorism, as well as actions taken or to be taken by the United States and other governments as a result of further acts or threats of terrorism, and the impact of these acts on economic, financial and social conditions in the countries where we operate; and
- the timing and occurrence (or non-occurrence) of other transactions, events and circumstances which may be beyond our control.

The risks included here are not exhaustive. Refer to "Part I, Item 1A -- Risk Factors" in our annual report on Form 10-K/A for the year ended December 31, 2006, for further discussion regarding our exposure to risks. Additionally, new risk factors emerge from time to time and it is not possible for us to predict all such risk factors, nor to assess the impact such risk factors might have on our business or the extent to which any factor or combination of factors may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results.

### PART I.

#### FINANCIAL INFORMATION

##### ITEM 1. FINANCIAL STATEMENTS (UNAUDITED)

###### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

TO THE BOARD OF DIRECTORS AND SHAREHOLDERS OF  
TENNECO INC.

We have reviewed the accompanying consolidated balance sheet of Tenneco Inc. and consolidated subsidiaries (the "Company") as of June 30, 2007, and the related consolidated statements of income, cash flows, comprehensive income (loss) for the three-month and six-month periods ended June 30, 2007 and 2006, and of changes in shareholders' equity for the six-month periods ended June 30, 2007 and 2006. These interim financial statements are the responsibility of Tenneco Inc.'s management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such consolidated interim financial statements for them to be

## Edgar Filing: TENNECO INC - Form 10-Q

in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 11, effective January 1, 2007, the Company adopted the measurement date provisions of Statement of Financial Accounting Standards No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans -- an amendment of FASB Statements No. 87, 88, 106 and 132(R).

As discussed in Note 2, the accompanying 2006 consolidated financial statements have been restated.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Tenneco Inc. and consolidated subsidiaries as of December 31, 2006, and the related consolidated statements of income, cash flows, changes in shareholders' equity, and comprehensive income (loss) for the year then ended (not presented herein); and in our report dated March 1, 2007 (August 14, 2007 as to the effects of the restatement discussed in Note 4), we expressed an unqualified opinion on those consolidated financial statements and financial statement schedule and included an explanatory paragraph regarding the Company's adoption of Statement of Financial Accounting Standards No. 123(R), "Share-Based Payment" on January 1, 2006, the Company's adoption of the recognition and disclosure provisions of Statement of Financial Accounting Standards No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans -- an amendment of FASB Statements No. 87, 88, 106 and 132(R)," and the effects of the restatement discussed in Note 4. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2006 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

## Edgar Filing: TENNECO INC - Form 10-Q

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(1) As you read the accompanying financial statements and Management's Discussion and Analysis you should also read our Annual Report on Form 10-K/A for the year ended December 31, 2006.

In our opinion, the accompanying unaudited financial statements contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly Tenneco Inc.'s financial position, results of operations, cash flows, changes in shareholders' equity, and comprehensive income (loss) for the periods indicated. We have prepared the unaudited interim consolidated financial statements pursuant to the rules and regulations of the U.S. Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America ("GAAP") for annual financial statements.

Our consolidated financial statements include all majority-owned subsidiaries. We carry investments in 20 percent to 50 percent owned companies at cost plus equity in undistributed earnings and cumulative translation adjustments from the date of acquisition since we have the ability to exert significant influence over operating and financial policies.

Certain reclassifications have been made to prior year amounts to conform to the current year presentation. We have reclassified in the statement of cash flows the net change in payables for acquisitions of plant, property and equipment (PP&E) from the increase (decrease) in payables included in operating activities into cash payments for PP&E included in investing activities and disclosed the period end balance of payables for PP&E in non-cash investing and financing activities. We do not believe these changes in presentation are material to the financial statements.

(2) Subsequent to the issuance of our consolidated financial statements for the year ended December 31, 2006, we determined that an error existed in our financial statements relating to our accounting for three interest rate swaps. The error did not change the underlying economics of the transaction and had no effect on our cash flow or liquidity.

In April 2004, we entered into three separate fixed-to-floating interest rate swaps with two financial institutions. These agreements swapped a total of \$150 million of our fixed 10.25% senior secured notes to floating interest rate debt at LIBOR plus an average spread of 5.68 percentage points. From the inception of the interest rate swaps, we applied the so-called "short-cut" method of fair value hedge accounting under Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities." To qualify for the short-cut method of hedge accounting, the terms of an interest rate swap must be an exact match, or "mirror image," of the terms of the debt it is hedging. When these conditions are met, a company can assume the changes in the value of the hedges and the underlying debt offset each other. Any unrealized gains and losses in fair value of the swap agreements are recorded as an offset to long-term debt thereby having no effect on earnings.

While we believed we had appropriately matched the terms of the swaps and the underlying debt, differences have subsequently been identified. One difference is between the 30-day notice period to terminate the swaps and the 30 to 60 day notice period to redeem the notes. Another difference relates to the fact that while the debt and swaps can both be redeemed before their maturity dates, the notes allow us to make redemptions in increments of \$1,000 while the interest rate swap agreements imply that they can only be redeemed in their full amounts.

## Edgar Filing: TENNECO INC - Form 10-Q

As a result, we have determined that these transactions do not meet the requirements for hedge accounting treatment under SFAS No. 133 and we are correcting our past accounting for the swaps as hedges. Therefore, we are recording the changes in the fair value of the interest rate swaps as increases or decreases to interest expense in each period since we entered into them, instead of recording the changes in fair value as an offset to the underlying debt.

In connection with the restatement, we requested and received from the lenders under the senior credit facility a waiver of any default or event of default that would otherwise have arisen because our prior financial statements could no longer be relied upon.

10

### TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(CONTINUED) (Unaudited)

##### Other restatement adjustments

In addition, we are correcting other errors as part of this restatement that we originally determined to be immaterial, individually and in the aggregate, to our consolidated financial statements. The corrections include:

Fees on Receivables Sold -- We corrected the classification of costs associated with our European receivables sale program. These costs were recorded in interest expense and selling, general and administrative expense and should have been recorded in other income and expense. This change reduced interest expense by less than one million dollars in the three month period ended June 30, 2006 and by \$1 million in the six month period ended June 30, 2006. Selling, general and administrative expense was also reduced by less than one million dollars in the three month period ended June 30, 2006 and by \$1 million in the six month period ended June 30, 2006. This represents the discount from book values at which these receivables were sold to the third party. This adjustment did not impact net income.

As a result, the accompanying consolidated financial statements for the three and six month periods ending June 30, 2006 and the accompanying consolidated balance sheet as of December 31, 2006 have been restated from the amounts previously reported. In connection with this restatement, the following Notes to the Consolidated

TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(CONTINUED)  
(Unaudited)

(3) Equity Plans -- In December 1996, we adopted the 1996 Stock Ownership Plan, which permitted the granting of a variety of awards, including common stock, restricted stock, performance units, stock equivalent units, stock appreciation rights ("SARs"), and stock options to our directors, officers, employees and consultants. The plan, which terminated as to new awards on December 31, 2001, was renamed the "Stock Ownership Plan." In December 1999, we adopted the Supplemental Stock Ownership Plan, which permitted the granting of a

## Edgar Filing: TENNECO INC - Form 10-Q

variety of similar awards to our directors, officers, employees and consultants. We were authorized to deliver up to about 1.1 million treasury shares of common stock under the Supplemental Stock Ownership Plan, which also terminated as to new awards on December 31, 2001. In March 2002, we adopted the 2002 Long-Term Incentive Plan which permitted the granting of a variety of similar awards to our officers, directors, employees and consultants. Up to 4 million shares of our common stock were authorized for award under the 2002 Long-Term Incentive Plan. In March 2006, we adopted the 2006 Long-Term Incentive Plan which replaced the 2002 Long-Term Incentive Plan and permits the granting of a variety of similar awards to directors, officers, employees and consultants. Up to 2 million shares of our common stock plus the shares remaining for issuance under the 2002 Long-Term Incentive Plan are authorized for award under the 2006 Long-Term Incentive Plan. As of June 30, 2007, up to 1,301,144 shares of our common stock remain authorized for award under the 2006 Long-Term Incentive Plan. Our nonqualified stock options have 7 to 20 year terms and vest equally over a three year service period from the date of the grant.

We have granted restricted common stock to our directors and certain key employees. These awards generally require, among other things, that the award holder remains in service to our company during the restriction period. We have also granted stock equivalent units and long term performance units to certain key employees that are payable in cash. For 2007, the awards contain an annual stub-year grant payable in the first quarter of 2008 and a three-year grant payable in the first quarter of 2010. Payment is based on the attainment of specified performance goals. The grant value is indexed to the stock price. Each employee granted long term performance units will (based on the achievement of the applicable goals) receive a percentage of the total grant's value. In addition, we have granted SARs to certain key employees in our Asian operations that are payable in cash after a three year service period. The grant value is indexed to the stock price.

Accounting Methods -- Effective January 1, 2006, we adopted SFAS No. 123(R), "Share-Based Payment," using the modified prospective application method. Under this transition method, compensation cost recognized for the six months ended June 30, 2007 and 2006, respectively, includes the applicable amounts of: (1) compensation cost of all unvested stock-based awards granted prior to January 1, 2006, based upon the grant date fair value estimated in accordance with the original provisions of SFAS No. 123 and previously presented in pro forma footnote disclosures, and (2) compensation cost for all stock-based awards granted on or after January 1, 2006, based upon the grant date fair value estimated in accordance with the new provisions of SFAS No. 123(R).

The impact of recognizing compensation expense related to nonqualified stock options is contained in the table below.

### TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS-- (CONTINUED) (Unaudited)

For stock options awarded to retirement eligible employees we immediately accelerate the recognition of any outstanding compensation cost when employees become retiree eligible before the end of the explicit vesting period.

As of June 30, 2007, there was approximately \$5 million, net of tax, of total unrecognized compensation costs related to these stock-based awards that we expect to recognize over a weighted average period of 1.2 years.

Compensation expense for restricted stock, stock equivalent units, long term performance units and SARs, net of tax, was approximately \$3 million for the six months ended June 30, 2007 and 2006, and was recorded in selling, general, and administrative expense on the statement of income.

SFAS No. 109, "Accounting for Income Taxes," discusses the deductibility of transactions. We are allowed a tax deduction for compensation cost which is calculated as the difference between the value of the stock at the date of grant and the price upon exercise of a stock option. Under SFAS No. 123(R), excess tax benefits, which are tax benefits we may realize upon the exercise of stock options that are greater than the tax benefit recognized on the compensation cost recorded in our income statement, are recorded as an addition to paid-in capital. We would present cash retained as a result of excess tax benefits as financing cash flows. Any write-offs of deferred tax assets related to unrealized tax benefits associated with the recognized compensation cost would be reported as income tax expense.

Cash received from option exercises for the six months ended June 30, 2007, was approximately \$3 million. Stock option exercises during the first six months of 2007 generated an excess tax benefit of approximately \$3 million. Pursuant to footnote 82 of SFAS No. 123(R), this benefit was not recorded as we have federal and state net operating losses which are not currently being utilized. As a result, the excess tax benefit had no impact on our financial position or statement of cash flows.

Assumptions -- We calculated the fair values of stock option awards using the Black-Scholes option pricing model with the weighted average assumptions listed below. Determining the fair value of share-based awards requires judgment in estimating employee and market behavior. If actual results differ significantly from these estimates, stock-based compensation expense and our results of operations could be materially impacted.

SIX MONTHS

Edgar Filing: TENNECO INC - Form 10-Q

	ENDED JUNE 30,	
	2007	2006
Stock Options		
Weighted average grant date fair value, per share.....	\$9.91	\$9.27
Weighted average assumptions used:		
Expected volatility.....	38.4%	42.6%
Expected lives.....	4.1	5.1
Risk-free interest rates.....	4.7%	4.2%
Dividend yields.....	0.0%	0.0%

Effective January 1, 2006, we changed our method of determining volatility on all new options granted after that date to implied volatility rather than an analysis of historical volatility. We believe the market-based measures of implied volatility are currently the best available indicators of the expected volatility used in these estimates. The effect of this change did not have a material impact to our results of operations.

Expected lives of options are based upon the historical and expected time to post-vesting forfeiture and exercise. We believe this method is the best estimate of the future exercise patterns currently available.

The risk-free interest rates are based upon the Constant Maturity Rates provided by the U.S. Treasury. For our valuations, we used the continuous rate with a term equal to the expected life of the options.

## Edgar Filing: TENNECO INC - Form 10-Q

### TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS-- (CONTINUED) (Unaudited)

The fair value of restricted stock grants is equal to the average market price of our stock at the date of grant. As of June 30, 2007, approximately \$10 million of total unrecognized compensation costs related to restricted stock awards is expected to be recognized over a weighted-average period of approximately 2.2 years.

Long Term Performance Units and SARs -- Long term performance units and SARs are paid in cash and recognized as a liability based upon their fair value. As of June 30, 2007, approximately \$8 million of total unrecognized compensation costs is expected to be recognized over the weighted-average period of approximately 1.5 years.

(4) In March 2007 we refinanced our \$831 million senior credit facility. This transaction reduced the interest rates we pay on all portions of the facility. While the total amount of the new senior credit facility is \$830 million, approximately the same as the previous facility, we changed the components of the facility to enhance our financial flexibility. We increased the amount of commitments under our revolving loan facility from \$320 million to \$550 million, reduced the amount of commitments under our tranche B-1 letter of credit/revolving loan facility from \$155 million to \$130 million and replaced the \$356 million term loan B with a \$150 million term loan A. As of June 30, 2007, the senior credit facility consisted of a five-year, \$150 million term loan A maturing in March 2012, a five-year, \$550 million revolving credit facility maturing in March 2012, and a seven-year \$130 million tranche B-1 letter of credit/revolving loan facility maturing in March 2014.

The refinancing of the prior facility allowed us to: (i) amend the consolidated net debt to EBITDA ratio, (ii) eliminate the fixed charge coverage ratio, (iii) eliminate the restriction on capital expenditures, (iv) increase the amount of acquisitions permitted to \$250 million, (v) improve the flexibility to repurchase and retire higher cost junior debt, (vi) increase our ability to enter into capital leases, (vii) increase the ability of our foreign subsidiaries to incur debt, (viii) increase our ability to pay dividends and repurchase common stock, (ix) increase our ability to invest in joint ventures, (x) allow for the increase in the existing tranche B-1 facility and/or the term loan A or the addition of a new term loan of up to \$275 million in order to reduce our 10.25 percent senior secured notes, and (xi) make other modifications.

Following the refinancing, the term loan A facility is payable in twelve consecutive quarterly installments, commencing June 30, 2009 as follows: \$6 million due each of June 30, September 30, December 31, 2009 and March 31, 2010, \$15 million due each of June 30, September 30, December 31, 2010 and March 31, 2011, and \$17 million due each of June 30, September 30, December 31, 2011 and March 16, 2012. The revolving credit facility requires that any amounts drawn, be repaid by March 2012. Prior to that date, funds may be borrowed, repaid and reborrowed under the revolving credit facility without premium or penalty. Letters of credit may be issued under the revolving credit facility.

The tranche B-1 letter of credit/revolving loan facility requires that it be repaid by March 2014. We can borrow revolving loans and issue letters of credit under the \$130 million tranche B-1 letter of credit/revolving loan facility. The tranche B-1 letter of credit/revolving loan facility lenders have deposited \$130 million with the administrative agent, who has invested that

## Edgar Filing: TENNECO INC - Form 10-Q

amount in time deposits. We do not have an interest in any of the funds on deposit. When we draw revolving loans under this facility, the loans are funded from the \$130 million on deposit with the administrative agent. When we make repayments, the repayments are redeposited with the administrative agent.

The tranche B-1 letter of credit/revolving loan facility is reflected as debt on our balance sheet only if we borrow money under this facility or if we use the facility to make payments for letters of credit. We will not be liable for any losses to or misappropriation of any (i) return due to the administrative agent's failure to achieve the return described above or to pay all or any portion of such return to any lender under such facility or (ii) funds on deposit in such account by such lender (other than the obligation to repay funds released from such accounts and provided to us as revolving loans under such facility).

We have three fixed-to-floating interest rate swaps that effectively convert \$150 million of our 10.25 percent fixed interest rate senior secured notes into floating interest rate debt at an annual rate of LIBOR plus 5.68 percent.

18

### TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(CONTINUED) (Unaudited)

Based upon the current LIBOR rate of 5.39 percent (which is in effect until January 15, 2008) these swaps are expected to increase our interest expense by \$1 million in 2007 excluding any impact from marking the swaps to market. Since entering into these swaps, we have realized a net cumulative benefit of \$3 million through June 30, 2007, in reduced interest payments. The change in the market value of these swaps is recorded as part of interest expense with an offset to other long-term liabilities. As of June 30, 2007, the fair value of the interest rate swaps was a liability of approximately \$9 million which has been recorded in other long-term liabilities.

(5) In June 2006, the Financial Accounting Standards Board ("FASB") issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109 ("FIN 48)". FIN 48 is a new interpretation of SFAS No. 109 establishing a new model in accounting for uncertainty in income taxes recognized in financial statements. FIN 48 prescribes a recognition threshold and measurement attributes for financial statement disclosure of tax positions taken or expected to be taken on tax returns. Under FIN 48, the impact of an uncertain income tax position on the income tax return must be recognized at the largest amount that is more-likely-than-not to be sustained upon audit by the relevant taxing authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained. In addition, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. In May 2007, the FASB issued Interpretation No. 48-1, "Definition of Settlement in FASB Interpretation No. 48". FIN 48-1 is effective for fiscal years beginning after December 15, 2006 and provides guidance on how a reporting entity should determine when a tax position is effectively settled.

We adopted the provisions of FIN 48 on January 1, 2007. The total amount of unrecognized tax benefits as of the date of adoption was \$42 million. As a

## Edgar Filing: TENNECO INC - Form 10-Q

result of the implementation of FIN 48, we recognized an increase to retained earnings in an amount less than \$1 million and a decrease to our accruals for uncertain tax positions and related interest and penalties by a corresponding amount.

Included in the balance of unrecognized tax benefits at January 1, 2007, are \$26 million of tax benefits that, if recognized, would impact the effective tax rate. Also included in the balance of the unrecognized tax benefits at January 1, 2007, are \$14 million of tax benefits that, if recognized, would result in adjustments to other tax accounts, primarily deferred taxes.

We recognize interest related to unrecognized tax benefits in interest expense and penalties in the provision for income taxes. Upon adoption of FIN 48 on January 1, 2007, we have an accrual for interest and penalties of \$3 million.

Included in the balance of unrecognized tax benefits at January 1, 2007, are \$1 million of unrecognized tax benefits that are expected to settle or for which the statute of limitations will expire within the next twelve months.

We are subject to taxation in the U.S. and various states and foreign jurisdictions. Canada and Germany are our significant tax jurisdictions where we have had recent audit activity. A Canadian tax examination for years ended 2002-2004 has just been initiated. In 2006 we concluded a German tax examination for years ended 1998-2001. We have accrued the appropriate amounts and have made the required cash payments to the German tax authorities. With few exceptions, we are no longer subject to U.S. federal, state, local or foreign examinations by tax authorities for years before 2002. However, in certain jurisdictions tax authorities generally have the right, without regard to whether the year is open, to examine years in which a loss carryover originates in the year the loss carryover is used.

(6) Over the past several years we have adopted plans to restructure portions of our operations. These plans were approved by the Board of Directors and were designed to reduce operational and administrative overhead costs throughout the business. Prior to the change in accounting required for exit or disposal activities, we recorded charges to income related to these plans for costs that did not benefit future activities in the period in which the plans were finalized and approved, while actions necessary to affect these restructuring plans occurred over future periods in accordance with established plans.

19

### TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(CONTINUED) (Unaudited)

Our recent restructuring activities began in the fourth quarter of 2001, when our Board of Directors approved a restructuring plan, a project known as Project Genesis, which was designed to lower our fixed costs, relocate capacity, reduce our work force, improve efficiency and utilization, and better optimize our global footprint. We have subsequently engaged in various other restructuring projects related to Project Genesis. We incurred \$27 million in restructuring and restructuring-related costs during 2006, of which \$23 million was recorded in cost of sales and \$4 million was recorded in selling, general and administrative expense. In the second quarter of 2007, we incurred \$2 million in restructuring and restructuring-related costs which was recorded in cost of sales. For the first six months of 2007, we incurred \$4 million in

## Edgar Filing: TENNECO INC - Form 10-Q

restructuring and restructuring-related costs of which \$3 million was recorded in cost of sales and \$1 million in selling, general and administrative expense. Since Project Genesis was initiated, we have incurred costs of \$134 million through June 30, 2007.

Under the terms of our amended and restated senior credit agreement that took effect on March 16, 2007, we are allowed to exclude \$80 million of cash charges and expenses, before taxes, related to cost reduction initiatives incurred after March 16, 2007 from the calculation of the financial covenant ratios required under our senior credit facility. As of June 30, 2007, we have excluded \$4 million in allowable charges relating to restructuring initiatives against the \$80 million available under the terms of the March 2007 amended and restated senior credit facility.

In addition to the announced actions, we will continue to evaluate additional opportunities and expect that we will initiate actions that will reduce our costs through implementing the most appropriate and efficient logistics, distribution and manufacturing footprint for the future. We expect to continue to undertake additional restructuring actions as deemed necessary, however, there can be no assurances we will undertake such actions. Actions that we take, if any, will require the approval of our Board of Directors, or its authorized committee. We plan to conduct any workforce reductions that result in compliance with all legal and contractual requirements including obligations to consult with workers' councils, union representatives and others.

(7) We are subject to a variety of environmental and pollution control laws and regulations in all jurisdictions in which we operate. We expense or capitalize, as appropriate, expenditures for ongoing compliance with environmental regulations that relate to current operations. We expense costs related to an existing environmental condition caused by past operations that do not contribute to current or future revenue generation. We record liabilities when environmental assessments indicate that remedial efforts are probable and the costs can be reasonably estimated. Estimates of the liability are based upon currently available facts, existing technology, and presently enacted laws and regulations taking into consideration the likely effects of inflation and other societal and economic factors. We consider all available evidence including prior experience in remediation of contaminated sites, other companies' cleanup experiences and data released by the United States Environmental Protection Agency or other organizations. These estimated liabilities are subject to revision in future periods based on actual costs or new information. Where future cash flows are fixed or reliably determinable, we have discounted the liabilities. All other environmental liabilities are recorded at their undiscounted amounts. We evaluate recoveries separately from the liability and, when they are assured, recoveries are recorded and reported separately from the associated liability in our financial statements.

As of June 30, 2007, we are designated as a potentially responsible party in one Superfund site. Including the Superfund site, we may have the obligation to remediate current or former facilities, and we estimate our share of environmental remediation costs at these facilities to be approximately \$9 million. For the Superfund site and the current and former facilities, we have established reserves that we believe are adequate for these costs. Although we believe our estimates of remediation costs are reasonable and are based on the latest available information, the cleanup costs are estimates and are subject to revision as more information becomes available about the extent of remediation required. At some sites, we expect that other parties will contribute to the remediation costs. In addition, at the Superfund site, the Comprehensive Environmental Response, Compensation and Liability Act provides that our liability could be joint and several, meaning that we could be required to pay in excess of our share of remediation costs. Our understanding of the financial strength of other potentially responsible parties at the

## TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(CONTINUED)  
(Unaudited)

Superfund site, and of other liable parties at our current and former facilities, has been considered, where appropriate, in our determination of our estimated liability. We believe that any potential costs associated with our current status as a potentially responsible party in the Superfund site, or as a liable party at our current or former facilities, will not be material to our results of operations or consolidated financial position.

We also from time to time are involved in legal proceedings, claims or investigations that are incidental to the conduct of our business. Some of these proceedings allege damages against us relating to environmental liabilities (including toxic tort, property damage and remediation), intellectual property matters (including patent, trademark and copyright infringement, and licensing disputes), personal injury claims (including injuries due to product failure, design or warnings issues, and other product liability related matters), taxes, employment matters, and commercial or contractual disputes, sometimes related to acquisitions or divestitures. We vigorously defend ourselves against all of these claims. In future periods, we could be subjected to cash costs or non-cash charges to earnings if any of these matters is resolved on unfavorable terms. However, although the ultimate outcome of any legal matter cannot be predicted with certainty, based on current information, including our assessment of the merits of the particular claim, we do not expect that these legal proceedings or claims will have any material adverse impact on our future consolidated financial position or results of operations.

In addition, we are subject to a number of lawsuits initiated by a significant number of claimants alleging health problems as a result of exposure to asbestos. A small percentage of claims have been asserted by railroad workers alleging exposure to asbestos products in railroad cars manufactured by The Pullman Company, one of our subsidiaries. Nearly all of the claims are related to alleged exposure to asbestos in our automotive emission control products. Only a small percentage of these claimants allege that they were automobile mechanics and a significant number appear to involve workers in other industries or otherwise do not include sufficient information to determine whether there is any basis for a claim against us. We believe, based on scientific and other evidence, it is unlikely that mechanics were exposed to asbestos by our former muffler products and that, in any event, they would not be at increased risk of asbestos-related disease based on their work with these products. Further, many of these cases involve numerous defendants, with the number of each in some cases exceeding 200 defendants from a variety of industries. Additionally, the plaintiffs either do not specify any, or specify the jurisdictional minimum, dollar amount for damages. As major asbestos manufacturers continue to go out of business or file for bankruptcy, we may experience an increased number of these claims. We vigorously defend ourselves against these claims as part of our ordinary course of business. In future periods, we could be subject to cash costs or non-cash charges to earnings if any of these matters is resolved unfavorably to us. To date, with respect to claims that have proceeded sufficiently through the judicial process, we have regularly achieved favorable resolution. Accordingly, we presently believe that these asbestos-related claims will not have a material adverse impact on our future financial condition or results of operations.

We provide warranties on some of our products. The warranty terms vary but

## Edgar Filing: TENNECO INC - Form 10-Q

range from one year up to limited lifetime warranties on some of our premium aftermarket products. Provisions for estimated expenses related to product warranty are made at the time products are sold or when specific warranty issues are identified on OE products. These estimates are established using historical information about the nature, frequency, and average cost of warranty claims. We actively study trends of our warranty claims and take action to improve product quality and minimize warranty claims. We believe that the warranty reserve is appropriate; however, actual claims incurred could differ from the original estimates, requiring adjustments to the reserve. The reserve is included in both current and long-term liabilities on the balance sheet.

21

### TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(CONTINUED) (Unaudited)

Below is a table that shows the activity in the warranty accrual accounts:

	SIX MONTHS ENDED JUNE 30,	
	2007	2006
	(MILLIONS)	
Beginning Balance January 1,.....	\$25	\$22
Accruals related to product warranties.....	7	9
Reductions for payments made.....	(5)	(9)
	---	---
Ending Balance June 30,.....	\$27	\$22
	===	===

The current year increase in the warranty accrual is primarily driven by higher unit pricing and product mix in the North American aftermarket.

(8) In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurement." This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We do not expect the adoption of this statement to have a material impact to our financial statements.

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R)." Part of this Statement was effective as

## Edgar Filing: TENNECO INC - Form 10-Q

of December 31, 2006, and requires companies that have defined benefit pension plans and other postretirement benefit plans to recognize the funded status of those plans on the balance sheet on a prospective basis from the effective date. The funded status of these plans is determined as of the plans' measurement dates and represents the difference between the amount of the obligations owed to participants under each plan (including the effects of future salary increases for defined benefit plans) and the fair value of each plan's assets dedicated to paying those obligations. To record the funded status of those plans, unrecognized prior service costs and net actuarial losses experienced by the plans will be recorded in the Accumulated Other Comprehensive Loss section of shareholders' equity on the balance sheet. The initial adoption as of December 31, 2006 resulted in a reduction of Accumulated Other Comprehensive Loss in shareholders' equity of \$59 million.

In addition, SFAS No. 158 requires that companies using a measurement date for their defined benefit pension plans and other postretirement benefit plans other than their fiscal year end, change the measurement date to the fiscal year end effective for fiscal years ending after December 15, 2008. Effective January 1, 2007, we elected to early adopt the measurement date provision of SFAS No. 158. Adoption of this part of the statement was not material to our financial position and results of operations. See Note 11.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." This statement permits companies to choose to measure at fair value many financial instruments and certain other items that are not currently required to be measured at fair value. SFAS No. 159 is effective for financial statements issued for fiscal years beginning on or after November 15, 2007. We do not believe the statement will have a material effect on our financial statements and related disclosures.

In April 2007, the FASB issued Interpretation No. 39-1, "Amendment of FASB Interpretation No. 39". This amendment allows a reporting entity to offset fair value amounts recognized for derivative instruments with fair value amounts recognized for the right to reclaim or realize cash collateral. Additionally, this amendment requires disclosure of the accounting policy on the reporting entity's election to offset or not offset amounts for derivative instruments. FIN 39-1 is effective for fiscal years beginning after November 15, 2007. We do not expect the adoption of FIN 39-1 to have a material impact on our financial statements.

22

### TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(CONTINUED) (Unaudited)

In May 2007, the FASB issued Interpretation No. 48-1, "Definition of Settlement in FASB Interpretation No. 48". FIN 48-1 is effective for fiscal years beginning after December 15, 2006 and provides guidance on how a reporting entity should determine when a tax position is effectively settled. We have applied FIN 48-1 in the current quarter. The adoption of FIN 48-1 did not have a material impact to our financial statements and related disclosures. See Note 5.

In June 2007, the Emerging Issues Task Force ("EITF") issued EITF 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards". EITF 06-11 provides the final consensus on the application of paragraphs 62 and 63 of SFAS 123(R) on the accounting for income tax benefits relating to the payment of dividends on equity-classified employee share-based payment awards

## Edgar Filing: TENNECO INC - Form 10-Q

that are charged to retained earnings. EITF 06-11 affirms that the realized income tax benefit from dividends or dividend equivalents that are charged to retained earnings for equity classified nonvested equity shares, nonvested equity share units, and outstanding equity share options should be recognized as an increase in additional paid-in-capital. Additionally, EITF 06-11 provides guidance on the amount of tax benefits from dividends that are reclassified from additional paid-in-capital to the income statement when an entity's estimate of forfeitures changes. EITF 06-11 is effective prospectively for the income tax benefits that result from dividends on equity-classified employee share-based payment awards that are declared in fiscal years beginning after December 15, 2007. Because we currently do not pay dividends on our common stock, we do not expect the adoption of EITF 06-11 to have an impact on our financial statements.

In June 2007, the EITF issued EITF 07-3, "Accounting for Nonrefundable Advance Payments for Goods or Services Received for Use in Future Research and Development Activities". EITF 07-3 requires the deferral and capitalization of nonrefundable advance payments for goods and services that an entity will use in research and development activities pursuant to an executory contractual agreement. Expenditures which are capitalized under EITF 07-3 should be expensed as the goods are delivered or the related services are performed. EITF 07-3 is effective prospectively for fiscal years beginning after December 15, 2007 and interim periods within those fiscal years. EITF 07-3 is applicable to new contracts entered into on or after the effective date of this Issue. We do not expect the adoption of EITF 07-3 to have a material impact on our financial statements.

(9) We have an agreement to sell an interest in some of our U.S. trade accounts receivable to a third party. Receivables become eligible for the program on a daily basis, at which time the receivables are sold to the third party, net of a factoring discount, through a wholly-owned subsidiary. Under this agreement, as well as individual agreements with third parties in Europe, we have sold accounts receivable of \$148 million at June 30, 2007 and 2006. We recognized a loss of approximately \$5 million for the six months ended June 30, 2007, and approximately \$4 million for the six months ended June 30, 2006, on these sales of trade accounts, representing the discount from book values at which these receivables were sold to the third party. The discount rate varies based on funding cost incurred by the third party, which has averaged approximately six percent during 2007. We retain ownership of the remaining interest in the pool of receivables not sold to the third party. The retained interest represents a credit enhancement for the program. We value the retained interest based upon the amount we expect to collect from our customers, which approximates book value.

23

### TENNECO INC. AND CONSOLIDATED SUBSIDIARIES

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(CONTINUED) (Unaudited)

Effective January 1, 2007, we froze our defined benefit plans and replaced them with additional contributions under defined contribution plans for nearly all U.S.-based salaried and non-union hourly employees.

In September 2006, the FASB issued Statement No. 158 "Employers' Accounting for Defined Benefit and Other Postretirement Plans." Effective January 1, 2007, Tenneco elected to early-adopt the measurement date provisions of SFAS No. 158.

## Edgar Filing: TENNECO INC - Form 10-Q

As a result, during the first quarter of 2007, the following adjustments were made to retained earnings (accumulated deficit) and other comprehensive income (both net of tax effects):

	US	FOREIGN
	---	-----
Retained earnings (accumulated deficit).....	(3)	(2)
Accumulated other comprehensive income.....	8	6

For the six months ended June 30, 2007, we made pension contributions of approximately \$4 million for our domestic pension plans and \$8 million for our foreign pension plans. Based on current actuarial estimates, we believe we will be required to make approximately \$17 million in contributions for the remainder of 2007.

We made postretirement contributions of approximately \$5 million during the first six months of 2007. Based on current actuarial estimates, we believe we will be required to make approximately \$5 million in contributions for the remainder of 2007.

(12) We occasionally provide guarantees that could require us to make future payments in the event that the third party primary obligor does not make its required payments. We have not recorded a liability for any of these guarantees. The only third party guarantee we have made is the performance of lease obligations by a former affiliate. Our maximum liability under this guarantee was less than \$1 million at June 30, 2007 and 2006, respectively. We have no recourse in the event of default by the former affiliate. However, we have not been required to make any payments under this guarantee.

Additionally, we have from time to time issued guarantees for the performance of obligations by some of our subsidiaries, and some of our subsidiaries have guaranteed our debt. All of our existing and future material domestic wholly-owned subsidiaries fully and unconditionally guarantee our senior credit facility, our senior secured notes and our senior subordinated notes on a joint and several basis. The arrangement for the senior credit facility is also secured by first-priority liens on substantially all our domestic assets and pledges of 66 percent of the stock of certain first-tier foreign subsidiaries. The arrangement for the \$475 million senior secured notes is also secured by second-priority liens on substantially all our domestic assets, excluding some of the stock of our domestic subsidiaries. No assets or capital stock of our direct or indirect foreign subsidiaries secure these notes. You should also read Note 13 where we present the Supplemental Guarantor Condensed Consolidating Financial Statements.

## Edgar Filing: TENNECO INC - Form 10-Q

We have issued guarantees through letters of credit in connection with some obligations of our affiliates. We have issued \$18 million in letters of credit to support some of our subsidiaries' insurance arrangements. In addition, we have issued \$6 million in guarantees through letters of credit to guarantee other obligations of subsidiaries primarily related to environmental remediation activities.

Negotiable Financial Instruments -- One of our European subsidiaries receives payment from one of its OE customers whereby the account receivables are satisfied through the delivery of negotiable financial instruments. These financial instruments are then sold at a discount to a European bank. The sales of these financial instruments are not included in the account receivables sold. Any of these financial instruments which were not sold as of June 30, 2007 and 2006 are classified as other current assets and are excluded from our definition of cash equivalents. We had sold approximately \$21 million of these instruments at June 30, 2007 and \$36 million at June 30, 2006.

In certain instances several of our Chinese subsidiaries receive payment from OE customers and satisfy vendor payments through the receipt and delivery of negotiable financial instruments. Financial instruments used to satisfy vendor payables and not redeemed totaled \$11 million and \$5 million at June 30, 2007 and 2006, respectively, and were classified as notes payable. Financial instruments received from OE customers and not redeemed totaled \$6 million and \$11 million at June 30, 2007 and 2006, respectively, and were classified as other current assets. One of our Chinese subsidiaries is required to maintain a cash balance at a financial institution issuing the financial instruments which are used to satisfy vendor payments. The balance was less than \$1 million dollars at June 30, 2007 and 2006, respectively, and was classified as cash and cash equivalents.

(13) We are a global manufacturer with three geographic reportable segments: (1) North America, (2) Europe, South America and India ("Europe"), and (3) Asia Pacific. Each segment manufactures and distributes ride control and emission control products primarily for the automotive industry. We have not aggregated individual operating segments within these reportable segments. We evaluate segment performance based primarily on income before interest expense, income taxes, and minority interest. Products are transferred between segments and geographic areas on a basis intended to reflect as nearly as possible the "market value" of the products.

(14) Supplemental guarantor condensed financial statements are presented below:

Basis of Presentation

Subject to limited exceptions, all of our existing and future material domestic wholly owned subsidiaries (which are referred to as the Guarantor Subsidiaries) fully and unconditionally guarantee our senior subordinated notes due 2014 and our senior secured notes due 2013 on a joint and several basis. We have not presented separate financial statements and other disclosures concerning each of the Guarantor Subsidiaries because management has determined that such information is not material to the holders of the notes. Therefore, the Guarantor Subsidiaries are combined in the presentation below.

These condensed consolidating financial statements are presented on the equity method. Under this method, our investments are recorded at cost and adjusted for our ownership share of a subsidiary's cumulative results of operations, capital contributions and distributions, and other equity changes. You should read the condensed consolidating financial statements of the Guarantor Subsidiaries in connection with our consolidated financial statements and related notes of which this note is an integral part.

Distributions

There are no significant restrictions on the ability of the Guarantor Subsidiaries to make distributions to us.

### ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### EXECUTIVE SUMMARY

We are one of the world's leading manufacturers of automotive emission control and ride control products and systems. We serve both original equipment (OE) vehicle designers and manufacturers and the repair and replacement markets, or aftermarket, globally through leading brands, including Monroe(R), Rancho(R), Clevite(R) Elastomers and Fric Rot(TM) ride control products and Walker(R), Fonos(TM) and Gillet(TM) emission control products. Worldwide we serve more than 35 different original equipment manufacturers, and our products or systems are included on nine of the top 10 passenger car models produced for sale in Europe and nine of the top 10 light truck and SUV models produced for sale in North America for 2006. Our aftermarket customers are comprised of full-line and specialty warehouse distributors, retailers, jobbers, installer chains and car dealers. We operate more than 80 manufacturing facilities worldwide and employ approximately 19,000 people to service our customers' demands.

Factors that are critical to our success include winning new business awards, managing our overall global manufacturing footprint to ensure proper placement and workforce levels in line with business needs, maintaining competitive wages and benefits, maximizing efficiencies in manufacturing processes, fixing or eliminating unprofitable businesses and reducing overall costs. In addition, our ability to adapt to key industry trends, such as the consolidation of OE customers, a shift in consumer preferences to other vehicles in response to higher fuel costs and other economic and social factors, increasing technologically sophisticated content, changing aftermarket distribution channels, increasing environmental standards and extended product life of automotive parts, also play a critical role in our success. Other factors that are critical to our success include adjusting to industry and economic challenges such as increases in the cost of raw materials and our ability to successfully reduce the impact of any such cost increases through material substitutions, cost reduction initiatives and other methods.

We have a substantial amount of indebtedness. As such, our ability to generate cash -- both to fund operations and service our debt -- is also a significant area of focus for our company. See "Liquidity and Capital Resources" below for further discussion of cash flows.

The numbers reported as of June 30, 2006 and for the three and six months then ended have been restated. See Note 2.

Total revenues for the second quarter of 2007 were \$1,663 million, compared to \$1,221 million in the second quarter of 2006. Excluding the impact of currency and substrate sales, revenue was up \$156 million, from \$1,008 million to \$1,164 million, driven primarily by large North American OE emission control platform launches, as well as continued new business and higher OE production rates in European OE businesses and expanding markets like China. In addition to the benefit of the new launches, our geographic balance, broad platform diversity and wide customer base helped offset the overall North American industry production decline.

## Edgar Filing: TENNECO INC - Form 10-Q

Gross margin in the second quarter of 2007 was 17.2 percent, down 3.3 percentage points from 20.5 percent in 2006. Substantially higher substrate sales, which typically carry lower margins, primarily from newly launched diesel truck platforms in North America, reduced OE ride control sales for commercial vehicles due to the significant production decline in that industry, and a shift toward a lower percentage of total revenue generated by higher margin aftermarket business all negatively impacted overall gross margin. Increased steel and other material costs were offset by cost reduction initiatives, material substitutions, low cost country sourcing, steel price recovery efforts with aftermarket and OE customers, as well as improved efficiencies from Lean manufacturing and Six Sigma programs.

We reported selling, general, administrative and engineering expenses in the second quarter of 2007 at 8.0 percent of revenues, as compared to 10.5 percent of revenues for the second quarter of 2006. The improvement was due to leveraging our higher revenues and keeping our SG&A expenses relatively flat to last year, while continuing to invest in engineering and technology development for OE emission control and ride control businesses globally.

38

Earnings before interest expense, taxes and minority interest ("EBIT") was \$103 million for the second quarter of 2007, up \$30 million from the \$73 million reported in the second quarter of 2006. Global sales growth on OE platforms featuring advanced technology content, operational efficiencies and lower costs for restructuring and new aftermarket customer changeovers drove the year-over-year improvement.

Total revenues for the first six months of 2007 were \$3,063 million, compared to \$2,352 million for the first six months of 2006. Excluding the impact of currency and substrate sales, revenue was up \$241 million, from \$1,943 million to \$2,184 million, driven primarily by new launches in North America and strong OE volumes in Europe. In addition to the benefit of the new launches, our geographic balance and diverse customer base helped offset the overall North American industry production decline.

Gross margin in the first half of 2007 was 16.6 percent, down 3.0 percentage points from 19.6 percent in 2006. Higher substrate sales, which typically carry lower margins, driven by significant diesel platform launches in North America diluted gross margin. As these high volume new platforms launched, we also saw our revenue mix shift from higher-margin aftermarket revenues to OE revenues. Increased steel and other material costs were more than offset by cost reduction initiatives, material substitutions, low cost country sourcing, steel price recovery efforts with aftermarket and OE customers, as well as improved efficiencies from Lean manufacturing and Six Sigma programs.

We reported selling, general, administrative and engineering expenses in the first six months of 2007 at 8.3 percent of revenues, as compared to 10.7 percent of revenues for the first six months of 2006. The improvement was due to leveraging our higher revenues and reducing our SG&A expenses, while continuing to increase our investment in engineering and technology development to prepare to meet customer needs for more stringent environmental regulations.

EBIT was \$152 million for the first half of 2007, up \$38 million from the \$114 million for 2006. Global sales growth on OE platforms, benefits from the company's ongoing manufacturing efficiency programs, favorable currency and lower restructuring charges and aftermarket customer changeover costs more than offset higher material costs and reduced North American industry production

## Edgar Filing: TENNECO INC - Form 10-Q

volumes.

### RESULTS FROM OPERATIONS

#### NET SALES AND OPERATING REVENUES FOR THE THREE MONTHS ENDED JUNE 30, 2007 AND 2006

The following tables reflect our revenues for the second quarters of 2007 and 2006. We present these reconciliations of revenues in order to reflect the trend in our sales in various product lines and geographic regions separately from the effects of doing business in currencies other than the U.S. dollar. We have not reflected any currency impact in the 2006 table since this is the base period for measuring the effects of currency during 2007 on our operations. We believe investors find this information useful in understanding period-to-period comparisons in our revenues.

Additionally, we show the component of our revenue represented by substrate sales in the following table. While we generally have primary design, engineering and manufacturing responsibility for OE emission control systems, we do not manufacture substrates. Substrates are porous ceramic filters coated with a catalyst -- precious metals such as platinum, palladium and rhodium. These are supplied to us by Tier 2 suppliers and directed by our OE customers. We generally earn a small margin on these components of the system. As the need for more sophisticated emission control solutions increases to meet more stringent environmental regulations, and as we capture more diesel aftertreatment business, these substrate components have been increasing as a percentage of our revenue. While these substrates dilute our gross margin percentage they are a necessary component of an emission control system. We view the growth of substrates as a key indicator that our value add content in an emission control system is moving toward the higher technology hot-end gas and diesel business.

Our value-add content in an emission control system includes designing the system to meet environmental regulations through integration of the substrates into the system, maximizing use of thermal energy to heat up the catalyst quickly, efficiently managing airflow to reduce back pressure as the exhaust stream moves past the catalyst, managing the expansion and contraction of the emission control system components due to temperature extremes experienced by an emission control system, using advanced acoustic engineering tools to design the desired exhaust

39

sound, minimizing the opportunity for the fragile components of the substrate to be damaged when we integrate it into the emission control system and reducing unwanted noise, vibration and harshness transmitted through the emission control system.

We present these substrate sales separately in the following table because we believe investors utilize this information to understand the impact of this portion of our revenues on our overall business and because it removes the impact of potentially volatile precious metals pricing from our revenues. While our original equipment customers generally assume the risk of precious metals pricing volatility, it impacts our reported revenues. Excluding "substrate" catalytic converter and diesel particulate filter sales removes this impact.

THREE MONTHS ENDED JUNE 30, 2007

	=====	===	=====	=====	=====

Revenues from our North American operations increased \$287 million in the second quarter of 2007 compared to the same period last year. Higher sales from new North American OE platform launches more than offset lower aftermarket revenues. North American OE emission control revenues were up \$293 million in the second quarter of 2007. Excluding substrate sales, revenues were up \$88 million compared to last year. This increase was primarily due to significant new OE platform launches which included the Ford Super Duty gas and diesel pick up trucks, GM's three-quarter ton gasoline powered pick-up trucks, GM's light duty pick-up trucks and vans with the Duramax diesel engines, GM's new Lambda crossover, the International Truck and Engine medium duty diesel platform, Toyota's Tundra gasoline pick-up truck and the Dodge Ram three-quarter ton diesel pick-up truck. North American OE ride control revenues for the second quarter of 2007 were up \$1 million from the prior year. Increased ride-control content on the GMT900 platform and strong sales on Ford's Super Duty truck offset lower heavy duty and commercial vehicle volumes. Our total North American OE revenues, excluding substrate sales and currency, increased 29 percent in the second quarter of 2007 compared to second quarter of 2006 despite the North American light vehicle production rate decrease of three percent. Aftermarket revenues for North America were \$149 million in the second quarter of 2007, a decrease of \$7 million compared to the prior year, driven by lower volumes in

## Edgar Filing: TENNECO INC - Form 10-Q

both product lines due to soft market conditions. These volume decreases were partially offset by price increases to recover steel costs. Aftermarket ride control revenues decreased three percent in the second quarter of 2007 while aftermarket emission control revenues decreased 11 percent in the second quarter of 2007.

Our European, South American and Indian segment's revenues increased \$122 million, or 20 percent, in the second quarter of 2007 compared to last year. The second quarter total European light vehicle industry production increased four percent from the second quarter of 2006. Europe OE emission control revenues of \$406 million in the

41

second quarter of 2007 were up 29 percent as compared to the second quarter of last year. Excluding a \$17 million increase in substrate sales and \$23 million due to the impact of currency, Europe OE emission control revenues increased 27 percent over 2006, due to a growing position on the hot-end of exhaust platforms. In addition, higher volumes on the BMW 3-Series, Volvo C30 hatchback, PSA Picasso, Mercedes Benz E - Class and Ford Mondeo drove the improvement. Europe OE ride control revenues of \$107 million in the second quarter of 2007 were up nine percent year-over-year. Excluding currency, revenues increased by two percent in the 2007 second quarter due to favorable volumes on the Ford Focus, VW Transporter and Renault's Dacia Logan, partially offset by lower volumes on the Renault Scenic and Audi A6. European aftermarket revenues increased \$6 million in the second quarter of 2007 compared to last year. When adjusted for currency, aftermarket revenues were relatively flat year over year. Excluding the \$4 million impact of currency, ride control aftermarket revenues were up six percent due to strong volumes and improved pricing. Emission control aftermarket revenues were down six percent, excluding \$4 million in currency benefit, due to lower volumes which more than offset improved pricing. South American and Indian revenues were \$81 million during the second quarter of 2007, compared to \$66 million in the prior year. Stronger OE and aftermarket sales and currency appreciation drove this increase.

Revenues from our Asia Pacific segment increased \$33 million to \$135 million in the second quarter of 2007 compared to the same period last year. Excluding the impact of substrate sales and currency, revenues increased to \$92 million from \$78 million in the prior year. Asian revenues for the second quarter of 2007 were \$85 million, up 48 percent from last year. This increase was primarily due to higher OE sales in China driven by new launches and higher emission control volumes on existing platforms. Second quarter revenues for Australia increased 14 percent to \$50 million. Excluding higher substrate sales and favorable currency of \$6 million, Australian revenue was down \$2 million due to lower volumes.

	=====	===	=====	=====	=====

Revenues from our North American operations increased \$416 million in the first six months of 2007 compared to the same period last year. Higher sales from new North American OE platform launches more than offset lower aftermarket revenues. North American OE emission control revenues were up \$426 million in the first six months of 2007. Excluding substrate sales, revenues were up \$121 million compared to last year. This increase was primarily due to significant new OE platform launches as discussed in the three month discussion above. North American OE ride control revenues for the first six months of 2007 were up \$3 million from the prior year. Increased ride-control content on the GMT900 platform more than offset lower heavy duty and commercial vehicle volumes. Our total North American OE revenues, excluding substrate sales and currency, increased 20 percent in the first six months of 2007 compared to the first six months of 2006 despite the North American light vehicle production rate decrease of five percent. Aftermarket revenues for North America were \$283 million in the first six months of 2007, a decrease of \$13 million compared to the prior year, driven by lower volumes in both product lines due to soft market conditions. These volume decreases were partially offset by price increases to recover steel costs. Aftermarket ride control revenues decreased two percent in the first six months of 2007 while aftermarket emission control revenues decreased 11 percent in the first six months of 2007.

Our European, South American and Indian segment's revenues increased \$239 million, or 21 percent, in the first six months of 2007 compared to last year. The first six months total European light vehicle industry production increased five percent from the first six months of 2006. Europe OE emission control revenues of \$793 million in the

Edgar Filing: TENNECO INC - Form 10-Q

first six months of 2007 were up 31 percent as compared to the first six months of last year. Excluding a \$41 million increase in substrate sales and \$52 million due to the impact of currency, Europe OE emission control revenues increased 24 percent over 2006, due to a growing position on the hot-end of exhaust platforms, new launches and higher OE production levels as discussed in the three month discussion above. Europe OE ride control revenues of \$214 million in the first six months of 2007 were up 11 percent year-over-year. Excluding currency, revenues increased by three percent in the the first six months of 2007 due to improved volumes on the Ford Focus and the Audi A6 for both conventional and electronic shocks, and the Ford Galaxy and Mondeo for electronic shocks. European aftermarket revenues increased \$11 million in the first six months of 2007 compared to last year. When adjusted for currency, aftermarket revenues were down one percent. Excluding the \$6 million impact of currency, ride control aftermarket revenues were up four percent due to strong volumes and improved pricing. Emission control aftermarket revenues were down six percent, excluding \$8 million in currency benefit, due to lower volumes which more than offset improved pricing. South American and Indian revenues were \$151 million during the first six months of 2007, compared to \$131 million in the prior year. Stronger OE and aftermarket sales and currency appreciation drove this increase.

Revenues from our Asia Pacific segment, increased \$56 million to \$248 million in the first six months of 2007 compared to the same period last year. Excluding the impact of substrate sales and currency, revenues increased to \$171 million from \$147 million in the prior year. Asian revenues for the first six months of 2007 were \$155 million, up 44 percent from last year. This increase was primarily due to higher OE sales in China driven by new launches and higher emission control volumes on existing platforms. Revenues for the first six months of 2007 for Australia increased 10 percent to \$93 million. Excluding higher substrate sales and favorable currency of \$9 million, Australian revenue was down \$3 million due to lower volumes.

EARNINGS BEFORE INTEREST EXPENSE, INCOME TAXES AND MINORITY INTEREST ("EBIT")  
FOR THE THREE MONTHS ENDED JUNE 30, 2007 AND 2006

	THREE MONTHS ENDED JUNE 30, 2007	AS RESTATED ----- THREE MONTHS ENDED JUNE 30, 2006	CHANGE -----
	(MILLIONS)

(1) Represents costs associated with changing new aftermarket customers from their prior suppliers to an inventory of our products. Although our aftermarket business regularly incurs changeover costs, we specifically identify

44

in the table above those changeover costs that, based on the size or number of customers involved, we believe are of an unusual nature for the quarter in which they were incurred.

EBIT for North American operations increased to \$50 million in the second quarter of 2007, from \$37 million one year ago. Strong OE emission control volumes impacted EBIT by \$11 million, particularly the efficient ramp-up on key emission control truck platforms, lower selling, general, and administrative expenses, manufacturing efficiencies driven by Lean and Six Sigma and reduced restructuring charges of \$4 million drove the increase. These improvements were partially offset by higher steel costs of \$11 million, increased spending on engineering of \$4 million and a softer aftermarket. Included in North America's second quarter 2006 EBIT was \$4 million in restructuring and restructuring-related costs and \$6 million of changeover costs for new aftermarket customers.

Our European, South American and Indian segment's EBIT was \$45 million for the second quarter of 2007 compared to \$34 million during the same period last year. Higher European OE volumes on existing business and new platform launches combined for an EBIT increase of \$8 million, manufacturing efficiencies, as well as favorable currency of \$3 million drove the increase. These increases were partially offset by \$6 million of higher steel costs. Restructuring and restructuring-related expenses of \$2 million were included in second quarter of 2007 compared to \$3 million in the second quarter of 2006.

## Edgar Filing: TENNECO INC - Form 10-Q

EBIT for our Asia Pacific segment in the second quarter of 2007 was \$8 million compared to \$2 million in the second quarter of 2006. Increased OE production and new launches in China, reduced head count in Australia due to our 2006 restructuring activities and favorable currency of \$1 million was partially offset by \$1 million of increased steel costs and reduced light vehicle production in Australia. Included in the second quarter of 2006's EBIT was \$1 million in restructuring and restructuring related expenses.

Currency had a \$5 million favorable impact on overall company EBIT for the three months ended June 30, 2007, as compared to the prior year.

### EBIT AS A PERCENTAGE OF REVENUE

	THREE MONTHS ENDED JUNE 30,	
	2007	2006
	----	----
North America.....	6%	7%
Europe, South America & India.....	6%	6%
Asia Pacific.....	6%	2%
Total Tenneco.....	6%	6%

In North America, EBIT as a percentage of revenue for the second quarter of 2007 was one percentage point less than last year. The benefits from our new platform launches, lower selling, general, and administrative expenses and manufacturing efficiencies were more than offset by the margin impact from an increase in lower margin substrate sales, lower OE industry volumes, higher material costs, increased investments in engineering and soft aftermarket conditions. During the second quarter of 2007, North American results also included lower restructuring and restructuring-related charges and aftermarket customer changeover costs. In Europe, South America and India, EBIT margin for the second quarter of 2007 was even with prior year. Higher European OE volumes on existing business, new platform launches, favorable currency and manufacturing efficiencies were offset by higher material costs. Restructuring and restructuring-related expenses were \$1 million less than the prior year. EBIT as a percentage of revenue for our Asia Pacific segment increased four percentage points in the second quarter of 2007 versus the prior year. Volume increases in China, favorable currency and benefits from last year's restructuring activities drove the improvement. Lower restructuring and restructuring-related expenses also benefited EBIT margin.

(1) Represents costs associated with changing new aftermarket customers from their prior suppliers to an inventory of our products. Although our aftermarket business regularly incurs changeover costs, we specifically identify in the table above those changeover costs that, based on the size or number of customers involved, we believe are of an unusual nature for the quarter in which they were incurred.

EBIT for North American operations increased to \$80 million in the first six months of 2007, from \$70 million one year ago. Volumes on new platform launches, lower selling, general, and administrative expenses and manufacturing efficiencies driven by Lean and Six Sigma of \$12 million drove the improvement. These increases were partially offset by higher steel costs of \$19 million, incremental launch costs, increased spending on engineering and a softer

## Edgar Filing: TENNECO INC - Form 10-Q

aftermarket. Included in North America's first six months 2007 EBIT was \$1 million in restructuring and restructuring-related expenses compared to \$7 million in the first six months of 2006. Also included in 2006 EBIT was \$6 million of new aftermarket customer changeover cost.

Our European, South American and Indian segment's EBIT was \$58 million for the first six months of 2007 compared to \$42 million during the same period last year. Higher European OE volumes on existing business, new platform launches, favorable currency of \$5 million and manufacturing efficiencies of \$17 million gained through Lean manufacturing and Six Sigma programs drove the improvement. These increases were partially offset by higher material costs which included \$11 million of higher steel costs. Restructuring and restructuring-related expenses of \$3 million were included in first six months EBIT of 2007, a decrease of \$1 million from the same period last year.

EBIT for our Asia Pacific segment in the first six months of 2007 was \$14 million compared to \$2 million in the first six months of 2006. Increased OE production and new launches in China of \$6 million, reduced head count in Australia due to our 2006 restructuring activities and favorable currency of \$1 million was partially offset by \$2 million of increased steel costs and reduced light vehicle production in Australia. Included in the first six months of 2006's EBIT was \$3 million in restructuring and restructuring-related expenses.

46

Currency had a \$7 million favorable impact on overall company EBIT for the six months ended June 30, 2007, as compared to the prior year.

### EBIT AS A PERCENTAGE OF REVENUE

	SIX MONTHS ENDED JUNE 30,	
	2007	2006
	----	----
North America.....	6%	7%
Europe, South America & India.....	4%	4%
Asia Pacific.....	6%	1%
Total Tenneco.....	5%	5%

In North America, EBIT as a percentage of revenue for the first six months of 2007 was one percentage point less than last year. The benefits from our new platform launches, lower selling, general, and administrative expenses and manufacturing efficiencies were more than offset by the margin impact from an increase in lower margin substrate sales, lower OE industry volumes, higher material costs, incremental launch costs, increased investments in engineering, and soft aftermarket conditions. During the first six months of 2007, North American results included lower restructuring and restructuring-related charges and aftermarket changeover costs. In Europe, South America and India, EBIT margin for the first six months of 2007 was even with prior year. Higher

## Edgar Filing: TENNECO INC - Form 10-Q

European OE volumes on existing business, new platform launches, favorable currency and manufacturing efficiencies were offset by higher material costs. Restructuring and restructuring-related expenses were less than prior year. EBIT as a percentage of revenue for our Asia Pacific segment increased five percentage points in the first six months of 2007 versus the prior year. OE production increases in China, favorable currency and benefits from last year's restructuring activities drove the improvement. Lower restructuring and restructuring-related expenses also benefited EBIT margin.

### INTEREST EXPENSE, NET OF INTEREST CAPITALIZED

We reported interest expense for the second quarter of 2007 of \$40 million, up from \$35 million a year ago. Higher borrowing levels in the quarter drove a majority of the interest expense increase. The requirement to mark the fixed to floating interest rate swaps to market also increased interest expense by \$3 million in the second quarter 2007, versus an expense of \$2 million in the second quarter 2006.

We reported interest expense for the first half of 2007 of \$80 million, up from \$72 million in the first six months of a year ago. Higher borrowing levels for the first six months of the year drove a majority of the interest expense increase. The requirement to mark the fixed to floating interest rate swaps to market also increased interest expense by \$2 million for the first six months of 2007, versus an increased expense of \$5 million in the first half of 2006. Included in the first six months of 2007 results was a \$5 million charge to expense the unamortized portion of debt issuance costs related to our 2003 amended and restated senior credit facility due to our debt refinancing in the first quarter of 2007.

We have three fixed-to-floating interest rate swaps that effectively convert \$150 million of our 10.25 percent fixed interest rate senior secured notes into floating interest rate debt at an annual rate of LIBOR plus 5.68 percent. Based upon the current LIBOR rate of 5.39 percent (which is in effect until January 15, 2008) these swaps are expected to increase our interest expense by \$1 million in 2007 excluding any impact from marking the swaps to market. Since entering into these swaps, we have realized a net cumulative benefit of \$3 million through June 30, 2007, in reduced cash interest payments. On June 30, 2007, we had \$997 million in long-term debt obligations that have fixed interest rates. Of that amount, \$475 million is fixed through July 2013 and \$500 million through November 2014, while the remainder is fixed from 2007 through 2025. Of the \$475 million, \$150 million has been swapped to floating rate debt and we also have \$431 million in long-term debt obligations outstanding under our senior secured credit facility that are subject to variable interest rates. See Note 4.

47

### INCOME TAXES

We reported income tax expense of \$20 million in the second quarter of 2007 compared to \$13 million in the second quarter of 2006. The effective tax rate for the second quarter of 2007 was 32 percent. The effective tax rate for the second quarter of 2006 was 34 percent.

Income tax expense was \$22 million for the first six months of 2007, compared to \$13 million for the first six months of 2006. The effective tax rate for the first half of 2007 was 31 percent as compared to 30 percent for the first six months of 2006.

## Edgar Filing: TENNECO INC - Form 10-Q

### RESTRUCTURING AND OTHER CHARGES

Over the past several years we have adopted plans to restructure portions of our operations. These plans were approved by the Board of Directors and were designed to reduce operational and administrative overhead costs throughout the business. Prior to the change in accounting required for exit or disposal activities, we recorded charges to income related to these plans for costs that did not benefit future activities in the period in which the plans were finalized and approved, while actions necessary to affect these restructuring plans occurred over future periods in accordance with established plans.

Our recent restructuring activities began in the fourth quarter of 2001, when our Board of Directors approved a restructuring plan, a project known as Project Genesis, which was designed to lower our fixed costs, relocate capacity, reduce our work force, improve efficiency and utilization, and better optimize our global footprint. We have subsequently engaged in various other restructuring projects related to Project Genesis. We incurred \$27 million in restructuring and restructuring-related costs during 2006, of which \$23 million was recorded in cost of sales and \$4 million was recorded in selling, general and administrative expense. In the second quarter of 2007, we incurred \$2 million in restructuring and restructuring-related costs which was recorded in cost of sales. For the first six months of 2007, we incurred \$4 million in restructuring and restructuring-related costs of which \$3 million was recorded in cost of sales and \$1 million in selling, general and administrative expense. Since Project Genesis was initiated, we have incurred costs of \$134 million through June 30, 2007. We estimate that our current annual savings rate for completed projects is approximately \$88 million. When all actions are complete, we expect an additional \$16 million of annual savings.

Under the terms of our amended and restated senior credit agreement that took effect on March 16, 2007, we are allowed to exclude \$80 million of cash charges and expenses, before taxes, related to cost reduction initiatives incurred after March 16, 2007 from the calculation of the financial covenant ratios required under our senior credit facility. As of June 30, 2007, we have excluded \$4 million in allowable charges relating to restructuring initiatives against the \$80 million available under the terms of the March 2007 amended and restated to the senior credit facility.

In addition to the announced actions, we will continue to evaluate additional opportunities and expect that we will initiate actions that will reduce our costs through implementing the most appropriate and efficient logistics, distribution and manufacturing footprint for the future. We expect to continue to undertake additional restructuring actions as deemed necessary, however, there can be no assurances we will undertake such actions. Actions that we take, if any, will require the approval of our Board of Directors, or its authorized committee. We plan to conduct any workforce reductions that result in compliance with all legal and contractual requirements including obligations to consult with workers' councils, union representatives and others.

### EARNINGS PER SHARE

We reported net income of \$41 million or \$0.85 per diluted common share for the second quarter of 2007, as compared to net income of \$24 million or \$0.51 per diluted common share for the second quarter of 2006. Included in the results for the second quarter of 2007 were negative impacts from expenses related to our restructuring and restructuring related activities. The net impact of these items decreased earnings per diluted share by \$0.03. Included in the results for the second quarter of 2006 were negative impacts from expenses related to our restructuring activities decreasing earnings per diluted share by \$0.12 and the negative impact of new aftermarket

## Edgar Filing: TENNECO INC - Form 10-Q

customer changeovers of \$0.08 per diluted share. Please read the Notes to the consolidated financial statements for more detailed information on earnings per share.

We reported net income of \$46 million or \$0.96 per diluted common share for the first half of 2007, as compared to net income of \$27 million or \$0.58 per diluted common share for the first half of 2006. Included in the results for the first half of 2007 were negative impacts from expenses related to our restructuring activities and charges relating to refinancing in the first quarter. The net impact of these items decreased earnings per diluted share by \$0.06 and \$0.07, respectively. Included in the results for the first half of 2006 were negative impacts from expenses related to our restructuring activities of \$0.21 per diluted share and new aftermarket customer changeover costs of \$0.09 per diluted share, partially offset by a positive impact from a tax adjustment of \$0.06 per diluted share. Please read the Notes to the consolidated financial statements for more detailed information on earnings per share.

### OUTLOOK

Current industry predictions indicate for the second half of the year that the North American light vehicle production levels will be stronger year-over-year. We believe we are well-positioned to benefit with our new diesel pick-up truck platforms and a good position on strong-selling cross-over vehicles. However, we will continue to closely monitor market uncertainties, namely rising inventory levels and labor negotiations, in North America.

We also expect that our strong performance will continue in Europe and in emerging markets like China, where industry conditions are expected to remain positive. In the aftermarket, we continue to support our strong brands and aggressively pursue new customers, actions that we hope will counter any continued softness in the European and North American markets.

We will continue to invest in engineering and new technologies, primarily to develop next generation emission and ride control products. Our diesel after-treatment capabilities and innovative hot-end emission control solutions are generating new business opportunities and positioning us for future growth. In addition, we will continue to focus globally on increasing productivity and cost improvements through Six Sigma, Lean manufacturing and restructuring activities.

### CASH FLOWS FOR THE THREE MONTHS ENDED JUNE 30, 2007 AND 2006

	THREE MONTHS ENDED JUNE 30, 2007	THREE MONTHS ENDED JUNE 30, 2006
	-----	-----
	(MILLIONS)	
Cash provided (used) by:

Investing activities.....	(38)	(42)
Financing activities.....	(8)	(9)

## Edgar Filing: TENNECO INC - Form 10-Q

### Operating Activities

For the three months ended June 30, 2007, operating activities provided \$67 million in cash compared to \$73 million in cash provided during the same period last year. For the three months ended June 30, 2007, cash used for working capital was \$15 million versus \$10 million for the three months ended June 30, 2006 because of increased working capital needs for new business launches. Receivables were a use of cash of \$111 million compared to a use of cash of \$16 million in the prior year. Inventory represented a cash inflow of \$3 million during the three months ended June 30, 2007, an improvement of \$16 million over the prior year. Accounts payable provided cash of \$91 million, an increase from last year's cash inflow of \$16 million. The year-over-year increase in the net use of cash for accounts receivable, inventory, and accounts payable was primarily a result of working capital requirements for our new platform launches in North America. Cash taxes were \$20 million, driven by a final payment on a foreign audit and the timing of certain tax payments, for the three months ended June 30, 2007, compared to \$7 million in the prior year which included a tax refund.

49

One of our European subsidiaries receives payment from one of its OE customers whereby the accounts receivable are satisfied through the delivery of negotiable financial instruments. We may collect these financial instruments before their maturity date by either selling them at a discount or using them to satisfy accounts receivable that have previously been sold to a European bank. Any of these financial instruments which are not sold are classified as other current assets as they do not meet our definition of cash equivalents. The amount of these financial instruments that was collected before their maturity date totaled \$21 million for the six months ended June 30, 2007, compared with \$36 million for the same period in 2006.

In certain instances several of our Chinese subsidiaries receive payment from OE customers and satisfy vendor payments through the receipt and delivery of negotiable financial instruments. Financial instruments used to satisfy vendor payables and not redeemed totaled \$11 million and \$5 million at June 30, 2007 and 2006, respectively, and were classified as notes payable. Financial instruments received from OE customers and not redeemed totaled \$6 million and \$11 million at June 30, 2007 and 2006, respectively, and were classified as other current assets. One of our Chinese subsidiaries is required to maintain a cash balance at a financial institution issuing the financial instruments which are used to satisfy vendor payments. The balance was less than \$1 million at both June 30, 2007 and 2006, respectively, and was classified as cash and cash equivalents.

### Investing Activities

Cash used for investing activities was \$4 million lower in the second quarter of 2007 compared to the same period a year ago. Cash payments for plant, property and equipment were \$36 million in the second quarter of 2007 versus payments of \$42 million in the second quarter of 2006. The decrease of \$6 million in cash payments for plant, property and equipment was primarily due to the timing of investment in OE customer platform launches. Cash payments for software-related intangible assets were \$4 million in the second three months of 2007 compared to \$3 million in the second three months of 2006.

### Financing Activities

## Edgar Filing: TENNECO INC - Form 10-Q

Cash flow from financing activities was an \$8 million outflow in the second quarter of 2007 compared to an outflow of \$9 million in the same period of 2006.

### CASH FLOWS FOR THE SIX MONTHS ENDED JUNE 30, 2007 AND 2006

	SIX MONTHS ENDED JUNE 30, 2007	AS RESTATED ----- SIX MONTHS ENDED JUNE 30, 2006 -----
(MILLIONS)		
Cash provided (used) by:		
Operating activities.....	\$(26)	\$ 60
Investing activities.....	(83)	(92)
Financing activities.....	61	6

#### Operating Activities

For the six months ended June 30, 2007, operating activities used \$26 million in cash compared to \$60 million in cash provided during the same period last year. For the six months ended June 30, 2007, cash used for working capital was \$154 million versus \$80 million for the six months ended June 30, 2006 because of working capital needs for new business launches. Receivables were a use of cash of \$312 million compared to a cash use of \$100 million in the prior year. Inventory represented a cash outflow of \$71 million during the six months ended June 30, 2007, an increase of \$31 million over the prior year. The year-over-year increase in the use of cash for both accounts receivable and inventory was primarily a result of working capital requirements for our new platform launches in North America. In addition to the higher level of receivables related to the revenue increase, we must carry higher inventory levels for these new platforms, a portion of which relates to higher value substrates sourced from South Africa. This inventory in transit from South Africa to the U.S. increased our cash outflow from operating

50

activities during the first six months of 2007 by \$29 million. Accounts payable provided cash of \$241 million, an increase from last year's cash inflow of \$91 million. This increase also primarily resulted from the working capital needed for our new platform launches in North America. Cash taxes were \$28 million, driven by a final payment on a foreign audit and the timing of certain tax payments, for the six months ended June 30, 2007, compared to \$7 million in the prior year which included a tax refund.

#### Investing Activities

Cash used for investing activities was \$9 million lower in the first half of 2007 compared to the same period a year ago. Cash payments for plant, property and equipment were \$75 million in the first half of 2007 versus payments of \$89 million in the first six months of 2006. The decrease of \$14

## Edgar Filing: TENNECO INC - Form 10-Q

million in cash payments for plant, property and equipment was primarily due to the timing of investment in OE customer platform launches. Cash payments for software-related intangible assets were \$11 million in the first six months of 2007 compared to \$6 million in the first six months of 2006.

### Financing Activities

Cash flow from financing activities was a \$61 million inflow in the first six months of 2007 compared to an inflow of \$6 million in the same period of 2006. The primary reason for the change is attributable to an increase in borrowings to fund 2007 working capital needs partially offset by debt issuance costs due to our debt refinancing in the first quarter of 2007.

### CRITICAL ACCOUNTING POLICIES

We prepare our financial statements in accordance with accounting principles generally accepted in the United States of America. Preparing our financial statements in accordance with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The following paragraphs include a discussion of some critical areas where estimates are required.

#### Revenue Recognition

We recognize revenue for sales to our original equipment and aftermarket customers when title and risk of loss passes to the customers under the terms of our arrangements with those customers, which is usually at the time of shipment from our plants or distribution centers. In connection with the sale of exhaust systems to certain original equipment manufacturers, we purchase catalytic converters or components thereof and diesel particulate filters including precious metals ("substrates") on behalf of our customers which are used in the assembled system. These substrates are included in our inventory and "passed through" to the customer at our cost, plus a small margin, since we take title to the inventory and are responsible for both the delivery and quality of the finished product. Revenues recognized for substrate sales were \$803 million, and \$409 million for the first six months of 2007 and 2006, respectively. For our aftermarket customers, we provide for promotional incentives and returns at the time of sale. Estimates are based upon the terms of the incentives and historical experience with returns.

#### Warranty Reserves

Where we have offered product warranty, we also provide for warranty costs. Those estimates are based upon historical experience and upon specific warranty issues as they arise. While we have not experienced any material differences between these estimates and our actual costs, it is reasonably possible that future warranty issues could arise that could have a significant impact on our financial statements.

#### Long-Term Receivables

We expense pre-production design and development costs incurred for our original equipment customers unless we have a contractual guarantee for reimbursement of those costs from the customer. At June 30, 2007, we had approximately \$20 million recorded as a long-term receivable from original equipment customers for

## Edgar Filing: TENNECO INC - Form 10-Q

guaranteed pre-production design and development arrangements. While we believe that the vehicle programs behind these arrangements will enter production, these arrangements allow us to recover our pre-production design and development costs in the event that the programs are cancelled or do not reach expected production levels. We have not experienced any material losses on arrangements where we have a contractual guarantee of reimbursement from our customers.

### Income Taxes

We have a U.S. Federal tax net operating loss carryforward ("NOL") at December 31, 2006 of \$597 million, which will expire in varying amounts from 2018 to 2026. The federal tax effect of that NOL is \$209 million, and is recorded as a deferred tax asset on our balance sheet at December 31, 2006. We also have state NOL carryforwards of \$585 million, which will expire in various years through 2026. The tax effect of the state NOL, net of a valuation allowance, is \$29 million and is recorded as a deferred tax asset on our balance sheet at December 31, 2006. In the six months ended June 30, 2007, we have a loss for U.S. Federal tax of \$26 million for which we recorded an additional \$9 million in deferred tax assets. We estimate, based on available evidence both positive and negative, that it is more likely than not that we will utilize these NOLs within the prescribed carryforward period. That estimate is based upon our expectations regarding future taxable income of our U.S. operations and the implementation of available tax planning strategies that accelerate usage of the NOL. Circumstances that could change that estimate include future U.S. earnings at lower than expected levels or a majority ownership change as defined in the rules of the U.S. tax law. If that estimate changed, we would be required to cease recognizing an income tax benefit for any new NOL and could be required to record a reserve for some or all of the asset currently recorded on our balance sheet.

### Stock-Based Compensation

Effective January 1, 2006, we account for our stock-based compensation plans in accordance with Statement of Financial Accounting Standards ("SFAS") No. 123(R), "Share-Based Payment" which requires a fair value method of accounting for compensation costs related to our stock-based compensation plans. Under the fair value method recognition provision of the statement, a share-based payment is measured at the grant date based upon the value of the award and is recognized as expense over the vesting period. Determining the fair value of share-based awards requires judgment in estimating employee and market behavior. If actual results differ significantly from these estimates, stock-based compensation expense and our results of operations could be materially impacted. As of June 30, 2007, there is approximately \$5 million, net of tax, of total unrecognized compensation costs related to these stock-based awards that is expected to be recognized over a weighted average period of 1.2 years as compared to \$4 million, net of tax and a weighted average period of 1.5 years as of June 30, 2006.

### Goodwill and Other Intangible Assets

We utilize an impairment-only approach to value our purchased goodwill in accordance with SFAS No. 142, "Goodwill and Other Intangible Assets." Each year in the fourth quarter, we perform an impairment analysis on the balance of goodwill. Inherent in this calculation is the use of estimates as the fair value of our designated reporting units is based upon the present value of our expected future cash flows. In addition, our calculation includes our best estimate of our weighted average cost of capital and growth rate. If the calculation results in a fair value of goodwill which is less than the book value of goodwill, an impairment charge would be recorded in the operating results of the impaired reporting unit.

## Edgar Filing: TENNECO INC - Form 10-Q

### Pension and Other Postretirement Benefits

We have various defined benefit pension plans that cover substantially all of our employees. We also have postretirement health care and life insurance plans that cover a majority of our domestic employees. Our pension and postretirement health care and life insurance expenses and valuations are dependent on assumptions used by our actuaries in calculating those amounts. These assumptions include discount rates, health care cost trend rates, long-term return on plan assets, retirement rates, mortality rates and other factors. Health care cost trend rate assumptions are developed based on historical cost data and an assessment of likely long-term trends. Retirement rates are based

52

primarily on actual plan experience while mortality rates are based upon the general population experience which is not expected to differ materially from our experience.

Our approach to establishing the discount rate assumption for both our domestic and foreign plans starts with high-quality investment-grade bonds adjusted for an incremental yield based on actual historical performance. This incremental yield adjustment is the result of selecting securities whose yields are higher than the "normal" bonds that comprise the index. Based on this approach, for 2007 we raised the weighted average discount rate for all of our pension plans to 5.6 percent, from 5.5 percent. The discount rate for postretirement benefits was raised from approximately 5.9 percent for 2006 to approximately 6.0 percent for 2007.

Our approach to determining expected return on plan asset assumptions evaluates both historical returns as well as estimates of future returns, and is adjusted for any expected changes in the long-term outlook for the equity and fixed income markets. As a result, our estimate of the weighted average long-term rate of return on plan assets for all of our pension plans was left unchanged at 8.2 percent for 2007.

Except in the U.K., generally, our pension plans do not require employee contributions. Our policy is to fund our pension plans in accordance with applicable U.S. and foreign government regulations and to make additional payments as funds are available to achieve full funding of the accumulated benefit obligation. At June 30, 2007, all legal funding requirements had been met. Other postretirement benefit obligations, such as retiree medical, and certain foreign pension plans are not funded.

Effective December 31, 2006, we froze future accruals under our defined benefit plans for substantially all U.S. salaried and non-union hourly employees and replaced these benefits with additional contributions under defined contribution plans. We estimate that these changes will save about \$11 million in earnings before taxes annually, starting January 1, 2007.

### CHANGES IN ACCOUNTING PRONOUNCEMENTS

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 157, "Fair Value Measurement." This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. The statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We do not expect the adoption of this statement to have a material impact to our financial statements.

## Edgar Filing: TENNECO INC - Form 10-Q

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R)." Part of this Statement was effective as of December 31, 2006, and requires companies that have defined benefit pension plans and other postretirement benefit plans to recognize the funded status of those plans on the balance sheet on a prospective basis from the effective date. The funded status of these plans is determined as of the plans' measurement dates and represents the difference between the amount of the obligations owed to participants under each plan (including the effects of future salary increases for defined benefit plans) and the fair value of each plan's assets dedicated to paying those obligations. To record the funded status of those plans, unrecognized prior service costs and net actuarial losses experienced by the plans will be recorded in the Accumulated Other Comprehensive Loss section of shareholders' equity on the balance sheet. The initial adoption as of December 31, 2006 resulted in a reduction of Accumulated Other Comprehensive Loss in shareholders' equity of \$59 million.

In addition, SFAS No. 158 requires that companies using a measurement date for their defined benefit pension plans and other postretirement benefit plans other than their fiscal year end, change the measurement date effective for fiscal years ending after December 15, 2008. Effective January 1, 2007, we elected to early adopt the measurement date provision of SFAS No. 158. Adoption of this part of the statement was not material to our financial position and results of operations. See Note 11.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." This statement permits companies to choose to measure at fair value many financial instruments and certain other items that are not currently required to be measured at fair value. SFAS No. 159 is effective for

53

financial statements issued for fiscal years beginning on or after November 15, 2007. We do not believe the statement will have a material effect on our financial statements and related disclosures.

In April 2007, the FASB issued Interpretation No. 39-1, "Amendment of FASB Interpretation No. 39". This amendment allows a reporting entity to offset fair value amounts recognized for derivative instruments with fair value amounts recognized for the right to reclaim or realize cash collateral. Additionally, this amendment requires disclosure of the accounting policy on the reporting entity's election to offset or not offset amounts for derivative instruments. FIN 39-1 is effective for fiscal years beginning after November 15, 2007. We do not expect the adoption of FIN 39-1 to have a material impact on our financial statements.

In May 2007, the FASB issued Interpretation No. 48-1, "Definition of Settlement in FASB Interpretation No. 48". FIN 48-1 is effective for fiscal years beginning after December 15, 2006 and provides guidance on how a reporting entity should determine when a tax position is effectively settled. We have applied FIN 48-1 in the current quarter. The adoption of FIN 48-1 did not have a material impact to our financial statements and related disclosures. See Note 5.

In June 2007, the Emerging Issues Task Force ("EITF") issued EITF 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards". EITF 06-11 provides the final consensus on the application of paragraphs 62 and 63 of SFAS 123(R) on the accounting for income tax benefits relating to the payment of dividends on equity-classified employee share-based payment awards

## Edgar Filing: TENNECO INC - Form 10-Q

that are charged to retained earnings. EITF 06-11 affirms that the realized income tax benefit from dividends or dividend equivalents that are charged to retained earnings for equity classified nonvested equity shares, nonvested equity share units, and outstanding equity share options should be recognized as an increase in additional paid-in-capital. Additionally, EITF 06-11 provides guidance on the amount of tax benefits from dividends that are reclassified from additional paid-in-capital to the income statement when an entity's estimate of forfeitures changes. EITF 06-11 is effective prospectively to the income tax benefits that result from dividends on equity-classified employee share-based payment awards that are declared in fiscal years beginning after December 15, 2007. We do not expect the adoption of EITF 06-11 to have a material impact on our financial statements.

In June 2007, the EITF issued EITF 07-3, "Accounting for Nonrefundable Advance Payments for Goods or Services Received for Use in Future Research and Development Activities". EITF 07-3 requires the deferral and capitalization of nonrefundable advance payments for goods or services that an entity will use in research and development activities pursuant to an executory contractual agreement. Expenditures which are capitalized under EITF 07-3 should be expensed as the goods are delivered or the related services are performed. EITF 07-3 is effective prospectively for fiscal years beginning after December 15, 2007 and interim periods within those fiscal years. EITF 07-3 is applicable to new contracts entered into after the effective date of this Issue. We do not expect the adoption of EITF 07-3 to have a material impact on our financial statements.

### LIQUIDITY AND CAPITAL RESOURCES

#### CAPITALIZATION

	JUNE 30, 2007	AS RESTATED DECEMBER 31, 2006	% CHANGE
	-----	-----	-----
		(MILLIONS)

Shareholders' equity.....	326	226	44
	-----	-----	--
Total capitalization.....	\$1,808	\$1,639	10
	=====	=====	

General. Short-term debt, which includes the current portion of long-term obligations and borrowings by foreign subsidiaries, was \$31 million and \$28 million as of June 30, 2007 and December 31, 2006, respectively.

## Edgar Filing: TENNECO INC - Form 10-Q

Borrowings under our revolving credit facilities, which are now classified as long-term debt, were approximately \$272 million and \$0 as of June 30, 2007 and December 31, 2006, respectively. The overall increase in debt resulted primarily from increased working capital levels.

The year-to-date increase in shareholders' equity primarily resulted from \$41 million related to the translation of foreign balances into U.S. dollars. In addition, net income, the implementation of the measurement date provision of SFAS No. 158 and other transactions contributed \$59 million to shareholders' equity. While our book equity balance was small at June 30, 2007, it had no effect on our business operations. We have no debt covenants that are based upon our book equity, and there are no other agreements that are adversely impacted by our relatively low book equity.

**Overview and Recent Transactions.** Our financing arrangements are primarily provided by a committed senior secured financing arrangement with a syndicate of banks and other financial institutions. The arrangement is secured by substantially all our domestic assets and pledges of 66 percent of the stock of certain first-tier foreign subsidiaries, as well as guarantees by our material domestic subsidiaries.

In March 2007 we refinanced our \$831 million senior credit facility. This transaction reduced the interest rates we pay on all portions of the facility. While the total amount of the new senior credit facility is \$830 million, approximately the same as the previous facility, we changed the components of the facility to enhance our financial flexibility. We increased the amount of commitments under our revolving loan facility from \$320 million to \$550 million, reduced the amount of commitments under our tranche B-1 letter of credit/revolving loan facility from \$155 million to \$130 million and replaced the \$356 million term loan B with a \$150 million term loan A. As of June 30, 2007, the senior credit facility consisted of a five-year, \$150 million term loan A maturing in March 2012, a five-year, \$550 million revolving credit facility maturing in March 2012, and a seven-year \$130 million tranche B-1 letter of credit/revolving loan facility maturing in March 2014.

The refinancing of the prior facility allowed us to: (i) amend the consolidated net debt to EBITDA ratio, (ii) eliminate the fixed charge coverage ratio, (iii) eliminate the restriction on capital expenditures, (iv) increase the amount of acquisitions permitted to \$250 million, (v) improve the flexibility to repurchase and retire higher cost junior debt, (vi) increase our ability to enter into capital leases, (vii) increase the ability of our foreign subsidiaries to incur debt, (viii) increase our ability to pay dividends and repurchase common stock, (ix) increase our ability to invest in joint ventures, (x) allow for the increase in the existing tranche B-1 facility and/or the term loan A or the addition of a new term loan of up to \$275 million in order to reduce our 10.25 percentage second lien notes, and (xi) make other modifications.

Following the refinancing, the term loan A facility is payable in twelve consecutive quarterly installments, commencing June 30, 2009 as follows: \$6 million due each of June 30, September 30, December 31, 2009 and March 31, 2010, \$15 million due each of June 30, September 30, December 31, 2010 and March 31, 2011, and \$17 million due each of June 30, September 30, December 31, 2011 and March 16, 2012. The revolving credit facility requires that any amounts drawn, be repaid by March 2012. Prior to that date, funds may be borrowed, repaid and reborrowed under the revolving credit facility without premium or penalty. Letters of credit may be issued under the revolving credit facility.

The tranche B-1 letter of credit/revolving loan facility requires that it be repaid by March 2014. We can borrow revolving loans and issue letters of credit under the \$130 million tranche B-1 letter of credit/revolving loan

## Edgar Filing: TENNECO INC - Form 10-Q

facility. The tranche B-1 letter of credit/revolving loan facility lenders have deposited \$130 million with the administrative agent, who has invested that amount in time deposits. We do not have an interest in any of the funds on deposit. When we draw revolving loans under this facility, the loans are funded from the \$130 million on deposit with the administrative agent. When we make repayments, the repayments are redeposited with the administrative agent.

The tranche B-1 letter of credit/revolving loan facility is reflected as debt on our balance sheet only if we borrow money under this facility or if we use the facility to make payments for letters of credit. We will not be liable for any losses to or misappropriation of any (i) return due to the administrative agent's failure to achieve the return described above or to pay all or any portion of such return to any lender under such facility or (ii) funds on deposit in such account by such lender (other than the obligation to repay funds released from such accounts and provided to us as revolving loans under such facility).

55

Senior Credit Facility -- Forms of Credit Provided. Following the March 2007 refinancing, the term loan A facility is payable in twelve consecutive quarterly installments, commencing June 30, 2009 as follows: \$6 million due each of June 30, September 30, December 31, 2009 and March 31, 2010, \$15 million due each of June 30, September 30, December 31, 2010 and March 31, 2011, and \$17 million due each of June 30, September 30, December 31, 2011 and March 16, 2012. The revolving credit facility requires that if any amounts are drawn, they be repaid by March 2012. Prior to that date, funds may be borrowed, repaid and reborrowed under the revolving credit facility without premium or penalty. Letters of credit may be issued under the revolving credit facility.

The tranche B-1 letter of credit/revolving loan facility requires that it be repaid by March 2014. We can borrow revolving loans from the \$130 million tranche B-1 letter of credit/revolving loan facility and use that facility to support letters of credit. The tranche B-1 letter of credit/revolving loan facility lenders have deposited \$130 million with the administrative agent, who has invested that amount in time deposits. We do not have an interest in any of the funds on deposit. When we draw revolving loans under this facility, the loans are funded from the \$130 million on deposit with the administrative agent. When we make repayments, the repayments are redeposited with the administrative agent.

The tranche B-1 letter of credit/revolving loan facility is reflected as debt on our balance sheet only if we borrow money under this facility or if we use the facility to make payments for letters of credit. We will not be liable for any losses to or misappropriation of any (i) return due to the administrative agent's failure to achieve the return described above or to pay all or any portion of such return to any lender under such facility or (ii) funds on deposit in such account by such lender (other than the obligation to repay funds released from such accounts and provided to us as revolving loans under such facility).

Senior Credit Facility -- Interest Rates and Fees. Prior to the March 2007 refinancing borrowings under the term loan B facility and the tranche B-1 letter of credit/revolving loan facility bore interest at an annual rate equal to, at our option, either (i) the London Interbank Offering Rate plus a margin of 200 basis points; or (ii) a rate consisting of the greater of the JP Morgan Chase prime rate or the Federal Funds rate plus 50 basis points, plus a margin of 100 basis points. As of June 30, 2007 borrowings under the term loan A facility and the tranche B-1 letter of credit/revolving loan facility bore interest at an

## Edgar Filing: TENNECO INC - Form 10-Q

annual rate equal to, at our option, either (i) the London Interbank Offering Rate plus a margin of 150 basis points; or (ii) a rate consisting of the greater of the JP Morgan Chase prime rate or the Federal Funds rate plus 50 basis points, plus a margin of 50 basis points. The interest margin for borrowings under the term loan A are subject to adjustment based on the consolidated net leverage ratio (consolidated indebtedness net of cash divided by consolidated EBITDA as defined in the senior credit facility agreement). The margin we pay on the term loan A and the tranche B-1 facility is reduced by 25 basis points following each fiscal quarter for which the consolidated net leverage ratio is less than 2.5 beginning in March 2007, and would increase by 25 basis points following each fiscal quarter for which the consolidated net leverage ratio exceeds 3.5. There is no cost to us for issuing letters of credit under the tranche B-1 letter of credit/revolving loan facility, however outstanding letters of credit reduce our availability to borrow revolving loans under this portion of the facility. If a letter of credit issued under this facility is subsequently paid and we do not reimburse the amount paid in full, then a ratable portion of each lender's deposit would be used to fund the letter of credit. We pay the tranche B-1 lenders a fee which is equal to LIBOR plus 150 basis points. This fee is offset by the return on the funds deposited with the administrative agent which earn interest at a per annum rate approximately equal to LIBOR. Outstanding revolving loans reduce the funds on deposit with the administrative agent which in turn reduce the earnings of those deposits and effectively increases our interest expense at a per annum rate equal to LIBOR.

Prior to the March 2007 refinancing, borrowings under the revolving credit facility bore interest at an annual rate equal to, at our option, either (i) the London Interbank Offering Rate plus a margin of 275 basis points; or (ii) a rate consisting of the greater of the JP Morgan Chase prime rate or the Federal Funds rate plus 37.5 basis points, plus a margin of 175 basis points. As of June 30, 2007 borrowings under the revolving credit facility bore interest at an annual rate equal to, at our option, either (i) the London Interbank Offering Rate plus a margin of 150 basis points; or (ii) a rate consisting of the greater of the JP Morgan Chase prime rate or the Federal Funds rate plus 50 basis points, plus a margin of 50 basis points. Letters of credit issued under the revolving credit facility accrue a letter of credit fee at a per annum rate of 150 basis points for the pro rata account of the lenders under such facility and a fronting fee for the ratable account of the issuers thereof at a per annum rate in an amount to be agreed upon payable quarterly in arrears. We also pay a commitment fee of 35 basis points on the unused portion of the revolving credit

56

facility. The interest margins for borrowings and letters of credit issued under the revolving credit facility are subject to adjustment based on the consolidated net leverage ratio (consolidated indebtedness net of cash divided by consolidated EBITDA as defined in the senior credit facility agreement) measured at the end of each quarter. The margin we pay on the revolving credit facility is reduced by 25 basis points and the commitment fee we pay on the revolving credit facility is reduced by 5 basis points following each fiscal quarter for which the consolidated net leverage ratio is less than 2.5 beginning in March 2007. The margin and the commitment fee would increase by 25 basis points and 2.5 basis points, respectively, following each fiscal quarter for which the consolidated net leverage ratio exceeds 3.5.

Senior Credit Facility -- Other Terms and Conditions. As described above, we are highly leveraged. Our refinanced senior credit facility requires that we maintain financial ratios equal to or better than the following consolidated net leverage ratio (consolidated indebtedness net of cash divided by consolidated EBITDA, as defined in the senior credit facility agreement), and consolidated interest coverage ratio (consolidated EBITDA divided by consolidated interest

## Edgar Filing: TENNECO INC - Form 10-Q

expense, as defined under the senior credit facility agreement) at the end of each period indicated. Failure to maintain these ratios will result in a default under our senior credit facility. See "Contractual Obligations" below. The financial ratios required under the amended and restated senior credit facility and, the actual ratios we achieved for the first and second quarter of 2007, are shown in the following tables:

	AS RESTATED									
	-----									
	QUARTER ENDED									
	MARCH 31, 2007		JUNE 30, 2007		SEPTEMBER 30, 2007		DECEMBER 2007			
	REQ.	ACT.	REQ.	ACT.	REQ.	REQ.	REQ.	REQ.	REQ.	REQ.

Interest Coverage Ratio (minimum).....			2.10	2.25	2.40	2.55	2.75			

The senior credit facility agreement provides the ability to refinance our senior subordinated notes and/or our senior secured notes in an amount equal to the sum of (i) the net cash proceeds of equity issued after the closing date plus (ii) the portion of annual excess cash flow (as defined in the senior credit facility agreement) that is not required to be applied to the payment of the credit facilities and which is not used for other purposes, provided that the amount of the subordinated notes and the aggregate amount of the senior secured notes and the subordinated notes that may be refinanced is capped based the pro forma consolidated leverage ratio after giving effect to such refinancing as shown in the following table:

PROFORMA CONSOLIDATED LEVERAGE RATIO	SUBORDINATED NOTES MAXIMUM AMOUNT	AGGREGATE SENIOR AND SUBORDINATE NOTE MAXIMUM AMOUNT
-----	-----	-----

## Edgar Filing: TENNECO INC - Form 10-Q

Greater than or equal to 3.0x	\$50 million	\$150 million
Greater than or equal to 2.5x	\$100 million	\$300 million
Less than 2.5x	\$125 million	\$375 million

In addition, the senior secured notes may be refinanced with (i) the net cash proceeds of incremental facilities and permitted refinancing indebtedness (as defined in the senior credit facility agreement), (ii) the net cash proceeds of any new senior or subordinated unsecured indebtedness, (iii) proceeds of revolving credit loans (as defined in the senior credit facility agreement), (iv) up to \$200 million of unsecured indebtedness of the company's foreign subsidiaries and (v) cash generated by the company's operations.

The refinanced senior credit facility agreement also contains restrictions on our operations that are customary for similar facilities, including limitations on: (i) incurring additional liens; (ii) sale and leaseback transactions (except for the permitted transactions as described in the amended and restated agreement); (iii) liquidations and dissolutions; (iv) incurring additional indebtedness or guarantees; (v) investments and acquisitions (vi) dividends and share repurchases; (vii) mergers and consolidations; and (viii) refinancing of subordinated and 10.25 percent

57

senior secured notes. Compliance with these requirements and restrictions is a condition for any incremental borrowings under the senior credit facility agreement and failure to meet these requirements enables the lenders to require repayment of any outstanding loans. After giving effect to the waiver we received as described above, as of June 30, 2007, we were in compliance with all the financial covenants and operational restrictions of the facility.

Our senior credit facility does not contain any terms that could accelerate the payment of the facility as a result of a credit rating agency downgrade.

Senior Secured and Subordinated Notes. Our outstanding debt also includes \$475 million of 10.25 percent senior secured notes due July 15, 2013, in addition to the \$500 million of 8 5/8 percent senior subordinated notes due November 15, 2014. We can redeem some or all of the notes at any time after July 15, 2008, in the case of the senior secured notes, and November 15, 2009, in the case of the senior subordinated notes. If we sell certain of our assets or experience specified kinds of changes in control, we must offer to repurchase the notes. We are permitted to redeem up to 35 percent of the senior subordinated notes with the proceeds of certain equity offerings completed before November 15, 2007.

Our senior secured and subordinated notes require that, as a condition precedent to incurring certain types of indebtedness not otherwise permitted, our consolidated fixed charge coverage ratio, as calculated on a proforma basis, to be greater than 2.25 and 2.00, respectively. We have not incurred any of the types of indebtedness not otherwise permitted by the indentures. The indentures also contain restrictions on our operations, including limitations on: (i) incurring additional indebtedness or liens; (ii) dividends; (iii) distributions and stock repurchases; (iv) investments; (v) asset sales and (vi) mergers and consolidations. Subject to limited exceptions, all of our existing and future material domestic wholly owned subsidiaries fully and unconditionally guarantee these notes on a joint and several basis. In addition, the senior secured notes

## Edgar Filing: TENNECO INC - Form 10-Q

and related guarantees are secured by second priority liens, subject to specified exceptions, on all of our and our subsidiary guarantors' assets that secure obligations under our senior credit facility, except that only a portion of the capital stock of our subsidiary guarantor's domestic subsidiaries is provided as collateral and no assets or capital stock of our direct or indirect foreign subsidiaries secure the notes or guarantees. There are no significant restrictions on the ability of the subsidiaries that have guaranteed these notes to make distributions to us. The senior subordinated notes rank junior in right of payment to our senior credit facility and any future senior debt incurred. As of June 30, 2007, we were in compliance with the covenants and restrictions of these indentures.

**Accounts Receivable Securitization.** In addition to our senior credit facility, senior secured notes and senior subordinated notes, we also sell some of our accounts receivable on a nonrecourse basis in North America and Europe. In North America, we have an accounts receivable securitization program with two commercial banks. We sell original equipment and aftermarket receivables on a daily basis under this program. We sold accounts receivable under this program of \$89 million and \$91 million for the first six months at June 30, 2007 and 2006, respectively. This program is subject to cancellation prior to its maturity date if we were to (i) fail to pay interest or principal payments on an amount of indebtedness exceeding \$50 million, (ii) default on the financial covenant ratios under the senior credit facility, or (iii) fail to maintain certain financial ratios in connection with the accounts receivable securitization program. In January 2007, this program was renewed for 364 days to January 28, 2008 at a facility size of \$100 million. We also sell some receivables in our European operations to regional banks in Europe. For the first six months of June 30, 2007, we sold \$59 million of accounts receivable in Europe up from \$57 million at June 30, 2006. The arrangements to sell receivables in Europe are not committed and can be cancelled at any time. If we were not able to sell receivables under either the North American or European securitization programs, our borrowings under our revolving credit agreements may increase. These accounts receivable securitization programs provide us with access to cash at costs that are generally favorable to alternative sources of financing, and allow us to reduce borrowings under our revolving credit agreements.

**Capital Requirements.** We believe that cash flows from operations, combined with available borrowing capacity described above, assuming that we maintain compliance with the financial covenants and other requirements of our loan agreement, will be sufficient to meet our future capital requirements for the following year. Our ability to meet the financial covenants depends upon a number of operational and economic factors, many of which are beyond our control. Factors that could impact our ability to comply with the financial covenants include the rate at which consumers continue to buy new vehicles and the rate at which they continue to repair vehicles already in

58

service, as well as our ability to successfully implement our restructuring plans and offset higher raw material prices. Lower North American vehicle production levels, weakening in the global aftermarket, or a reduction in vehicle production levels in Europe, beyond our expectations, could impact our ability to meet our financial covenant ratios. In the event that we are unable to meet these financial covenants, we would consider several options to meet our cash flow needs. These options could include further renegotiations with our senior credit lenders, additional cost reduction or restructuring initiatives, sales of assets or common stock, or other alternatives to enhance our financial and operating position. Should we be required to implement any of these actions to meet our cash flow needs, we believe we can do so in a reasonable time frame.

## Edgar Filing: TENNECO INC - Form 10-Q

### CONTRACTUAL OBLIGATIONS

Our remaining required debt principal amortization and payment obligations under lease and certain other financial commitments as of June 30, 2007, are shown in the following table:

	PAYMENTS DUE IN:						TOTAL
	2007	2008	2009	2010	2011	BEYOND 2011	
	(MILLIONS)						
Obligations:							
Revolver borrowings.....	\$--	\$ --	\$ --	\$ --	\$ --	\$ 272	\$ 272
Senior long-term debt.....	--	--	17	50	66	17	150
Long-term notes.....	--	2	--	--	--	477	479
Capital leases.....	1	3	3	3	--	--	10
Subordinated long-term debt.....	--	--	--	--	--	500	500
Other subsidiary debt.....	1	--	--	--	--	2	3
Short-term debt.....	25	--	--	--	--	--	25

Interest payments.....	29	112	112	112	103	204	672
Capital commitments.....	26	--	--	--	--	--	26
	----	----	----	----	----	-----	-----
Total Payments.....	\$91	\$132	\$143	\$173	\$176	\$1,477	\$2,192
	====	====	====	====	====	=====	=====

If we do not maintain compliance with the terms of our senior credit facility, senior secured notes indenture and senior subordinated debt indenture described above, all amounts under those arrangements could, automatically or at the option of the lenders or other debt holders, become due. Additionally, each of those facilities contains provisions that certain events of default under one facility will constitute a default under the other facility, allowing the acceleration of all amounts due. We currently expect to maintain compliance with terms of all of our various credit agreements for the foreseeable future.

Included in our contractual obligations is the amount of interest to be paid on our long-term debt. As our debt structure contains both fixed and variable rate interest debt, we have made assumptions in calculating the amount of the future interest payments. Interest on our senior secured notes and senior subordinated notes is calculated using the fixed rates of 10 1/4 percent and 8 5/8 percent, respectively. Interest on our variable rate debt is calculated as 150 basis points plus LIBOR of 5.39 percent which was the rate at June 30, 2007. We have assumed that LIBOR will remain unchanged for the outlying years. See "-- Capitalization." In addition we have included the impact of our interest rate swaps entered into in April 2004, excluding any impact marking the swaps to market may have. See "Interest Rate Risk" below.

We have also included an estimate of expenditures required after June 30, 2007 to complete the facilities and projects authorized at December 31, 2006, in

## Edgar Filing: TENNECO INC - Form 10-Q

which we have made substantial commitments in connections with facilities.

We have not included purchase obligations as part of our contractual obligations as we generally do not enter into long-term agreements with our suppliers. In addition, the agreements we currently have do not specify the

59

volumes we are required to purchase. If any commitment is provided, in many cases the agreements state only the minimum percentage of our purchase requirements we must buy from the supplier. As a result, these purchase obligations fluctuate from year to year and we are not able to quantify the amount of our future obligation.

We have not included material cash requirements for taxes as we are a taxpayer in certain foreign jurisdictions but not in domestic locations. Additionally, it is difficult to estimate taxes to be paid as changes in where we generate income can have a significant impact on future tax payments. We have also not included cash requirements for funding pension and postretirement benefit costs. Based upon current estimates we believe we will be required to make contributions of approximately \$39 million to those plans in 2007, of which approximately \$17 million has been contributed as of June 30, 2007. Pension and postretirement contributions beyond 2007 will be required but those amounts will vary based upon many factors, including the performance of our pension fund investments during 2007. In addition, we have not included cash requirements for environmental remediation. Based upon current estimates we believe we will be required to spend approximately \$9 million over the next 20 to 30 years. However, due to possible modifications in remediation processes and other factors, it is difficult to determine the actual timing of the payments. See "-- Environmental and Other Matters".

We occasionally provide guarantees that could require us to make future payments in the event that the third party primary obligor does not make its required payments. We have not recorded a liability for any of these guarantees. The only third party guarantee we have made is the performance of lease obligations by a former affiliate. Our maximum liability under this guarantee was less than \$1 million at both June 30, 2007 and 2006. We have no recourse in the event of default by the former affiliate. However, we have not been required to make any payments under this guarantee.

Additionally, we have from time to time issued guarantees for the performance of obligations by some of our subsidiaries, and some of our subsidiaries have guaranteed our debt. All of our then existing and future material domestic wholly-owned subsidiaries fully and unconditionally guarantee our senior credit facility, our senior secured notes and our senior subordinated notes on a joint and several basis. The arrangement for the senior credit facility is also secured by first-priority liens on substantially all our domestic assets and pledges of 66 percent of the stock of certain first-tier foreign subsidiaries. The arrangement for the \$475 million senior secured notes is also secured by second-priority liens on substantially all our domestic assets, excluding some of the stock of our domestic subsidiaries. No assets or capital stock of our direct or indirect foreign subsidiaries secure these notes. You should also read Note 14 where we present the Supplemental Guarantor Condensed Consolidating Financial Statements.

We have issued guarantees through letters of credit in connection with some obligations of our affiliates. We have guaranteed \$18 million in letters of credit to support some of our subsidiaries' insurance arrangements. In addition, we have issued \$6 million in guarantees through letters of credit to guarantee other obligations of subsidiaries primarily related to environmental remediation

## Edgar Filing: TENNECO INC - Form 10-Q

activities.

### INTEREST RATE RISK

Our financial instruments that are sensitive to market risk for changes in interest rates are primarily our debt securities and our interest rate swaps. We primarily use our revolving credit facilities to finance our short-term capital requirements. We pay a current market rate of interest on these borrowings. We have financed our long-term capital requirements with long-term debt with original maturity dates ranging from five to ten years. On June 30, 2007, we had \$997 million in long-term debt obligations that have fixed interest rates. Of that amount, \$475 million is fixed through July 2013 and \$500 million through November 2014, while the remainder is fixed from 2007 through 2025. Of the \$475 million, \$150 million has been swapped to floating and we also have \$431 million in long-term debt obligations outstanding under our senior secured credit facility that are subject to variable interest rates. See Note 4.

We estimate that the fair value of our long-term debt at June 30, 2007 was about 104 percent of its book value. A one percentage point increase or decrease in interest rates would increase or decrease the annual interest expense we recognize in the income statement and the cash we pay for interest expense by about \$3 million after tax, excluding the effect of the interest rate swaps we completed in April 2004. A one percentage point increase or decrease in interest rates on the swaps we completed in April 2004 would increase or decrease the annual interest

60

expense we recognize in the income statement and the cash we pay for interest expense by approximately \$1 million after tax, excluding the effect on interest expense of marking the swaps to market.

### ENVIRONMENTAL AND OTHER MATTERS

We are subject to a variety of environmental and pollution control laws and regulations in all jurisdictions in which we operate. We expense or capitalize, as appropriate, expenditures for ongoing compliance with environmental regulations that relate to current operations. We expense costs related to an existing environmental condition caused by past operations that do not contribute to current or future revenue generation. We record liabilities when environmental assessments indicate that remedial efforts are probable and the costs can be reasonably estimated. Estimates of the liability are based upon currently available facts, existing technology, and presently enacted laws and regulations taking into consideration the likely effects of inflation and other societal and economic factors. We consider all available evidence including prior experience in remediation of contaminated sites, other companies' cleanup experiences and data released by the United States Environmental Protection Agency or other organizations. These estimated liabilities are subject to revision in future periods based on actual costs or new information. Where future cash flows are fixed or reliably determinable, we have discounted the liabilities. All other environmental liabilities are recorded at their undiscounted amounts. We evaluate recoveries separately from the liability and, when they are assured, recoveries are recorded and reported separately from the associated liability in our financial statements.

As of June 30, 2007, we are designated as a potentially responsible party in one Superfund site. Including the Superfund site, we may have the obligation to remediate current or former facilities, and we estimate our share of environmental remediation costs at these facilities to be approximately \$9 million. For the Superfund site and the current and former facilities, we have

## Edgar Filing: TENNECO INC - Form 10-Q

established reserves that we believe are adequate for these costs. Although we believe our estimates of remediation costs are reasonable and are based on the latest available information, the cleanup costs are estimates and are subject to revision as more information becomes available about the extent of remediation required. At some sites, we expect that other parties will contribute to the remediation costs. In addition, at the Superfund site, the Comprehensive Environmental Response, Compensation and Liability Act provides that our liability could be joint and several, meaning that we could be required to pay in excess of our share of remediation costs. Our understanding of the financial strength of other potentially responsible parties at the Superfund site, and of other liable parties at our current and former facilities, has been considered, where appropriate, in our determination of our estimated liability. We believe that any potential costs associated with our current status as a potentially responsible party in the Superfund site, or as a liable party at our current or former facilities, will not be material to our results of operations or consolidated financial position.

We also from time to time are involved in legal proceedings, claims or investigations that are incidental to the conduct of our business. Some of these proceedings allege damages against us relating to environmental liabilities (including toxic tort, property damage and remediation), intellectual property matters (including patent, trademark and copyright infringement, and licensing disputes), personal injury claims (including injuries due to product failure, design or warnings issues, and other product liability related matters), taxes, employment matters, and commercial or contractual disputes, sometimes related to acquisitions or divestitures. We vigorously defend ourselves against all of these claims. In future periods, we could be subjected to cash costs or non-cash charges to earnings if any of these matters is resolved on unfavorable terms. However, although the ultimate outcome of any legal matter cannot be predicted with certainty, based on current information, including our assessment of the merits of the particular claim, we do not expect that these legal proceedings or claims will have any material adverse impact on our future consolidated financial position or results of operations.

In addition, we are subject to a number of lawsuits initiated by a significant number of claimants alleging health problems as a result of exposure to asbestos. A small percentage of claims have been asserted by railroad workers alleging exposure to asbestos products in railroad cars manufactured by the Pullman Company, one of our subsidiaries. Nearly all of the claims are related to alleged exposure to asbestos in our automotive emission control products. Only a small percentage of these claimants allege that they were automobile mechanics and a significant number appear to involve workers in other industries or otherwise do not include sufficient information to determine whether there is any basis for a claim against us. We believe, based on scientific and other evidence, it is unlikely that mechanics were exposed to asbestos by our former muffler products and that, in any event, they would not be at

61

increased risk of asbestos-related disease based on their work with these products. Further, many of these cases involve numerous defendants, with the number of each in some cases exceeding 200 defendants from a variety of industries. Additionally, the plaintiffs either do not specify any, or specify the jurisdictional minimum, dollar amount for damages. As major asbestos manufacturers continue to go out of business or file for bankruptcy, we may experience an increased number of these claims. We vigorously defend ourselves against these claims as part of our ordinary course of business. In future periods, we could be subject to cash costs or non-cash charges to earnings if any of these matters is resolved unfavorably to us. To date, with respect to claims that have proceeded sufficiently through the judicial process, we have

## Edgar Filing: TENNECO INC - Form 10-Q

regularly achieved favorable resolution. Accordingly, we presently believe that these asbestos-related claims will not have a material adverse impact on our future financial condition or results of operations.

### EMPLOYEE STOCK OWNERSHIP PLANS

We have established Employee Stock Ownership Plans for the benefit of our employees. Under the plans, subject to limitations in the Internal Revenue Code, participants may elect to defer up to 75 percent of their salary through contributions to the plan, which are invested in selected mutual funds or used to buy our common stock. We currently match in cash 50 percent of each employee's contribution up to eight percent of the employee's salary. In connection with freezing the defined benefit pension plans for nearly all U.S. based salaried and hourly employees effective December 31, 2006, and the related replacement of those defined benefit plans with defined contribution plans, we are making additional contributions to the Employee Stock Option Plans. We recorded expense for these matching contributions of approximately \$8 million for the six months ended June 30, 2007 as compared to \$3 million for the six months ended June 30, 2006. All contributions vest immediately.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information regarding our exposure to interest rate risk, see the caption entitled "Interest Rate Risk" in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations," which is incorporated herein by reference.

### ITEM 4. CONTROLS AND PROCEDURES

#### EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

An evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. As of December 31, 2006 we reported a material weakness in our internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) based upon our evaluation pursuant to Section 404 of the Sarbanes-Oxley Act of 2002. Due to the nature of the material weakness, remediation will not be completed until the annual tax processes are performed during the 2007 year end close. Based upon the June 30, 2007 evaluation, we have concluded that our disclosure controls and procedures were not effective for the reasons more fully described below related to the unremediated material weakness. To address this control weakness, we performed additional analysis and performed other procedures in order to prepare the unaudited quarterly consolidated financial statements in accordance with generally accepted accounting principles in the United States of America. Accordingly, we believe that the consolidated financial statements included in this Quarterly Report on Form 10-Q fairly present, in all material respects, our financial condition, results of operations and cash flows for the periods presented.

#### INTERNAL CONTROLS SURROUNDING THE ACCOUNTING FOR INCOME TAXES

A material weakness is a control deficiency, or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. Management identified a material weakness in our internal control over financial reporting as of December 31, 2006, related to our accounting for income taxes including income taxes payable, deferred income tax assets and liabilities and the related income tax provision. Specifically, we did not maintain effective controls

over the accuracy and completeness of the components of the income tax provision calculation and related deferred income taxes and income taxes payable, and over the monitoring of the differences between the income tax basis and the financial reporting basis of assets and liabilities to effectively reconcile the differences to the reported deferred income tax balances. This control deficiency resulted in adjustments to the tax accounts for our financial statements as of December 31, 2006. While the errors identified largely offset each other, our internal controls did not operate effectively to detect errors that could have been, individually or in the aggregate, material.

#### REMEDIATION PLAN FOR MATERIAL WEAKNESS IN INTERNAL CONTROL OVER FINANCIAL REPORTING

We took actions to improve internal controls over our accounting for income taxes during 2006. However, the actions taken have not yet been fully evidenced and therefore we concluded that this weakness existed as of December 31, 2006. To address the material weakness in the accounting for income taxes, we have taken or will take the following actions:

- With the assistance of an outside professional service provider, during the fourth quarter of 2006 we implemented procedures to more effectively and accurately accumulate detailed support for approximately 70 foreign tax basis balance sheets and related processes to quantify deferred tax balances.
- We are re-engineering the tax provision reporting processes (including U.S. federal and state tax provision processes) to improve visibility, timeliness and accuracy, as well as technical support and documentation standards.
- We will reorganize functional responsibilities in the tax department to better control and manage the income tax data that is collected and enhance our current process for completing the provision and performing analysis.
- We are in the process of developing additional remediation plans which will be implemented to address the material weakness in internal controls in accounting for income taxes. Many of these newly designed controls and procedures are only executed annually during the year-end closing process. Our assessment of the remediation will remain open until that time.

Due to the nature of the material weakness, remediation will not be completed until the annual tax processes are performed during the 2007 year end close.

#### CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

Except as described above, there have been no changes in our internal control over financial reporting during the quarter ended June 30, 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

In connection with the restatement and the filing of this Form 10-Q/A, we, with the participation of management, including our Chief Executive Officer and our Chief Financial Officer, re-evaluated our disclosure controls and procedures and internal control over financial reporting. In performing the re-evaluation,

## Edgar Filing: TENNECO INC - Form 10-Q

we considered the effects of the restatement that resulted from the error in the accounting for interest rate swap agreements. Based on the foregoing re-evaluation of our disclosure controls and procedures and internal control over financial reporting as of March 31, 2007 and our analysis of the circumstances which led to the error in the accounting for interest rate swap agreements, our Chief Executive Officer and Chief Financial Officer concluded that the error in accounting for interest rate swaps does not indicate an additional material weakness in internal controls over financial reporting.

### PART II

#### ITEM 1A. RISK FACTORS

We are exposed to certain risks and uncertainties that could have a material adverse impact on our business, financial condition and operating results. There have been no material changes to the Risk Factors described in Part I, Item 1A of our Annual Report on Form 10-K/A for the year ended December 31, 2006.

#### ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

We held our annual stockholders' meeting on May 8, 2007, to consider and vote on two separate proposals: (1) a proposal to elect Charles W. Cramb, Gregg Sherrill, Frank E. Macher, Roger B. Porter, David B. Price, Jr., Paul T. Stecko, Mitsunobu Takeuchi and Jane L. Warner as directors of our company for a term expiring at our next annual stockholders' meeting and (2) a proposal to ratify the appointment of Deloitte & Touche LLP as independent public accountants for 2007. The following sets forth the vote results with respect to these proposals at the meeting:

#### ELECTION OF DIRECTORS

	VOTES FOR -----	VOTES WITHHELD -----
Charles W. Cramb.....	38,643,842	3,530,185
Gregg Sherrill.....	40,993,184	1,180,843
Frank E. Macher.....	41,451,612	722,415
Roger B. Porter.....	41,480,743	693,284
David B. Price, Jr. ....	41,857,713	316,314
Paul T. Stecko.....	41,555,120	618,907
Mitsunobu Takeuchi.....	41,658,751	515,276
Jane L. Warner.....	41,895,991	278,036
