FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Sappi Limited (the "Company") is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute "forward-looking statements" within the meaning of the Reform Act. The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions which are predictions of or indicate future events and future trends which do not relate to historical matters identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company's potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the "Group"), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to: the highly cyclical nature of the pulp and paper industry; pulp and paper production, production capacity and pricing levels in North America, Europe, Asia and southern Africa; any major disruption in production at the Group's key facilities; changes in environmental, tax and other laws and regulations; adverse changes in the markets for the Group's products; any delays, unexpected costs or other problems experienced with any business acquired or to be acquired; consequences of the Group's leverage; adverse changes in the South African political situation and economy or the effect of governmental efforts to address present or future economic or social problems; and the impact of future investments, acquisitions and dispositions (including the financing of investments and acquisitions) and any delays, unexpected costs or other problems experienced in connection with dispositions. These and other risks, uncertainties and factors are discussed in the Company's Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

financial highlights
summary

Demand for most of our products is driven at the macro level by GDP growth, corporate profitability and advertising spend; indicators for all these factors continue to be positive. Our margins, however, remain unsatisfactory and worsened this quarter due to the combination of raw material cost pressure, difficulty in achieving price increases in Europe and associated production downtime, and a sharp drop in US apparent consumption which we think is linked to customer inventory reduction.

In North America apparent consumption of coated fine paper for the quarter dropped 11% compared to the unusual surge a year earlier. For our fiscal year to date North American apparent consumption was at the same level as last year. We believe that underlying demand in the market remains firm supported by continuing growth in advertising pages. In Europe apparent consumption was up 2% on a year earlier. Competition remained strong and we achieved only part of the price increases announced in Europe and North America.

We lost sales in Europe in the early part of the quarter as a result of our price increases but order books filled later in the quarter. We curtailed production from normal levels and operated at around 75% of paper capacity in both Europe and North America during the quarter to match production to customer requirements but this was insufficient to adjust our US inventories.

Our Southern African businesses had some relief from a slightly weaker Rand/US Dollar exchange rate in the quarter but currencies remain volatile. The businesses continued to drive costs down and achieved reasonable results in the circumstances.

As part of our ongoing plan to achieve acceptable returns in our North American business we have decided to restructure our Muskegon mill to eliminate high cost capacity and position the mill as a high quality, low cost mill. We will close PM4, which has a capacity of 105,000 tons of coated fine paper and close and mothball the pulp mill. We will also restructure our North American regional overhead to help offset increasing Sales, General and Administration (SG&A) costs. The combined effect will be a reduction of approximately 14% of our North American headcount.

Our 3rd quarter results reflect an asset impairment charge of US\$180 million in respect of all of the Muskegon assets and our 4th quarter results are expected to reflect a restructuring charge of approximately US\$31 million mainly in respect of the manpower reduction.

The closure and restructuring is expected to commence within 60 days. In a full year the Muskegon restructuring and repositioning and SG&A restructuring are expected to result in a pre-tax benefit of approximately US\$50 million compared to the current year.

Sales for the quarter were US\$1.144 billion, 3.7% lower than a year earlier mainly as a result of lower sales volumes. There was no relief from cost pressure in the quarter. The price impact of higher wood, energy and chemical costs reduced our operating results by US\$32 million compared to last year and compared to last quarter the impact was US\$6 million.

comment

sappi limited – third quarter page 2

Maintenance shuts at our mills cost US\$19 million in the quarter compared to US\$2 million in the prior quarter and US\$10 million a year earlier. There are only minor maintenance shuts scheduled in the final quarter.

We recorded an operating loss of US\$193 million after the pre-tax charge of US\$180 million in respect of asset write-off at Muskegon Mill.

For a period during the quarter we could not, for technical reasons, apply hedge accounting in respect of our interest rate swaps. This accounting mismatch resulted in a gain of US\$12 million reflected in the fair value of financial instruments.

The headline loss for the quarter was 4 US cents and the net loss per share was 77 US cents.

The primary difference between headline and net loss was the Muskegon impairment.

cash flow and debt

Cash generated by operations was significantly lower at US\$90 million during the quarter compared to US\$154 million a year earlier as a result of lower operating profit. The net reduction of working capital of US\$66 million in the quarter, mainly a result of lower debtors, resulted in cash retained from operating activities of US\$125 million, similar to a year earlier and significantly better than the US\$53 million utilization last quarter. We expect substantial reductions in inventory next quarter.

Net debt was US\$1.823 billion at quarter end, a reduction of US\$111 million compared to March, of which a net amount of approximately US\$54 million was the result of currency translation offset by fair value adjustments. Our debt to total capitalization ratio increased from 37.8% to 39.7% and remains well within our target range.

Our decision to increase prices cost us sales during the quarter and had limited success in our major markets, which remained highly competitive despite rising costs. However, order flow returned to normal in Europe and South Africa in the latter part of the quarter but remained sluggish in the USA.

Input costs in our fine paper business continued to grow faster than our ability to eliminate costs or improve price realisation.

Europe and North America reported operating losses in the quarter.

Despite the apparent consumption decline in North America we believe that underlying demand was firm and that advertising continues to show healthy growth.

Largely as a consequence of implementing a price increase from April 2005 our sales volumes were 63,000 tons lower than the prior quarter. We only succeeded in raising average prices approximately 1% and net sales in Euro terms declined approximately 43 million Euros (9.9%) compared to the prior quarter. Neither the lockout in the Finnish pulp and paper industry which lasted seven weeks nor the further escalation in energy and chemical input costs slowed the drive for market share by our European competitors. We held our price increases until late in the quarter and suffered a severe loss of volume. We have acted to regain our lost positions and will recover our market share.

operating review for the quarter (continued)

More positively, industry order books are the highest since 2001, our web order books have improved and we are heading towards a period of seasonally higher demand. Input costs were at a similar level to the prior quarter but increased US\$11 million compared to year earlier as a result of price increases for chemicals and energy.

* Includes pre-tax charge of US\$180 million in respect of Muskegon Mill asset impairment.

Apparent consumption was unexpectedly weak in the quarter, which is anyway typically seasonally weak; however it appears that underlying demand remained firm – a view supported by the approximately 2% increase in advertising pages. This would imply that merchant and end-use inventories declined significantly during the quarter.

Although our sales volume declined 15% in the quarter compared to a year earlier, more than the decline in apparent consumption, we have started rebuilding our market shares which improved compared to the prior quarter.

Average prices realised by the region increased approximately 2% compared to the prior quarter as a result of increased prices and product and customer mix.

The impact on input costs of price increases for wood, energy and chemicals was approximately US\$17 million for the quarter compared to a year earlier and US\$3 million compared to the prior quarter.

As a result of weak apparent consumption we did not achieve our inventory reduction targets despite production curtailment and will therefore take significant production curtailment in the next quarter.

Our repositioning of Muskegon mill will allow us to compete more effectively in the areas of the sheet market that are showing higher growth.

Demand in our local markets was firm.

Operations performed well and with the slight weakening of the Rand relative to the US Dollar we expect to increase our exports in the next quarter.

Sales volumes were similar to the prior quarter but down significantly compared to a year earlier largely as a result of importers taking advantage of the strong Rand and lower exports. Average prices realised improved slightly in local currency compared to a year earlier and the prior quarter, resulting in a small improvement of operating profit to break even.

Demand for our chemical cellulose (dissolving pulp), and local demand for newsprint and kraft linerboard was strong in the quarter. Softwood pulp prices declined US\$45 per ton from the start to the end of the quarter while hardwood pulp prices increased, almost eliminating the price gap between the two grades.

sappi limited – third quarter page 6

operating review for the quarter (continued)

Management's cost initiatives continued to deliver savings and to partly offset high input costs. The generally strong level of the Rand relative to the US Dollar continued to depress pricing. Although currencies remain volatile the recent slightly weaker levels of the Rand are likely to give some relief. At quarter end the exchange rate of R6.70 was 5% weaker than the quarter average. Forest Products' operating income was US\$21 million in the quarter compared to US\$62 million last year. Approximately US\$27 million of the difference is a result of lower plantation fair value adjustments net of silvicultural costs and fellings.

Outlook

We expect demand in the final quarter to be seasonally stronger than our third quarter, particularly in North America, but do not expect significant market price increases during the quarter as a result of continuing strong industry competition for market share.

Our actions to close high cost capacity at Muskegon mill, reduce overhead costs and return our inventory to target levels will help to improve our North American business in the medium term but will contribute to disappointing results in the next quarter.

We will take further curtailment next quarter to reduce inventory in North America. This will impact the operating result but will help reduce working capital and generate cash flow. The inventory reduction is expected to result in an under-recovery of manufacturing overheads of approximately US\$30 million next quarter.

We continue to focus on the reduction of costs throughout our businesses.

The Rand/US Dollar exchange rate remains strong, which continues to depress margins in our Southern African businesses but it is currently 5% weaker than this quarter's average which will boost margins on exports and over time will help boost margins on local sales.

For the group as a whole, we expect trading conditions to improve in the final quarter, which typically is our strongest quarter. Our inventory reduction action together with high input costs will, however, make it difficult to achieve positive earnings at the operating income level, before taking into account the additional Muskegon restructuring charges.

1. Basis of preparation

The annual financial statements are prepared in conformity with South African Statements of Generally Accepted Accounting Practice (SA GAAP). These quarterly results have been prepared in compliance with AC 127 (Interim financial reporting) and are based on accounting policies which are consistent with those used in the annual financial statements. The same accounting policies have been followed as in the annual financial statements for September 2004, except for the new accounting standard AC 501 – Accounting for “Secondary Tax on Companies (STC)” – which became effective from the beginning of the current financial year. This has resulted in the recognition of a deferred tax asset for unused tax credits to the extent that they will be utilised in the future.

The adoption of the new accounting policy resulted in an increase in shareholders’ equity of US\$38 million at September 2004 (September 2003: increase of US\$38 million). The effect on net profit for the year to date is a decrease of US\$8 million (June 2005 quarter: nil; March 2005 quarter: nil; December 2004 quarter: decrease of US\$8 million; March 2004 and June 2004 quarters: nil). Where appropriate, comparative figures have been restated. The preliminary results for the quarter have been reviewed in terms of South African Auditing Standards by the group’s auditors, Deloitte & Touche. Their unqualified review report is available for inspection at the company’s registered offices.

2. Comparative figures

Certain comparative amounts have been reclassified between deferred tax and current tax. This had no effect on reported net income or shareholders’ equity.

definitions

Average – averages are calculated as the sum of the opening and closing balances for the relevant period divided by two

*

EBITDA – earnings before interest (net finance costs), tax, depreciation and amortisation

*

EBITDA to sales – EBITDA divided by sales

Fellings – the amount charged against the income statement representing the standing value of the plantations harvested

Headline earnings – as defined in circular 7/2002 issued by the South African Institute of Chartered Accountants, separates from earnings all items of a capital nature. It is not necessarily a measure of sustainable earnings. It is a listing requirement of the JSE Limited (formerly JSE Securities Exchange South Africa) to disclose headline earnings per share

NBSK – Northern Bleached Softwood Kraft pulp. One of the main varieties of market pulp, mainly produced from spruce trees in Scandinavia, Canada and north eastern USA. The NBSK is a benchmark widely used in pulp and paper industry for comparative purposes

*

Net assets – total assets less current liabilities

*

Net asset value – shareholders' equity plus net deferred tax

*

Net asset value per share – net asset value divided by the number of shares in issue at balance sheet date

*

Net debt – current and non-current interest-bearing borrowings, and bank overdrafts (net of cash, cash equivalents and short-term deposits)

*

Net debt to total capitalisation – Net debt divided by shareholders' equity plus minority interest, non-current liabilities, current interest-bearing borrowings and overdraft

*

ROE – return on average equity. Net profit divided by average shareholders' equity

*

RONA – operating profit divided by average net assets

*

RONOA – operating profit divided by average net operating assets. Net operating assets are total assets (excluding deferred taxation and cash) less current liabilities (excluding interest-bearing borrowings and bank overdraft)

** The above financial measures, other than headline earnings per share, are presented to assist our shareholders and the investment community in interpreting our financial results. These financial measures are regularly used and compared between companies in our industry.*

In connection with the U.S. Securities Exchange Commission (“SEC”) rules relating to “Conditions for Use of Non-GAAP Financial Measures”, we have reconciled EBITDA to net profit rather than operating profit. As a result our definition retains other income/expenses as part of EBITDA.

We use EBITDA as an internal measure of performance and believe it is a useful and commonly used measure of financial performance in addition to operating profit and other profitability measures under SA GAAP. EBITDA is not a measure of performance under SA GAAP. EBITDA should not be construed as an alternative to operating profit as an indicator of the company’s operations in accordance with SA GAAP. EBITDA is also presented to assist our shareholders and the investment community in interpreting our financial results. This financial measure is regularly used as a means of comparison of companies in our industry by removing certain differences between companies such as depreciation methods, financing structures and taxation regimes. Different companies and analysts may calculate EBITDA differently, so making comparisons among companies on this basis should be done very carefully.

(2)
Refer to page 17, Supplemental Information for the definition of the term.

(3)

EBITDA for the nine months ended June 2005 reduced by US\$222 million (December 2004 quarter: US\$41 million; March 2005 quarter: US\$1 million) in respect of asset impairments.
