FORWARD-LOOKING STATEMENTS

In order to utilize the “Safe Harbor” provisions of the United States Private Securities Litigation Reform Act of 1995 (the “Reform Act”), Sappi Limited (the “Company”) is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute “forward-looking statements” within the meaning of the Reform Act. The words “believe”, “anticipate”, “expect”, “intend”, “estimate”, “plan”, “assume”, “positioned”, “will”, “may”, “should”, “risk” and other similar expressions, which are predictions of or indicate future events and future trends, which do not relate to historical matters, identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company’s potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the “Group”), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to:

- the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing);
- the impact on the business of the global economic downturn;
- unanticipated production disruptions (including as a result of planned or unexpected power outages);
- changes in environmental, tax and other laws and regulations;
- adverse changes in the markets for our products;
- consequences of our leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed;
- adverse changes in the political situation and economy in the countries in which we operate or the effect of governmental efforts to address present or future economic or social problems;
- the impact of restructuring, investments, acquisitions and dispositions (including related financing) delays, unexpected costs or other problems experienced in connection with dispositions or with integrating acquisitions and achieving expected savings and synergies; and
- currency fluctuations.

These and other risks, uncertainties and factors are discussed in the Company’s Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to

publicly update or revise any of these forward looking statements, whether to reflect new information or future events or circumstances or otherwise.

4th Quarter Results

Sappi works closely with customers, both direct and indirect, in over 100 countries to provide them with relevant and sustainable paper, paper-pulp and chemical cellulose products and related services and innovations.

Our market-leading range of paper products includes: coated fine papers used by printers, publishers and corporate end-users in the production of books, brochures, magazines, catalogues, direct mail and many other print applications; casting release papers used by suppliers to the fashion, textiles, automobile and household industries; and in our Southern African region, newsprint, uncoated graphic and business papers, premium-quality packaging papers, paper-grade pulp and chemical cellulose.

Our chemical cellulose products are used worldwide by converters to create viscose fibre, acetate tow, pharmaceutical products as well as a wide range of consumer products.

The pulp needed for our products is either produced within Sappi or bought from accredited suppliers. Across the group, Sappi is close to 'pulp neutral', meaning that we sell almost as much pulp as we buy.

Cash generation: US\$279 million (Q4 2010 US\$238 million)

Strategic initiatives result in asset impairments and restructuring charges of

US\$165 million

North American business and Southern African chemical cellulose business continued to perform strongly

High input costs continued to squeeze margins

Loss per share of 24 US cents (Q4 2010 EPS of 16 US cents)

•

Earnings per share excluding special items and once-off debt refinancing costs 2 US cents (Q4 2010 9 US cents)

Financial summary for the quarter

2

Fourth Quarter Results

Commentary on the quarter

The North American business and Southern African chemical cellulose business continued to perform well during the quarter. The European business generated positive operating profit excluding special items. In addition to the actions taken to improve the European business, we have announced actions to fix the Southern African paper business.

Conditions in many of our markets remained uncertain throughout the quarter. Although sales volumes were approximately 6% lower than the equivalent quarter last year, sales value increased slightly to US\$1.8 billion, largely as a result of currency movements. Input costs including wood, pulp, chemicals and energy were high for the quarter but did start declining during the quarter as economic growth slowed. The prices of these inputs were US\$50 million higher than the equivalent quarter last year.

Following a strategic review of our operations, investments and the implementation of a number of initiatives, we incurred impairment and restructuring charges in the quarter, details of which were announced during October 2011. These charges amounted to US\$165 million of the US\$168 million special items. Of this amount, US\$98 million related to non-cash items.

Operating profit excluding special items was US\$80 million for the quarter compared to US\$129 million in the equivalent quarter last year and US\$60 million in the quarter ended June 2011.

As a result of the impairment and restructuring charges in the quarter, the group incurred a net loss for the quarter. The loss per share for the quarter was 24 US cents (including a charge of 26 US cents in respect of special items) compared to earnings per share of 16 US cents (including a gain of 7 US cents in respect of special items) in the equivalent quarter last year.

Year ended September 2011 compared
to year ended September 2010

Sappi continued its improving trend in operating performance for 2011. Sales for the year increased 11%, almost entirely as a result of higher prices in US Dollar terms. The prices of our major inputs of wood, pulp, energy and chemicals were approximately US\$290 million higher than in 2010, which maintained pressure on margins in all of our businesses.

Operating profit excluding special items was US\$404 million for the year, up 19% compared to 2010. Special items were largely a result of the strategic actions we have undertaken and planned. Impairment and restructuring charges amounted to US\$302 million for the year, of which US\$167 million are non-cash charges. Special items included a further US\$16 million of unfavourable plantation fair value adjustments. Finance costs for the year were US\$307 million, of which US\$51 million relates to the cost of refinancing during the year.

After impairment and restructuring costs and once-off refinancing costs the net loss for the group was US\$232 million for the year. The loss per share was 45 US cents (including a charge of 65 US cents in respect of special items including financing items), compared to earnings per share of 13 US cents (including a gain of 4 US cents of special items including financing items) in 2010.

Cash flow and debt

Quarter

Net cash generation for the quarter was US\$279 million, compared to US\$238 million for the equivalent quarter last year. During the quarter, US\$266 million was generated from working capital. Capital expenditure increased to US\$103 million from US\$81 million in the equivalent quarter last year as a result of the commencement of the chemical cellulose investment at Ngodwana Mill.

3

Fourth Quarter Results

Year

Net cash generation for the full year was US\$163 million. This fell short of the cash generated last year as a result of higher working capital (largely as a result of the cut-off effect of including an additional accounting week), increased capital expenditure and once-off refinancing costs.

Net debt was further reduced from US\$2.2 billion to US\$2.1 billion, which is US\$700 million below the peak level in mid-2009.

During the year we successfully refinanced US\$1.1 billion of our debt in order to extend the maturities and reduce our finance costs. We also increased our revolving credit facility to €350 million (US\$468 million) and extended its maturity to 2016. During August, we implemented a three year €360 million trade receivables securitisation programme which replaced the previous short-term programme that was due to mature in December 2011.

At September 2011, we had liquidity comprising US\$639 million of cash on hand and the undrawn balance of €250 million (US\$335 million) of the committed revolving credit facility. We utilised US\$125 million of our cash shortly after the year end to repay debt.

Operating profit excluding special items for the global fine paper business improved compared to the quarter ended June 2011, but was well below the equivalent quarter last year. Prices of our major inputs of wood, pulp, energy and chemicals increased by approximately US\$24 million compared to the equivalent quarter last year, resulting in a significant margin squeeze.

Demand was sluggish partly as a result of market uncertainty.

Sales volumes for the quarter were approximately 5% below the equivalent quarter last year, reflecting the weaker market experienced in the second half of our financial year. Sales volumes for the full year were at the same level as the previous year.

Average prices realised for the quarter were similar to the equivalent quarter last year and to the quarter ended June 2011.

Prices in our export markets were impacted by the supply/demand imbalance created by major start-ups of coated paper capacity in China in recent months. Raw material prices, particularly for chemicals, energy and pulp, remained high during the quarter. The benefits of our variable cost reduction programme started to impact costs towards the end of the quarter.

The closure of the Biberist Mill in Switzerland was completed in August 2011. As a result of strong support from our customers, the transfer of the order book to our other mills was successful. Going forward, we expect savings of US\$100 million per annum as a result of the closure of the Biberist Mill as well as other fixed and variable cost savings initiatives in Europe.

The business continued to perform strongly. Despite weaker industry conditions, our sales volumes improved 8% compared to the equivalent quarter last year, driven by coated paper and pulp.

Average prices realised for coated paper were approximately 6% higher than a year ago and similar to the quarter ended June 2011. Hardwood pulp prices, however, were approximately 12% below a year ago.

Raw material prices, including wood, energy and chemicals, remained at high levels for the quarter.

The business' performance for the quarter was significantly impacted by the industry-wide wage-related strike of about three weeks in July.

The chemical cellulose business continued to perform well. Global demand showed some signs of softening largely as a result of lower growth in China. We, however, sold a record 190,000 tons of chemical cellulose during the quarter.

In the domestic market, sales volumes were significantly below the equivalent quarter last year, but started improving during September partly as a result of reduced competition from imports caused by the weakening of the Rand relative to the US Dollar.

All of the region's operating profit excluding special items for the quarter was contributed by the chemical cellulose business, with the paper business recording a loss.

We took substantial impairment and restructuring charges during the quarter in respect of initiatives which are underway to reposition the paper business to better meet market requirements, to improve efficiencies and to reduce costs. These amounted to US\$99 million, of which US\$56 million are non-cash costs.

Good progress has been made on the Ngodwana Mill chemical cellulose conversion project, which is on track to start up in early calendar 2013.

7

Fourth Quarter Results

Outlook

Market conditions remain uncertain, making it difficult to forecast demand globally. Industry demand levels have softened in all our major markets. We are experiencing reasonable demand for graphic paper in North America and somewhat slower demand in Europe; however, the supply/demand balance in many of our export markets has been affected by the significant new paper capacity commissioned in China during the past six months.

Pulp prices have declined, partly as a result of weaker demand from China, but remain above historical average levels. The group as a whole sells slightly more pulp than it purchases and is therefore generally neutral to pulp prices. Our European business is a net purchaser and North America and South Africa are net sellers of pulp.

We expect the chemical cellulose business to continue to perform well, albeit with slightly lower prices in US Dollar terms.

The board has approved an additional investment in chemical cellulose. We will invest approximately US\$170 million to convert the Cloquet Mill pulp mill (North America) to produce 330,000 tons of low cost, high quality chemical cellulose. We expect the conversion to be commissioned during 2013. This investment, together with the Ngodwana Mill conversion will increase total group chemical cellulose capacity to over 1.3 million metric tons, further entrenching Sappi's leading position in this business.

The volatility of currencies adds to the difficulty of forecasting. Sappi is very sensitive to the value of the Rand/US Dollar exchange rate. Other things being equal, a 10% weakening of the Rand adds approximately US\$60 million to the group's operating profit. The recent weakening of the Rand to the US Dollar is therefore favourable to Sappi.

There has been some relief from high input costs but they remain at historically high levels.

We will start benefiting from our European initiatives from the beginning of the new financial year. These include the closure of Biberist Mill which was completed in August 2011, and further fixed cost and variable cost saving actions, which together are expected to result in benefits of US\$100 million per annum.

We do not expect any significant benefits from the Southern African restructuring until the second half of the 2012 financial year.

We expect net cash generation to remain positive for the year ahead, after increasing our capital expenditure on strategic investments. We expect our finance costs to be lower following our refinancing during 2011 and intend to continue to reduce our financing costs including through refinancing our existing higher cost debt, such as our 2014 bonds.

Provided there is no further major deterioration in global market conditions, we expect to continue the past two years' trend in improving operating performance and to achieve a net profit for the full year of 2012.

We are confident that the actions we have taken and those planned will position the group well for the future, resulting in growth and improved returns for the group.

forward-looking statements

Certain statements in this release that are neither reported financial results nor other historical information, are forward-looking statements, including but not limited to statements that are predictions of or indicate future earnings, savings, synergies, events, trends, plans or objectives.

The words “believe”, “anticipate”, “expect”, “intend”, “estimate”, “plan”, “assume”, “positioned”, “will”, “may”, “should”, “risk” and other similar expressions, which are predictions of or indicate future events and future trends, which do not relate to historical matters, identify forward-looking statements. You should not rely on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond our control and may cause our actual results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements).

Certain factors that may cause such differences include but are not limited to:

- the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing);
- the impact on our business of the global economic downturn;
- unanticipated production disruptions (including as a result of planned or unexpected power outages);
- changes in environmental, tax and other laws and regulations;
- adverse changes in the markets for our products;
- consequences of our leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed;
- adverse changes in the political situation and economy in the countries in which we operate or the effect of governmental efforts to address present or future economic or social problems;
- the impact of restructurings, investments, acquisitions and dispositions (including related financing), any delays, unexpected costs or other problems experienced in connection with dispositions or with integrating acquisitions and achieving expected savings and synergies; and
- currency fluctuations.

We undertake no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

Fourth Quarter Results

Notes to the condensed group results

1. Basis of preparation

The condensed financial information has been prepared in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board, the AC 500 standards issued by the Accounting Practices Board and the information required by IAS 34 "Interim Financial Reporting". They are based on appropriate accounting policies which have been consistently applied with those applied in the financial statements for the year ended September 2010 and which are supported by reasonable and prudent judgements, including those involving estimations.

The fiscal year ended September 2011 consists of 53 weeks compared to the prior fiscal year which consisted of 52 weeks.

The preparation of this condensed consolidated financial information was supervised by the Chief Financial Officer, M R Thompson CA(SA)

(1)

The preliminary results for the year ended September 2011 as set out on pages 09 to 16 have been reviewed in terms of the International Standard on Review Engagements 2410 by the group's auditors, Deloitte & Touche. Their unmodified review report is available for inspection at the company's registered office.

(1)

This disclosure is in terms of the Companies Act No. 71 of 2008.

56

7. Material balance sheet movements compared to September 2010

Cash and cash equivalents and other current liabilities

The decrease in cash and cash equivalents and in other current liabilities is largely due to the timing of creditor payments as a result of the calendar month-end falling before the fiscal month-end when creditor payments fell due.

14

Fourth Quarter Results

Cash and cash equivalents and interest-bearing borrowings

In March 2011, we utilised some of our cash resources to repay US\$150 million principal amount of the outstanding US\$500 million 6.75% Guaranteed Notes due June 2012.

In April 2011, we issued approximately US\$705 million Senior Secured Notes split into a 10-year US\$350 million tranche and a 7-year €250 million tranche that were issued at par and both Notes bear interest at a rate of 6.625% per annum. The net proceeds of the Notes were used to redeem the remaining US\$350 million of our 6.75% Guaranteed Notes due June 2012 and to repay €200 million of our OeKB Term Loan Facility. At the same time, our existing undrawn revolving credit facility maturing 2012 was increased from a €209 million to a €350 million facility and extended to 2016. We repaid the remaining €120 million of our OeKB Term Loan balance from cash resources in June 2011.

Sappi Southern Africa (Pty) Ltd issued a ZAR500 million (US Dollar fixed rate bond ‘SSA01’) on 28 June 2011 at a 150 basis points spread over the government reference rate and an all in coupon rate of 9.63%. The bond is repayable on 28 June 2016, with coupons payable semi-annually on 28 June and 28 December of each year.

During the quarter, the group entered into a new €360 million three year trade receivables securitisation programme for its non-Southern African businesses. The proceeds of this new long-term programme were used to refinance the group’s existing short-term securitisation programme, which was due to mature in December 2011.

In addition, there were transfers of approximately US\$198 million from non-current interest-bearing borrowings to current interest-bearing borrowings of loans falling due in the next 12 months.

Restructuring provisions and asset impairments

In line with our strategy review, the group implemented a number of interventions during the year which resulted in major asset impairment and restructuring charges being incurred by our European and Southern African businesses. These included the closure of the Biberist Mill in Switzerland and the Adamas Mill in South Africa. In addition, we incurred an impairment charge related to an equity accounted investment.

8. Post balance sheet events

In October 2011, Sappi Southern Africa utilised some of its cash resources to repay its 10.64% fixed rate public bond of ZAR1,000 million.

In November 2011, the board approved an investment of approximately US\$170 million to convert the Cloquet Mill pulp mill in North America to produce chemical cellulose.

Fourth Quarter Results	
Reconciliation of operating profit excluding special items to segment operating (loss) profit	
Special items cover those items which management believe are material by nature or amount to the operating results and require separate disclosure. Such items would generally include profit or loss on disposal of property, investments and businesses, asset impairments, restructuring charges, non-recurring integration costs related to acquisitions, financial impacts of natural disasters, non-cash gains or losses on the price fair value adjustment of plantations and alternative fuel tax credits receivable in cash.

Fourth Quarter Results

Supplemental information (this information has not been audited or reviewed)

General definitions

Average – averages are calculated as the sum of the opening and closing balances for the relevant period divided by two

Black Economic Empowerment – as envisaged in the Black Economic Empowerment (BEE) legislation in South Africa

Black Economic Empowerment charge – represents the IFRS 2 non-cash charge associated with the BEE transaction implemented in fiscal 2010

Fellings – the amount charged against the income statement representing the standing value of the plantations harvested

NBSK – Northern Bleached Softwood Kraft pulp. One of the main varieties of market pulp, produced from coniferous trees (ie spruce, pine) in Scandinavia, Canada and northern USA. The price of NBSK is a benchmark widely used in the pulp and paper industry for comparative purposes

SG&A – selling, general and administrative expenses

Non-GAAP measures

The group believes that it is useful to report certain non-GAAP measures for the following reasons:

- these measures are used by the group for internal performance analysis;
- the presentation by the group's reported business segments of these measures facilitates comparability with other companies in our industry, although the group's measures may not be comparable with similarly titled profit measurements reported by other companies; and
- it is useful in connection with discussion with the investment analyst community and debt rating agencies

These non-GAAP measures should not be considered in isolation or construed as a substitute for GAAP measures in accordance with IFRS

Capital employed – shareholders' equity plus net debt

EBITDA excluding special items – earnings before interest (net finance costs), taxation, depreciation, amortisation and special items

Headline earnings – as defined in circular 3/2009 issued by The South African Institute of Chartered Accountants, separates from earnings all separately identifiable re-measurements. It is not necessarily a measure of sustainable earnings. It is a Listings Requirement of the JSE Limited to disclose headline earnings per share

Net assets – total assets less total liabilities

Net asset value per share – net assets divided by the number of shares in issue at balance sheet date

Net debt – current and non-current interest-bearing borrowings, and bank overdraft (net of cash, cash equivalents and short-term deposits)

Net debt to total capitalisation – net debt divided by capital employed

Net operating assets – total assets (excluding deferred taxation and cash) less current liabilities (excluding interest-bearing borrowings and overdraft). Net operating assets equate to segment assets

ROCE – return on average capital employed. Operating profit excluding special items divided by average capital employed

ROE – return on average equity. Profit for the period divided by average shareholders' equity

RONOA – return on average net operating assets. Operating profit excluding special items divided by average segment assets

Special items – special items cover those items which management believe are material by nature or amount to the operating results and require separate disclosure. Such items would generally include profit or loss on disposal of property, investments and businesses, asset impairments, restructuring charges, non-recurring integration costs related to acquisitions, financial impacts of natural disasters, non-cash gains or losses on the price fair value adjustment of plantations and alternative fuel tax credits receivable in cash

The above financial measures are presented to assist our shareholders and the investment community in interpreting our financial results.

These financial measures are regularly used and compared between companies in our industry.
