## Edgar Filing: HUANENG POWER INTERNATIONAL INC - Form 6-K

HUANENG POWER INTERNATIONAL, INC.  
Announces the Huaneng Shanghai Combined-Cycle-Gas-Turbine  
Project being Approved

(Beijing, China, March 24, 2005) Huaneng Power International, Inc. (the "Company") [NYSE: HNP; HKEx: 902; SSE: 600011] today announced that its Huaneng Shanghai Combined-Cycle-Gas-Turbine Project (the "Project"), with three 300MW-class generating units being constructed, has recently been approved by the National Development and Reform Commission.

The Project is located in between Huaneng Shanghai Shidongkou First Power Plant and Huaneng Shanghai Shidongkou Second Power Plant. After being put into operation, the power plant will need a supply of natural gas of about 900 million cubic meters annually, and the gas will be supplied directly through Shanghai's main gas pipeline to the interface outside the walls of the power plant. The investment amount (including capitalized interest) of the Project, which is calculated according to the pricing level of year 2002, is estimated to be approximately RMB3.51 billion, 25% of which is equity capital to be funded by the Company (70%) and Shenergy Company Limited (30%) respectively, with the remaining portion to be funded by bank loans.

The Company develops, constructs, operates and manages large thermal power plants in China nationwide, with a total generation capacity of 21,418MW on an equity basis. The Company wholly owns 16 operating power plants, and has controlling interests in ten operating power companies and minority interests in four operating power companies. Today, the Company is one of the largest independent power producers in China.
